BUREAU OF THE CENSUS

Bruce Chapman, Director

Daniel B. Levine, Deputy Director

POPULATION DIVISION

Roger A. Herriot, Chief

Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the census-taking process. The Bureau was guided by then Director, **Vincent P. Barabba**, and Deputy Director, **Daniel B. Levine**. Primary direction of the census program was performed by **George E. Hall**, Associate Director for Demographic Fields, assisted by **Earle J. Gerson**, then Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Ballar**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Assistant Director for Computer Services, **Shirley Kallek**, Associate Director for Economic Fields, **James D. Lincoln**, Associate Director for Administration, **Rex L. Pullin**, Associate Director for Field Operations, and **W. Bruce Ramsay**, Associate Director for Information Technology. The director's staff was assisted by **Peter A. Bounpane** and **Sherry L. Courtland**.

Responsibility for developing the population portion of the 1980 census questionnaire content and designing the tabulations was in the Population Division, under the supervision of **Meyer Zitter**, then Chief, **Paula J. Schneider**, Staff Assistant for Census Programs, **Roger A. Herriot**, **Nampeo D. McKenney**, and **Arthur J. Norton**, Assistant Chiefs. This report was prepared by **Robert C. Speaker**, Chief, Population Distribution Branch, with the assistance of **Sam T. Davis**, **Richard L. Forstall**, and **Joel C. Miller**.

Responsibility for the overall planning, coordinating, and processing of the 1980 census was in the Decennial Census Division under the direction of **Gerald J. Post**, then Acting Chief, assisted by **Marie G. Argans**, **Rachel F. Brown**, **Donald R. Dalzell**, **Leonard Goldberg**, **Earle B. Knapp, Jr.**, and **Roger O. Lepage**.

Data base and generalized system support was developed and provided by Systems Development Division, **Judy M. Bedell**, Chief, under the direction of **John Jerry Bell**, Assistant Chief.

Computer processing was performed in the

Computer Operations Division, **C. Thomas DiNenna**, then Chief, and **John E. Halterman**, Assistant Chief.

The Statistical Methods Division was largely responsible for developing new procedures to obtain a more accurate count of the population. This work was supervised by **Charles D. Jones**, Chief, **David V. Bateman**, **Susan M. Miskura**, and **Robert T. O'Reagan**, Assistant Chiefs.

Geographic programs and plans were developed in the Geography Division under the direction of **Gerald F. Cranford**, then Assistant Chief, **Robert W. Marx** and **Silla G. Tomasi**, Assistant Chiefs, and **Donald I. Hirschfeld**, Special Assistant. **Joseph J. Knott** coordinated geographic operational phases.

Data collection activities were supervised in the Field Division by **Richard C. Burt**, then Chief, under the direction of **Lawrence T. Love** and **Stanley D. Matchett**, then Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

The coordination and acquisition of automatic data processing equipment were the responsibility of the Automatic Data Processing Planning Staff, **James R. Papat**, Chief, under the direction of **Richard L. Pauly**, Deputy Chief.

The system design, technical specifications, construction, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of Technical Services Division, **McRae Anderson**, Chief, assisted by **Robert E. Joseph**, Assistant Chief.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, Chief, under the direction of **Harry C. O'Haver**, Assistant Chief. The manual processing and microfilming of the questionnaires were performed at three decennial processing locations as follows: Data Preparation Division, **Don L. Adams**, Chief; Jeffersonville Processing Office, **Robert L. Kirkland**, then Processing Manager; New Orleans Processing Office, **Robert L. Allen**, Chief; and Laguna

Niguel Processing Office, **Robert N. Scheller**, Chief.

Administrative support was provided by the Administrative Services Division, **O. Bryant Benton**, then Acting Chief.

Publications editing, printing, and composition were performed in the Publications Services Division, **Raymond J. Koski**, Chief, under the direction of **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, and **Marshall L. Turner**, Assistant Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

Introduction

GENERAL	III
CONTENTS OF THE REPORT	III
SYMBOLS AND GEOGRAPHIC ABBREVIATIONS	III

GENERAL

This report presents statistics from the 1980 Census of Population on the number of inhabitants of the State, classified by urban and rural residence and by size of place; its counties or comparable areas, county subdivisions, incorporated places, census designated places, standard metropolitan statistical areas, standard consolidated statistical areas, and urbanized areas; and certain other geographic areas of the State. The abbreviated identification for this report is PC80-1-A (i.e., Population Census, 1980-Volume 1-Chapter A) followed by a number representing the State. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

A large portion of the information compiled from the 1980 Census of Population will appear in Volume 1, *Characteristics of the Population*, of which this report is part.

The 1980 census figures presented here may differ from those shown in the *Advance Reports*, PHC80-V, and in the Public Law 94-171 redistricting data products. The changes reflect corrections of errors found after the PHC80-V reports and P.L. 94-171 materials were prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in

1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 data and the 1970 data shown in this report.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and three appendixes), a table of contents, charts, 13 detailed tables, and maps. A map of the State appears after the table of contents and shows county names and boundaries, the names and boundaries of standard metropolitan statistical areas (SMSA's) and standard consolidated statistical areas (SCSA's), the names and locations of all places with a population of 25,000 or more, and SMSA central cities with fewer than 25,000 inhabitants. Then follow two pages of charts that precede the 13 tables. Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

The tables are followed by a map section which includes:

- A "County Location Index" which presents the reference coordinates and map section numbers for each county on the county subdivision map, the legend to the county subdivision map, and a State map outlining the geographic area covered by each county subdivision map section.
- A county subdivision map, often covering several pages, that shows the names and boundaries of counties

(or equivalent areas), their subdivisions, and places, as recognized by the Census Bureau in the published tables.

- One map for each urbanized area in the State which shows the names and boundaries of all States, counties, county subdivisions, and places in the area, as well as the extent of territory defined as "urbanized." The report for each State containing part of a multi-State urbanized area includes the map for the entire urbanized area.

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., urban and rural residence, census designated places, urbanized areas). Appendix B explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash "--" represents zero or a percent which rounds to less than 0.1.
- Three dots "... " mean not applicable.
- (NA) means not available.
- A minus sign preceding a figure denotes decrease.
- The prefix "r" indicates that the count has been revised since publication of 1970 census reports, or that the area was erroneously omitted, or that the area was not shown in the correct geographic relationship in the 1970 census reports.
- CDP is census designated place.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.
- (unorg.) is unorganized territory.

Standard Metropolitan Statistical Areas, Counties, and Selected Places

Total Population and Percent Change From Preceding Census for the State: 1900 to 1980

■ Percent change
▨ Population in thousands

Population and Percent Change by Type of Residence: 1980 and 1970

■ 1980
▨ 1970
Population in thousands

Percent Distribution by Type of Residence for the State: 1980 and 1970

A. URBAN AND RURAL RESIDENCE

¹ Excludes population of places in rural territory.

B. INSIDE AND OUTSIDE STANDARD METROPOLITAN STATISTICAL AREAS (SMSA'S)

CORRECTION NOTE

The official 1980 census counts of total population shown in this report supersede counts issued previously. Corrections to the figures were made after the counts were provided to the State for redistricting purposes and released in Advance Report PHC80-V for this State.

Shown below are corrections to the 1980 census counts of the total population made after the tabulations for this report were completed. Any additional corrections made after this report is printed are available by writing to Data User Services Division, Customer Services (Corrections), Bureau of the Census, Washington, D.C. 20233.

