INDEX.

Alabama, increase in total cost of construction, 71. See also States and territories.

American Institute of Electrical Engineers, description of illuminating at twenty-fifth anniversary of, 112.

Apparatus, miscellaneous, kilowatt capacity of, for commercial and municipal stations (combined), 135, 130; for commercial stations, 132; for municipal stations, 169.

Appleton, Joseph, extract from paper concerning batteries, 106.

Arc lamps, number of, for commercial stations, 53, 54; for municipal stations, 53, 54; for commercial and municipal stations (combined), 127; average per station, 65; supplies and repairs, cost of, for commercial stations, 65, 101; for municipal stations, 93, 175; for commercial and municipal stations (combined), 141; rapid development of new types, 16.

—flaming types of, 16.

—luminous magnetic, description of, 107.

—wired for service, number of, for central stations operated by street-railway companies, 17, 180; for commercial and municipal stations (combined), 139; for commercial stations, 154; for municipal stations, 170. See also Lamps, arc and incandescent.

Arc lighting, number of stations selling current, 50. See also Arc lamps.

Arc lighting, described, 114.

Arizona, decrease in total cost of new construction, 73. See also States and territories.

Arkansas, increase in total cost of new construction, 73. See also States and territories.

Aurora, Ill., installation of arc lighting, 111.

Automobiles, supply of current for, by central station, 155; income from charging, for commercial and municipal stations (combined), 142; for commercial stations, 159; for municipal stations, 176.

Ballard, R. H., on transmission of current, 102.

Baltimore, Md., number and horsepower of steam turbines, 42.

Bath, Ill., primary power and dynamo capacity, for municipal station, 20.

Bell, Dr. Louis, on power transmission, 102; decision as to cablepower of mercury vapor lamps, 113.

Big Horn, Wyo., utilization of water pressure for dams, 99.

Big Rapids, Mich., description of arc lighting, 111.

Board of Gas and Electric Light Commissioners (Mass.), meters examined and tested by, 118; decision regarding rates, 123.

Bonds, authorized and outstanding, par value for commercial stations, 157; for municipal stations, 172.

Bookkeepers. See Clerks and bookkeepers.

Boosters, number and kilowatt capacity of, for commercial and municipal stations (combined), 151; for commercial stations, 151; for municipal stations, 169.

Boston, Mass., number and horsepower of steam turbines, 42.

Boston Edison Company, increase in area of system, 96.

Brooklyin Edison Company, amount received per month for service, 114.

Buffalo, N. Y., number of fans for refrigerating purposes, 115.

Buildings and machinery, repairs of. See Repairs of buildings and machinery.

Cable. See Wire and cable.

California, number of plants for generation of electricity, 22; horsepower of steam power, 39; number and horsepower of steam engines, 41; of stationary motors, 59; horsepower of gas engines, 42; increase in water power, 43; kilowatt capacity of dynamos, 49; lamps, arc and incandescent, 56; consumers of consumption, 57; number and kilowatt capacity of transformers in circuits, 58; increase in total cost of construction, 71; rank, in expenditure for new construction, 73; cost of construction, for commercial stations, 74; gross income, 82; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88; method of holding up wires, 102; length of circuits, 102. See also States and territories.

California Gas and Electric Corporation, horsepower and dimension of engines, 69.

Callahan, E. I., on advantages of electric-heating load, 116.

Canada, rates for testing meters, 118.

Canadian Niagara Power Company, capacity of turbines, 100.

Canvas, basis of, 15.

Capital, difficulty in increasing or bringing together, 21. See also Capitalization.

Capital stock, amount of, for companies reporting, 69, 57, 58; total cost of plants and equipment, 72; of commercial stations, 156. See also Capitalization.

Capitalization, increase in, 61; number of companies reporting, 61, 63, 65; amount of, for purely electric and composite companies, 63, 65; for commercial companies, 67; for incorporated companies, 74, 75; distribution between electric-light and power industry and allied industries, 65, 75; per cent distribution and average per company, 68.

Cells, storage battery. See Storage-battery cells.

Cells in storage batteries, number of, for commercial and municipal stations (combined), 156; for commercial stations, 152.

Central stations, number of, 18; relation of leading items to population, 22, 24; generating equipment, for selected cities, 24, 25; dynamo capacity, 27; comparison with gas plants, 28; with electric railways, 36, 58; primary-power machines, 35; primary power, by states, diagram, 37; steam and water power, by states, diagram, 40; steam turbines, for selected cities, 42; dynamos, 44-48; output of generating stations, 50, 51; lamp equipment, 66; meters on consumption circuits, for selected cities, 57; transformers, for selected cities, 58; for selected states, 82, 86; changes in use of steam power, 97.

