## LETTER OF TRANSMITTAL.

---

DEPARTMENT OF THE INTERIOR,  
CENSUS OFFICE,

WASHINGTON, D. C., October 7, 1894.

SIR:

I have the honor to transmit herewith Part II of the volume on "Wealth, Debt, and Taxation", entitled "Valuation and Taxation". Part I, concerning the public debt, has already been published.

This volume contains results of investigations, as follows:

True value of real and personal property in the aggregate and by states, counties, and principal municipalities.

Assessed valuation of real and personal property in the aggregate and by states, counties, and municipalities.

Ad valorem taxation levied on real and personal property for state, county, and local purposes, in the aggregate and by states, counties, and municipalities.

Financial condition of principal cities.

Receipts and expenditures of the national government and of the several states, counties, and municipalities, with separate report of expenditures on account of public common schools by counties.

This investigation was under the supervision of Special Agent J. K. Upton.

I am, very respectfully, your obedient servant,

CARROLL D. WRIGHT,  
*Commissioner of Labor in charge.*

Hon. HOKE SMITH,  
*Secretary of the Interior.*

---

## PART II.—VALUATION AND TAXATION.

---

## LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR,  
CENSUS OFFICE,

WASHINGTON, D. C., August 27, 1894.

SIR:

I have the honor to transmit herewith Part II of the Report on Wealth, Debt, and Taxation of the United States for the Eleventh Census, entitled "Valuation and Taxation".

The information has been gathered from state and local reports or from special returns rendered to this office, and it is believed that no place in the country having power to levy a tax for any public purpose has been omitted in the investigation.

To the national, state, county, and local officers, and to hundreds of private citizens who have cheerfully furnished information as requested for use in this work, this office owes many obligations.

To all the clerks and employes who have labored under my direction in preparing this volume much credit is due for their faithful services. Of my assistants, Dr. J. W. Porter died in a few months after I took charge of the work, regretted by all who knew him. Mr. Charles A. Carpenter succeeded him, and he in turn was succeeded by Mr. Charles M. Currier, both of whom showed great aptitude for the work and rendered most valuable aid in collecting and tabulating the information embraced in this volume.

Recognizing and appreciating the uniform courtesy that has been shown me at all times by yourself and others charged with the conduct of the work of the Eleventh Census,

I have the honor to be, very respectfully,

J. K. UPTON,

*Special Agent.*

HON. CARROLL D. WRIGHT,

*Commissioner of Labor in charge.*

WEALTH OF THE NATION.

---

---

## WEALTH OF THE NATION.

The true valuation of all tangible property in the United States, exclusive of Alaska, at the close of the census period, 1890, amounted to \$65,037,091,197. In this total no account is taken of property not within the limits of the United States at the period mentioned. Nor is any account taken of any form of credit money or of promissory notes, mortgages, or securities, although such items are frequently subject to ad valorem taxation.

The term "true valuation" is used to express a fair selling price for the property in question at the date mentioned, and is used in distinction from that of "assessed valuation", which is a valuation put only upon property taxed and for taxation purposes.

The true valuation for 1890 is classified as follows:

Total.....	\$65, 037, 091, 197
Real estate, with improvements thereon.....	39, 544, 544, 333
Live stock on farms, farm implements, and machinery.....	2, 703, 015, 040
Mines and quarries, including product on hand.....	1, 291, 291, 579
Gold and silver coin and bullion.....	1, 158, 774, 948
Machinery of mills and product on hand, raw and manufactured.....	3, 058, 593, 441
Railroads and equipments, including \$389,357,289 for street railroads.....	8, 685, 407, 323
Telegraphs, telephones, shipping, canals, and equipment.....	701, 755, 712
Miscellaneous.....	7, 893, 708, 821

The term real estate includes all lands and lots with improvements thereon, but does not include mines, quarries, telegraphs, telephones, or railroads, except that in a few states where the roadbed, station houses, and repair shops of railroads are classed as real estate for purposes of taxation and their value not separately reported.

The real estate of the country assessed for taxation and exempt therefrom is classified in area and value as follows:

CLASSIFICATION.	Acres.	Value.
Total .....	1, 900, 800, 000	\$30, 544, 544, 333
Distributable into counties .....	1, 214, 073, 406	33, 693, 512, 955
National vacant lands and Indian reservations.....	685, 826, 594	941, 031, 378

To ascertain the true value of real estate distributable into counties, inquiries were sent to county and municipal officers empowered to assess property for purposes of taxation, asking them to state what, in their opinion, was the relation between the assessed and the true value of the real estate as respectively assessed by them, and, to corroborate their reports, more than 25,000 inquiries were sent throughout the country to persons believed to be familiar with the values of real estate, asking their opinions as to the relation between the assessed and true value in their respective localities, and the replies received were carefully considered in connection with the reports of the assessors. The value of farm lands as reported by the enumerators was also carefully noted.