The 1980 figures shown in this publication are subject to change pending the outcome of the various lawsuits dealing with the census counts.

NOTE: The county subdivisions in this State are minor civil divisions (MCD's) which are townships in some counties and precincts in others; see the text for additional information.

¹ADAMS COUNTY. Parts of Blaine, Denver, and Highland townships were annexed to Hastings city. Annexations were also made by Kenesaw village.

²ANTELOPE COUNTY. Part of Neligh township was annexed to Neligh city. Annexations were also made by Clearwater village and Elgin city. Area was detached by Orchard village.

³ARTHUR COUNTY. The county was redistricted: Arthur precinct was created from Arthur, Braden, Edward, Lena, Spotted Horse, and Thune precincts (1970 population 606).

⁴BANNER COUNTY. The county was redistricted: Long Springs precinct was created from Epworth, Flowerfield, Hull, Lone Pine, Long Springs, and Wrights precincts (1970 population 1,034).

⁵BLAINE COUNTY. Area was annexed to and detached from Dunning village. The county was partially redistricted; Brewster precinct was created from parts of Brewster and Purdum precincts; Dunning precinct was created from parts of Dunning and Brewster precincts; Purdum precinct was created from Hawley and parts of Dunning and Purdum precincts (1970 populations for these precincts are not available).

⁶BOONE COUNTY. Part of Manchester precinct was annexed to Albion city. Annexations were also made by Petersburg village.

⁷BOX BUTTE COUNTY. Parts of Lake and Wright precincts were annexed to Alliance city. Area was annexed to and detached from Hemingford village.

⁸BOYD COUNTY. Annexations were made by Spencer village. Ware township dissolved and the area was added to Butte and Spencer townships.

⁹BROWN COUNTY. Part of Ainsworth precinct was annexed to Ainsworth city. The county was redistricted; Johnstown precinct was created from Johnstown, Lakeland, Moon Lake, and Valley precincts (1970 population: 483). The other revised precincts are not comparable to those of 1970.

¹⁰BUFFALO COUNTY. Parts of Center, Collins, and Riverdale townships were annexed to Kearney city. The county was partially redistricted; changes were made to the boundaries between Cherry Creek, Collins, Gardner, and Riverdale townships (the 1970 populations are not available). Poole village was discontinued.

¹¹BURT COUNTY. Parts of Bell Creek, Oakland, and Pershing townships were annexed to Oakland city. Part of Arizona township was annexed to Tekamah city. Annexations were also made by Craig and Decatur villages and Lyons city.

¹²BUTLER COUNTY. Part of Franklin township was annexed to David City city. Annexations were also made by Brainard, Bellwood, and Bruno villages.

¹³CASS COUNTY. Part of Plattsmouth precinct was annexed to Plattsmouth city. Parts of Center and Weeping Water precincts were annexed to Weeping Water city. Annexations were also made by Manley, Murdock, Union, Louisville, Eagle, and Murray villages. Area was detached by Elmwood village. Cedar Creek village was not returned separately in 1970.

¹⁴CEDAR COUNTY. Part of Precinct 9 was annexed to Hartington city. Annexations were also made by Belden and Coleridge villages and Laurel city.

¹⁵CHASE COUNTY. Annexations were made by Imperial city. Area was detached from Wauneta village. The county was redistricted: Imperial East precinct was created from part of Imperial precinct (1970 population not available); Imperial Rural precinct was created from Canby, Logan, and Pearl precincts and part of Imperial precinct (1970 population not available); Imperial West precinct was created from part of Imperial Precinct (1970 population not available); Lamar precinct was created from Lamar and Valley precincts (1970 population: 290); Macedonia precinct was created from Bussell and Macedonia precincts (1970 population: 303); Wauneta precinct was created from Enterprise and Wauneta precincts (1970 population: 1,013).

¹⁶CHERRY COUNTY. Part of Valentine precinct was annexed to Valentine city. Annexations were also made by Kilgore and Merriman villages. Area was detached by Crookston village. The county was partially redistricted; Crookston precinct was created from Crookston and German

precincts (1970 population: 257); Goose Creek precinct was created from Elsmore and Goose Creek precincts (1970 population: 177); Kilgore precinct was created from Georgia precinct (1970 population: 203). Valentine precinct was created from Kewanee, Sparks, Table, and Valentine precincts (1970 population: 677). Barley, Cody, King, Lackey, Loup, Merriman, and Wells precincts are not comparable and 1970 populations are not available.

¹⁷CHEYENNE COUNTY. Part of Gurley and Sidney Rural precincts were annexed to Sidney city. Annexations were also made by Lodgepole village. The county was partially redistricted; changes were made to all precincts except Colton (1970 populations for the revised precincts are not available).

¹⁸CLAY COUNTY. Part of Lone Tree township was annexed to Clay Center city. Annexations were also made to Edgar city and Glenvil village.

¹⁹COLFAX COUNTY. Part of Schuyler precinct was annexed to Schuyler city. Annexations were also made by Clarkson city.

²⁰CUMING COUNTY. Parts of Cuming and Sherman townships were annexed to West Point city. Part of Wisner township was annexed to Wisner city. Annexations were also made by Beemer village.

²¹CUSTER COUNTY. Part of Broken Arrow township was annexed to Broken Arrow city. Annexations were also made to Arnold and Anselmo villages.

²²DAKOTA COUNTY. Part of Covington precinct was annexed to South Sioux City city. Annexations were also made by Hubbard, Homer, and Jackson villages. Pigeon Creek precinct dissolved and the area was added to Emerson, Hubbard, and Summit precincts.

²³DAWES COUNTY. Parts of North West Chadron and South West Chadron precincts were annexed to Chadron city. Annexations were also made by Crawford city. The county was partially redistricted; changes were made to all precincts except East Chadron and Leonard; Whitney precinct was created from Bethel and Whitney precincts (1970 population: 279); the other revised precincts are not comparable to those of 1970.

²⁴DAWSON COUNTY. Areas were annexed from and detached to Cozad precinct by Cozad city. Part of Gothenburg precinct was annexed to Gothenburg city. Part of Lexington precinct was annexed to Lexington city. Area was detached from Overton village. Darr village was discontinued prior to 1970. The county was partially redistricted; Coyote precinct was created from Coyote and Hillside precincts (1970 population: 575); Fairview precinct was created from Antelope and Fairview precincts (1970 population: 344); German precinct was created from German and Blaine precincts (1970 population: 461); Grant precinct was created from parts of Grant and Platte precincts (1970 population not available); Overton precinct was created from Overton and Logan precincts (1970 population: 1,045); Platte precinct was created from parts of Grant and Platte precincts (1970 population not available); Ringgold precinct was created from Ringgold and Holmes precincts (1970 population: 431); Wood River precinct was created from Lincoln and Wood River precincts (1970 population: 558).

²⁵DEUEL COUNTY. Annexations were made by Big Springs and Chappel cities. The county was redistricted; parts of Big Springs and Chappel precincts were transferred to Swan precinct.

²⁶DIXON COUNTY. Annexations were made by Concord, Newcastle, and Waterbury villages. Area was annexed to and detached from Allen village.

²⁷DODGE COUNTY. Parts of Elkhorn and Platte townships were annexed to Fremont city. Parts of Cotterell and Union townships were annexed to North Bend city. Annexations were also made by Hooper city and Dodge, Ingelwood, Snyder, and Uehling villages.

