GENERAL TABLES.

Comparative summary for the United States, by industries (Table 47).—This is a comparative table covering 1919 and 1914. It shows for each census the number of establishments, average number of wage earners, capital, wages, cost of materials, value of products, value added by manufacture, and primary horsepower used, for the 358 industries distinguished by the census of 1919.

Comparative summary for the United States, by geographic divisions and states (Table 48).—This is a comparative table covering the last four censuses. The table shows for all industries combined in each geographic division and state, for each of the four censuses, the number of establishments, average number of wage earners, capital, wages, cost of materials, value of products, value added by manufacture, and primary horsepower.

Comparative summary for selected industries, by states (Table 49).—This table presents, by states, the comparative data for the censuses of 1919, 1914, and 1909, and relates to the 134 industries which, in 1919, gave employment to 10,000 wage earners or more. It shows the number of establishments, average number of wage earners, primary horsepower, wages, cost of materials, and value of products.

Comparative summary for cities having 10,000 inhabitants or more, by states (Table 50).—The table shows, for each city having 10,000 inhabitants or more in the census year and for which statistics can be shown without disclosing individual operations, the principal items covered by the manufacturing censuses of 1919, 1914, and 1909. The cities are arranged alphabetically under the name of the state in which they are located. The table also gives the total for the 747 cities of 1919, 656 cities of 1914, and 593 cities of 1909. Statistics are not shown separately for the following cities that had a population of 10,000 inhabitants or more in 1919: Gary and Whiting, Ind.; Sanford, Me.; Austin and Virginia, Minn.; Hamtramck and Highland Park, Mich.; Roosevelt, Summit, and West Orange, N. J.; Lackawanna, N. Y.; Cleveland Heights and EastYoungstown, Ohio; Berwick, Coatesville, Donora, Duquesne, Farrell, Monessen, North Braddock, Olyphant, Steelton, Swissvale, and Woodlawn, Pa.; Port Arthur, Tex.; and Newport News, Va.

Summary for counties, by states (Table 51).—This table shows for each county for which separate figures can be published without the disclosure of individual establishments, the number of establishments, average number of wage earners, wages, rent and taxes, cost of materials, value of products, value added by manufacture, and primary horsepower. The counties are arranged alphebetically under each state, the state total being also given. The total number of counties, or the equivalent divisions, in continental United States in 1920 was 3,065.

Comparative figures for counties are not available as these statistics have not been compiled since the census has been confined to factory products.

Detailed statement for the United States, by industries (Table 52).—This table is confined to the census of 1919 and gives a fairly complete presentation of the census returns for persons engaged in manufacture and the financial statistics for each industry. Statistics in regard to wage earners by months, hours of labor, size of establishments, character of ownership, horsepower, and fuel consumed are covered by other tables.

Detailed statement for the United States, by geographic divisions and states (Table 53).—This table contains for all industries combined in each state statistics in regard to the persons engaged in manufacturing and financial statistics in detail for 1919.

Detailed statement for industries, by states (Table 54).—This table presents for each of the industries detailed statistics for 1919 for each state that can be shown without disclosing operations of individual establishments. It covers the same items as are given in Table 52, with the addition of details on horsepower.

TABLE 47.—COMPARATIVE SUMMARY FOR THE UNITED STATES, BY INDUSTRIES: 1919 AND 1914.

[NOTE.—The figures for some industries do not represent the total production, because important establishments that manufacture the same class of products may be included in other industries. (See Explanation of terms, p. 9.)
Primary horsepower includes power generated in manufacturing establishments plus electric and other power rented from outside sources; it does not include electric power generated by primary units of the establishments reporting.]