Central stations and gas plants, comparative summary, 28.

Central stations operated by street-railway companies, summary of statistics, 17.

Chicago, Ill., number and horsepower of steam turbines, 55, 42; primary power and dynamo capacity, for municipal station, 26.

Chicago City Railway, cost of construction for electrical energy, 114.

Cincinnati, Ohio, number and horsepower of steam turbines, 42.

Clerks and bookkeepers, number and salaries of, for commercial and municipal stations (combined), 143; for commercial stations, 162; for municipal stations, 177.

Cleveland, Ohio, number and horsepower of steam turbines, 42.

Coal. See Fuel.

Colorado, kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, for commercial stations, 74; gross income, from commercial and public lighting, 87; from current sold to electric railways and to other electric companies, 88, 91, 145; summary, 129; primary power and generating equipment, 130.

Commercial companies, capitalization of, 61; classified according to dynamo capacity of station, 67.

Commercial stations, comparison with municipal stations, 13; number of, 18; by character of ownership, 17; by dynamo capacity, 20; kind of associated enterprises, 29; changed to municipal, 29; primary-power machines, 30, 38; number and horsepower of steam engines and steam turbines (combined), 38; of steam engines, 38; of steam turbines, 41; of water wheels, 43; average horsepower per station and per engine, 43; kinds of primary power, 44; dynamos, 46, 47; miscellaneous main-station equipment, 49; substation equipment, 49; output of generating stations, 50; lamps, meters, transformers in circuits, and stationary motors, 63, 69; arc lamps, 89, 94; incandescent lamps, 55, 58; dynamo capacity, 67; total cost of plants and equipment, 70, 74; of construction, 71, 74; gross income, 76, 185, 159; for stations with and without meters on consumption circuits, 84; from commercial and public lighting, 85; from current sold to electric railways, 87, 88; from miscellaneous electric service, 98; expenses, 89, 95, 164; salaries, and wages, 91, 162, 163; cost of supplies, materials, and fuel, 93, 94, 160, 161; primary power and generating equipment, 146; locomotive equipment, motors, transformers, meters, customers, and output of stations, 162; analysis of service, 154; character of ownership, service, capitalization, and cost of construction and equipment, 156.

(193)
INDEX.

Common stock, classification of, 65. See also Capital stock.

Compressed, by Edison Company (Chicago), development of stations by, 97; capacity of vertical-shaft machine, 101; sale of electrical energy for power purposes, 114; for central stations, 77; for commercial and municipal stations (combined), 178.

Companies, number of, reporting capitalization, 64, 65; funded debt, 66, 67; paying and not paying dividends on preferred stock, 114; issued and paid-in capital of, 19; number of, 65; stockholders' equity, 19; capacity of, 18; authorized stock, 19; per share, 19; total number of, 65; number of, 65; number of, 65; for commercial and municipal stations (combined), 178.

Companies, number of, reporting capitalization of, 62.

— without generating equipment, number of, 65.

Composite central stations, number of, 27; gross income, 78; expenses, 90.

Composite commercial stations, number and gross income of, 81.

Composite companies, number and capitalization of, 63.

Composite municipal stations, funded debt and interest of, 69; number and gross income, 81.

Condite, rent of, See Rent of stations, lines, works, appurtenances, and conduits.

Connecticut, number and horsepower of internal-combustion oil engines, 42; kilowatt capacity of dynamos, 49; gross income in central station stationary-motor service, 57. See also States and territories.

Conservation conference, subject of study, 55.

Construction, cost of, 70, 73, 74; increase in, 71. See also Construction and equipment.

Construction and equipment, cost of, for commercial stations, 16, 18, 157; for municipal stations, 16, 30, 157; for purely electric and composite stations, 19, 20; for central electric stations and gas plants, 25; for stations under construction, 29; for commercial and municipal stations (combined), 129.

Cooking, electric, data concerning, 115, 116.

Cooley, Professor, on perpetual and limited franchises, 121.

Current sold to other electric companies, income from, for commercial and municipal stations (combined), 142; for commercial stations, 155; for municipal stations, 176; for central stations operated by street-railway companies, 182.

Current supply (A. v. l.), height of dam, 99.

Customers furnished electric current, number of, for commercial and municipal stations (combined), 137; for commercial stations, 133; for municipal stations, 165.

Damages. See Injuries and damages.

Delaware, disaster in total cost of new construction, 73. See also States and territories.