The true value of real estate for Wisconsin has been compiled from the reports of the county officers, who publish with their annual reports approximate true values of such property based upon the ascertained relation between prices received from actual sales of real estate parcels and the assessed value put upon the same parcels for taxation, as shown by the county records; that for Pennsylvania has been furnished by Joseph D. Weeks, who, in behalf of a state tax conference, recently made a thorough investigation by like methods of the value of real property throughout the state.

To further insure the accuracy of the results for the entire country, a statement showing for the state or territory the true value of real property by counties was sent to the governor, with a request that he approve it, or suggest such changes therein as he might deem necessary or proper. The changes suggested have been made, but they were few and of but little importance.

No attempt has been made to ascertain the value of improvements separate from that of lands, or of city or town lots separate from other lands measured by acres, as the state reports do not generally make such divisions, and original investigations as to land values have not been instituted by this office.

The value of live stock on farms and of farm implements and machinery is that obtained by the enumerators from the owners of the property, as required by law.

The value of mines and quarries, including product on hand, is the capital invested in these enterprises, as shown by the Report on Mineral Industries for the Eleventh Census. It does not represent the amount of capital stock issued, but is the actual investment in the land, buildings, fixtures, tools, implements, live stock, machinery, etc., including in some cases a small amount of cash on hand, which was not reported separately and could not therefore be eliminated. The commercial value of the mines varies from day to day, but it is thought as only mines are included which appear to be yielding more or less product that their average commercial value would be at least the amount of capital actually invested therein. The lands and buildings belonging to mines in some states are assessed as real estate, and to that extent their value may be also included in that of real estate, as herein reported, but at most the amount is not relatively great. In case the tax is levied on the product, as in several states, the real estate and improvements are not assessed for taxation, and consequently would not be embraced in any real estate values herein published.

The value of gold and silver coin and bullion in the country is the amount estimated by the Director of the Mint in his report for 1890. The means employed by him to ascertain this amount are fully set forth in his report, and need not be repeated here. The distribution of the values among the several states is, however, the work of this office. The amount of such coin and bullion in the hands of banks, bankers, and banking institutions being known and published, each state was credited with the amount thus held and the remainder distributed among the several states according to population. It is well known that of this coin and bullion the greater part is held in the government vaults at New York, Philadelphia, Washington, and San Francisco, but this wealth is owned to a great extent by the holders of gold and silver certificates issued thereon, which pass as money, and this distribution would give to each state a fair share of these metals regardless of their place of deposit.

The value by states and territories of the machinery of mills and product on hand, raw and manufactured, is as reported by the owners to the agents of this office, as required by law.

The value of railroads and equipments, including street railroads, \$8,685,407,323, here used represents the cost of their construction and equipment, about 7,000 miles being estimated. Had the value been based upon the net earnings of the roads during the census year 1890, capitalized at 5 per cent, the amount would have been \$7,935,912,420, of which the value of street railroads would have been \$572,120,520. The roads at the same time report their value (permanent investment) to be \$9,715,322,439, including \$362,378,584 street railroads. The distribution of the value among the several states has been made according to mileage, that being the most feasible plan suggested for such distribution, and being the one employed in the several states where railroads not wholly within their respective limits are assessed for taxation.

The value of telegraphs, telephones, and canals and equipments is based upon the net earnings derived therefrom, capitalized at 5 per cent. The value of the two former is distributed among the several states, from lack of any better plan, in proportion to the true value of real estate.

The total value of shipping, which includes lake and river craft as well as ocean, is as reported to this office. That for steam vessels is given by states, but that of sailing vessels is distributed among the several states in proportion to the tonnage of such vessels.

Of the miscellaneous, the value of furniture and personal belongings constitutes a large portion. To arrive at the value of such property an examination was made of more than 8,000 insurance policies on contents of houses not located in large cities, and the result showed the average value of furniture insured in such houses to be \$387. The value of private carriages and tools of mechanics is not known, but it is believed that for each house in the United States there would be of furniture, tools, and carriages an average amount of \$400, making for the entire country a value of about \$5,000,000,000. Included as miscellaneous also is the value of cattle not on farms, of merchandise in stock, of agricultural products not yet consumed nor otherwise included as merchandise, the values of which have been respectively approximated from the returns of local assessors, showing a value put upon them for taxation. The number of cattle and other stock on ranges, however, had been officially reported, and the value given to them is that of the agents of this office familiar with such valuations. There was also included the value of public libraries and of personal property owned by the national, state, and local governments exempt from taxation, returns of which have been received at this office from every county and nearly every municipality in the country, and the value of foreign goods in bond amounting to about \$43,000,000, as reported by the Secretary of the Treasury.

These items embrace substantially all the wealth of the country. Their respective amounts are to a certain extent approximated and their division among the states necessarily somewhat arbitrary, but it is believed that from the checks that have been instituted the total value of all items as reported would not vary any considerable amount from the absolute value were such value obtainable.

