ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by Conrad Taeuber, Associate Director for Demographic Fields, assisted by David L. Kaplan, 1970 Census Coordinator, and in conjunction with Joseph F. Daly, then Associate Director for Research and Methodology, William I. Merkin, Associate Director for Administration, and Paul R. Squires, Associate Director for Data Collection and Statistical Processing.

The Census Employment Survey was planned and directed in the Demographic Surveys Division under the supervision of Daniel B. Levine, by Earle J. Gerson, Assistant Division Chief. This report was developed and written by George Gray, Kenneth R. Brimmer, and Gloria F. Tobor. The procedures for processing the data shown in this report were prepared under the direction of Jervis Braunstein, Assistant Division Chief; Orville Fisher and Leonard Goldberg were responsible for the manual procedures and Alfonso Episcopo and Merritte Woodward for the computer procedures.

The Statistical Methods Division was responsible for sample design, quality control, estimation procedures and the estimates of reliability. This work was performed under the supervision of Joseph Waksberg, Chief, Robert H. Hanson and Morton Boisen, Assistant Division Chiefs, assisted by Barbara Ann Boyes and Peter A. Bounpane. Listing procedures were prepared by Irene C. Montie.

Data collection activities were administered in the Field Division under the Supervision of Paul R. Squires, then Chief, and Richard C. Burt, then Assistant Division Chief, by James L. Johnson, Alvin L. Etzler, and Alfred J. Giglitto, and with the assistance of the directors of the Bureau's Data Collection Centers.

Manual processing, microfilming, and data punching of the questionnaires were performed by the Jeffersonville Census Operations Division under the supervision of Joseph F. Arbena, then Chief, and Reese P. Helmer, Assistant Division Chief. The clerical operations carried out at the Bureau's facility in Pittsburg, Kans., were supervised by Francis Allai and Robert Allen.

Computer processing was performed in the Computer Facilities Division under the supervision of James R. Pepal, Chief, and E. Richard Bourdon and James W. Shores, Assistant Division Chiefs.

Delineation of urban areas was done under the direction of Arno I. Winard, by Donald Fowles, Frederick J. Cavanaugh, Mark Littman, and Antoinette Weir, of the Population Division, Herman P. Miller, Chief.

The maps used for this survey were developed in the Geography Division, under the supervision of William T. Fay, then Chief, Robert C. Klove, Assistant Division Chief, and Ross E. Vaughn.

Publication planning, editing, and printing were performed in the Administrative and Publications Services Division, Cecil B. Matthews, Chief, under the direction of Raymond J. Koski, Assistant Chief, by Gerald A. Mann and Julia H. Moring.

Important contributions were made by Robert L. Stein and Stuart Garfinkle of the U.S. Department of Labor in the designation of the metropolitan areas covered in this Survey, and by Stanley Knebel of that Department and Gene Rowe of the U.S. Department of Agriculture in the designation of the rural areas. Mr. Stein and Mr. Rowe also developed the table specifications for the metropolitan and rural area reports, respectively.

GENERAL

This report presents statistics from the Census Employment Survey (CES) conducted as part of the overall program of the 1970 Census of Population and Housing. Detailed socioeconomic information on employment-related problems was collected in each of seven sets of rural counties and in 51 cities.

The need for a special program became evident during the final Cabinet-level review of the subject content of the 1970 census. It was clear that the census questionnaire could not be expanded to fulfill all of the needs for data to assist in guiding Government programs in the fields of labor, housing, education, and welfare for certain critical target groups—people residing in areas having substantial numbers of persons and families

with low incomes. More extensive information was needed on such subjects as employment, unemployment, job-seeking methods, job tenure, sources and level of income, residential mobility and transportation to work. Therefore, the Census Employment Survey was developed to obtain this information from persons living in 60 selected areas in 51 of the Nation's largest cities, and seven predominantly rural areas. These seven sets of counties were selected as representative of differing factors that affect job opportunities in the Nation's rural areas.

This series on the CES consists of a total of 76 separate reports. Eight of the reports present results for the rural areas. There are 60 reports which cover the individual urban areas and 8 combined reports, including a U.S. Summary of the urban areas. The other combined reports are summaries of metropolitan areas with more than one low-income area. A list of the reports of the areas appears on page ii.

Content of the tables.—Tables A to N present general demographic characteristics of the population by the most important labor force and socioeconomic factors. These tables include data for each race and Spanish-origin group comprising 5 percent or more of the area's population, as measured by the 1970 Census of Population and Housing. In Appalachia, however, the tables are presented by State rather than by race or ethnic origin. In all other reports, each table will be presented for the total population of the area, for the white population of the area, and for the Negro population of the area. Whenever the proportion of persons of Spanish origin is 5 percent or more the white group will be subdivided into white Spanish and other white. In most instances figures for other races (American Indian, Chinese, Japanese, etc.) can be obtained only by sub-

traction from the total. However, where they comprise 5 percent or more of the population they will be shown separately as "Other," as occurs in the report on the rural counties of New Mexico.

Tables 1 to 15 of the detailed characteristics tables present current labor force and employment status statistics by detailed demographic categories. Since these and the following detailed characteristics tables provide significantly greater detail in the form of cross classifications than tables A to N, they are restricted to those race and Spanish-origin groups representing 20 percent or more of the area's population. Their presentation for a group of less than 20 percent of the total population would result in many categories with no information.

Tables 16 to 26 present the same detailed demographic characteristics as tables 1 to 15 by the work experience of the population in the last 12 months. Information on work history of the population is presented in tables 27 to 31. Detailed statistics on family income and the migration pattern of the residents of this area are presented in tables 32 to 46. Tables 47 to 55 present characteristics of the labor force and family income for persons reported as having engaged in some farmwork for wage or salary in the last 12 months.

All tables are for persons 16 years of age or older unless specifically indicated otherwise.

The subcategories do not always add to the totals because of rounding the weighted figures to whole numbers.

Derived figures.—This report presents data for medians as well as percents and rates. The median is the middle value in a distribution of values; i.e., the median divides the distribution into two equal parts—one-half of the cases fall below the median and one-

half the cases fall above the median value. When the median falls in the last category of a distribution, the method of presentation is to show the lower limit of the category followed by a plus sign. For example, if the median falls in the category "65 years and over," it is shown as "65+."

Symbols.—The symbols used in these reports are "—" and "NA". A dash (—) signifies zero or no data for that cell. "NA" means not applicable and is used, for example, when a median line is shown but the information to be presented is a percent.

DATA COLLECTION PROCEDURES

On the average, in each designated rural area interviews were obtained from about 8,700 persons 16 years of age or older who were members of about 3,990 households. However, the areas ranged from a low of 3,600 households and 7,200 persons to a high of 4,400 interviewed households with over 10,800 sample persons. The interviewing operations lasted an average of 11 weeks, but the span of data collection activities ranged from 8 weeks to 14 weeks. Some areas began enumeration in mid-October 1970, while others did not begin until mid-November. All, however, were completed by mid-February 1971. Overall, interviews were obtained from all but 1.4 percent of the eligible occupied addresses.

For the area covered in this report, specific data for sample size, the interviewing period, and the proportion of contacted households not participating in the survey are presented in the section "Selected Characteristics of the Survey in This Area."

Selection of sample areas.—Since the inhabitants of rural low-income areas do not have the same characteristics in all parts of the country, each of the rural survey areas was chosen to represent a particular type of employment problem confronting the resi-

dents of the area. The area in North Carolina is a major tobacco growing area and present indications are that considerable displacement of small farmers and farm workers may take place because of impending harvest mechanization. The Appalachian counties represent an area of mining and subsistence farming. The Arkansas area represents an area with a largely Negro population displaced by mechanization in cotton growing. The area in Alabama illustrates problems confronting those residents in a deep south area. The Missouri area is a mid-continent area with a mixed economy of small farming, lumber industry, and recreational services. New Mexico was selected because of the concentration of two low-income minority groups—American Indians and Americans of Spanish origin. Finally, a two-county area of California, where the unemployment rate is about twice as high as the State-wide rate, was selected to illustrate the situation of a low-income pocket in the midst of a generally prosperous region. Major cities were not included in the sample so as not to obscure the characteristics of the rural and small town populations. These cities not included in the sample are listed in the section "Selected Characteristics of the Survey in This Area."

Selection and training of personnel.—The Census Employment Survey was conducted in each area as soon as practicable after the completion of the decennial census operations. The great majority of the members of the CES data collection staff (area supervisors, crew leaders, and interviewers) were selected because they had held similar positions with the census and thus had some data-gathering experience.

The typical area office staff consisted of (1) an area supervisor, (2) a supervisory clerk, (3) three or four office clerks, (4) a crew leader for each five or six interviewers, and (5) an

interviewer for each one hundred assigned households. Most offices had six or seven crew leaders and from 30 to 35 interviewers. Each office had at least one person specially trained in selected quality control procedures. Overall supervision of the project was provided by personnel from the Census Bureau's permanent Data Collection Centers.

