TABLE III.—IOWA—Continued.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the townships in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* villages have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the townships in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the magisterial districts or precincts in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the parishes in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the towns in which they are separately situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the election districts in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the towns in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

TABLE III.—MICHIGAN—Continued.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the townships in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.

NOTE.—The following *unincorporated* places have been returned separately by the enumerators. The list is not by any means complete, as very many enumerators have failed to separate such bodies of population. The population of these places has, of course, been included in the townships in which they are respectively situated. The figures can be considered as only approximate, as the limits of such places are not sharply defined.