Delta, Pa., utilization of water power for dam, 99.

Denver, Colo., number and horsepower of steam turbines, 42; number of fans for refrigerating purposes, 115; rate system, 123.

Denver Gas and Electric Company, change from direct to alternating current, 104.

Detroit, Mich., establishment of new plant, 104.

Distribution, methods of, 103.

Dividends and interest, amount of, 63, 156, 157; analysis of, 64, per cent distribution, 68. See also Capitalization.

Dodge, L. B., in support of, 125.

Duffy, C. M., uniform accounting approved by, 122.

Dunham, R. H., data regarding meter measurement, 119.

Dynamo capacity, of commercial and municipal stations, 26; of purely electric and composite stations, 27; of central stations, 27.

Dynamos, number and kilowatt capacity of, for commercial stations, 16, 18, 44, 148; for municipal stations, 16, 18, 157; for purely electric and composite stations, 19; for central stations, 44, 47, 48; for electric railways, 44; relation to population, 114; 29; for commercial and municipal station and per machine, 46; for selected stations, 49; per capita kilowatt capacity, 70.

Edison Electric Illuminating Company (Boston), system of rates, 123.

Electric light and power industry, bonds outstanding and interest, 69.

Electric light and power industry, 113.

Electrical Development Company (Niagara Falls, Ont.), capacity of turbines, 100.

Electrical energy, development and use of, 22.

Ellicott City, Md., utilization of water power for dam, 99.

Employees, miscellaneous, number and wages of, for commercial and municipal stations (combined), 144; for commercial stations, 163; for municipal stations, 178.

— salaried. See Salaried employees.

Engines, number of, for commercial and municipal stations (combined), 144; for commercial stations, 163; for municipal stations, 178.

Engines, number and horsepower of, for commercial stations, 18, 36, 148; for purely electric and composite stations, 18, for central stations and electric railways, 35; for municipal stations, 36, 167; for commercial and municipal stations (combined), 132; average horsepower per station and per machine, 43, description of, 98.

— gas, number of, for commercial stations, 16, 18, 36, 148; for municipal stations, 16, 17, 167; for purely electric and composite stations, 18; for central stations and electric railways, 35; for commercial and municipal stations (combined), 129; classes of, 42; average horsepower per station and per machine, 43; description of, 98.

— internal-combustion oil, number and horsepower of, 42; description of, 98.

— reciprocating, installation of, 97.

— steam, number of, for commercial stations, 16, 18, 157; for purely electric and composite stations, 18; for central stations and electric railways, 35; for municipal stations, 167; for commercial and municipal stations (combined), 132.

Engines and water wheels, horsepower of, 22, 127; average cost per horsepower capacity, 70.

Equation, number and kilowatt capacity of, 99; generating and other main-station, 152, 148, 167.

— miscellaneous main-station, number and kilowatt capacity of, 49. See also Construction and equipment.

Establishments, number of, for central electric stations and gas plants, 29.

Expenses, for commercial stations, 16, 18, 89, 158, 164; for municipal stations, 16, 31, 38, 173, 179; for purely electric and composite stations, 19, 20, 90; for commercial and municipal stations (combined), 91, 129, 145.

— miscellaneous, for commercial stations, 89, 90, 164; for municipal stations, 89, 90, 176; for purely electric and composite stations, 90; for commercial and municipal stations (combined), 91, 145.

Fans, for refrigerating purposes, number of, in specified cities, 118.

Fratronic, electric, introduction and use of, 111.

Florida, increase in total cost of new construction, 73. See also States and territories.

Foremen, average number and wages of, for commercial and municipal stations (combined), 144; for commercial stations, 163; for municipal stations, 178.

Freight, cost of, for commercial stations, 93, 101; for municipal stations, 93, 175; for commercial and municipal stations (combined), 141.

Fuel, cost of, for commercial stations, 89, 94, 161; for municipal stations, 88, 94, 175; for commercial and municipal stations (combined), 91, 127, 141. See also Supplies, materials, and fuel.

Funded debt, companies reporting, 66, 67; per cent distribution, according to dynamo capacity, 68; amount of, for municipal stations, 69; for purely electric and composite stations, 69. See also Capitalization.

Ganz, Prof. Albert F., on popularity of metallic-filament lamps, 108.

Gas, manufactured and natural. See Fuel.

Gas engines. See Engines, gas.

Gas plants. See Central stations and gas plants.

“Gem” lamps, number of, 57; power consumption, 108; carbon lamps replaced by, 106.