The actual data collection was preceded by an extensive training program involving both home study and classroom work. Training for area supervisors lasted 1 week. Crew leaders received 7 days of training, including 1 day of actual interviewing experience. Interviewers were given 5 days of classroom lectures and one-half day of on-the-job training. The person selected for quality control attended the interviewer training and then received a 2-day special training session on quality control procedures. The area office staff attended either the crew leader's or the interviewer's training session and received additional specific instruction on the operations they were to perform.

Quality control of data collection.—The quality of the results of the interviewing was controlled at two levels in the field. First, the crew leader observed each interviewer twice and more often if needed. The first few completed forms returned by an interviewer also were reviewed carefully and thereafter all forms were scanned for completeness. Most importantly, the crew leader conducted a recheck by personal visit or telephone of one in every eight addresses assigned to the interviewer. These addresses were randomly selected and included units reported as "noninterview" as well as interviewed households. The purpose of the recheck was to make sure that interviewers were dealing properly with persons who did not wish to respond and that they had obtained informa-

tion concerning all members of the household who were 16 years of age or older. In addition, the crew leader revisited and obtained, if possible, an interview for all occupied households that were reported as "noninterview" by the interviewer. This served the dual purpose of reducing such noninterviews and acquainting the crew leader with ways to help the interviewers obtain a high rate of completion.

The second level of control of quality was carried out in the area office. First, a complete edit of a portion of each interviewer's work was performed for each week he worked. In addition, the area office reviewed all of the interviewer's work for completeness.

Finally, a random group of addresses was selected from the entire area assignment and a specially trained interviewer (designated as a reinterviewer) returned to the household and conducted a complete reinterview with one of the persons contacted by the original interviewer. The reinterviewer was provided with the information that was originally collected. After he conducted his interview he checked his results against the information obtained by the original interviewer. If discrepancies were noted between the two interviews the reinterviewer attempted to reconcile the differences. Discrepancies were then corrected and the reasons reported. The addresses included in the reinterview were selected not only to provide a check on the work of the interviewer and crew leader, but also to obtain a measure of the overall quality of the data collected.

For the more urban areas in the selected counties the area office was provided with lists of addresses and special places designated to be interviewed. For the less built-up areas the office was provided with maps showing small areas. The interviewers listed all housing units within these small areas and some or all of them were

designated for interviewing. (See Appendix B, Sample Design, Estimation, and Reliability of Estimates.)

Interviewing.—The office prepared a Control Card (CES-1R) for each housing unit and each designated person in special places. (See appendix C for copies of the forms used in CES.) The survey was conducted by a personal visit to each designated unit. The interviewer completed the Control Card by obtaining a complete list of all household members, as defined below, and some personal characteristics, such as birth date, sex, marital status, and educational attainment, for these household members. In addition, information was gathered on selected housing characteristics—the number of rooms in the unit, whether it was owned or rented, the amount of rent payments, the amounts paid for monthly utilities, installment debt, and the number of cars the household had for its use.

Any person, whether present or temporarily absent, whose usual place of residence was the sample address, or who was staying at the address and had no usual place of residence elsewhere, was considered a household member. This included all persons related to the head and any unrelated individuals living or staying there, but excluded Armed Forces members, inmates of penal or mental institutions or hospitals, and homes providing long-term care.

Next, a labor force questionnaire (CES-2R) was completed for all civilian noninstitutional household members 16 years of age or older. The Labor Force Questionnaire covers current employment or unemployment, current occupation, whether or not the person was employed during the last 12 months and, if so, at what occupation.

Information was then obtained for each eligible adult member 16 years of

age or older by asking the household respondent the questions that are contained in the Work History Booklet (CES-3R). This was unlike the procedure in the urban areas where each person was interviewed for himself. The subjects covered by this booklet were methods of seeking employment, wage or salary and other income for the last 12 months, migration, earnings last week, and transportation to work.

An average interview lasted about 30 minutes and covered information about two persons per household.

PROCESSING PROCEDURES

Clerical editing and coding.—The questionnaires were first edited for consistency, and corrections were made wherever possible in the Census Bureau facility at Pittsburg, Kans. In addition, certain information was transferred from the Control Card (CES-1R) to the Labor Force Questionnaire (CES-2R) for ease in subsequent processing.

The next step was to assign code categories to the various write-in entries. For example, individuals in sample units were grouped into families or other living arrangements; the sample person's birthplace was converted into the State or country of birth; and the critical determination of the appropriate codes to represent the occupation and industry of the person's current job, longest job held during the last 12 months, first job, and longest job ever held were placed on the record. The industry and occupation codes were subject to a system of independent verification in which a randomly selected 5 percent of each production coder's work was precoded independently by two coders. Coders failing to meet and maintain standards were reassigned. Work units that were below standard were recoded. Because of the detailed training, close super-

vision, and stringent quality control procedures, the final overall error rate was estimated at 2 percent for the occupation and industry coding operation.

Creation of computer record file.—The Census Employment Survey was collected using two primary forms—the Labor Force Questionnaire (CES-2R) and the Work History Booklet (CES-3R). Because of their different natures, two separate processes were used to place the data on tape. These two sources were subsequently merged by matching separate data for each individual respondent into one continuous record. Finally, the merged record was subject to a further edit for consistency and completeness and adjusted to independent estimates of the population. (For a discussion of these procedures see "Estimation" in appendix B.)

The Labor Force Questionnaire (CES-2R) was specially designed to be processed by FOSDIC (Film Optical Sensing Device for Input to Computers). Interviewers and coding clerks marked the answers in predesignated positions which could be "read" by FOSDIC, from a microfilm copy of the questionnaire, onto computer magnetic tape.

The Work History Booklet (CES-3R) data, on the other hand, were punched directly on a magnetic tape using a data keying device to create a continuous record. Each data field to be punched was associated with a numerical key, for example item 2 had the key 011. After the data were punched on tapes, the data were reformatted into a more conventional record layout deleting the data keys. The verification of this data keying showed that approximately 90 percent of all Work History Booklets keyed were entirely error free. The overall error rate for all information keyed was approximately 0.32 percent.

Editing of unacceptable data.—

Although every attempt is made to avoid human and mechanical errors, they still occur in any survey operation, especially in one as large and complex as the Census Employment Survey. Such errors include failure to obtain required information from respondents, obtaining inconsistent or incorrect information, and recording information incorrectly. Sampling biases occur because some of the enumerators fail to follow sampling instructions properly. Errors can occur in the field review of the interviewer's work, in the clerical editing and coding of the questionnaires, in the electronic processing and, indeed, even in the final review and publication of the materials.

Careful and extensive efforts have been made in this survey to keep the errors in each step at an acceptably low level. Review of the interviewer's work, verification of the manual coding and editing, checking the tabulated figures, and ratio estimation of sample data to control totals (as discussed in appendix B) reduced the effects of the errors. Clerical editing and coding operations provided an opportunity to correct obvious errors and to assign numerical codes to those items where editing and coding required the reading of written entries. Wherever possible, edits for consistency within each questionnaire and between questionnaires were done in the computer. Allocations or assignments of acceptable codes were made where needed. This occurred most often when information for a given item was lacking, though it was also done when the information was inconsistent with that from other acceptable entries for a person. The general procedures for handling blanks or for correcting unacceptable entries were to assign an entry for the person that was consistent with the entries for other persons with similar social and economic characteristics.

An example of this procedure is the method used in this survey of assigning or allocating wage or salary income information. The process was carried out in the following steps:

1. The computer stored a person's reported wage or salary income information (an amount or none) by age (16-24, 25-55, 55+ yrs.), sex (male, female), and the number of weeks worked in the 12 months prior to the survey (1-26 wks., 27-52 wks.), and occupational classification (white collar, skilled and semiskilled, unskilled).
2. Each person's stored wage or salary income information was retained in the computer only until a succeeding person having the same characteristics and having wage or salary income information reported was processed through the computer. Then the reported wage or salary income of the succeeding person was substituted for the wage or salary income information previously stored.
3. When a record being processed had no wage or salary income information reported or the entry was unacceptable, the wage or salary income information retained for the last person who had the same set of characteristics on the variables shown in (1) above was inserted to replace the missing entry.

This process insured that the distribution of the wage or salary income information assigned for persons for a given set of characteristics would correspond closely to the distribution of the wage or salary income information as actually reported in the survey for persons with the same set of characteristics living in the same area.

Similar procedures were used to allocate race, State or country of person's and parent's birth, and sources of income.

COUNTY COMPOSITION OF THE CENSUS EMPLOYMENT SURVEY AREA IN MISSOURI

The Census Employment Survey Area in Missouri is composed of the following counties:

- | | |
|-----------|-------------|
| 1. Carter | 5. Reynolds |
| 2. Dent | 6. Ripley |
| 3. Howell | 7. Shannon |
| 4. Oregon | 8. Texas |

SELECTED CHARACTERISTICS OF THE SURVEY IN THIS AREA

The Census Employment Survey was conducted in seven selected rural areas where the period of interviewing for each area differed considerably. The primary consideration in the timing was the availability of the census enumerators. The population sizes of the rural CES areas varied, ranging from a low of approximately 89,000 persons 16 years of age or older in the CES area of Missouri, to a high of 433,000 persons 16 years or older in the North Carolina CES area. To enable the analyst to interpret the data presented in this report, specific

information is given below for this area together with selected noninterview and error rates.