²⁸DOUGLAS COUNTY. Parts of Beechwood, Benson, Douglas, Jefferson, McArdle, Millard, and Union precincts were annexed to Omaha city. Omaha city and the part of Millard city in Douglas County were merged and designated as Omaha city (combined 1970 population: 354,786). Annexations were made by Elkhorn, Ralston, and Valley cities and Bennington village. Area was detached from Boys Town village.

²⁹DUNDY COUNTY. Annexations were made by Benkelman city. The county was redistricted; Haigler precinct was created from Harrison and Haigler precincts (1970 population: 473); Hoover precinct was created from Hoover and Lutz precincts (1970 population: 153); Parks precinct was created from Allston, Parks, and Thayer precincts (1970 population: 185); the other revised precincts are not comparable to those of 1970.

³⁰FILLMORE COUNTY. Annexations were made by Geneva city and Milligan and Shickley villages. Area was detached by Exeter village.

³¹FRANKLIN COUNTY. Annexations were made by Eustis village. Ash Grove and Farmers townships consolidated and were designated as Ash Grove township (1970 population: 206). Oak Grove and Bloomington townships consolidated and were

Table 4. Population of County Subdivisions: 1960 to 1980—Con.

designated as Bloomington township (1970 population: 383). Buffalo and Grant townships consolidated and were designated as Grant township (1970 population: 288). Marion and Logan townships consolidated and were designated as Marion township (1970 population: 227). Washington and Franklin townships consolidated and were designated as Washington township (1970 population: 1,404).

³²FRONTIER COUNTY. Annexations were made by Eustis village.

³³FURNAS COUNTY. Annexations were made by Arapahoe and Cambridge cities. Area was detached by Edison village. The county was partially redistricted: Arapahoe precinct was created from Arapahoe and Union precincts (1970 population: 1,402); Beaver City precinct was created from Beaver City and Richmond precincts (1970 population: 189); Cambridge precinct was created from Logan and Cambridge precincts (1970 population: 1,433); Edison precinct was created from Edison and Weaver precincts (1970 population: 365); Hendley precinct was created from Eureka, Lynden, Rockton, and Spring Green precincts (1970 population: 428); Holbrook precinct was created from Burtons Bend and Vincent precincts (1970 population: 529); Hollinger precinct was created from Lincoln and Maple Creek precincts (1970 population: 187); Wilsonville precinct was created from Sherman and Wilsonville precincts (1970 population: 434).

³⁴GAGE COUNTY. Parts of Midland and Riverside townships were annexed to and detached from Beatrice city. Annexations were made by Adams, Clatonia, Cortland, Filley, and Pickrell villages.

³⁵GARDEN COUNTY. Annexations were made by Oshkosh city. The county was partially redistricted: Alkali precinct was created from Alkali and Pioneer precincts (1970 population: 116); Blue Creek precinct was created from Blue Creek and Park precincts (1970 population: 728); Lost Creek precinct was created from Sughrue precinct and part of Lost Creek precinct (1970 population not available); Oshkosh No. 1 precinct was created from Rush Creek and part of Lost Creek precinct (1970 population not available); Oshkosh No. 3 precinct was created from part of Lost Creek precinct (1970 population not available).

³⁶GARFIELD COUNTY. Part of Rockford precinct was annexed to Burwell city.

³⁷GOSPER COUNTY. Annexations were made by Elwood village.

³⁸GREELEY COUNTY. The county was partially redistricted: Scotia No. 1 (coextensive with Scotia village) and Scotia No. 2 precincts were created from Scotia precinct; Spalding No. 1 (coextensive with Spalding village) and Spalding No. 2 precincts were created from Spalding precinct (1970 populations are not available). Part of Scotia No. 2 precinct was annexed to Scotia precinct No. 1 and Scotia village.

³⁹HALL COUNTY. Grand Island city and Parkview village merged prior to 1970. Parts of Center and Washington townships were annexed to Grand Island city. Annexations were also made by Alda, Cairo, and Doniphan villages and Wood River city.

⁴⁰HAMILTON COUNTY. Parts of Aurora and Grant precincts were annexed to Aurora city. Annexations were also made by Hampton village. The county was partially redistricted: East Otis and West Otis precincts were created from Otis precinct (1970 populations are not available).

⁴¹HARLAN COUNTY. Part of Alma township was annexed to Alma city.

⁴²HAYES COUNTY. Annexations were made by Hayes Center village.

⁴³HITCHCOCK COUNTY. Annexations were made by Stratton and Trenton villages.

⁴⁴HOLT COUNTY. Part of Grattan township was annexed to O'Neill city. Annexations were also made by Atkinson city and Inman village.

⁴⁵HOOKER COUNTY. Annexations were made by Mullen village. The county was redistricted: Mullen precinct was created from Abby, Mullen, and Valley precincts (1970 population: 939).

⁴⁶HOWARD COUNTY. Part of St. Paul precinct was annexed to St. Paul city. Annexations were also made by Howard City village.

⁴⁷JEFFERSON COUNTY. Part of Fairbury precinct was annexed to Fairbury city. Annexations were also made by Jansen, Plymouth, and Steele City villages.

⁴⁸JOHNSON COUNTY. Annexations were made by Cook and Sterling villages.

⁴⁹KEARNEY COUNTY. Annexations were made by Minden city and Axtell village. Area was detached by Wilcox village.

⁵⁰KEITH COUNTY. Parts of Brule, North Ogallala, South Ogallala, and Whitetail precincts were annexed to Ogallala city.

⁵¹KEYA PAHA COUNTY. The county was redistricted: the revised precincts are not comparable to those of 1970.

⁵²KIMBALL COUNTY. Annexations were made by Kimball city and Bushnell village. The county was redistricted:

Antelope precinct was created from South Divide precinct and part of Antelope precinct (1970 population is not available); Bushnell precinct was created from Bushnell and Johnson precincts (1970 population: 512); Dix precinct was created from Dix and Union precincts (1970 population: 655); Kimball No. 1 and Kimball No. 2 precincts were created from parts of Antelope precinct (1970 populations not available).

⁵³KNOX COUNTY. Part of Morton township was annexed to Bloomfield city. Annexations were also made by Crofton, Center, Niobrara, Verdigre, and Wausa villages. Area was also detached by Niobrara village. Santee village was incorporated; (1970 population: 51).

⁵⁴LANCASTER COUNTY. Parts of Garfield, Grant, Lancaster, Middle Creek, North Bluff, Oak, West Lincoln, and Yankee Hill precincts were annexed to Lincoln city. Annexations were also made to Denton, Firth, Hellam, Hickman, and Malcolm villages and Waverly city.

⁵⁵LINCOLN COUNTY. Parts of East Hinman, Hinman, and Osgood precincts were annexed to North Platte city. North Platte city also detached area to Hinman precinct. Annexations were made by Brady and Hershey villages. The county was partially redistricted: changes were made to the boundaries of all precincts except Miller and North Platte; Dickens precinct was created from Dickens and Willow precincts (1970 population: 135); Garfield precinct was created from Garfield, Harrison, Myrtle, Table, and Whittier precincts (1970 population: 233); Medicine precinct was created from Medicine and Somerset precincts (1970 population: 255); Sellers precinct was created from Kem, Plant, and Sellers precincts (1970 population: 336); Wallace precinct was created from Hooker and Wallace precincts (1970 population: 486).

⁵⁶LOGAN COUNTY. The county was partially redistricted: Stapleton No. 1 precinct was created from Burt, Cody Lake, Lone Valley, and parts of Dorp and Stapleton precincts; Stapleton No. 2 precinct was created from parts of Dorp and Stapleton precincts (1970 populations not available).