Generating equipment, number and kilowatt capacity of dynamos, for commercial stations, 16, 18, 145; for municipal stations, 16, 17; for purely electric and composite stations, 18, 20; for commercial and municipal stations (combined), 132. See also Equipment.

Generators, data concerning, 100.

Georgia, increase in water power, 43; in total cost of construction, 71; kilowatt capacity of dynamos, 49. See also States and territories.

“Glower” lamps. See Nernst or “glower” lamps.

Gosier system, adoption of, 113.

Grand Rapids, Mich., description of arch lighting, 111.

Great Northern Company (Duluth, Minn.), capacity of transformers, 105.

Great Western Power Company (Cal.), capacity of transformers, 106.

Hartford, Conn., number and horsepower of steam turbines, 42.

Hawaii. See States and territories.

Heating, electric, use of, 98; for commercial and municipal stations (combined), 143; for commercial stations, 159; for municipal stations, 176.

Heating and cooking, electric, cost of, compared with other methods, 115. See also Cooking, electric.

Hewitt, Dr. Peter Cooper, introduction of mercury vapor lamps by, 119.

Idaho. See States and territories.

Illinois, horsepower of steam power, 39; number and horsepower of steam engines, 41; of internal-combustion oil engines, 42; of stationary motors, 50; kilowatt capacity of dynamos, 49; lamps, arc and incandescent, 36, 50; for commercial and municipal stations (combined), 132; cost of construction, for commercial stations, 74; gross income, 82; from commercial and public lighting, 86; from stations, motor systems, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.
INDEX.

Incarandescent lamps, number of, for commercial stations, 55, 174; for municipal stations, 55, 174; for commercial and municipal stations (combined), 127, 140; average per station, 60; cost of, for commercial stations, 93, 100; cost of, for municipal stations, 93, 174; for commercial and municipal stations (combined), 140; change from carbon-filament to metallic-filament, 108.

— having filament of tungsten, consumption of, 109.

— wired for service, number of, for central stations operated by street-railway companies, 18, 158; for commercial and municipal stations (combined), 139; for commercial stations, 155; for municipal stations, 171. See also Lamps, arc and incandescent.

Incandescent lighting, number of stations selling current, 59.

Income, amount of, for central stations operated by street-railway companies, 17, 182: for commercial stations, 18, 18, 76, 80, 84, 158; for municipal stations, 18, 30, 76, 90, 84, 173, 176; for purely electric and composite stations, 19, 20, 76, 80, 81; for central stations, 77, 81; for conversions and gas plants, 28; for commercial and municipal stations (combined), 79, 83, 126; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 87, 88.

Incorporated companies. See Companies, incorporated.

Indiana, kilowatt capacity of dynamos, 49; meters on consumption circuits, 57; number and kilowatt capacity of transformers in circuits, 58; increase in total cost of construction, 71; gross income, 82; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Indiana and Michigan Electric Company, character of water-power plant, 89.

Indianapolis, Ind., number and horsepower of steam turbines, 42.

Injuries and damages, cost of, for commercial stations, 95, 179; for municipal stations, 95, 179; for commercial and municipal stations (combined), 145.

Inspectors, average number and wages of, for commercial and municipal stations (combined), 144; for commercial stations, 163; for municipal stations, 178.

Insurance, cost of, for commercial stations, 95, 194; for municipal stations, 95, 178; for commercial and municipal stations (combined), 145. See also Rents, taxes, and insurance.

Interest. See Dividends and interest.

Iowa, decrease in total cost of new construction, 73; gross income, from commercial and public lighting, 86; from stationary-motor service, 87.

Kansas, kilowatt capacity of dynamos, 49; gross income from stationary-motor service, 87. See also States and territories.

Keene Gas and Electric Company (N. H.), complex system of, 98.

Kentucky, decrease in total cost of new construction, 73; gross income from stationary-motor service, 87. See also States and territories.

La Crosse Gas and Electric Company, application for higher rates, 120.

Lamp fittings (except arc lamp fittings), cost of, for commercial stations, 93, 100; for municipal stations, 93, 175; for commercial and municipal stations (combined), 140.

Lamps, arc and incandescent, total number of, 22, 58; for central stations and electric railways, 52; for selected states, 58; average income from, 86.

— other than arc and incandescent, number of, for commercial stations and electric railways, 52; for commercial stations, 53, 156, 160; for municipal stations, 53, 55, 171; for central stations, 57; for commercial and municipal stations (combined), 140; change from electric tunnels operated by street-railway companies, 181.

— quartz mercury vapor, specific consumption of, 182.