Interviewing began in the selected rural counties in Missouri on October 12, 1970, and was completed by December 4, 1970. A total of 4,590 addresses was assigned of which 3,626 were occupied at the time of interview. The remainder were either vacant or proved not to be addresses having housing units. Interviews were obtained from all but 1.7 percent of the occupied households. Comparison

with the 1970 census for the area indicates coverage of persons within households in this survey was not as complete as in the census. A total of 7,181 household members 16 years of age and over lived in the interviewed households.

The CES estimate for the total population 16 years of age and over in the selected rural counties in Missouri is 62,935. Although not shown separately in the tables, an estimate of all race groups in the area shows the following:

Racial Characteristics of CES Areas: Selected Rural Counties in Missouri

Race	Number	Percent of CES Area ¹
Total persons	62,935	100.0
Total Negro	16	0.02
Total white	62,849	99.9
Total, other	70	0.1

¹Subtotals may not add to 100.0 because of rounding of weights.

Appendix A—DEFINITIONS AND EXPLANATIONS OF SUBJECT CHARACTERISTICS

POPULATION COVERAGE ..	App-1
HOUSEHOLD AND FAMILY CHARACTERISTICS	App-1
PERSONAL CHARACTERISTICS	App-2
LABOR FORCE CHARACTERISTICS	App-3
INCOME, SOURCES OF INCOME, AND DEBT	App-5

POPULATION COVERAGE

This report covers the civilian non-institutional population of the low-income area described by the maps and the list of counties. Unlike the 1970 census, the Census Employment Survey (CES) excluded Armed Forces members and inmates of institutions. Another important difference is the treatment of college students. The CES considered unmarried students as members of their parents' household even though they were living away from home when the survey was taken. The 1970 census counted students as members of the household or dormitory in which they actually resided at the time of the census.

Although Armed Forces members were not interviewed, their incomes were included in the computation of total family income if they were living off post with their families. If an Armed Forces member was not living with his family, only the allotment income actually received by his family was counted.

HOUSEHOLD AND FAMILY CHARACTERISTICS

Household.—A household consists of all the persons who occupy a housing unit. A house, an apartment, a group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when occupants do not live and eat with any other persons in the structure and there is

either (1) direct access from the outside or through a common hall or (2) a kitchen or complete cooking facilities for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household.

Group quarters.—Group quarters are living arrangements for institutional inmates, regardless of the number of inmates, or for other groups containing five or more persons unrelated to the person in charge. For this report, institutional inmates were not enumerated although staff personnel of institutions and other persons living in group quarters, such as residents of a rooming house, were included.

Head of household or family.—One person in each household or family is designated as the "head." The head is usually the person regarded as the head by the members of the group. Married women are not classified as heads if their husbands are living with them at the time of the survey. The number of household heads does not equal the number of family heads, because some households do not contain a family, and also because more than one family may share a household.

Family.—The term "family," as used in this report, refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered as members of the same family. Thus, if the son of the head of the household and the son's wife are in the household, they are treated as part of the head's family. On the other hand, a lodger and his wife not related to the head of the household or an unrelated servant and his wife are considered as a separate family, and

not a part of the household head's family.

Primary family.—A primary family refers to the head of a household and all other persons in the household related to the head by blood, marriage, or adoption. In a primary family, the household head and the family head are the same person.

Secondary family.—A family that does not include among its members the head of a household is known as a secondary family. Members of secondary families may include persons such as guests, lodgers, or resident employees and their relatives living in a household.

Unrelated individual.—The term "unrelated individuals," as used in this report, refers to persons 16 years old and over (other than inmates of institutions) who are not living with any relatives. An unrelated individual may constitute a one-person household by himself, or he may be part of a household including one or more other families or unrelated individuals, or he may reside in group quarters such as a rooming house. Examples of unrelated individuals are: A widow living by herself or with one or more other persons not related to her, a lodger not related to the head of the household or to anyone else in the household, a servant with no relatives living in an employer's household, and a resident staff member in a hospital living apart from any relatives.

Primary individual.—If the household head does not have any relatives in his household, then the head himself constitutes a primary individual. A household contains either a primary family or a primary individual. The number of primary families and primary individuals is identical with the number of households.

Secondary individual.—A secondary individual is a person, such as a lodger, guest, or resident employee who is not

related to any other person in the household or group quarters.

Family status.—All household members may be divided into families and unrelated individuals. Family members are classified according to their relationship to the family head. The **family head** is the person who is regarded as the head by the members of the family. **Wife of head** is a woman married to and living with a family head. This category includes women in common law marriages as well as women in formal marriages. **Other relative of head** includes children and all other relatives of the head. **Unrelated individuals** are all persons not related to any other person in the household.

Size of family.—The term "size of family" refers to the number of persons who are living together and are related to each other by blood, marriage, or adoption.

PERSONAL CHARACTERISTICS

Age.—The age classification is based on the age of the person at the time the household was enumerated. The overlap of age breaks in the tables is provided to reflect the restrictions on age imposed by some Federal training programs.

Race.—The population is divided into three groups on the basis of race: White, Negro, and "other races." The last category includes American Indians, Japanese, Chinese, and any other race except white and Negro. Household members were classified into racial groups by the enumerator's observation.

If the race entry was missing for a household member, an entry was assigned according to the race of the other household members using specific rules of precedence of relationship. If there is no entry for any household member, the race is allocated by special procedures.

Spanish origin.—The Spanish origin classification is derived from information about the place of birth of the person, or the place of birth of his parents, or the language spoken in his home when he was a child.

If a person's place of birth or the place of birth of either of his parents was Puerto Rico, Mexico, Cuba, or another Latin American country, he is classified as of Spanish origin. A person who reported that Spanish was the language spoken most often in his home when he was a child is also classified as of Spanish origin even though he and both of his parents were born in the United States.

In cases where parents are of different Spanish origin, "Puerto Rican" has precedence over "Spanish, Non-Puerto Rican." In other words, if one parent was born in Mexico and the other in Puerto Rico, the person is considered Puerto Rican.

This definition differs from that used in the 1970 census inasmuch as each person marked the census item himself while the CES definition was based on the person's place of birth, or place of birth of father or mother, or whether Spanish was spoken in the home.

Marital status.—This classification refers to the marital status at the time of enumeration. There are five categories: **Married—civilian spouse present** refers to a household member whose wife or husband is listed as a civilian household member. **Married—Armed Forces spouse present** refers to a household member whose spouse lives at home and is a member of the Armed Forces. Since only civilians are interviewed, the data on spouses in the Armed Forces is limited to the reporting of their income information. On tables referring to characteristics of the head, such as work experience in the last year, these families are omitted from the tables. This occurs in the majority of the tables. Where these families are included, a headnote is

used. **Married—spouse absent** refers to a household member whose spouse is not presently a member of the household. **Widowed or divorced** refers to a household member whose spouse is not a member due to divorce or death. **Never married** refers to a household member that has never married or whose only marriage has been annulled.

Veteran status.—This question is restricted to males who have been on active duty in the U.S. Armed Forces. This includes men who have been in the U.S. Army, U.S. Navy, U.S. Air Force, U.S. Marine Corps, U.S. Coast Guard, on active duty status for several months in the reserve branch of any of the above organizations, commissioned officers of the U.S. Public Health Service who have been attached to any branch of the armed services, and the National Guard in Federal service.

Veterans are classified by their most recent period of service. Serving during a major conflict such as World War I, World War II, Korean War, or the Vietnam War takes priority over peacetime service.

Years of school completed.—Data on years of school completed in this report were derived from the combination of answers to questions concerning the highest grade of school attended by the person and whether or not that grade was finished. The questions on educational attainment apply only to progress in "regular" schools. Such schools include graded public, private, and parochial, elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Regular schooling is that which may advance a person toward an elementary school certificate, a high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits

obtained were regarded as transferable to a school in the regular school system.

School enrollment.—This classification is made for persons not in the labor force whose major activity last week was going to school.

Place of birth.—The State or country of the respondent's birthplace is given as well as the size of the place of birth. A distinction has been drawn on certain tables between places in the South and places outside the South. Those States considered in the South are as follows: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. Place of birth was also obtained for the parents of the respondents. Birthplaces of parents may determine Spanish origin.

Residential migration.—Migration patterns are determined from a battery of questions concerned with length of residence in the county and the place of residence at specific ages in the respondent's life. Length of residence in this county refers to the latest period of continuous residence and includes those persons who have never moved. Vacations and other temporary absences are not considered a break in continuity. In determining place of residence other than in this county, the State or country was obtained in addition to the size of the place.

The specific age periods are birth, 5 years prior to enumeration, and at 16 years old.

There are six categories for size of place ranging from a farm to a large city of over 250,000 inhabitants.

A distinction is drawn on some of the tables between places in the South and places outside the South. For the list of places in the South, see "Place of birth."

LABOR FORCE CHARACTERISTICS

Labor force and employment status.—

The definitions of labor force and employment status in this report relate to civilian persons 16 years old and over. The reference period for establishing labor force status is the week preceding enumeration.