No estimate of the value of national lands by counties could be obtained, but, in the opinion of officers familiar with the subject, it was thought that a value of \$1.25 an acre for the amount in each state would be a conservative estimate.

It was found impossible also to distribute the Indian lands either in acreage or value by counties. The areas of these lands in some of the states and territories are so large that the average value per acre by counties has not been computed in the following states and territories: Arizona, Colorado, Idaho, Minnesota, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. The area of counties of the other states containing such lands is not materially affected, containing only small portions, and a value per acre therefore is given. The total value given to this class of property has the approval of the Commissioner of the General Land Office.

In computing the value per acre in states having vacant national lands, the acreage of such land, as shown by the report of the Commissioner of the General Land Office for 1890, was deducted from the acreage of the county as determined by this office wherever it was practicable to do so, but the land districts are not coextensive with counties, and the division of the vacant lands into counties appears in some cases to be only approximated, the amount of vacant lands being in some cases even greater than the reported total area of the county. In such cases no attempt has been made to ascertain the value per acre of the county, and the acreage is treated as a part of the land not distributable into counties.

The valuation per capita of some counties situated in sections recently settled is relatively very high, owing, it is thought, to a large portion of the property being held by nonresidents.

The true valuation of the real and personal estate of the country has been made at the end of each decade, commencing with 1850, and published by this office. The following table shows the true valuation for each decade, the assessed valuation, the per capita, and the increase per cent for each period of both valuations:

YEARS.	TRUE VALUATION.			ASSESSED VALUATION OF REAL AND PERSONAL PROPERTY TAXED.		
	Total.	Per capita.	Increase. (Per cent.)	Total.	Per capita.	Increase. (Per cent.)
1850.....	\$7,135,780,228	\$308	.....	\$6,024,060,000	\$260	.....
1860.....	16,159,616,068	514	126.46	12,084,560,005	384	100.58
1870.....	30,068,518,507	780	86.07	14,178,986,732	368	17.33
1880.....	43,642,000,000	870	45.14	17,139,903,495	342	20.88
1890.....	65,037,091,197	1,036	49.02	25,473,173,418	407	48.02

The total assessed value of property taxed for 1880 is somewhat in excess of the amount reported by the Tenth Census, for reasons which will be hereinafter explained.

A preliminary publication by this office of the true valuation of 1890 compared with that of the previous decades, as above shown, has been subjected to adverse criticism by the public press and writers who have made special study of this subject. They allege that the methods pursued by which the results of previous decades, especially for 1850 and 1860, are ascertained were not uniform with those employed by the Eleventh Census, and that the results therefore admit of no comparisons.

The objections are summarized in the following extract from a letter addressed to this office by a well known writer on economic topics:

I beg to call your attention to the tables of valuation of wealth now being completed in the Census Office. It is quite useless for the department to continue the old warnings against comparisons of the present returns and the past returns, because so long as the department publishes the old, crude, and utterly incorrect figures, so long they will certainly be used in public discussion. What ought to be done is to correct the old returns and recast them upon the same principle on which the new returns or estimates have been made. This ought to be done in the Census Office, which made the original blunders, and which ought now to correct them. But so far from doing this, the superintendents of the census, both in 1870 and 1880, prepared elaborate estimates of wealth, upon principles which they did not explain, and then put them side by side with similar estimates made in 1860 and 1850, upon entirely different principles, which they also did not explain.

Now, while the methods by which the estimates of 1870 and 1880 were arrived at are not easily ascertainable, except by personal inquiry of the gentlemen who made them, the methods by which the estimates of 1850 and 1860 were reached are very easily ascertained. In those two periods the estimate of true wealth was left to the marshals of the different districts, who simply added to the local assessments such a percentage as they thought the assessors themselves would have added if they had wanted to ascertain the real value. In other words, they increased the local assessments just as much as they thought that the assessors had intentionally cut them down.

Now, the only fair way of comparing such different valuations is, either to reduce the valuations of 1890, 1880, and 1870 to the standard of 1860 or to increase the valuation of 1860 by estimating it on the principles of 1890.

In answer to such suggestions it may be stated that at this day any correction of the figures of true valuation for any previous census period is utterly impossible, however desirable such correction may be, the necessary information for the purpose not being procurable. The methods pursued, however, in each decade in arriving at such results and a summary of evident differences in the valuations resulting therefrom, as compared with those for 1890, may be briefly stated.

