CENSUS OF ELECTRICAL INDUSTRIES
1922

TELEGRAPHS
LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., June 1, 1924.

Sir:

I transmit herewith the report on the census of Telegraphs for 1922. This is one of the electrical industries series, which also includes reports on central electric light and power stations, electric railways, and telephones.

The census of electrical industries has been taken quinquennially, beginning with the inquiry for the year 1902, under provisions of the acts of Congress approved March 6, 1902, and June 7, 1906.

The collection of the data, the compilation of the statistics, and the preparation of the text were done under the supervision of Eugene F. Hartley, chief statistician for manufactures, assisted by Edward B. White and LeVerne Beales.

Respectfully,

W. M. STEUART,
Director of the Census.

Hon. HERBERT HOOVER,
Secretary of Commerce.
CONTENTS

INTRODUCTION

General description .................................................. 7
Period covered ......................................................... 7
Financial statistics .................................................... 7
Effect of change in monetary values ............................... 7

TABLE

1.—Summary, land and ocean-cable telegraph systems combined: 1902-1922 .................................................. 8

COMPARISON OF COMMERCIAL LAND AND OCEAN-CABLE TELEGRAPH SYSTEMS

Balance sheet .......................................................... 11
Growth between 1902 and 1922 ....................................... 11

TABLES

2.—Equipment and traffic, land and ocean-cable telegraph systems: 1922 ................................................ 11
3.—Income statement, land and ocean-cable telegraph systems: 1922 ................................................ 12
4.—Expense account, land and ocean-cable telegraph systems: 1922 ................................................ 12
5.—Balance sheet, land and ocean-cable telegraph systems: 1922 ................................................ 13
6.—Employees, salaries, and wages, land and ocean-cable telegraph systems: 1922 ................................. 13

COMMERCIAL AND RAILWAY LAND TELEGRAPH SYSTEMS

Commercial systems .................................................. 15
Line and wire mileage ................................................ 15
Increase in business and decrease in number of offices and wire mileage .............................................. 15
Plant and equipment and funded debt ................................ 16
Long-distance telephone business over telegraph wires ................................................................. 16