Labor force.—Persons are classified as in the labor force if they are currently employed, waiting to begin a new job, or actively seeking employment.

Employed persons comprise (1) all those who did any work at all as paid employees, or in their own business, profession, or farm, or who worked 15 hours or more as unpaid workers on a farm or in an enterprise operated by a member of the family, and (2) all those who were not working but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs.

Each employed person is counted only once. A person who held more than one job is counted at the job at which he worked the greatest number of hours during the survey week.

Excluded from the employed group are persons whose only activity consisted of work around the house (such as own home housework, painting or repairing own home, etc.) or volunteer work for religious, charitable, or similar organizations.

Unemployed persons comprise all persons who did not work during the survey week, who made specific efforts to find a job within the last 4 weeks, and who were available for work during the survey week (except for temporary illness). Also included as unemployed are those who did not work at all but were available for work and either were waiting to be called back to a job from which they had been laid off or were waiting to report

to a new wage or salary job within 30 days.

Unemployment rate.—The unemployment rate represents the number unemployed as a percent of the civilian labor force. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc.

Not in labor force.—This category includes persons who are not classified as employed or unemployed. These persons are further classified as "engaged in own home housework," "in school," "unable to work" because of long-term physical or mental illness, and "other." The "other" group includes, for the most part retired persons, those reported as too old to work, the voluntarily idle, and seasonal workers for whom the survey week fell in an "off" season and who were not reported as unemployed. Persons doing only incidental unpaid family work (less than 15 hours) are also classified as not in the labor force.

Full-time employed.—Persons who worked 35 hours or more last week are designated as working full time.

Part-time employed.—Persons who worked between 1 and 34 hours last week are designated as working part time. Part-time workers are further classified by their usual status at their present job (either full time or part time) and by their reason for working part time through the survey week (economic or other reasons). Economic reasons include: Slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. Other reasons include: Labor dispute, bad weather, own illness, vacation, demands of own housework, school, no desire for full-time work, and full-time worker only during peak season.

Employed on full-time schedules.—Persons are classified on full-time

schedules if they fall into one of three categories: (1) They worked 35 hours or more last week, (2) they worked less than 35 hours last week for noneconomic reasons (holiday, labor dispute, bad weather, own illness, on vacation, too busy with housework, school, personal business, etc., did not want full-time work, full-time work week under 35 hours, and other reasons) but they usually work 35 hours or more, (3) they have a job but were not at work, yet were employed on a full-time basis.

Full- and part-time labor force.—The full-time labor force consists of persons working on full-time schedules, persons involuntarily working part time (because full-time work is not available), and unemployed persons seeking full-time jobs. The part-time labor force consists of persons working part time voluntarily and unemployed persons seeking part-time work. Persons with a job but not at work are classified according to whether they usually work full time or part time.

Part-time and full-time jobs.—Persons are classified as having worked at full-time jobs if they worked 35 hours or more per week in a majority of the weeks worked during the year. They are classified as having worked at part-time jobs if they worked 1 to 34 hours per week in a majority of the weeks worked during the year.

Work experience.—Persons with work experience are those who worked as civilians at any time during the year at full-time or part-time jobs.

Year-round full-time workers.—Persons who worked primarily at full-time civilian jobs 50 weeks or more in the last 12 months are classified as year-round full-time workers.

Part-year workers.—Persons who worked either full time or part time for 1 to 49 weeks in the last 12 months are classified as part-year

workers. (For part-year farm worker, see definition below.)

Main reason for part-year work.—Part-year workers are classified by the major reason for part-year work on the basis of what they were doing most of the weeks in which they did not work. Their reasons are reported as unemployment or layoff from a job, illness or disability (not including paid sick leave), taking care of home, going to school, retirement, in the Armed Forces, and other reasons. The "taking care of family or home" category was restricted to women.

Nonworkers.—Nonworkers are persons who did not work during the last 12 months. They are asked whether they looked for work during the year and, if they looked, for how many weeks. Nonworkers are classified according to the main reason for not working. Their reasons are reported as illness or disability, taking care of own home, going to school, inability to find work, retired, in the Armed Forces, and other reasons.

Part-year farm workers (this definition applies to tables 49 and 50 only).—Persons who worked 51 weeks or less as farm wage workers regardless of how they spent the remainder of the year, e.g., working at a nonfarm job, unemployed, on vacation, or something else, are classified as part-year farm workers.

Farmwork for cash wages or salary.—This consists of the following: (1) Work done on any farm for cash wages in connection with the production, harvesting, threshing, preparation for market, or delivery to market of agricultural products; (2) work done off the farm for a farmer by his hired farmworker, such as trips to town to buy feed, seeds, or fertilizer, or to handle other matters involved in running the farm business; (3) repairs on farm buildings, machinery, etc., performed by a farm wage worker

when done along with the type of work specified in (1) and (2) above; and (4) managing a farm enterprise for cash salary.

Not included as farmwork for cash wages or salary are: (1) Work performed by farm operators on their own farms, or "exchange" work between farmers; (2) work done exclusively for "pay in kind"; (3) work done without pay on a family farm by a member of the farm operator's family (a small regular cash allowance is not considered as farm wages); and (4) nonfarm work performed on a farm, such as the building of a farm structure, the drilling of a well, the hauling of agricultural products to market by commercial truckers, or domestic service in the home of a farmer; and (5) custom work such as spraying, threshing, combining, etc., when a person is paid a combined rate for the use of his equipment and labor.

Weeks of farmwork.—This includes the total number of weeks in which a person did any farmwork during the last 12 months, even if only for a few hours or a few days in the week.

Weeks of nonfarm work.—This includes the total number of weeks in which the person did any nonfarm work during the last 12 months, even if it was only for a few hours or for a few days in the week. (If both farm and nonfarm work were done during the same week, the nonfarm work was counted.)

Nonfarm work for cash wages or salary.—This consists of any work other than farmwork for which a person was paid cash wages or salary.

Proportion of income from farmwork.—This is the proportion of income from farmwork to the total income of a person. The categories for the proportion of income are all, almost all, most, about half, or less than half. The interviewer read the categories and the respondent selected

the category that he felt was appropriate. The enumerator gave no clues as to what these categories meant. Those who indicated at least 1 week of farm work were asked the question on proportion of income from farmwork.

Stretch of unemployment.—A stretch of unemployment is a continuous period of unemployment of at least 1 week's duration. A stretch is terminated by employment or withdrawal from the labor force.

Extent of unemployment.—The number of weeks accumulated in all stretches of unemployment represents the total number of weeks of unemployment during the last 12 months.

Longest job.—The occupation and industry information is collected for the longest job in the last 12 months and the longest job since leaving school. They are collected in the same manner as for the current job. A person's longest job during the last 12 months is the one at which he worked the greatest number of weeks. For most wage or salary workers, a job is defined as all the time worked for the same employer. The only exception is work for private families (domestic service, babysitting, odd jobs, and the like) which is counted as a single job regardless of number of employers. Self-employment and unpaid work in family-operated enterprises are also designated as jobs for purposes of this survey. A person's longest job since leaving school is the one at which he worked the greatest number of months or years.

Occupation and industry.—The categories for industry and occupation are based on the same classification system used in the 1970 decennial census. Occupation and industry information is obtained in several items. One item refers to the current job, that is, the job held last week. If two jobs were held, the job reported was

the one at which the person worked the greater number of hours. For an unemployed person, the job reported refers to the last job held. For a person who is not currently in the labor force, the last job held within the last 5 years is reported. Industry and occupation is also reported for the person's longest job in the last 12 months, the person's first regular job since leaving school, and the person's longest job since leaving school.

Tenure on job.—This category refers to the length of time a person has worked on a job without a break in service. Tenure is obtained for the current job, the first job since leaving school, and the longest job since leaving school.

Job-seeking methods.—A respondent was asked which methods he used to look for work in the last 12 months. The methods asked about were: Checked with State employment service, applied directly to employer, asked friends or relatives, checked newspapers, registered with a union, checked with a private employment agency, checked with a community organization, went to special streets or places to be picked up, or other ways. The respondent also indicated the most frequent method used, and the method that got the respondent his last job.

Method of transportation.—Employed persons were asked for the methods of transportation they usually use to get to work. All methods that the respondent mentioned were recorded with the result that the total shown in these tables may be less than the sum of the various parts. Some of the methods may not be applicable for a specific area which may account for blank data cells.

Distance to work.—This is the number of miles to get to work. Enumerators placed the response into one of nine categories ranging from "Less than 1 mile" to "51 miles or more."

INCOME, SOURCES OF INCOME, AND DEBT

Income.—Each person was asked the amount of money income received in the preceding 12 months from such sources as follows: Money wage or salary, net self-employment income from farm, or nonfarm business, social security, dividends, interest, unemployment and workmen's compensation, public assistance payments, and other periodic income. The amounts received represent income before deductions for taxes, union dues, etc.

Family income.—Family income is the composite of the amounts received by all income recipients in the family from the sources listed in "Income."

Median income.—Median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. The medians for families and individuals are based on all families and individuals.