— used by central stations to light their own properties, 52, 58.

— wired for service, number of, for commercial stations, 16, 18, 158; for municipal stations, 16, 51, 170; for central stations operated by street-railway companies, 18, 158; for purely electric and composite stations, 19, 20, 50; for commercial and municipal stations (combined), 188, 189. See also Arc lamps and incandescent lamps.

Layman, W. K., quoted concerning transformers, 105.

Line construction, scope of inquiry, 60.

Line-wire supports, rent of. See Rent of stations, line-wire supports, and conduits.

Los Angeles (Cal.) Edison Company, frequency of large power failures, 22; kilowatt capacity of steam turbines, 42; permits issued in regard to street lighting, 111.

Los Angeles (Cal.) Edison Company, frequency of large power failures, 22; kilowatt capacity of steam turbines, 42; permits issued in regard to street lighting, 111.

Louisiana, number and horsepower of internal-combustion oil engines, 42. See also States and territories.

Louisville, Ky., number and horsepower of steam turbines, 42.

Lynchburg, Va., power-plant equipment, 100.

Machinery, repairs of. See Repairs of buildings and machinery.

Maine, kilowatt capacity of dynamos, 49; decrease in total cost of new construction, 73; gross income from stationary-motor service, 87. See also States and territories.

Managers and superintendents, number and salaries for, commercial stations, 88; rates for testing stations (combined), 149; for commercial stations, 162; for municipal stations, 177.

Maryland, number and horsepower of steam engines, 49; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, for commercial stations, 74; gross income from stationary-motor service, 87. See also States and territories.

Massachusetts, horsepower of steam power, 39; number and horsepower of internal-combustion oil engines, 49; of stationary motors, 59; kilowatt capacity of dynamos, 49; lamps, arc and incandescent, 56; meters on consumption circuits, 57; number and kilowatt capacity of transformers in circuits, 58; increase in total cost of construction, 71; decrease in total cost of new construction, 73; cost of construction, for commercial stations, 74; gross income, 82; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Michigan, increase in water power, 43; kilowatt capacity of dynamos, 49; lamps, arc and incandescent, 56; meters on consumption circuits, 57; kilowatt capacity of transformers in circuits, 58; number and horsepower of stationary motors, 59; increase in total cost of construction, 71; cost of construction, for commercial stations, 74; gross income, 82; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88; arch lighting, 111. See also States and territories.

Michigan Electric Association, data committee regarding electric heating and cooking, 111.

Minneapolis, Minn., description of arch lighting, 111.

Minneapolis General Electric Company, arch lighting installed by, 111; rates charged, 120.

Minnesota, increase in water power, 43; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, for commercial stations, 74; gross income, from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Mississippi. See States and territories.

Missouri, horsepower of steam power, 39; kilowatt capacity of dynamos, 49; lamps, arc and incandescent, 56; number and horsepower of stationary motors, 59; increase in total cost of construction, 71; gross income, 82; from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Missouri, increase in water power, 43; in total cost of construction, 71; gross income from stationary-motor service, 87. See also States and territories.

Missouri Power Light and Power Company, classes of customers using Geoelectric system, 113.

Moore tube system, progress in, 113.

Municipalization, elimination of, for refrigerating purposes, 114.

Motors, number and cost of, for commercial stations, 93, 160; for municipal stations, 93, 174; for commercial and municipal stations (combined), 140.

— stationary, number and horsepower of, for central stations operated by street-railway companies, 17, 181; for commercial stations and electric railways, 52; for commercial stations, 53, 156; for municipal stations, 53, 155; for commercial and municipal stations (combined), 187; average per station, 60.

— municipal stations, comparison with commercial stations, 13; number of, 16, 29, 30; by dynamo capacity, 20; kind of associated enterprises, 57; supplying and not supplying electric service in cities where located, 32, 33; per cent distribution of income, 34; primary-power machines, 35; number and horsepower of steam engines and steam turbines (combined), 38; of steam engines, 39; of steam turbines, 41; of water wheels, 42; of generators on permissible machines, 43; kind of primary power, 44; dynamos, 46, 47: miscellaneous main-
INDEX.

station equipment, 49; substation equipment, 49; output of generating stations, 50; lamp and arc equipment, 50; current and stationary motors, 58; 60; arc lamps, 53, 54; incandescent lamps, 53, 55; funded debt and interest, 60; distribution of electric energy, 60; number and horsepower of electric light and power industry and allied industries, 69; total cost of plants and equipment, 70, 72; of construction, 70; generation of power, 78, 79; with and without meters on consumption circuits, 84; from commercial and public lighting, 85; from current sold to electric railways and to other electric companies, 85. See also States and territories.