The first effort of the government to obtain a statement of the valuation of the property of the country was made under the census act of 1850. The instructions on the schedules issued to United States marshals, through whom the census statistics for that year were collected, required those officers to obtain statistics of the valuation

of real and personal property as assessed for taxation and in addition thereto the true valuation of such property, for obtaining which the schedules contained instructions as follows:

The "true valuation" of all property should be estimated at what is its cash value in the place where it is situated. In some places, however, it is valued by appraisers at two-thirds or one-half of its just value and the assessment made upon such valuation. If in the estimate of an estate it is valued at other than its true worth the true valuation should be stated, which may easily be done by adding the proper per centum to the recorded valuation.

No valuation statistics of the above character were, however, published in the final report of the Seventh Census (1850), but in a preliminary report of the Superintendent, dated December 1, 1852, transmitted to Congress by the Secretary of the Interior and published by that body, a table of such values is published under the heading of "Real and personal estate", with the following remark:

The table of real and personal estate owned by individuals is made up from official returns of property for taxation. Where the assessment has been made on a sum less than the intrinsic worth, the assistant marshals were instructed to add the necessary percentage. For the purposes of taxation the full amount is not generally given, in rural districts especially. Stocks or bonds owned by states or by the general government are not represented. The value of slaves is included.

The table is headed "Valuation of real and personal estate of the inhabitants of the United States, for the year ending June 1, 1850", and is subheaded as follows:

STATES AND TERRITORIES.	REAL AND PERSONAL ESTATE.	
	Assessed value.	True or estimated value.

The total of the true or estimated value is \$7,135,780,228.

In the report of the Eighth Census (1860), Mortality and Miscellaneous Statistics, page 294, the assessed and true valuations for 1850 and for 1860 are reported with the following text:

The marshals of the United States were directed to obtain from the records of the states and territories, respectively, an account of the value of real and personal estate as assessed for taxation. Instructions were given these officers to add the proper amount to the assessment, so that the return should represent as well the true or intrinsic value as the inadequate sum generally attached to property for taxable purposes. The result of this return by all the census takers will be found in Table No. 2, whereby it will appear that the value of individual property in the states and territories exceeds the sum of \$16,000,000,000, representing an increase of 126.5 per centum in 10 years in value in the aggregate, and an increase of 68 per cent per capita of the free population. \* \* \*

It must be borne in mind that the value of all taxable property was returned, including that of foreigners as well as natives, while all was omitted belonging to the state or United States. In considering the relation of population to wealth, the fact must be borne in mind that a much larger proportion of the property of the western than the eastern states is held by nonresidents, and that this circumstance is not without its influence in exaggerating the wealth of individuals in states where large investments have been made by persons resident elsewhere.

Table 2 is headed "The true value of real estate and personal property, according to the Seventh Census (1850) and the Eighth Census (1860), respectively, also the increase and increase per cent". The aggregate for 1850 is \$7,135,780,228, as before stated; that for 1860 is \$16,159,616,068.

In 1870 the duty of ascertaining the assessed and true valuation of property was again confined to the United States marshals, and the report for that period says that the two points particularly dwelt upon in instructions from the Census Office in the matter of valuation were, first, the undervaluation of real estate in assessments for taxation; second, the large class of personal property lawfully exempt from taxation, the class disregarded by the assessors, or that which by evasion or fraud escapes taxation. Of the first class the report says: "For the majority of the states and for the vast majority of the property of the country, the additions to be made to assessed values on account of the undervaluation of real estate have been calculated with great nicety by competent investigators". But in determining how much should be added to the assessed valuation of the country on account of the exemption or escape of personal property from taxation in 1870, the report admits no such accurate methods could be applied and that the result reached must be characterized rather as an impression than an opinion. The report further says that no attempt has been made to eliminate the amount of mortgages on real estate forming a part of the personal property taxed, though to that extent there was an evident duplication of values, and that for comparisons the total results should be decreased 20 per cent to reduce the valuation to a gold standard in which the valuations of other periods are stated. The final results are published by states, but with no figures showing in detail the amount or kind of the several classes of property included.

In 1880 the true valuation of property appears to have been ascertained directly by the Census Office. Inquiries concerning the relation between the assessed and true value of real estate were sent all over the country, and from the returns the value of this class of property was determined. The value of other property was obtained from official and other sources with little or no reference to the assessed valuation.

The plan pursued in the Eleventh Census has been fully set forth above.

In comparing the report of true valuation of 1890 with like valuations of previous periods it should be borne in mind:

First. That no statement of true valuation previous to 1890 included the value of vacant state or national land or Indian reservations.

Second. That the true valuation for 1870 admittedly embraces certain duplications of value of personal property, arising from the taxation of mortgages and the realty represented by them, and that the values are inflated, owing to the depreciation of the standard then in use, requiring a corrective reduction of 20 per cent.

Third. That for 1860 and 1850 the true valuation appears to have been made by adding to the assessor's list such an amount as would, in the opinion of the officer reporting, compensate for the undervaluations of the assessor. If such course was pursued, no property exempt from taxation or which escaped the assessor's list is included as a part of the property valued.