⁵⁷LOUP COUNTY. The county was redistricted: Kent precinct was created from Kent and Little York precincts and part of Taylor precinct; Madison Square precinct was created from Madison Square and Sawyer precincts and part of Taylor precinct; Taylor precinct was created from Strohi precinct and part of Taylor precinct (1970 populations not available).

⁵⁸MADISON COUNTY. Parts of Norfolk and Warnerville precincts were annexed to Norfolk city. Part of Jefferson precinct was annexed to Tilden city. Annexations were also made by Battle Creek village. The county was partially redistricted: Highland precinct was created from Highland and South Deer Creek precincts (1970 population: 599); Meadow Grove precinct was created from Meadow Grove and North Deer Creek precincts (1970 population: 599).

⁵⁹MERRICK COUNTY. Part of Lone Tree township was annexed to Central City city. Annexations were also made by Clarks, Palmer, and Silver Creek villages.

⁶⁰MORRILL COUNTY. Area was annexed from and detached to West Bayard precinct by Bayard city. Part of West Camp Clarke precinct was annexed to Bridgeport city. Broadwater village was returned in error in 1970 as independent of Broadwater precinct. The county was partially redistricted: changes were made to the boundaries of all precincts except Redington and Yockey precincts; Broadwater precinct was created from Broadwater, Eastwood, Kinkaid, and Weir-Lisco precincts (1970 population: 351); Haynes precinct was created from Bonner and Haynes precincts (1970 population: 129); the other revised precincts are not comparable to those of 1970.

⁶¹NANCE COUNTY. Area was detached from Genoa city.

⁶²NEMAHA COUNTY. Area was annexed from and detached to Douglas precinct by Auburn city. Annexations were made by Johnson village.

⁶³NUCKOLLS COUNTY. Part of Beaver precinct was annexed to Superior city. Annexations were also made to Nelson city. Area was detached by Hardy village. Angus village was disincorporated.

⁶⁴OTGE COUNTY. Parts of Four Mile and Wyoming precincts were annexed to Nebraska City city. Annexations were also made by Burr, Dunbar, Otoe, Palmyra, and Unadilla villages and Syracuse city. The county was partially redistricted: Berlin precinct was created from Berlin and North Branch precincts (1970 population: 765); Delaware precinct was created from Belmont and Delaware precincts (1970 population: 813); McWilliams precinct was created from North McWilliams and South McWilliams precincts (1970 population: 607); North Syracuse precinct was created from parts of North Syracuse and South Syracuse precincts (1970 population not available); Palmyra precinct was created from North Palmyra and South Palmyra precincts (1970 population: 815); Russell precinct was created from North Russell and South Russell precincts (1970 population: 780); South Syracuse precinct was created from parts of North Syracuse and South Syracuse precincts (1970 population not available).

Table 4. Population of County Subdivisions: 1960 to 1980—Con.

⁶⁵PAWNEE COUNTY. Part of Precinct 2, Pawnee No. 2 was annexed to Pawnee City city. The county was partially redistricted; changes were made to the boundaries of all precincts except Precinct 6, South Fork, and Precinct 7, Turkey Creek which were named South Fork and Turkey Creek precincts respectively in 1970; Precinct 4, Stelnauer was created from Clear Creek and Stelnauer precincts (1970 population: 503); Precinct 5, Burchard was created from Miles, Mission Creek, Plum Creek, and West Branch precincts (1970 population: 720); the other revised precincts are not comparable to those of 1970.

⁶⁶PERKINS COUNTY. Annexations were made by Grant city and Madrid and Venango villages. The county was partially redistricted; Grant precinct was created from part of Liberty precinct; Valley precinct was added to the remaining part of Liberty precinct; Lisbon precinct was created from Lisbon and Highland precincts (1970 population: 227); and Yankee precinct was created from Yankee and Marvin precincts (1970 population: 396).

⁶⁷HELPS COUNTY. Parts of Prairie and Sheridan townships were annexed to Holdrege city. Area was annexed and detached by Bertrand village. Industry and Rock Falls townships were consolidated and designated as Industry-Rock Falls township (combined 1970 population: 271).

⁶⁸PIERCE COUNTY. Part of Pierce precinct was annexed to Pierce city. Part of North Dry Creek precinct was annexed to Plainview city. Annexations were also made by Osmond city.

⁶⁹PLATTE COUNTY. Part of Columbus township was annexed to Columbus city. Annexations were also made by Humphrey city and Duncan, Lindsay, Monroe, and Platte Center villages.

⁷⁰POLK COUNTY. Part of Osceola precinct was annexed to Osceola city. Part of Stromsburg precinct was annexed to Stromsburg city. Annexations were also made by Polk and Shelby villages.

⁷¹RED WILLOW COUNTY. Parts of Perry and Willow Grove precincts were annexed to McCook city. The county was partially redistricted; Beaver and Missouri Ridge precincts were created from Missouri Ridge-Beaver precinct; Box Elder and Coleman precincts were created from Coleman-Box Elder precinct; Danbury and Gerver precincts were created from Gerver-Danbury precinct; Driftwood and Grant precincts were created from Driftwood-Grant precinct (1970 populations are not available).

⁷²RICHARDSON COUNTY. Part of Falls City precinct was annexed to Falls City city. Annexations were also made by Shubert village.

⁷³SALINE COUNTY. Part of Crete precinct was annexed to Crete city. Area was annexed from and detached to Friend precinct by Friend city. Annexations were also made by De Witt and Dorchester villages.

⁷⁴SARPY COUNTY. Parts of Bellevue No. 2, Highland, and Highland No. 3 precincts were annexed to Bellevue city. Part of Mella-Forest City precinct was annexed to Gretna city. Parts of Papillion No. 2 precinct were annexed to La Vista and Papillion cities. Part of Plattford-Springfield No. 2 precinct was annexed to Springfield city. The part of Millard city in Sarpy County disincorporated; the part in Douglas County was merged with Omaha city.

⁷⁵SAUNDERS COUNTY. Parts of Center and Stocking townships were annexed to Wahoo city. Area was detached from Wahoo city and reverted to Center township. Annexations were also made by Ashland city and Cedar Bluffs, Ceresco, Mead, Weston, and Yutan villages.

⁷⁶SCOTTS BLUFF COUNTY. Part of Gering precinct was annexed to Gering city. Part of Fanning precinct was annexed to Mitchell city. Part of West Winters Creek and East Winters Creek precincts were annexed to Scottsbluff city. Annexations were also made by Lyman, Morrill, and Terrytown villages.

⁷⁷SEWARD COUNTY. Part of Precinct G was annexed to Seward city. Annexations were also made by Garland, Staplehurst, and Utica villages and Milford city. The county was partially redistricted; Precinct E was created from Precinct E and part of Precinct L (1970 population not available); Precinct H was created from Precinct A and Precinct H (1970 population: 696); Precinct M, Beaver Crossing was created from parts of Precinct L and Precinct M (1970 population not available); Precinct N, Cordova was created from part of Precinct M (1970 population not available).

⁷⁸SHERIDAN COUNTY. Parts of East Gordon and West Gordon precincts were annexed to Gordon city. Part of North Rushville precinct was annexed to Rushville city. Clinton was erroneously returned in 1970 as an incorporated village. The county was partially redistricted; changes were made to the boundaries of all precincts except East Gordon, Kinkaid, Reno, and Wounded Knee; Ellsworth precinct was created from Bingham, Ellsworth, and Lakeside precincts (1970 population: 210); West Gordon precinct was created from West Gordon precinct and the unorganized territory (1970 population: 358); the other revised precincts are not comparable to those of 1970.