Wage or salary.—This is total money earnings received for work performed as an employee during the last 12 months. The amount reported covers an employee's gross wages, salaries, tips, and commissions before deductions for taxes, bonds, pensions, union dues, etc. Receipts not included as income are income in kind such as room and board.

Farm self-employment income.—This is net money income from the operation of a farm by a person on his own account, as an owner, a renter, or a sharecropper. The value of fuel, food, or other farm products used for family living is not included as part of net income.

Self-employment income.—This is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership.

Workmen's compensation.—This category refers to payments received from public or private insurance companies for injuries incurred while on the job. The cost of this insurance must be paid by the employer and not by the employee.

Unemployment compensation.—This category refers to money received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds.

Social security.—This includes social security pensions, survivors' benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance, and railroad retirement insurance checks from the U.S. Government.

Other pensions.—These include (1) veterans' pensions—money paid periodically by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, and so-called "refunds" paid to ex-servicemen as GI insurance premiums; (2) private pensions or retirement benefits paid to a retired person or his survivors by a former employer or by a union, either directly or through an insurance company; (3) government employee pensions received from retirement pensions paid by Federal, State, county, or other governmental agencies to former employees (including members or their survivors).

Public assistance or welfare payments.—These include public assistance payments, such as old-age assistance, aid to families with dependent children, and aid to the blind or totally disabled.

Rents.—Rents include net income from rental of a house, store, or other property to others, and receipts from boarders or lodgers.

Dividends and interest.—These include dividends from stockholdings or membership in associations, and interest on savings or bonds.

Other income.—This includes any income which cannot be placed in the above categories. The Armed Forces pay of a husband living at home is reported here as well as allotments received from absent Armed Forces members.

Transfer payments and pensions.—Included in these are total income received from the following sources: Unemployment insurance, workmen's compensation, social security, welfare payments, and private veterans' and government pensions.

Property income and all other.—This category includes rents, interest and dividends, and any miscellaneous income reported.

Earners.—Heads and individuals 16 to 64 years, not in school, with either wage or salary, or net self-employment income from business or farm are earners.

Weekly earnings.—This represents earnings of full-time wage and salary workers last week.

Hourly earnings.—This represents weekly earnings of full-time wage and salary workers divided by the hours worked last week.

Monthly installment debt.—This is the total amount the primary family or primary individual pays each month on all long-term debts except rent. It includes payments on cars, furniture, appliances, loans from banks and other lending institutions, and also alimony payments.

Rent payments.—This is the total amount paid each month for rent regardless of whether it includes furniture, utilities, or other services.

Utility payments.—This is the amount reported as total payment for all utilities during the last calendar month.

Fixed monthly expenses.—This is the total amount paid each month on rent, utilities, and installment debt.

Poverty level.—Families and unrelated individuals are classified as being above or below the poverty level, using the poverty index adopted by a Federal Interagency Committee in 1969.¹ This index provides a range of income cutoffs adjusted to take into account such factors as family size, sex and age of the family head, the number of children, and farm-nonfarm residence. The poverty cutoffs for farm families have been set at 85 percent of the nonfarm levels. These cutoff levels are updated every year to reflect the changes in the Consumer Price Index. The poverty thresholds used in this report were updated for changes in the cost of living between January and September 1970. For the 12 month period covered by this survey, the poverty cutoffs ranged from \$1,556 for a female unrelated individual 65 years old and over living on a farm, to \$6,904 for a nonfarm family with a male head and with seven or more persons (none under 18 years old). The poverty cutoff for a farm family of four, headed by a male with a wife and two children under 18 years old, was \$3,298.

Percentage calculations relating to families or persons by poverty status are based on a restricted universe that excludes unrelated individuals under 16 years of age, members of the Armed Forces living in barracks, and inmates of institutions.

¹See Current Population Reports, Series P-23, No. 28 "Revision in Poverty Statistics, 1959 to 1968," for a more detailed descriptions of this poverty index.

Appendix B—SAMPLE DESIGN, ESTIMATION, AND RELIABILITY OF ESTIMATES

SAMPLE DESIGN	App-7
ESTIMATION	App-7
RELIABILITY OF THE ESTIMATES	App-7

SAMPLE DESIGN

The Census Employment Survey (CES) sample for this area was selected after the completion of the 1970 census. In those parts of the area where households were generally identified by a street name and house number in the census, the sample was selected from the census list of addresses and special places. A systematic sample of units was chosen and the interviewer was given the addresses of specific units to interview. The sample was selected in clusters of six contiguous units as recorded in the census address register.

In those portions of the area where addresses were generally recorded in the census in the form of route numbers or Post Office box numbers, a system of "area segments" was used. The land area was divided into portions (called segments) easily identified by geographic boundaries and containing an expected six or multiple of six (i.e., 12, 18, etc.) housing units based on the information from the census. A systematic sample of segments was then selected. For segments of expected size six falling in the sample, the interviewer was instructed to interview all housing units in the segment. For segments of expected size 12, the interviewer listed all housing units in the segment and one-half of them were systematically selected for interviewing. Similar procedures were used for other sizes of segments in the sample so that an expected six households were selected per segment.

For persons in housing units, the sampling unit was the housing unit with all occupants age 16 and over eligible for survey. For persons in

group quarters the sampling unit was on a person basis, i.e., a random selection of persons living in the group quarters was made.

The number of occupied, interviewed housing units in the sample in this area is shown on page X in the section on "Selected Characteristics of the Survey in This Area."

ESTIMATION

The estimates from this survey were developed through the use of a ratio estimate to 1970 census population counts. The computer record for each sample person was first given a weight (the inverse of the probability of selection) adjusted to account for non-interviews encountered during the survey. The records were then used to prepare preliminary tallies of the CES data for the following ratio estimation cells:

Age	Male		Female	
	Negro	Non-Negro	Negro	Non-Negro
25 to 44				
45 to 64				
65 and over ..				

Within each of the cells, the ratio of the 1970 census count to the preliminary CES tally was computed and applied to the weights of all CES records in that cell. Because of differing definitions of the eligible universe, no ratio estimation was performed for persons of ages 16 to 24. The principle difference between CES and census definitions of eligible persons relates to the treatment of students and Armed Forces members. In CES, unmarried students living away from home were counted as members of their parents' household, while in the 1970 census they were counted as members of the households or dormitories in which they were residing.

Armed Forces members were excluded from the CES but included in the 1970 census.

The effect of this procedure is to produce estimates realizing some of the gains in sampling efficiency that would have resulted had the population been stratified into the above groups before sampling. The net effect is a reduction in both the sampling error and possible bias of most statistics below what would be obtained by weighting all of the sample households and persons by a uniform factor. The reduction in sampling error will be substantial for some items and less effective for others. A byproduct of this estimation procedure is that estimates from the sample tend to be consistent with the census counts for the groups used in the estimation procedure except for the differences between the population covered in this survey and in the census.

RELIABILITY OF THE ESTIMATES

Since the estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census was taken using the same schedules, instructions, and interviewers. In addition to this error (called sampling variability), the results are also subject to the errors of response, non-reporting, and processing inherent in censuses as well as sample surveys.

The standard error is primarily a measure of the sampling variability, that is, of the variations that occur by chance because a sample rather than the whole of the population is surveyed. The chances are about 68 out of 100 that an estimate from the sample would differ from a complete census by less than the standard error. The chances are about 95 out of 100 that the difference would be less than twice the standard error and about 99 out of 100 that it would be less than 2-1/2 times the standard error.

The figures presented in the following tables are approximations to the standard errors of various estimates shown in this report. In order to derive standard errors that would be applicable to a wide variety of items and could be prepared at a moderate cost, a number of approximations were required. As a result, the standard errors shown provide an indication of the order of magnitude rather than the precise standard error for any specific item. These tables do not reflect the effect of response variance or bias arising in the collection or processing stages.

The standard errors in these tables are not directly applicable to differences between two estimates. In order to estimate the standard error of a difference, the tables are to be used as described in the following two situations:

1. The standard error of a difference between a sample figure from the CES and a 1970 census complete count is the standard error of the CES statistic.
2. For a difference between two sample figures (two figures from the CES for the same or for one CES area versus another, or a CES figure versus one collected on a sample basis in the census), the standard error of the difference is approximately the square root of the sum of squares of the standard errors of each estimate considered separately. If two figures from the same CES area are being compared and there is a high positive correlation between the two characteristics, this formula will overstate the true standard error somewhat.

Table B1 gives approximate standard errors for estimated numbers of persons with a characteristic (e.g., the

number of unemployed males) while table B2 gives approximate standard errors for estimated percentages (e.g., the percent of males who are unemployed). Linear interpolation in these tables will provide generally satisfactory results.

