LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., August 1, 1939.

SIR: I transmit herewith the report of the Census of Telephones and Telegraphs for 1937. This is one of the electrical industries series which also includes reports on Central Electric Light and Power Stations and Street Railways and Motorbus Lines.

The Census of Electrical Industries has been taken quinquennially beginning with the inquiry for the year 1902, under provisions of the acts of Congress approved March 6, 1902, and June 7, 1906.

The collection of the data, the compilation of the statistics, and the preparation of the text were under the supervision of Thomas J. Fitzgerald, Chief Statistician for Manufactures, and Howard H. McClure, Assistant Chief Statistician for Manufactures, assisted by Owen L. Briggs and William J. McGauley.

Respectfully,

WILLIAM LANE AUSTIN,
Director of the Census.

HON. HARRY L. HOPKINS,
Secretary of Commerce.

TABLES

1. Summary—All systems and lines: 1937................. 3
2. Summary—Operating companies grouped according to annual incomes, and connecting lines: 1937................. 4
3. Number of systems, total mileage, number of central offices, the Bell system and all other systems and lines, by divisions and States: 1937................. 5
4. Number of telephones, classified as residence and business, the Bell system and all other systems and lines, by divisions and States: 1937................. 8
5. Number of originating calls, the Bell system and all other operating companies, by divisions and States: 1937................. 10
6. Statistics of mutual and cooperative telephone companies operating switchboards: 1937................. 11
7. Statistics of mutual and cooperative connecting telephones lines and systems not operating switchboards: 1937................. 11

Chapter II.—DEVELOPMENT OF THE INDUSTRY

Growth during 35 years

TABLES

8. Summary—Operating companies reporting annual incomes of $10,000 or more, 1927, 1932, 1927, and 1922, and those reporting $5,000 or more; 1925 to 1917................. 13
9. Number of systems and lines, operating companies grouped according to annual incomes, and connecting lines, by divisions and States: 1937, 1932, and 1927................. 14
10. Miles of single wire, all systems and lines, operating companies grouped according to annual incomes, and connecting lines, with percent increase or decrease, by divisions and States: 1937, 1932, and 1927................. 16
11. Number of telephones, all systems and lines, operating companies grouped according to annual incomes, and connecting lines, with percent increase or decrease, by divisions and States: 1937, 1932, and 1927................. 18
12. Percent distribution, miles of single wire and number of telephones, all systems and lines, operating companies grouped according to annual incomes, and connecting lines, by divisions and States: 1937, 1932, and 1927................. 20
13. Summary—Telephone and telegraph systems: 1902 to 1937................. 22

Chapter III.—EQUIPMENT AND TRAFFIC

Wire mileage
Telephones
Number of "originating calls"

TABLES

14. Miles of single wire in cable, and not in cable, the Bell system and other systems and lines: 1937, 1932, and 1927................. 23
15. Telephones, originating calls, and average calls per telephone per day, for systems reporting annual incomes of $10,000 or more, by divisions and States: 1937, 1932, and 1927................. 24
16. Traffic distribution, miles of single wire and number of telephones, all systems and lines, operating companies grouped according to annual incomes, and connecting lines, by divisions and States: 1937, 1932, and 1927................. 26
17. Originating calls—Number per capita, for systems and lines reporting annual incomes of $10,000 or more, 1927, 1932, 1927, and 1922; and for those reporting $5,000 or more, 1917, by divisions and States................. 27

Chapter IV.—COMPARISON OF BELL AND OTHER SYSTEMS; STATISTICS FOR SMALL SYSTEMS AND LINES

The Bell system
Comparison of the growth of the Bell system with all other systems
Interpretation of the statistics

TABLES

18. Systems and lines, miles of single wire, and telephones, the Bell system and all other systems and lines: 1937, 1932, and 1927................. 28
19. Detailed statistics, the Bell system and all other systems reporting annual incomes of $10,000 or more: 1937, 1932, and 1927................. 29
## CONTENTS

20. Miles of single wire, the Bell system and all other systems and lines, by divisions and States: 1937, 1932, and 1927 ........................................... 30

21. Number of telephones, the Bell system and all other systems and lines, by divisions and States: 1937, 1932, and 1927 ........................................... 32

22. Number of central offices, the Bell system and all other operating companies, grouped according to annual incomes, by divisions and States: 1937, 1932, and 1927 ........................................... 34

23. Number of originating calls and average number of calls per telephone per day, the Bell system and all other systems, by divisions and States: 1937 ........................................... 36

24. Principal statistics, operating companies reporting annual incomes of less than $10,000, by divisions and States: 1937 ........................................... 37

25. Summary—Connecting lines, by divisions and States: 1937 ........................................... 39