⁷⁹SHERMAN COUNTY. Annexations were made by Litchfield village and Loup City city.

⁸⁰SIOUX COUNTY. Annexations were made by Harrison village. The county was redistricted; Sheep Creek precinct was created from Roosevelt, Sheep Creek, Spotted Tail, and Townsend precincts (1970 population: 810); Snake Creek precinct was created from Lowell and Snake Creek precincts (1970 population: 96); Whistle Creek precinct was created from Running Water and Whistle Creek precincts (1970 population: 130); the other revised precincts are not comparable to those of 1970.

⁸¹STANTON COUNTY. Part of Stanton precinct was annexed to Stanton city.

⁸²THAYER COUNTY. Part of Hebron precinct was annexed to Hebron city. Annexations were also made by Byron village.

⁸³THOMAS COUNTY. Annexations were made by Halsey and Thedford villages.

⁸⁴THURSTON COUNTY. Annexations were made by Winnebago village. Area was annexed and detached by Pender village.

⁸⁵VALLEY COUNTY. Elyria village and Ord city were erroneously returned in 1970 as independent of their townships. Annexations were made by Ord city.

⁸⁶WASHINGTON COUNTY. Annexations were made by Arlington and Herman villages and Blair and Fort Calhoun cities. The county was redistricted; Township 1 was created from part of Fort Calhoun township; Township 2 was created from DeSoto and part of Blair City township; Township 3 and Township 4 were created from parts of Blair City township; Township 5 was created from Cuming City, Herman, and part of Blair City townships; Township 6 was created from Blair, Fontanelle, and part of Blair City township; township 7 was created from Arlington and parts of Fort Calhoun townships (1970 populations are not available).

⁸⁷WAYNE COUNTY. Annexations were made by Carroll and Winside villages and Wakefield and Wayne cities.

⁸⁸WEBSTER COUNTY. Annexations were made by Bladen and Blue Hill villages. The county was redistricted; Bladen precinct was created from Glenwood, Batin, Catherton, and Harmony precincts (1970 population: 773); Blue Hill precinct was created from Elm Creek and Potsdam precincts (1970 population: 1,152); the other revised precincts are not comparable to those of 1970.

⁸⁹WHEELER COUNTY. Annexations were made by Ericson village. The county was partially redistricted; Bartlett precinct was created from Mud Creek and Bartlett precincts (1970 population: 377); Beaver precinct was created from Buffalo and Caldwell precincts (1970 population: 185); Clearwater precinct was created from Clearwater and Francis precincts (1970 population: 223).

⁹⁰YORK COUNTY. Parts of Leroy, Baker, Lockridge, and New York precincts were annexed to York city. Annexations were also made by Henderson city and Waco village.

Asterisk following place name indicates place is coextensive with a county subdivision. County subdivision name is shown only when it differs from place name.

Note: All political boundaries are as of January 1, 1980. Boundaries of small areas may not be depicted exactly due to scale of map. Where boundaries coincide, boundary symbol of higher level geographic area is shown. Those places shown with county subdivision symbol, but identified with type styles for incorporated or census designated places, are treated as county subdivisions for census purposes.

COUNTY LOCATION INDEX

This list presents the reference coordinates for each county on the map on page 3 and on the county subdivision map. Map section numbers refer to the county subdivision map only.

STATES

The 50 States and the District of Columbia are the constituent units of the United States.

COUNTIES

In most States, the primary divisions are termed counties. In Louisiana, these divisions are known as parishes. In Alaska, which has no counties, the county equivalents are the organized boroughs together with the "census areas" which were developed for general statistical purposes by the State of Alaska and the Census Bureau. In four States (Maryland,

Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States. That part of Yellowstone National Park in Montana is treated as a county equivalent. The District of Columbia has no primary divisions, and the entire area is considered equivalent to a county for census purposes.

COUNTY SUBDIVISIONS

Statistics for subdivisions of counties or equivalent areas are presented as follows:

1. Minor civil divisions (MCD's) in 29 States: Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin. (In 1970, the county subdivisions recognized for North Dakota were census county divisions.)

MCD's are primary divisions of counties established under State law. These MCD's are variously designated as townships, towns, precincts, districts, wards, plantations, Indian reservations, grants, purchases, gores, locations, or areas. In some States, all incorporated places are also MCD's in their own right. In other States, incorporated places are subordinate to or part of the MCD(s) in which they are located, or the pattern is mixed—some incorporated places are independent MCD's and others are subordinate to one or more MCD's.

For 11 States (Connecticut, Maine, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Pennsyl-

vania, Rhode Island, Vermont, and Wisconsin), table 5a presents counts for towns and townships.

In 8 States (Arkansas, Iowa, Kansas, Maine, Minnesota, North Carolina, North Dakota, and South Dakota), certain counties contain territory not included in an MCD recognized by the Census Bureau. Each separate area of unorganized territory in these States is recognized as one or more subdivisions and given a name by the Bureau; the name is followed by the designation "(unorg.)."

2. Census county divisions (CCD's) in 20 States: Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.

CCD's are geographic areas which have been defined by the Census Bureau in cooperation with State and county officials for the purpose of presenting statistical data. CCD's have been defined in States where there are no legally established MCD's, where the boundaries of MCD's change frequently, and/or where the MCD's are not generally known to the public. Using published guidelines, the CCD's have usually been designed to represent community areas focused on trading centers, or to represent major land use areas, and to have visible, permanent, and easily described boundaries.

3. Census subareas in Alaska. For the 1980 census, census subareas have been delineated cooperatively by the Census Bureau and the State of Alaska for statistical purposes. These areas replace the subdivisions used for the 1970 census.

4. Quadrants in the District of Columbia.

PLACES

Two types of places are recognized in the census reports—incorporated places and census designated places—as defined below.

Incorporated Places

Incorporated places recognized in the reports of the census are those which are incorporated under the laws of their respective States as cities, boroughs, towns, and villages, with the following exceptions: boroughs in Alaska and New York, and towns in the six New England States, New York, and Wisconsin. The towns in the New England States, New York, and Wisconsin, and the boroughs in New York are recognized as MCD's for census purposes; the boroughs in Alaska are county equivalents.

Some incorporated places include narrow strips of land (frequently only the rights-of-way of streets) which typically have no population or housing units. These areas, termed "corporate corridors," are generally not shown on the maps or in the tables of 1980 census reports. The existence of these areas is indicated in the footnotes to table 4.

In Connecticut, a unique situation exists in which one incorporated place (Woodmont borough) is subordinate to another (Milford city). The city of Milford is coextensive with the town of Milford. In the tables for the Connecticut report in this series and other series of 1980 census reports, data shown for Milford city exclude those for Woodmont borough, and the user must therefore refer to data for Milford town (which include those for the borough) for data for Milford city.