Table B1. Approximate Standard Errors of Estimated Number of Persons

(Range of 68 chances out of 100)

Estimate	Standard error
900	80
2,700	140
4,500	180
9,000	250
13,500	290
18,000	320
22,500	340
27,000	350
36,000	350
45,000	310
54,000	240

Table B2. Approximate Standard Errors of Estimated Percentage of Persons

(Range of 68 chances out of 100)

Base of percentage	Estimated percentage							
	1 or 99	2 or 98	5 or 95	10 or 90	15 or 85	25 or 75	35 or 65	50
9009	1.3	2.0	2.8	3.3	4.1	4.5	4.7
2,7005	.8	1.2	1.6	1.9	2.3	2.6	2.7
4,5004	.6	.9	1.3	1.5	1.8	2.0	2.1
9,0003	.4	.6	.9	1.1	1.3	1.4	1.5
13,5002	.3	.5	.7	.9	1.0	1.2	1.2
18,0002	.3	.5	.6	.7	.9	1.0	1.0
22,5002	.3	.4	.6	.7	.8	.9	.9
27,0002	.2	.4	.5	.6	.7	.8	.9
36,0001	.2	.3	.4	.5	.6	.7	.7
45,0001	.2	.3	.4	.5	.6	.6	.7
54,0001	.2	.3	.4	.4	.5	.6	.6
63,0001	.2	.2	.3	.4	.5	.5	.6

Example.—Assume a table in this report shows there are an estimated 15,000 males aged 25 and older who have completed high school in the poverty area. Interpolation in table B1 shows the sampling error on an estimate of this size is about 300. This

means the chances are 68 in 100 that a complete census would show the number in this category would differ from the estimated 15,000 by less than this amount; the chances are 95 in 100 that the complete census would differ by less than twice this amount.

Assume further the report shows that 8 percent of these males are unemployed. Interpolation in table B2 shows the standard error on an estimated 8 percent on a base of 15,000 would be 0.60 percent.

Appendix C—FORMS USED FOR CENSUS EMPLOYMENT SURVEY

Form CES-1R CONTROL CARD (RURAL)

Form Approved: U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS
 Budget Bureau No. 41-569115
 Approval Expires June, 1971

1. Address (House number and street)
 City
 State
 ZIP code

2. Letter sent
 Y N
 3a. Segment number
 B T A N T A
 4. CONTROL NUMBER (PSU) (Serial)
 (Check)

5a. Are there any occupied or vacant living quarters besides your own at . . . ? (Read street address and apartment description from item 1)
 Y - Fill table X
 N

5b. (Limit if B segment in item 2b) How many people are living or staying in this house (apartment)?
 Y - Fill table X
 N

6a. NAME (last name first)
 6b. What is the name of the head of this household?
 6c. What are the names of all other persons who are living or staying here?
 6d. List all persons staying here and all persons who usually live here who are absent. Be sure to INCLUDE infants under 1 year of age.

RELATIONSHIP TO HOUSEHOLD HEAD MEMBER
 Example: Head, wife, son, daughter-in-law, partner, lodger, lodger's wife, etc.
 6e. (Circle Line No. of resp.)
 6f. (Enter in numerals)
 6g. (Enter in numerals)
 6h. (Enter in numerals)

7a. I have listed (Read names in 6b)
 7b. How many other people stay here some of the time?
 7c. Are any of these people staying here now?
 7d. Does anyone who is not staying here now consider this place home?
 7e. Does he have some one place he usually stays?

Form CES-2R LABOR FORCE QUESTIONNAIRE (RURAL)—Continued

18. Line No.

19. What was ... doing most of LAST WEEK—
 Working Keeping house Going to school Looking for work Other (Specify)

20. Did ... do any work at all LAST WEEK, not counting work around the house?
 Yes No (Go to 21)

21. (If J in 18, skip to 21A.) Did ... have a job or business from which he was temporarily absent or on layoff LAST WEEK?
 Yes No (Go to 22)

22. (If LK in 18, skip to 22A.) Has ... been looking for work during the past 4 weeks?
 Yes No (Go to 24)

20A. How many hours did ... work LAST WEEK at all jobs?
 0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50

21A. Why was ... absent from work LAST WEEK?
 Own illness On vacation Bad weather Labor dispute New job to begin within 30 days Temporary layoff (Under 30 days) Indefinite layoff (20 days or more or no def. recall date) Other (Specify)

22A. What has ... been doing in the last 4 weeks to find work? (Mark all methods used; do not read list.)
 Checked pub. employ. agency Pvt. employ. agency Employer directly Friends or relatives Placed or answered ads Nothing (Skip to 24) Other (Specify in notes, e.g., MDTA, union or prof. register, etc.)

24. (Skip 24A-E for persons with entry in 23)

24A. When did ... last work for pay at a regular job or business, either full- or part-time?
 Within past 12 months 1 up to 2 years ago 2 up to 3 years ago 3 up to 4 years ago 4 up to 5 years ago 5 or more years ago Never worked

24B. Why did ... leave that job?
 Personal, family (incl. pregnancy) or school Health Retirement or old age Seasonal job completed Slack work or business conditions Temporary nonseasonal job completed Unanticipated work arrangements (Hours, pay, etc.) Other

24C. Does ... want a regular job now, either full- or part-time?
 Yes Maybe-It depends (Specify in notes) No Don't know

24D. What are the reasons ... is not looking for work? (Mark each reason mentioned.)
 Believes no work available in line of work or area Couldn't find any work Needs more schooling, training, skills or experience Employers think too young or too old Other pers. handicap in finding job Can't arrange child care Family responsibilities In school or other training Ill health, physical disability Other (Specify in notes) Don't know

24E. Does ... intend to look for work of any kind in the next 12 months?
 Yes It depends (Specify in notes) No

20B. INTERVIEWER CHECK ITEM
 49+ (Skip to Item 22)
 1-34 (Go to 20C)
 35-48 (Go to 20D)

20C. Does ... USUALLY work 35 hours or more a week at this job?
 Yes No (Specify reason)

20D. Did ... lose any time or take any time off LAST WEEK for any reason such as illness, holiday or slack work?
 Yes No (Specify)

20E. Did ... work any overtime or at more than one job LAST WEEK?
 Yes No (Specify)

21B. Is ... getting wages or salary for any of the time off LAST WEEK?
 Yes No Self employed

21C. Does ... usually work 35 hours or more a week at this job?
 Yes No (Go to 25 and enter job held last week)

22B. Why did ... start looking for work? Was it because ... lost or quit a job at that time (pause) or was there some other reason?
 Lost job Quit job Left school Wanted temporary work Other (Specify in notes)

22C. 1) How many weeks has ... been looking for work?
 2) How many weeks ago did ... start looking for work?
 3) How many weeks ago was ... laid off?

22D. Has ... been looking for full-time or part-time work?
 Full Part

22E. Is there any reason why ... could not take a job LAST WEEK?
 Yes No (Specify in notes)

22F. When did ... last work at a full-time job or business lasting 2 consecutive weeks or more?
 1965 or later (Enter month and year) Before 1965 Never worked at all (Enter in 23, last full-time civilian job lasting 2 weeks or more, job from which laid off, or "Never Worked.")

1-4 wks 5-14 wks 15-26 wks 27-39 wks 40 wks or more (Ask 37)

37. What was the main reason ... did not work in the past 12 months?

(ill or disabled and unable to work
 Taking care of home or family
 Going to school
 Could not find work
 Armed Forces
 Retired
 Other (Specify)

38. You said ... worked about ... weeks in the past 12 months. How many of the remaining ... weeks minus entry in Item 34 were ... looking for work or on layoff from a job?

(Enter number of weeks and mark one circle)

None (Skip to Item 41)
 1-4 wks 5-10 wks 11-14 wks 15-26 wks 27-39 wks 40 wks or more (Ask Item 39)

39. Were the ... weeks ... was looking for work (or on layoff) all in one stretch?

Yes - 1 stretch No - 2 stretches No - 3 + stretches (Skip to Item 41)

40. Did ... lose any full weeks of work in the past 12 months because he was on layoff from a job or lost a job?

Yes No (Skip to Item 41)

41. (If any weeks not accounted for, ask: What was ... doing MOST of the remaining weeks in the past 12 months? Was he -

All weeks accounted for in Items 34 and 38
 ill or disabled and unable to work...
 Taking care of home or family... (Ask Item 42)
 Going to school...
 Armed Forces...
 Retired...
 Other (Specify)

42. When ... was working in the past 12 months, did he usually work full time or part time?

Full time Part time

43. What was ...'s longest job in the past 12 months? (Compare with entry in Item 23)

Same as Item 23 Different from Item 23 (Skip to Item 44) (Specify below and go to Item 44.)

A. For whom did ... work?

B. What kind of business or industry is this?

C. What kind of work was ... doing?

D. What were ...'s most important activities or duties?

E. Was this person -

An employee of PRIVATE co. business, or individual for wages, salary... P
 A GOVT. employee (Fed., State, county, or local)... G
 Self-emp. in OWN business, prof. practice, or farm... (If not a farm) Is the business (incorporated?)... Yes No
 Work WITHOUT PAY in family business or farm... WP

44. For persons with entries in BOTH items 36 and 38, add write-in entries of weeks; enter in box, and mark one circle.

1-13 wks 14-26 wks 27-39 wks 40-47 wks 48-49 wks 50-52 wks

47. INTERVIEWER CHECK ITEM

Person has occupation of farm work and "P" in Item 43C and E or 23C and E. (Skip to 49)

All others who did any work in the past 12 months. (Go to 48)

48. During the past 12 months did ... do any farm work for cash wages or salary, even for a few days?

Yes No (Go to CES-3R)

49. You told me ... worked ... weeks in the past 12 months. In how many of these weeks did he do any farm work for cash wages or salary?