Plant efficiency, 86, 87; for commercial and public lighting, 86; for commercial and municipal stations (combined), 143; for commercial stations, 162.

Ohio, horsepower of steam power, 59; of gas engines, 60; of power of internal-combustion oil engines, 44 of stationary motors, 66; kilowatt capacity of dynamos, 49; of electric and composite power, 19, 20; for central stations, 22, 23; for commercial and municipal stations (combined), 127, 137.

Ownership, character of, 18, 19; of operating equipment, 18, 19; of generating stations under construction, 18; for commercial and public lighting, 18; for commercial and municipal stations (combined), 127, 137.

New York, number and horsepower of internal-combustion oil engines, 44; decrease in total cost of new construction, 73; gross income from current sold to electric railways and to other electric companies, 85. See also States and territories.

New Jersey, number and horsepower of internal-combustion oil engines, 44; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, 71; for commercial and municipal stations (combined), 127, 137.

Newfoundland and Labrador, capacity of generating stations, 85; number and horsepower of internal-combustion oil engines, 44; kilowatt capacity of dynamos, 49; cost of construction, 71; construction stations, 74; gross income from commercial and public lighting, 86; for commercial and municipal stations (combined), 127, 137.

New Hampshire, number and horsepower of internal-combustion oil engines, 44; decrease in total cost of new construction, 73; gross income from current sold to electric railways and to other electric companies, 85. See also States and territories.

New Mexico, number and horsepower of internal-combustion oil engines, 44; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, 71; for commercial and municipal stations (combined), 127, 137.

New York City, number and horsepower of steam engines, 59; number and horsepower of stationary engines, 59; number and horsepower of steam turbines, 42; appropriation for fire protection, 114; number of years for refinancing purposes, 115; accuracy of meters, 118; provision for "breakdown" service, 122.

New York commission, effort to introduce universal chlorine disinfection of accounts, 122.

New York Edison Company, equipment of stations, 97; capacity of vertical shaft units, 101; installation of tungsten lamps in public parks, 111; permission to modify contracts requested by, 122.

Niagara Falls, N. Y., hydro-electric development of, 100; frequency of transmission, 102; description of circuit to Syracuse, 102.

North Dakota. See States and territories.

Officers of corporations, number and salaries of, for commercial and municipal stations (combined), 143; for commercial stations, 162.

Ohio, horsepower of steam power, 59; of gas engines, 60; of power of internal-combustion oil engines, 44; of stationary motors, 66; kilowatt capacity of dynamos, 49; of electric and composite power, 19, 20; for central stations, 22, 23; for commercial and municipal stations (combined), 127, 137; for commercial stations, 162.

Plant efficiency, 86, 87; for commercial and public lighting, 86; for commercial and municipal stations (combined), 143; for commercial stations, 162.

Philadelphia Electric Company, increase in use of refrigerating machines, 114; number of refrigerating plants, 115.

Pittsburgh (Mass.) Electric Company, oil-driven plant installed by, 96.

Plants, electric-railway, difficulty in securing electric-railway facilities, 93; issue of stock for electric-railway generation of power or generating, operation of, 14; primary-power, horsepower of, 31; substation, number and kilowatt capacity of, 136, 148, 150.

Plants and equipment, total cost of, 70; for selected states, 71; by kind of primary power, 72; by character of ownership, 73.

Power, electric-railway, cost of, for commercial stations, 93, 161; for municipal stations, 93, 176; for commercial and municipal stations (combined), 141.

Population, relation of leading items to, 23; estimated, in selected cities, 23.

Porto Rico. See States and territories.

Power, kind of, for stations under construction, 76; purchased, cost of, for commercial stations, 89, 95, 161; for municipal stations, 89, 95, 179; for purely electric and composite stations, 90; for commercial and municipal stations (combined), 91, 121; states reporting largest amounts, 94.

Preferred stock, number of companies reporting, 60; dividend and nondividend paying preferred stock of, 60.

Primary power, number and horsepower capacity of machines, for commercial stations, 15, 146; for municipal stations, 16, 156; for purely electric and composite stations, 19, 20; for central stations and electric railways, 35, 50; for commercial and municipal stations (combined), 130; by states, diagram, 37; average horsepower per station and per machine, 43; kinds of, 44, 73; total cost of plants and equipment, 74.

Provided, R., 1, number of fans for refrigerating purposes, 115.

Public Service Corporation (N. J.), development of generating plant, 96.