Census Designated Places

As in the 1950, 1960, and 1970 censuses, the Census Bureau has delineated boundaries for closely settled population centers without corporate limits. In 1980, the name of each such place is followed by "(CDP)," meaning "census designated place." In the 1970 and earlier censuses, these places were identified by "(U)," meaning "unincorporated place." To be recognized for the 1980 census, CDP's must have a minimum 1980 population as follows:

Area	Minimum CDP population
Alaska	25
Hawaii	300
All other States:	
Inside urbanized areas:	
With one or more cities of 50,000 or more	5,000
With no city of 50,000 or more	1,000
Outside urbanized areas . . .	1,000

Hawaii is the only State with no incorporated places recognized by the Bureau of the Census. All places shown for Hawaii in the 1980 census reports are CDP's. Honolulu CDP essentially represents the Honolulu Judicial District. The city of Honolulu, coextensive with the county of Honolulu, is not recognized for census purposes.

Census designated place boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for CDP's appear on the county subdivision map which follows the detailed tables. Detailed maps are available for purchase from the Census Bureau.

URBAN AND RURAL RESIDENCE

As defined for the 1980 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, the urban population consists of all persons living in (1) places of 2,500 or more inhabitants incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities; (2) census designated places of 2,500 or more inhabitants; and (3) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 or more inhabitants and areas (usually minor civil

divisions) classified as urban under special rules relating to population size and density. A definition of urban population restricted to incorporated places having 2,500 or more inhabitants excludes a number of large and densely settled areas merely because they are not incorporated. Prior to 1950, an effort was made to avoid some of the more obvious omissions by inclusion of selected areas which were classified as urban under special rules. Even with these rules, however, the inhabitants of many large and closely built-up areas were excluded from the urban population.

To improve its measure of the urban population, the Bureau of the Census in 1950 adopted the concept of the urbanized area and delineated boundaries for unincorporated places. For the 1950 census, the urban population was defined as all persons residing in urbanized areas and, outside these areas, in all places, incorporated or unincorporated, which had 2,500 or more inhabitants. With the following three exceptions, the 1950 definition of urban has continued substantially unchanged. First, in 1960 (but not in 1970 or 1980), certain towns in the New England States, townships in New Jersey and Pennsylvania, and Arlington County, Va., were designated as urban. However, most of the residents of these "special rule" areas would have been classified as urban in any event because they were residents of an urbanized area or an unincorporated place of 2,500 or more. Second, "extended cities" were identified in 1970 and 1980. Their recognition has, in general, had very little impact on the urban and rural population figures. Third, changes since 1970 in the criteria for defining central cities have permitted urbanized areas to be defined around smaller centers.

Extended Cities

Since 1960 there has been an increasing trend toward the extension of city boundaries to include territory essentially rural in character. The classification of all the inhabitants of such cities as urban would include in the urban population persons whose environment is primarily rural in character. For the 1970 and 1980 censuses, in order to separate these people from those residing in the closely settled portions of such cities, the Bureau of the Census classified as rural a portion

Appendix A.—Area Classifications

or portions of each such city that was located in an urbanized area. To be treated as an extended city, a city must contain one or more areas that are each at least 5 square miles in extent and have a population density of less than 100 persons per square mile. The area or areas must constitute at least 25 percent of the land area of the legal city or include at least 25 square miles. These areas are excluded from the urbanized area.

Those cities designated as extended cities thus consist of an urban part and a rural part. In table 5, the population figure for the urban part is shown separately under the total population for the entire city. Only the urban part is considered to be the central city of an urbanized area. However, the term "central city" as used for SMSA's refers to the entire population within the legal boundaries of the city.

"Current" and "Previous" Urban and Rural Definitions

In the tables showing historical data by urban and rural residence, the "current" figures refer to the urban definition used in 1950, 1960, 1970, and 1980 (inside urbanized areas and, outside urbanized areas, in places of 2,500 or more inhabitants). The "previous" figures presented in this report have been adjusted to constitute a substantially consistent series based on incorporated places of 2,500 or more inhabitants with additional areas defined as urban under special rules in censuses prior to 1950.

URBANIZED AREAS

Definition

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population in the vicinity of large cities. An urbanized area consists of a central city or cities, and surrounding closely settled territory ("urban fringe").

The following criteria are used in determining the eligibility and definition of the 1980 urbanized areas:¹

An urbanized area comprises an

incorporated place² and adjacent densely settled surrounding area that together have a minimum population of 50,000.³ The densely settled surrounding area consists of:

1. Contiguous incorporated or census designated places having:
 - a. A population of 2,500 or more; or,
 - b. A population of fewer than 2,500 but having a population density of 1,000 persons per square mile, a closely settled area containing a minimum of 50 percent of the population, or a cluster of at least 100 housing units.
2. Contiguous unincorporated area which is connected by road and has a population density of at least 1,000 persons per square mile.⁴
3. Other contiguous unincorporated area with a density of less than 1,000 persons per square mile, provided that it:
 - a. Eliminates an enclave of less than 5 square miles which is surrounded by built-up area.
 - b. Closes an indentation in the boundary of the densely settled area that is no more than 1 mile across the open end and encompasses no more than 5 square miles.
 - c. Links an outlying area of qualifying density, provided that the outlying area is:
 - (1) Connected by road to, and is not more than 1½ miles from, the main body of the urbanized area.
 - (2) Separated from the main body of the urbanized area by water or other undevelopable area, is connected by road to the main body of the urbanized area, and is not more than 5 miles

²In Hawaii, incorporated places do not exist in the sense of functioning local governmental units. Instead, census designated places are used in defining a central city and for applying urbanized area criteria.

³The rural portions of extended cities, as defined in the Census Bureau's extended city criteria, are excluded from the urbanized area. In addition, for an urbanized area to be recognized, it must include a population of at least 25,000 that does not reside on a military base.

⁴Any area of extensive nonresidential urban land use, such as railroad yards, airports, factories, parks, golf courses, and cemeteries, is excluded in computing the population density.

from the main body of the urbanized area.

4. Large concentrations of nonresidential urban area (such as industrial parks, office areas, and major airports), which have at least one-quarter of their boundary contiguous to an urbanized area.

Urbanized Area Titles

1. The titles of urbanized areas existing prior to the 1980 Census of Population and Housing are retained unchanged except for mergers and for those areas meeting items 4 and/or 5 of the titling criteria.
2. The titles of new urbanized areas qualifying as the result of the 1980 census are determined as follows:
 - a. The name of the incorporated place with the largest population in the urbanized area is always listed.
 - b. The names of up to two additional incorporated places may be listed, with eligibility determined as follows:
 - (1) Those with a population of at least 250,000.
 - (2) Those with a population of 15,000 to 250,000, provided that they are at least one-third the population of the largest place in the urbanized area.
3. Area titles that include the names of more than one incorporated place start with the name of the largest and list the others in descending order of their population.
4. In addition to incorporated place names, the titles contain the name of each State into which the urbanized area extends.
5. Regional titles may be used to identify urbanized areas with populations over 1 million, in which case only the largest city of the urbanized area is included in the title.

Urbanized Area Central Cities

The central cities of urbanized areas are those named in the titles except where regional titles are used. In such cases, the central cities are those that have qualified under items 1 or 2 of the titling criteria.

¹All references to population counts and densities relate to data from the 1980 census.

Counts and data for central cities of urbanized areas refer to the urban portion of these cities, thus excluding the rural portions of extended cities, as discussed above.

STANDARD METROPOLITAN STATISTICAL AREAS

Definition

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The standard metropolitan statistical area (SMSA) classification is a statistical standard, developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The SMSA's are designated and defined by the Office of Management and Budget, following a set of official published standards developed by the interagency Federal Committee on Standard Metropolitan Statistical Areas.

Each SMSA has one or more central counties containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An SMSA may also include outlying counties which have close economic and social relationships with the central counties. The outlying counties must have a specified level of commuting to the central counties and must also meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, SMSA's are composed of cities and towns rather than whole counties.