1-13 14-26 27-39 40-47 48-49 50-52

50. In how many weeks in the past 12 months did ... do nonfarm work for cash wages or salary?

1-13 14-26 27-39 40-47 48-49 50-52

51. Some farm workers leave home and stay away at least over night in another county to harvest crops and do other seasonal farm work. Did ... do this in the past 12 months?

Yes No (Go to CES-3R)

Form CES-2R LABOR FORCE QUESTIONNAIRE (RURAL)—Continued

18. Line No.

19. What was ... doing most of LAST WEEK—

Working (Skip to 20A) WK

Keeping house (fact. wife) in household

Going to school

Looking for work LK

Keeping house H

Going to school S

Unable to work (Go to 24) U

Other (Specify) OT

20. How many hours did ... work LAST WEEK at all jobs?

20A. INTERVIEWER CHECK ITEM

49+ (Skip to Item 23)

1-34 (Go to 20C)

35-48 (Go to 20D)

20C. Does ... USUALLY work 35 hours or more a week at this job?

Yes What is the reason ... worked less than 35 hours LAST WEEK?

No What is the reason ... USUALLY works less than 35 hours a week? (Mark the appropriate reason)

Stuck work

Material shortage

Plant or machine repair

New job started during week

Job terminated during week

Could find only part-time work

Holiday (Legal or religious)

Labor dispute

Bad weather

Own illness

On vacation

Too busy with housework, school, personal bus., etc.

Did not want full-time work

Full-time work under 35 hours

Other reason (Specify)

(Skip to 23 and enter job worked at last week)

20D. Did ... lose any time or take any time off LAST WEEK for any reason such as illness, holiday or stock work?

Yes How many hours did ... take off?

(Correct 20A if less time not already deducted; if 20A reduced below 35, fill 20C, otherwise, skip to 23.)

No

20E. Did ... work any overtime or at more than one job LAST WEEK?

Yes How many extra hours did ... work?

(Correct 20A if extra hours not already included and skip to 23.)

No (Skip to 23)

21. (If 1 in 19, skip to 21A.) Did ... have a job or business from which he was temporarily absent or on layoff LAST WEEK?

Yes No (Go to 22)

21A. Why was ... absent from work LAST WEEK?

Own illness

On vacation

Bad weather

Labor dispute

New job to begin within 30 days (Ask 22B and 22C)

Temporary layoff (Under 30 days) (Ask 22B and 22C)

Indefinite layoff (30 days or more or no def. recall base) (Ask 22B and 22C)

Other (Specify)

21B. Is ... getting wages or salary for any of the time off LAST WEEK?

Yes

No

SAH employed

21C. Does ... usually work 35 hours or more a week at this job?

Yes

No

(Go to 23 and enter job held last week)

22. (If LK in 19, skip to 22A.) Has ... been looking for work during the past 4 weeks?

Yes No (Go to 24)

22A. What has ... been doing in the last 4 weeks to find work? (Mark all methods used; do not read list.)

Checked pub. employ. agency with-

priv. employ. agency

employer directly

friends or relatives

Placed or answered ads

Nothing (Skip to 24)

Other (Specify in notes, e.g., NDTA, union or prof. register, etc.)

22B. Why did ... start looking for work? Was it because ... lost or quit a job at that time (pass) or was there some other reason?

Lost job

Quit job

Left school

Wanted temporary work

Form CES-2R LABOR FORCE QUESTIONNAIRE (RURAL)—Continued

The form consists of a large, empty rectangular box with a black border. Inside the box, there are several small black marks: two squares near the top center, a square on the left edge, a vertical column of seven circles on the left edge, and another square on the left edge. These marks are likely registration or punch marks.

1a. Now I have some questions about how ... would get to work. Does ... have a license to drive a car? a.	* 114 1 <input type="checkbox"/> Yes — ASK 1b 2 <input type="checkbox"/> No — SKIP to 2a
b. Is there a car ... could drive to work every day?	3 <input type="checkbox"/> Yes 4 <input type="checkbox"/> No
2a. Is there a bus line or some other public transportation within ten minutes walk of here that goes to a place where ... has looked for work?	* 116 1 <input type="checkbox"/> Yes — ASK 2b 2 <input type="checkbox"/> No — SKIP to 3
b. What kind of public transportation is that?	Stop or station 3 <input type="checkbox"/> Bus 4 <input type="checkbox"/> Other
3. About how many minutes does it take ... to walk to the place where public transportation stops?	117 _____ Minutes a <input type="checkbox"/> No public transportation within walking distance

Appendix D — PUBLICATION AND COMPUTER SUMMARY TAPE PROGRAM

The results of the 1970 Census of Population and Housing are being issued in the form of printed reports, microfiche copies of the printed reports, computer summary tapes, computer printouts, and microfilm. Listed below are short descriptions of the final report series and computer tapes, as currently planned. More detailed information on this program can be obtained by writing to the Publications Distribution Section, Bureau of the Census, Washington, D.C. 20233.

Population Census Reports

Volume I.

CHARACTERISTICS OF THE POPULATION

This volume will consist of 58 "parts"—number 1 for the United States, numbers 2 through 52 for the 50 States and the District of Columbia in alphabetical order, and numbers 53 through 58 for Puerto Rico, Guam, Virgin Islands, American Samoa, Canal Zone, and Trust Territory of the Pacific Islands, respectively. Each part, which will be a separate cloth-bound book, will contain four chapters designated as A, B, C, and D. Each chapter (for each of the 58 areas) will first be issued as an individual paperbound report in four series designated as PC(1)-A, B, C, and D, respectively. The 58 PC(1)-A reports will be specially assembled and issued in a clothbound book, designated as Part A.

■ Series PC(1)-A.

NUMBER OF INHABITANTS.

Final official population counts are presented for States, counties by urban and rural residence, standard metropolitan statistical areas (SMSA's), urbanized areas, county subdivisions, all incorporated places, and unincorporated places of 1,000 inhabitants or more.

■ Series PC(1)-B.

GENERAL POPULATION CHARACTERISTICS

Statistics on age, sex, race, marital status, and relationship to head of household are presented for States, counties by urban and rural residence, SMSA's, urbanized areas, county subdivisions, and places of 1,000 inhabitants or more.

■ Series PC(1)-C.

GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS

Statistics are presented on nativity and parentage, State or country of birth, Spanish origin, mother tongue, residence 5 years ago, year moved into present house, school enrollment (public or private), years of school completed, vocational training, number of children ever born, family composition, disability, veteran status, employment status, place of work, means of transportation to work, occupation group, industry group, class of worker, and income (by type) in 1969 of families and individuals. Each subject is shown for some or all of the following areas: States, counties (by urban, rural-nonfarm, and rural-farm residence), SMSA's, urbanized areas, and places of 2,500 inhabitants or more.

■ Series PC(1)-D.

DETAILED CHARACTERISTICS

These reports will cover most of the subjects shown in Series PC(1)-C, above, presenting the data in considerable detail and cross-classified by age, race, and other characteristics. Each subject will be shown for some or all of the following areas: States (by urban, rural-nonfarm, and rural-farm residence), SMSA's, and large cities.

Volume II.

SUBJECT REPORTS

Each report in this volume, also designated as Series PC(2), will concentrate on a particular subject. Detailed information and cross-relationships will generally be provided on a national and regional level; in some reports, data for States or SMSA's will also be shown. Among the characteristics to be covered are national origin and race, fertility, families, marital status, migration, education, unemployment, occupation, industry, and income.

Housing Census Reports

Volume I.

HOUSING CHARACTERISTICS FOR STATES, CITIES, AND COUNTIES

This volume will consist of 58 "parts"—number 1 for the United States, numbers 2 through 52 for the 50 States and the District of Columbia in alphabetical order, and numbers 53 through 58 for Puerto Rico, Guam, Virgin Islands, American Samoa, Canal Zone, and Trust Territory of the Pacific Islands, respectively. Each part, which will be a separate cloth-bound book, will contain two chapters designated as A and B. Each chapter (for each of the 58 areas) will first be issued as an individual paperbound report in two series designated as HC(1)-A and B, respectively.

■ Series HC(1)-A.

GENERAL HOUSING CHARACTERISTICS

Statistics on tenure, kitchen facilities, plumbing facilities, number of rooms, persons per room, units in structure, mobile home, telephone, value, contract rent, and vacancy status are presented for some or all of the following areas: States (by urban and rural residence), SMSA's, urbanized areas, places of 1,000 inhabitants or more, and counties.

■ Series HC(1)-B.

DETAILED HOUSING CHARACTERISTICS

Statistics are presented on a more detailed basis for the subjects included in the Series HC(1)-A reports, as well as on such additional subjects as year moved into unit, year structure built, basement, heating equipment, fuels, air conditioning, water and sewage, appliances, gross rent, and ownership of second home. Each subject is shown for some or all of the following areas: States (by urban, rural-nonfarm, and rural-farm residence), SMSA's, urbanized areas, places of 2,500 inhabitants or more, and counties (by rural and rural-farm residence).