Purity electric central stations, number of, 27; gross income, 78; expenses, 90.

Purity electric commercial stations, number and gross income of, 80.

Purity electric companies, number and capitalization of, 63.

Purity electric municipal stations, funded debt and interest of, 68; number and gross income of, 81.

Putnam, W. St. Clair, extract from report to conservation conference, 97.

Quartz mercury vapor lamps. See Lamps, quartz mercury vapor.

Railways, electric, number and horsepower of primary-power machines, 44, 86; character of power, diagram, 86; number and kilowatt capacity of dynamos, 44; output of generating stations, 50; lamps, meters, transformers in circuits, and stationary motors, 52; gross income, from current sold to, 88; for service, 125, 125, 159, 176.

Railways and Light Company (Toledo, Ohio), rates for charging automobiles, 115.

Reed, E. G., extract from paper concerning electric-light transformers, 105.

Refrigerating machines, increase in use of, 114.

Regulation and rates, data regarding, 120.

Rent, of offices, for commercial stations, 95, 164; for municipal stations, 95, 179; for commercial and municipal stations (combined), 145.

Petroleum, crude. See Fuel.

Philadelphia, Pa., number and horsepower of steam turbines, 42; use of motor service for refrigerating purposes, 114; adoption of refrigerating machines by florists, 115.

Philadelphia Electric Company, increase in use of refrigerating machines, 114; number of refrigerating plants, 115.
INDEX.

—of water privileges, for commercial and municipal stations (combined), 141; for commercial stations, 151; for municipal stations, 175.

Rents, taxes, and insurance, cost of, for commercial and municipal stations (combined), 127; for commercial stations, 198; for municipal stations, 175.

Repairs of buildings and machinery, cost of, for commercial stations, 96, 104; for municipal stations, 104; for commercial and municipal stations (combined), 145.

Rhode Island, number and horsepower of internal-combustion oil engines, 42; decrease in total cost of new construction, 73.

See also States and territories.

Rocheester, N. Y., erection of pole line on back-yard boundary line, 112.

Rotaries, number and kilowatt capacity of, for commercial and municipal stations (combined), 135, 136; for commercial stations, 151, 152; for municipal stations, 169.

Royal Electric Company (Montréal), adoption of Geisler system by, 113.

St. Louis, Mo., number and horsepower of steam turbines, 42; number of fans for refrigerating purposes, 115.

Salaries of mechanics and clerks and wages of, for commercial stations, 92, 182; for municipal stations, 93, 177; for commercial and municipal stations (combined), 143.

Salaries of mechanics, clerks, and wages of, for commercial stations, 16, 18; for municipal stations, 16; for purely electric and composite stations, 19; for central electric stations and gas plants, 28; for commercial and municipal stations (combined), 127.

Salaries and wages, for commercial stations, 91, 100; for purely electric and composite stations, 19, 90; for municipal stations, 89, 173; for commercial and municipal stations (combined), 126.

Seattle and Tacoma Company (Wash.), capacity of turbines, 100.

Service, electric, gross income from, for commercial stations, 76, 80, 108, 159; for municipal stations, 76, 80, 173, 176; for purely electric and composite stations, 78, 89, 151; for commercial and municipal stations (combined), 79, 83, 126, 142; for stations with and without meters on consumers’ premises, for central light and power stations operated by street-railway companies, 182.

—analysis of, for commercial and municipal stations (combined), 188; for commercial stations, 154; for municipal stations, 170.

—"breakdown," provision for, 122.

—character of, 156, 172.

—miscellaneous, gross income from, 88.

—stationary-motor, income from, for selected states, 87.

Sliding scale, use of, 122.

Smoot, C. H., suggestion regarding exhaust of reciprocating engines, 88.

Suquashie Falls plant, capacity of turbines, 100.

South Carolina, generating plant in, 22; increase in water power, 43; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; gross income from steam power, 151; See also States and territories.

South Dakota, increase in total cost of construction, 71. See also States and territories.

Southern Power Company, capacity of transformers, 104.

Stanton, Iowa, primary power and dynamo equipment, 26.

States and territories, primary power, diagram, 37; steam and water power, diagram, 40; capacity of dynamos, diagram, 48; output of generating stations, 61; comparative summary of power and energy, for generating equipment, 130, 156; substitution equipment, 130, 152, 169; analysis of service, 156, 164, 170; supplies, materials, and fuel, 149, 156, 170; income and expenses, 142, 158, 159, 173, 176, 182; salaried employees and salaries, 143, 162, 177; wage-earners and wages, 144, 163, 178; miscellaneous odd, 175; prime power and generating equipment, 140; character of ownership, 166; of service, bonds, and cost of construction and equipment, 172; arc lighting, 180; incandescent lighting, 180.