The population living in SMSA's may also be referred to as the metropolitan population. The population is subdivided into "inside central city (or cities)" and "outside central city (or cities)." The population living outside SMSA's constitutes the nonmetropolitan population.

SMSA Titles

Most SMSA's have at least one central city. The titles of SMSA's include up to three city names, as well as the name of each State into which the SMSA extends. For the 1980 census, central cities of

SMSA's are those named in the titles of the SMSA's, with the exception of Nassau-Suffolk, N.Y., which has no central city, and Northeast Pennsylvania, the central cities of which are Scranton, Wilkes-Barre, and Hazleton. Data on central cities of SMSA's include the entire population within the legal city boundaries. In Hawaii, where there are no incorporated places recognized by the Bureau of the Census, census designated places are recognized as central cities.

New SMSA Standards

New standards for designating and defining metropolitan statistical areas were published in the *Federal Register* on January 3, 1980. The SMSA's recognized for the 1980 census comprise (1) all areas as defined on January 1, 1980, except for one area which was defined provisionally during the 1970's on the basis of population estimates but whose qualification was not confirmed by 1980 census counts; and (2) a group of 36 new areas defined on the basis of 1980 census counts and the new standards that were published on January 3, 1980.

The new standards will not be applied to the areas existing on January 1, 1980, until after data on commuting flows become available from 1980 census tabulations. At that time, the boundaries, definitions, and titles for all SMSA's will be reviewed.

To aid users who want to become familiar with the SMSA standards and how they are applied, documents are available from the Office of Management and Budget, Washington, D.C. 20503.

STANDARD CONSOLIDATED STATISTICAL AREAS

In some parts of the country, metropolitan development has progressed to the point that adjoining SMSA's are themselves socially and economically interrelated. These areas are designated standard consolidated statistical areas (SCSA's) by the Office of Management and Budget, and are defined using standards included as part of the new SMSA standards described above.

RELATIONSHIP BETWEEN URBANIZED AREAS AND METROPOLITAN AREAS

Although the urbanized area and the metropolitan area are closely related in concept, there are important differences. The urbanized area has a more limited territorial extent. The urbanized area consists of the physically continuously built-up territory around each larger city and thus corresponds generally to the core of high and medium population density at the heart of the metropolitan area. In concept, a metropolitan area is always larger than its core urbanized area, even if the metropolitan area is defined in terms of small building blocks, because it includes discontinuous urban and suburban development beyond the periphery of the continuously built-up area. The metropolitan area may also include some rural territory whose residents commute to work in the city or its immediate environs, while the urbanized area does not include such territory. In practice, because the SMSA definitions use counties as building blocks, considerable amounts of rural territory with few commuters are often included. However, even in New England, where cities and towns are used as building blocks, SMSA's are generally much larger in extent than their core urbanized areas.

It sometimes occurs, because of boundary anomalies, that a portion of the urbanized area extends across the SMSA boundary into a nonmetropolitan county or another SMSA. However, such portions are usually quite small in area and population.

The new standards provide that each SMSA be associated with an urbanized area. However, the reverse is not true—there are some urbanized areas that are not in any SMSA. This situation occurs when an urbanized area does not qualify as an SMSA of at least 100,000 population (75,000 in new England), and the urbanized area has no city with at least 50,000 population.

In addition, some SMSA's contain more than one urbanized area. This occurs when—

1. Two or more urban concentrations not far apart and of generally similar size have separate urbanized areas but qualify as a single SMSA (for example, Greensboro, High Point, and Winston-Salem, North Carolina). Often the

Appendix A.—Area Classifications

SMSA title includes the name of the largest city of each of the component urbanized areas.

2. A very large SMSA includes one or more smaller separate urbanized areas within its boundaries. Examples are the separate urbanized areas around Joliet, Aurora, and Elgin within the Chicago SMSA.

BOUNDARY CHANGES

The boundaries of some of the areas shown in this report have changed between an earlier census for which counts are shown and January 1, 1980. The historic counts shown here for counties, county subdivisions, places, and urbanized areas have not been adjusted for such changes and thus reflect the population in the areas as defined at each census. The historic counts for SMSA's and SCSA's have been adjusted to reflect the areas defined as of the 1980 census. Information on boundary changes for counties, county subdivisions, and incorporated places is presented in table 4. For information on boundary changes prior to 1970, see the *Number of Inhabitants* report for each census.

AREA MEASUREMENTS

Area measurement figures for counties and county equivalent areas in the 1980 census were prepared using a process called digitizing. This process involved first verifying and highlighting the county boundaries recognized for the 1980 census on copies of the topographic quadrangle maps produced by the U.S. Geological Survey and relocating those boundaries where necessary. An electronically assisted digitizing device was

then used to trace over each county line and to calculate the latitude/longitude values associated with each line. From the latitude/longitude information associated with each county, the total area of the county in square miles was computed. The total area figure derived for each county was subsequently reviewed against similar information from the 1960 and 1970 censuses and other sources, with significant variations in area being rechecked and adjudicated.

Following this review, the total area of the county was apportioned between land and water. No direct measurements were made to determine these values separately; instead, information from which the final figures were compiled was gathered from several other Federal and State agencies. The boundary between inland and other water was part of the original digitizing process and was treated as though it were a county boundary line. After all operations, a mathematical conversion was performed to convert all values from square miles to square kilometers.

Differences between 1980 area figures and those reported in previous censuses are attributable to changes in base map scale and detail, methodology for measurement, and occasionally to county boundary change or relocation.

HISTORIC COUNTS

As in past censuses, the general rule for presenting historic figures for States, counties, county subdivisions, and places is to present counts only for single, continually existing entities. Stated another way, if an area existed at both the current and previous censuses, a count is shown for the previous census. Included in this category are areas which are of the same type (county, county

subdivision, or place) which have retained the same name or have changed their name. Also included are places which have merged and retained the name of one of the merged areas.

In cases where entities have been formed since the earlier censuses, such as a newly incorporated place or a newly organized township, the symbol three dots "... " is shown for the earlier census. The three-dot symbol is also shown for those parts of a place which have extended into a new county or county subdivision through annexation or other expansion of boundaries.

In a few cases, changes in the boundaries of county subdivisions have been made so as to split a place into two or more parts. Historic counts for the parts of the place as currently split may not always be available. In these cases, "(NA)" is shown for the place by county subdivision; however, the total population of the place is shown in tables showing the place by State or county.

For most places incorporated since 1970, or for census county divisions with altered boundaries, 1970 population counts for the 1980 territory are stated in the footnotes to table 4.

In a number of tables in this report, 1970 counts are shown for aggregations of individual areas such as the number and population of places by size groups or urban and rural distributions. In some instances, population counts for individual areas have been revised since publication of the 1970 census reports (indicated by the prefix "r" as described in the section "Symbols and Geographic Abbreviations" in the Introduction). These revisions have not been carried through to the various aggregations; therefore, it may not be possible to determine the individual areas in a given aggregation using the 1970 population counts shown here.

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to the first U.S. census in 1790, each person enumerated in the 1980 census was counted as an inhabitant of his or her "usual place of residence," which is generally construed to mean the place where the person lives and sleeps most of the time. This place is not necessarily the same as the person's legal residence or voting residence. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishment of residence rules for certain categories of persons whose usual place of residence is not immediately apparent. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be staying on Census Day (April 1). Persons without a usual place of residence, however, were counted where they happened to be staying.