Volume II.

METROPOLITAN HOUSING CHARACTERISTICS

These reports, also designated as Series HC(2), will cover most of the 1970 census housing subjects in considerable detail and cross-classification. There will be one report for each SMSA, presenting data for the SMSA and its central cities and places of 50,000 inhabitants or more, as well as a national summary report.

Volume III.

BLOCK STATISTICS

One report, under the designation Series HC(3), is issued for each urbanized area showing data for individual blocks on selected housing and population subjects. The series also includes reports for the communities outside urbanized areas which have contracted with the Census Bureau to provide block statistics from the 1970 census.

Volume IV.

COMPONENTS OF INVENTORY CHANGE

This volume will contain data on the disposition of the 1960 inventory and the source of the 1970 inventory, such as new construction, conversions, mergers, demolitions, and other additions and losses. Cross-tabulations of 1970 and 1960 characteristics for units that have not changed and characteristics of the present and previous residence of recent movers will also be provided. Statistics will be shown for 15 selected SMSA's and for the United States and regions.

Volume V.

RESIDENTIAL FINANCE

This volume will present data regarding the financing of privately owned nonfarm residential properties. Statistics will be shown on amount of outstanding mortgage debt, manner of acquisition of property, homeowner expenses, and other owner, property, and mortgage characteristics for the United States and regions.

**Volume VI.
ESTIMATES OF "SUBSTANDARD"
HOUSING**

This volume will present counts of "sub-standard" housing units for counties and cities, based on the number of units lacking plumbing facilities combined with estimates of units with all plumbing facilities but in "dilapidated" condition.

**Volume VII.
SUBJECT REPORTS**

Each report in this volume will concentrate on a particular subject. Detailed information and cross-classifications will generally be provided on a national and regional level; in some reports, data for States or SMSA's may also be shown. Among the subjects to be covered are housing characteristics by household composition, housing of minority groups and senior citizens, and households in mobile homes.

Joint Population-Housing Reports

**Series PHC(1).
CENSUS TRACT REPORTS**

This series will contain one report for each SMSA, showing data for most of the population and housing subjects included in the 1970 census.

**Series PHC(2).
GENERAL DEMOGRAPHIC TRENDS FOR
METROPOLITAN AREAS, 1960 to 1970**

This series consists of one report for each State and the District of Columbia, as well as a national summary report, presenting statistics for the State and for SMSA's and their central cities and constituent counties. Comparative 1960 and 1970 data are shown on population counts by age and race and on such housing subjects as tenure, plumbing facilities, value, and contract rent.

**Series PHC(3).
EMPLOYMENT PROFILES OF SELECTED
LOW-INCOME AREAS**

This series will consist of approximately 70 reports, each presenting statistics on the social and economic characteristics of the residents of a particular low-income area. The data relate to low-income neighborhoods in 54 cities and seven rural poverty areas. Each report will provide statistics on employment and unemployment, education, vocational training, availability for work, job history, and income, as well as on value or rent and number of rooms in the housing unit.

Additional Reports

**Series PHC(E).
EVALUATION REPORTS**

This open series will present the results of the extensive evaluation program conducted as an integral part of the 1970 census program, and relating to such matters as completeness of enumeration and quality of the data on characteristics.

**Series PHC(R).
PROCEDURAL REPORTS**

This open series presents information on various administrative and methodological aspects of the 1970 census, and will include a comprehensive procedural history of the 1970 census. The first report issued focuses on the forms and procedures used in the data collection phase of the census.

Computer Summary Tapes

The major portion of the results of the 1970 census will be produced in a set of six tabulation counts. To help meet the needs of census users, these counts are being designed to provide data with much greater subject and geographic detail than it is feasible or desirable to publish in printed reports. The data so tabulated will generally be available—subject to suppression of certain detail where necessary to protect confidentiality—on magnetic computer tape, printouts, and microfilm, at the cost of preparing the copy.

First Count—source of the PC(1)-A reports; contains about 400 cells of data on the subjects covered in the PC(1)-B and HC(1)-A reports and tabulated for each of the approximately 250,000 enumeration districts in the United States.

Second Count—source of the PC(1)-B, HC(1)-A, and part of the PHC(1) reports; contains about 3,500 cells of data covering the subjects in these reports and tabulated for the approximately 35,000 tracts and 35,000 county subdivisions in the United States.

Third Count—source of the HC(3) reports; contains about 250 cells of data on the subjects covered in the PC(1)-B and HC(1)-A reports and tabulated for approximately 1,500,000 blocks in the United States

Fourth Count—source of the PC(1)-C, HC(1)-B, and part of the PHC(1) reports; contains about 13,000 cells of data covering the subjects in these reports and tabulated for the approximately 35,000 tracts and 35,000 county subdivisions in the United States; also contains about 30,000 cells of data for each county.

Fifth Count—will contain approximately 800 cells of population and housing data for 5-digit ZIP code areas in SMSA's and 3-digit ZIP code areas outside SMSA's; the ZIP code data will be available only on tape.

Sixth Count—source of the PC(1)-D and HC(2) reports; will contain about 260,000 cells of data covering the subjects in these reports and tabulated for States, SMSA's, and large cities.

The tapes will generally be organized on a State basis. To use the First Count and Third Count tapes, it will be necessary to purchase the appropriate enumeration district and block maps.

The term "cells" used herein to indicate the scope of subject content of the several counts refers to each figure or statistic in the tabulation for a specific geographic area. For example, in the Third Count, there are six cells for a cross-classification of race by sex: three categories of race (white, Negro, other race) by two categories of sex (male, female).

In addition to the above-mentioned summary tapes, the Census Bureau will make available for purchase certain sample tape files containing population and housing characteristics as shown on individual census records. These files will contain no names or addresses, and the geographic identification will be sufficiently broad to protect confidentiality. There will be six files, each containing a 1-percent national sample of persons and housing units. Three of the files will be drawn from the population covered by the census 15-percent sample and three from the population in the census 5-percent sample. Each of these three files will provide a different type of geographic information: One will identify individual large SMSA's and, for the rest of the country, groups of counties; the second will identify individual States and, where they are sufficiently large, will provide urban-rural and metropolitan-nonmetropolitan detail; and the third will identify State groups and size of place, with each individual record showing selected characteristics of the person's neighborhood.

CURRENT POPULATION REPORTS

In addition to the findings of the Census of Population, conducted every ten years, the Bureau of the Census publishes continuing and up-to-date statistics on population counts, characteristics, and other special studies on the American people. Data are issued in the eight separate series of reports described herein and released under the general title, Current Population Reports.

P-20 POPULATION CHARACTERISTICS. Current national and, in some cases, regional data on geographic residence and mobility, fertility, education, school enrollment, marital status, numbers and characteristics of household and families, etc. Approximately ten reports each year.

P-23 SPECIAL STUDIES. Infrequent reports on methods, concepts, or specialized data.

P-25 POPULATION ESTIMATES AND PROJECTIONS.

Monthly estimates of the total population of the United States; annual mid-year estimates of the population of States, by broad age groups, and of the United States by age, color, and sex; annual estimates of the components of population change. Estimates of the population selected metropolitan areas and their component counties. Projections of the future population of the United States and individual States. Approximately 20 reports each year.

P-26 FEDERAL-STATE COOPERATIVE PROGRAM FOR POPULATION ESTIMATES. Population estimates for counties for selected States in which the figures are prepared by a State agency as part of the Federal-State Cooperative Program for Local Population Estimates.

P-27 FARM POPULATION.

(Census-ERS). Data on the size and selected characteristics of the farm population of the United States. Issued jointly with the Economic Research Service, U.S. Department of Agriculture. One or two reports each year.

P-28 SPECIAL CENSUSES. Results of population censuses taken at the request and expense of city or other local governments. Subscription includes only the quarterly and annual summaries showing the total population figures for all the censuses conducted during the particular period. Individual reports issued for areas of 50,000 or more, showing the population by age, sex, and color are available separately. See "How to Order Reports." Five reports each year.

P-60 CONSUMER INCOME. Information on the proportions of families and persons at various income levels. Also data on the relationship of income to age, sex, color, family size, education, occupation, work experience, and other characteristics. Two reports each year.

P-65 CONSUMER BUYING INDICATORS.

Information on the proportion of households reporting intentions to purchase automobiles, houses, and household equipment within a particular period of time. Also data on recent purchases. Quarterly.

HOW TO ORDER REPORTS

All Current Population Reports are sold as a single subscription for \$14.00 a year. This price includes Series P-20, P-23, P-25, P-26, P-27, P-28 (quarterly and annual summaries only), P-60, and P-65.

Subscriptions to individual series are not sold separately but single copies of reports issued in all series except P-28 may be obtained from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Individual city or area reports in the P-28 series may be ordered from the Bureau of the Census. Prices for these reports vary. For information on titles and prices of individual reports issued in all CPR series, write to Publications Distribution Section, Bureau of the Census, Washington, D.C. 20233.