Statistiscs, grouping of, 15.

Steam engines. See Engines, steam.

Steam engines and steam turbines, horsepower capacity of, 38; average per station and per machine, 43. See also Engines, steam.

Steam power, comparison with water power, diagram, 40.

Steam turbines. See Turbines, steam.

Storage-battery cells in main stations, number of, for commercial and municipal stations (combined), 151; for commercial stations, 151; for municipal stations, 159.

Street-railway companies, number of stations operated by, 17, 180-182.

Superintendents. See Managers and superintendents.

Supplies, materials, and fuel, cost of, for commercial and municipal stations (combined), 134; for commercial stations, 135; for municipal stations, 173.

Supplies, materials, power purchased, and fuel, cost of, for central stations and gas plants, 28.

Supplies and materials, cost of, for commercial stations, 90, 93; for municipal stations, 90, 93; for purely electric and composite stations, 90; for commercial and municipal stations (combined), 91, 127.

—miscellaneous, cost of, for commercial and municipal stations (combined), 141; for commercial stations, 151; for municipal stations, 175.

Supports. See Poles and supports.

Sweet, A. J., physical properties of various forms of lamps summarized by, 110.

Tantalum lamps, number of, 57; per cent of companies using, 106.

Taxes, amount of, for commercial stations, 96, 154; for commercial and municipal stations (combined), 145. See also Revs, taxes, and insurance.

Tennessee and states and territories.

Texas, horsepower of gas engines, 42; number and horsepower of internal-combustion oil engines, 42; kilowatt capacity of dynamos, 49; cost of construction, for commercial stations, 74; gross income, from commercial and public lighting, 86; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Toledo, Ohio, use of luminous magnetite arc lamps, 107.

Toledo (Ohio) Gas, Electric, and Heating Company, alternating-current system adopted by, 104.

Transformers, transmission methods developed for, 104; kilowatt capacity, for commercial and municipal stations (combined), 155, 156; for commercial stations, 151, 152; for municipal stations, 160; cost of, for commercial stations, 93, 160; for municipal stations, 93, 174; for commercial and municipal stations (combined), 160.

— in circuits, number and kilowatt capacity of, for central stations and electric railways, 62; for commercial stations, 68, 163; for municipal stations, 68, 165; for commercial and municipal stations (combined), 137; for selected states, 48; average horsepower per station and per machine, 43.

Turner, M. E., data in reference to use of electrical apparatus for cooking, 115.

Union Electric Light and Power Company (St. Louis), system of rates established by, 123.

Utah, cause of decrease in total cost of plants and equipment, 70. See also States and territories.

Vacuum lamps. See Lamps, other than arc and incandescent.

Vane lamps. See Lamps, other than arc and incandescent.

Vermont. See States and territories.

Virginia. See States and territories.

Wage-earners, average number and wages of, for commercial stations, 19, 18, 92, 163; for municipal stations, 19, 18, 178; for purely electric and composite stations, 19; for central stations and gas plants, 28; for commercial and municipal stations (combined), 127, 144.

Washington, D. C., number and horsepower of steam turbines, 42.

Washington, increase in water power, 48; kilowatt capacity of dynamos, 49; increase in total cost of construction, 71; cost of construction, for commercial stations, 74; gross income, from commercial and public lighting, 89; from stationary-motor service, 87; from current sold to electric railways and to other electric companies, 88. See also States and territories.

Water power, increase in, 25, 42, 98; comparisons with steam power, diagram, 40.

Water privileges, rental of. See Rent of water privileges.

Water wheels, number and horsepower of, for commercial stations, 16, 18, 36, 43, 147; for municipal stations, 16, 36, 43, 167; for purely electric and composite stations, 19; for central stations and electric railways, 36; for commercial and municipal stations (combined), 131; average horsepower per station and per machine, 43.

West Virginia, decrease in total cost of new construction, 73. See also States and territories.

Wire and cable, cost of, for commercial stations, 93, 101; for municipal stations, 93, 178; for commercial and municipal stations (combined), 123.

Wisconsin, number and horsepower of internal-combustion oil engines, 42; horsepower of gas engines, 42; gross income from stationary-motor service, 87; legislation in regard to control over meters, 118. See also States and territories.

Wyoming commission, decision in regard to number of efforts to make uniform classification of accounts, 122.

See States and territories.