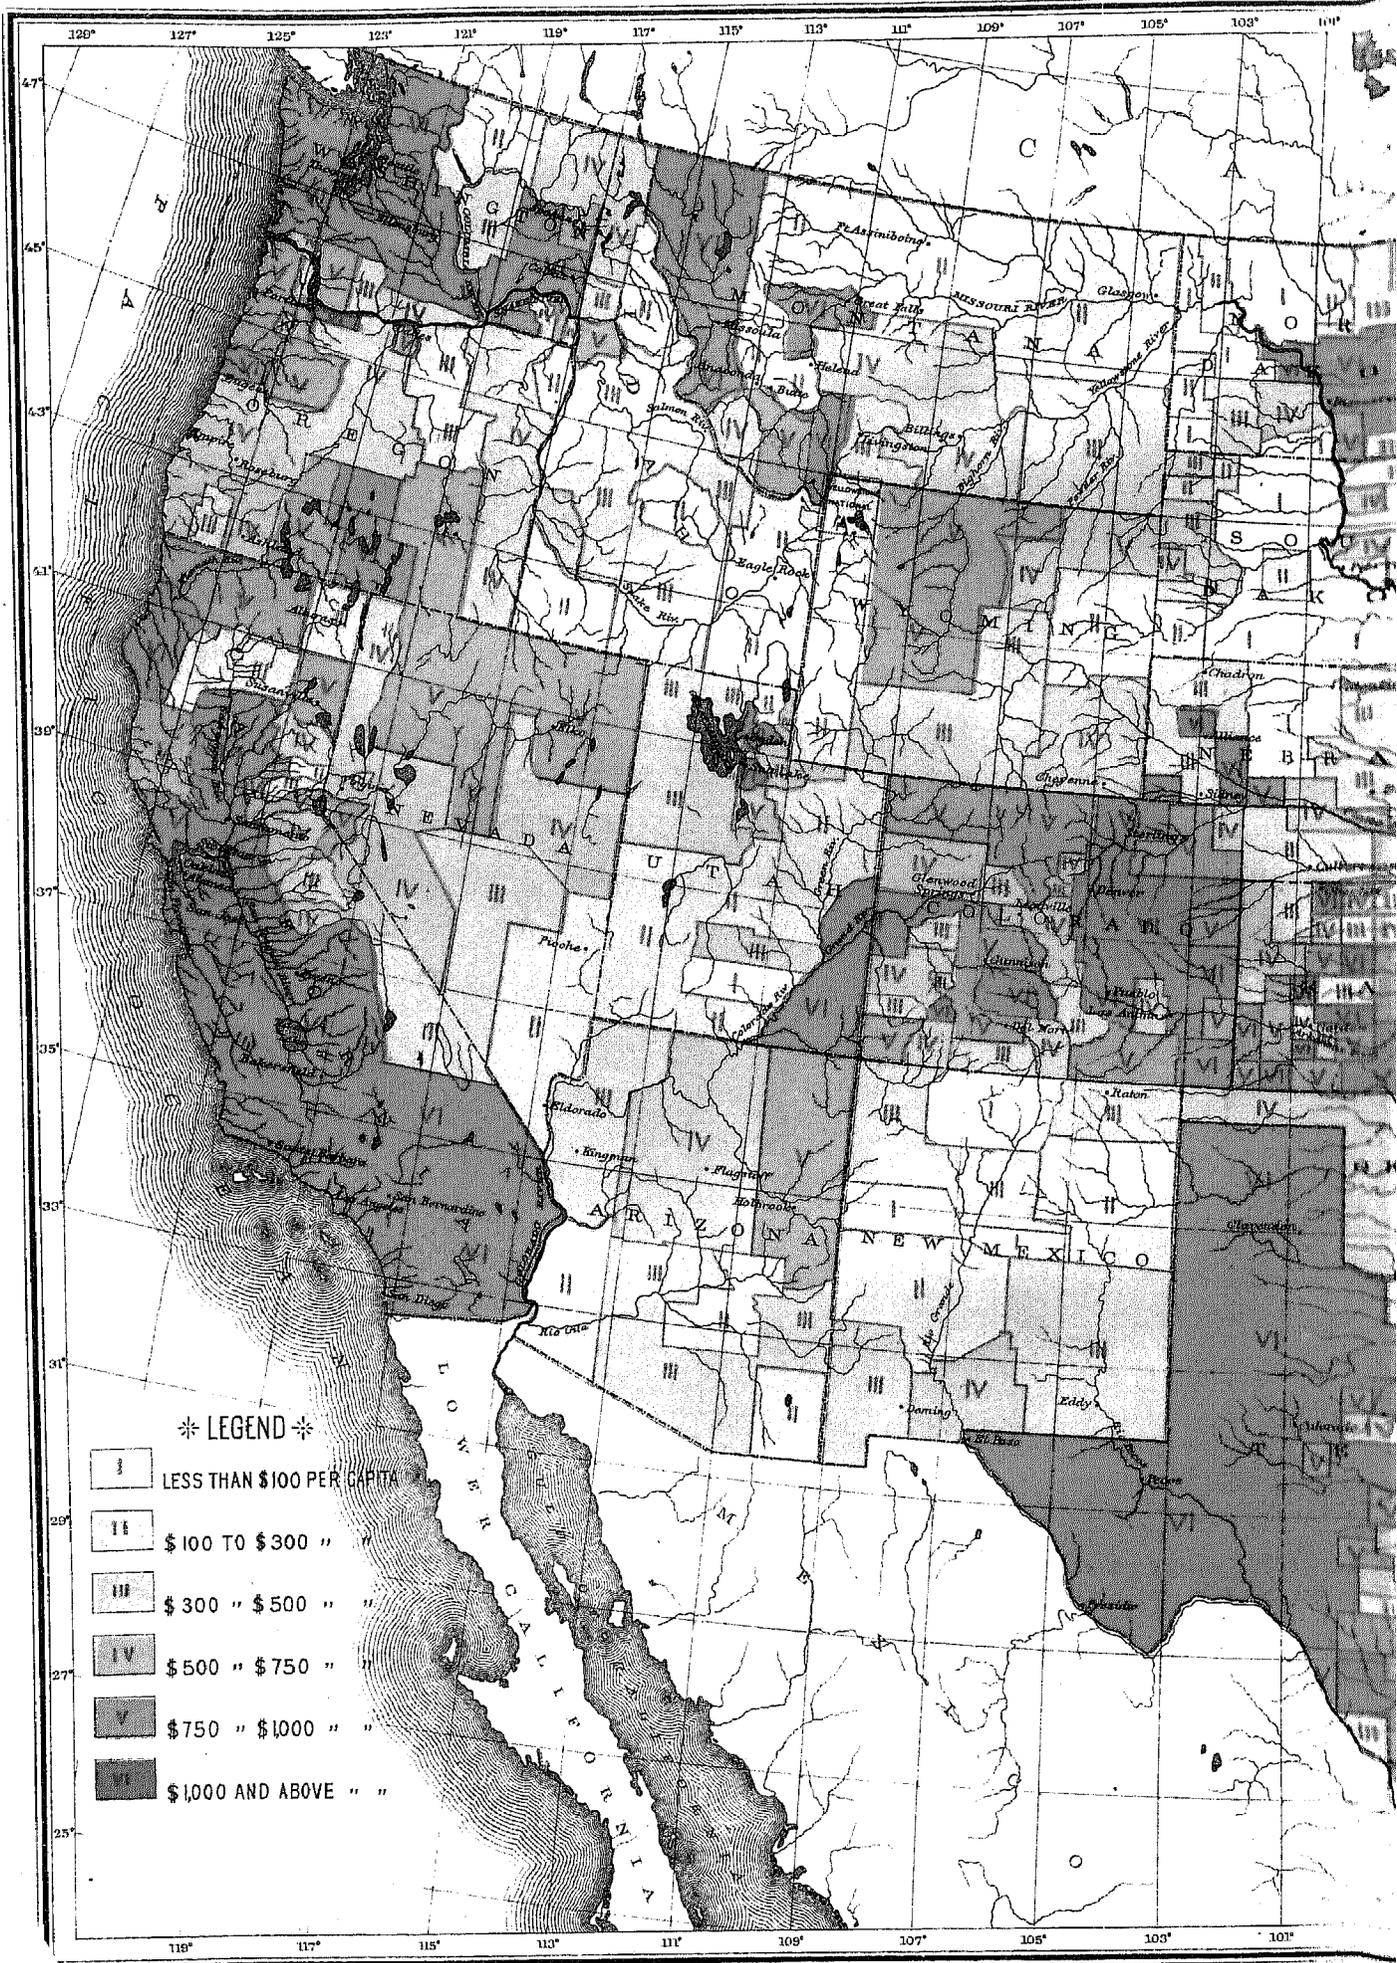

These admitted differences of method pursued in reaching the figures of true valuation for the several census periods, and the temporary character of the Census Office, of themselves preclude any attempt of one census to revise the figures of a previous one; and the figures as published, if not as accurate as desired, can be accepted with safety as showing in a general way a continuous increase in the wealth of the nation, the exact proportions of which can not be measured.

## WEALTH, DEBT, AND TAXATION.

TABLE I.—SUMMARY OF THE TRUE VALUATION OF REAL AND PERSONAL PROPERTY, BY STATES AND TERRITORIES (EXCLUSIVE OF ALASKA): 1890.