Armed Forces

Members of the Armed Forces living on a military installation were counted,

as in every previous census, as residents of the area in which the installation was located; members of the Armed Forces not living on a military installation were counted as residents of the area in which they were living. Persons in families with Armed Forces personnel were counted where they were living on Census Day (i.e., the military installation or "off base," as the case might be).

Each Navy ship was attributed to the municipality that the Department of the Navy designated as its homeport, except for those ships which were deployed to the 6th or 7th Fleet on Census Day. As was done in the 1970 census, naval personnel aboard deployed ships were defined in the 1980 census as part of the overseas population, because deployment to the 6th or 7th Fleet implies a long-term overseas assignment. In homeports with fewer than 1,000 naval personnel assigned to ships, the crews were counted aboard the ship. In homeports with 1,000 or more naval personnel assigned to ships, the naval personnel who indicated that they had a usual residence within 50 miles of the homeport of their ship were attributed to that residence. When a homeport designated by the Navy was contained in more than one municipality, ships homeported and berthed there on Census Day were assigned by the Bureau to the municipality in which the land immediately adjacent to the dock or pier was actually located. Other ships attributed by the Navy to that homeport, but which were not physically present and not deployed to the 6th or 7th Fleet on Census Day, were allocated to the municipality named on the Navy's homeport list.

Crews of Merchant Vessels

Shipboard Census Reports were mailed to crews of merchant vessels through the

ships' respective owner-operators based on lists of U.S. flag merchant vessels obtained from the Maritime Administration, U.S. Department of Commerce.

If the ship was berthed in a U.S. port on Census Day, the crew was enumerated as of that port. If the ship was not berthed in a U.S. port but was inside the territorial waters of the United States, the crew was enumerated as of (a) the port of destination if that port was inside the United States or (b) the homeport of the ship if its port of destination was outside the United States. Crews of U.S. flag vessels which were outside U.S. territorial waters on Census Day and crews of vessels flying a foreign flag were not enumerated in the 1980 census.

Persons Away at School

College students were counted as residents of the area in which they were living while attending college, as they have been since 1950. However, children in boarding schools below the college level were counted at their parental home.

Persons in Institutions

Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where the institution was located. Patients in short-term wards of general hospitals were counted at their usual place of residence; if they had no usual place of residence, they were counted at the hospital.

Persons Away From Their Residence on Census Day

Persons in hotels, motels, etc., on the night of March 31, 1980, were requested to fill out a census form for assignment of their census information back to their

homes if they indicated that no one was at home to report them in the census. A similar approach was used for persons visiting in private residences, as well as for Americans who left the United States during March 1980 via major intercontinental air or ship carriers for temporary travel abroad. In addition, information on persons away from their usual place of residence was obtained from other members of their families, resident managers, neighbors, etc. If an entire household was expected to be away during the whole period of the enumeration, information on that household was obtained from neighbors. A matching process was used to eliminate duplicate reports for persons who reported for themselves while away from their usual residence and who were also reported at this usual residence by someone else.

A special enumeration was conducted in such facilities as missions, flophouses, jails, detention centers, etc., on the night of April 6, 1980, and persons enumerated therein were counted as residents of the area in which the establishment was located.

Americans Abroad

Americans who were overseas for an extended period (in the Armed Forces, working at civilian jobs, studying in foreign universities, etc.) were not included in the population of any State or the District of Columbia. On the other hand, Americans who were temporarily abroad on vacations, business trips, and the like were counted at their usual residence in the United States.

Citizens of Foreign Countries

Citizens of foreign countries having their usual residence (legally or illegally) in the United States on Census Day, including those working here (but not living at an embassy, ministry, legation, chancellery, or consulate) and those attending school (but not living at an embassy, etc.), were included in the enumeration, as were members of their families living with them. However, citizens of foreign countries temporarily visiting or traveling in the United States or living on the premises of an embassy,

etc., were not enumerated in the 1980 census.

DATA COLLECTION PROCEDURES

The 1980 census was conducted primarily through self-enumeration. A census questionnaire was delivered by postal carriers to every household several days before Census Day, April 1, 1980. This questionnaire included explanatory information and was accompanied by an instruction guide. Spanish-language versions of the questionnaire and instruction guide were available on request. The questionnaire was also available in narrative translation in 32 languages.

In most areas of the United States, altogether containing about 95 percent of the population, the householder was requested to fill out and mail back the questionnaire on Census Day. Approximately 83 percent of these households returned their forms by mail. Households that did not mail back a form were visited by an enumerator. Households that returned a form with incomplete or inconsistent information that exceeded a specified tolerance were contacted by telephone or, if necessary, by a personal visit, to obtain the information.

In the remaining (mostly sparsely settled) areas of the country, which contained about 5 percent of the population, the household received a questionnaire in the mail. The householder was requested to fill out the questionnaire and give it to the enumerator when he or she visited the household; incomplete and unfilled forms were completed by interview during the enumerator's visit.

Each household in the country received one of two versions of the census questionnaire: a short-form questionnaire containing a limited number of basic population and housing questions or a long-form questionnaire containing these basic questions as well as a number of additional questions. A sampling procedure was used to determine those households which were to receive the long-form questionnaire. Two sampling rates were employed. For most of the country, one in every six households (about 17 percent) received the long form or sample questionnaire; in areas

estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data in small areas.

Special questionnaires were used for the enumeration of persons in group quarters such as colleges and universities, hospitals, prisons, military installations, and ships. These forms contained the same population questions that appeared on either the short form or the long form but did not include any housing questions. In addition to the regular census questionnaires, the Supplementary Questionnaire for American Indians was used in conjunction with the short form on Federal and State reservations and in the historic areas of Oklahoma (excluding urbanized areas) for households that had at least one American Indian, Eskimo, or Aleut household member.

PROCESSING PROCEDURES

The 1980 census questionnaires were processed in a manner similar to that for the 1970 and 1960 censuses. They were designed to be processed electronically by the Film Optical Sensing Device for Input to Computer (FOSDIC). For most items on the questionnaire, the information supplied by the respondent or obtained by the enumerator was indicated by marking the answers in predesignated positions that would be "read" by FOSDIC from a microfilm copy of the questionnaire and transferred onto computer tape with no intervening manual processing. The computer tape excluded information on individual names and addresses.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps. Among the products of this operation were computer tapes from which the tables in this report (and most others in the 1980 census publications) were prepared on phototypesetting equipment at the Government Printing Office.

A more detailed description of the data collection and processing procedures can be obtained from the *1980 Census of Population and Housing, Users' Guide*, PHC80-R1.

Appendix C.—Accuracy of the Data

Since 1980 population counts shown in this report were tabulated from the entries for persons on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every household or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic proc-

essing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum. As was done after the 1950, 1960, and 1970 censuses, there were programs after the 1980 census to measure various aspects of the quality achieved in the 1980 census. Reports on many aspects of the 1980 census evaluation program will be

published as soon as the appropriate data are accumulated and analyzed.

A major component of the evaluation work is to ascertain, insofar as possible, the degree of completeness of the count of persons and housing units. The Census Bureau has estimated that the 1970 census did not count 2.5 percent of the population. For 1980, the Census Bureau's extensive evaluation program will encompass a number of different approaches to the task of estimating the coverage of the census. Although these studies have not been completed at the time of publication of this report, preliminary estimates indicate that the rate of undercoverage in the 1980 census was reduced from 1970 census levels.