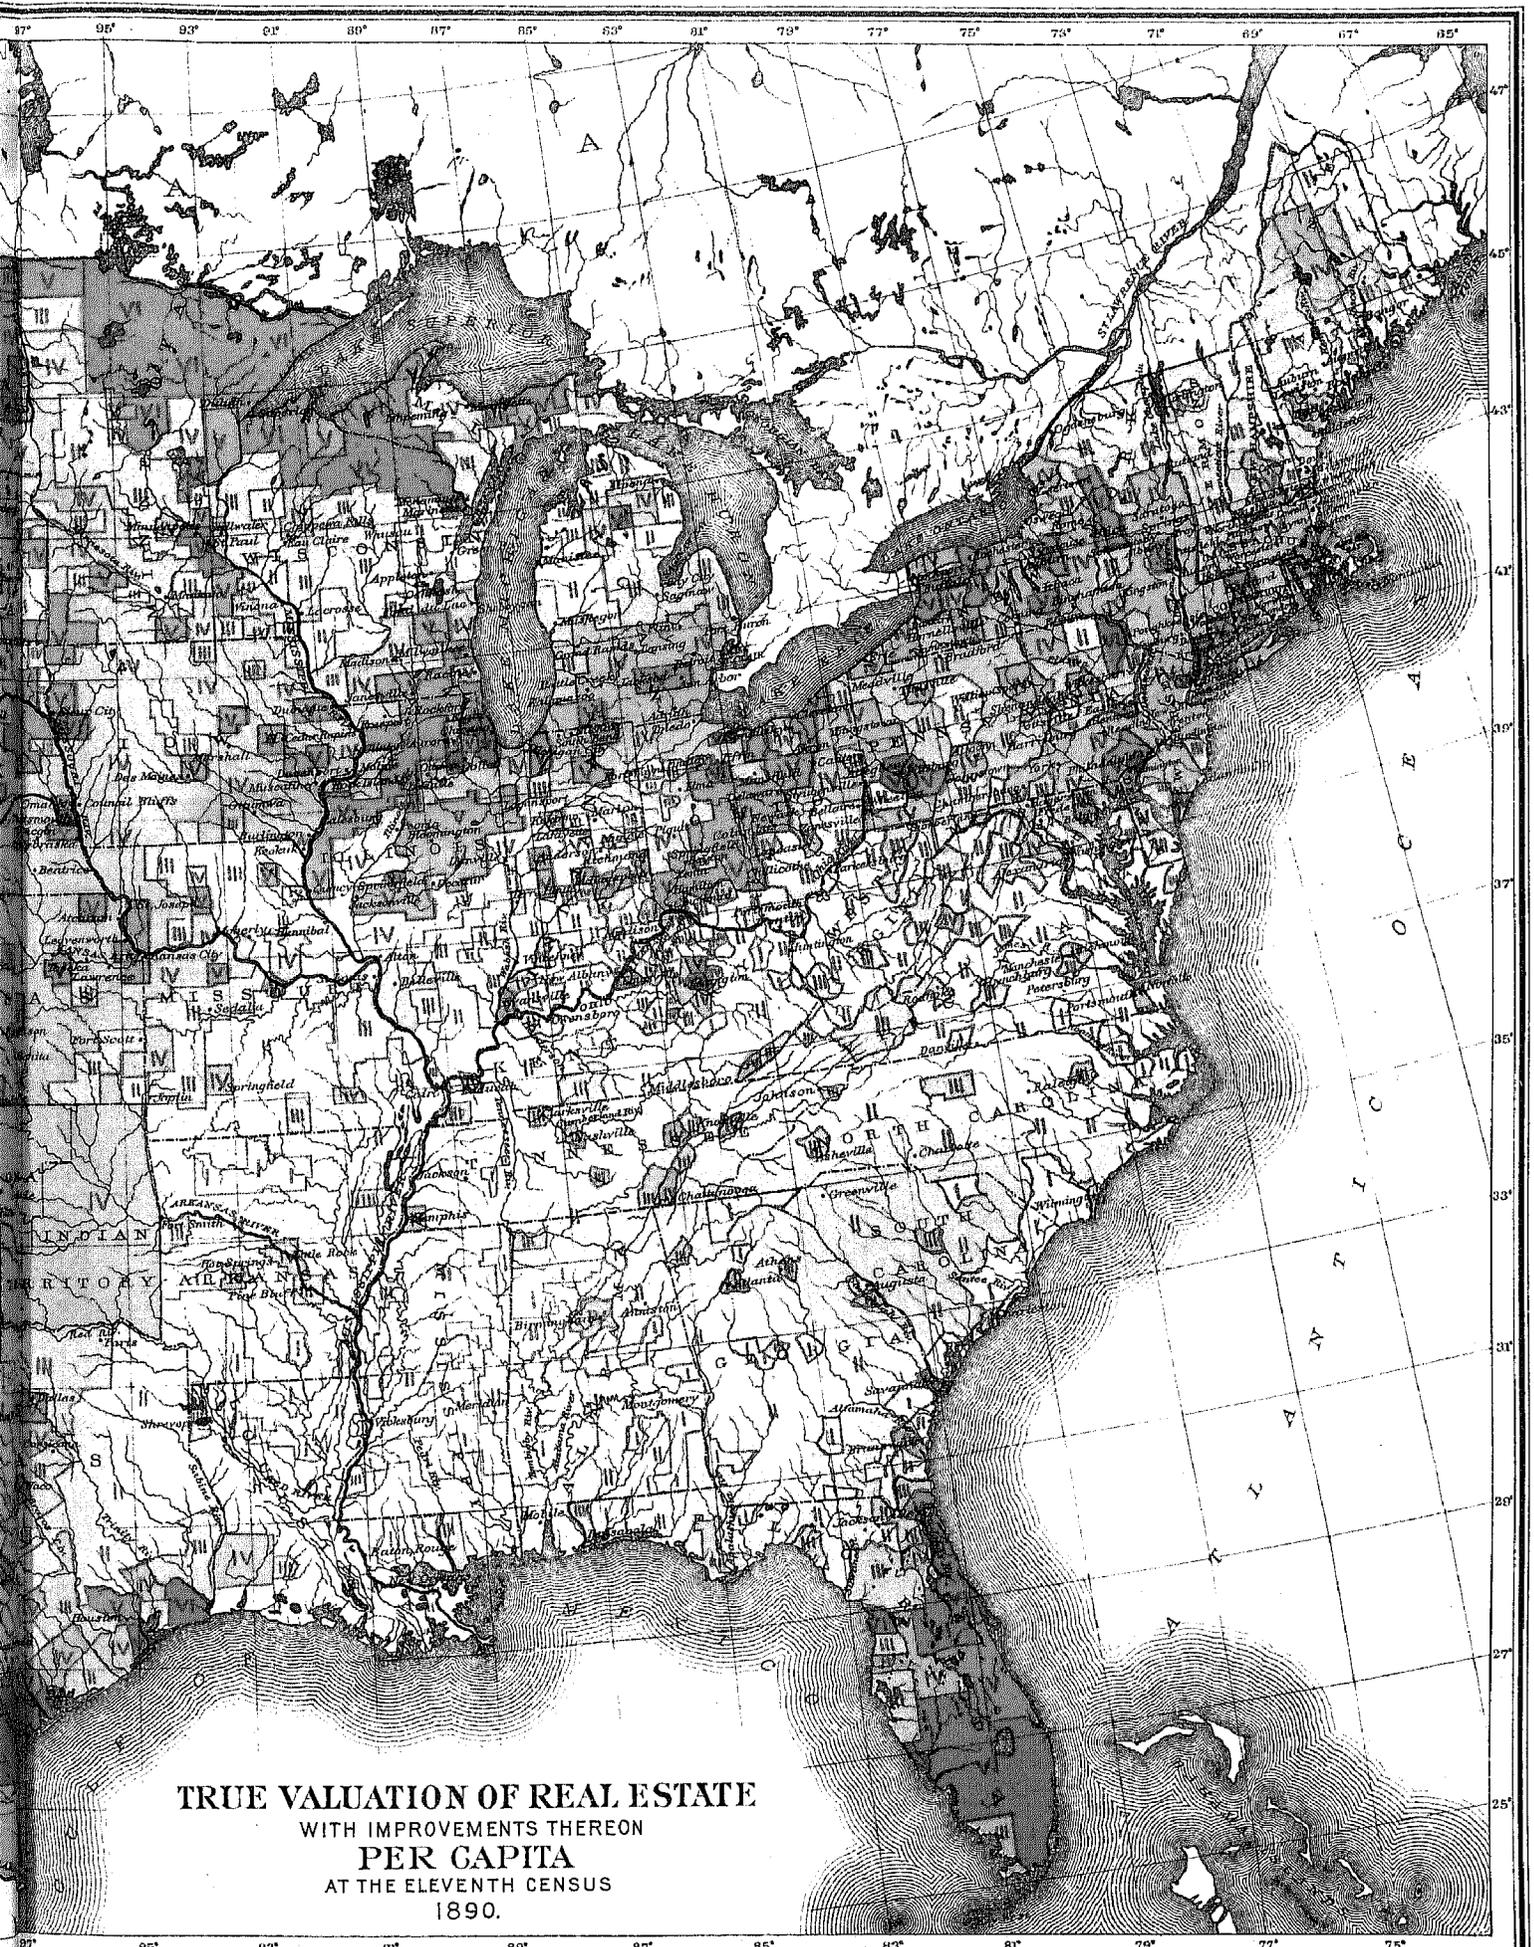

STATES AND TERRITORIES.	Total.	Real estate and improvements.	Live stock on farms, farm implements, and machinery.	Mines and quarries, including product on hand.	Gold and silver coin and bullion.
