

1980 Census of Population and Housing Summary Tape File 1G: Neighborhood Statistics. Technical Documentation

D1-D80-S10G-14-TECH

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

NOTE TO PURCHASERS OF SUMMARY
TAPE FILE 1G, NEIGHBORHOOD STATISTICS

Documentation for Summary Tape File (STF) 1G, Neighborhood Statistics is provided as a supplement to the Census of Population and Housing, 1980: Summary Tape File 1 Technical Documentation. The following sections of the STF 1 documentation apply to STF 1G: Suppression, STF 1 Data Finder, STF 1 Universe Finder, STF 1 Table Outlines, How to Use the Data Dictionary, Overview, STF 1 Technical Information, Glossary, and Questionnaire Information.

Sections of the documentation that have been modified for the STF 1G data file are attached. These pages replace the corresponding pages in the STF 1 documentation.

UPDATE INFORMATION

Additional information concerning this file may be available at a later date. If you have purchased this documentation (with or without tape purchase) from the Census Bureau and wish to receive these User Notes, please complete the coupon below specifying which State you ordered.

Mail to: Data User Services Division

ACKNOWLEDGMENTS

This documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Annette Ralston was the coordinator for this file assisted by Joann Sutton, Mary Thomas, and Norma Lopez. It was partially adapted from materials prepared by JoAnne Eitzen and Richard Warren of Decennial Census Division and staff members of Data User Services Division. Support was provided through content review by staff members from Decennial Census Division, Geography Division, Housing Division, Population Division, and Statistical Methods Division.

INTRODUCTION

The Census Bureau developed the Neighborhood Statistics Program (NSP) to assist localities that needed statistics for recognized subareas, generally called "neighborhoods." Through this program, considerable demographic, social, economic, and housing information based on tabulations of 100-percent data and sample data from the 1980 census is available for the locally defined neighborhoods. The statistics are used to identify the socioeconomic characteristics of the population residing in each area, to gauge the possible qualification of the area for participation in federal and other programs, and to help in formulating programs needed by neighborhood residents.

The Neighborhood Publication Area (NPA) is the total area within which neighborhoods were defined by each participant in the NSP. The NPA may be a city, a city plus post-census annexations, a city and adjacent territory, a township, the unincorporated portion of a county, an entire county, etc. The NPA could be almost any area or combination of areas provided that it was covered by numbered census blocks. The NPA's were generally delineated by the local participants, but were subject to review and revision by the Bureau to assure that NPA's did not overlap and otherwise met the requirements of the Bureau. Individual neighborhoods were identified within each NPA by the officially designated local contact person for the NPA. Neighborhood boundaries could cross any political or tabulation boundary within the NPA as long as they did not also split census blocks or overlap other neighborhood boundaries.

Neighborhood publication area reports are available on microfiche or paperprints for each NPA. In each report, the data are presented for the total NPA, each neighborhood in the NPA, and the remainder (if any) of the NPA; i.e., that portion of the NPA containing no neighborhoods. The neighborhood data are also available by State on Summary Tape Files 1G and 3G. Numeric codes for the geographic areas covering each neighborhood publication area and the component neighborhoods are available in the Neighborhood Equivalency File and on microfiche. Tapes, reports, and microfiche can be purchased from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 753-4100.

Maps showing NPA and neighborhood boundaries are not available from the Census Bureau. Maps with the appropriate boundaries can be constructed using the Neighborhood Equivalency File noted above and maps showing the census areas; or maps may be available from the local participant in the NSP.

Part I--Information Specific to Summary Tape File 1G

ABSTRACT

Census of Population and Housing, 1980:
Summary Tape File 1G, Neighborhood Statistics
[machine-readable data file] / conducted by
the U.S. Bureau of the Census. --Washington:
Bureau of the Census [producer and distributor],
1983.

TYPE OF FILE:

Summary statistics.

UNIVERSE DESCRIPTION:

All persons and housing units in neighborhood program areas.

SUBJECT-MATTER DESCRIPTION:

This file contains complete-count data. Population items tabulated include age, race, sex, marital status, Spanish origin, household type, and household relationship. Housing items tabulated include occupancy/vacancy status, tenure, contract rent, value, condominium status, number of rooms, and plumbing facilities. Selected aggregates, means, and medians are also provided. Data are presented in 59 tables consisting of 321 cells.

GEOGRAPHIC COVERAGE:

Locally defined neighborhood publication areas and their component neighborhoods in the 50 States, the District of Columbia, and Puerto Rico who chose to participate in the Neighborhood Statistics Program. The microfiche accompanying the technical documentation contains numeric codes and names of neighborhood publication areas and component neighborhoods.

TECHNICAL DESCRIPTION:

FILE SIZE:

STF 1G consists of one file per State. The file has a logical record length of 3276 characters with two record segments of 1638 characters each. The block size for the files varies with user specifications. A printout listing the block size and block count will be sent with each file.

FILE SORT SEQUENCE:

This file is sorted by neighborhood within the neighborhood publication area.

REFERENCE MATERIALS:

U.S. Bureau of the Census. "Census of Population and Housing, 1980: Summary Tape File 1G, Neighborhood Statistics Technical Documentation." The documentation includes this abstract as well as additional information about the file and a data dictionary. One copy accompanies each file order. When ordered separately, it is available for \$5.00 from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

PHC80-R1. 1980 Census of Population and Housing Users' Guide. This publication is a comprehensive guide to 1980 census data. It covers 1980 census subject content, procedures, geography, statistical products, limitations of the data, sources of user assistance, notes on data use, a glossary of terms, and guides for locating data in reports and tape files. The guide is issued in loose-leaf form and sold in parts (R1-A, -B, etc.) as they are prepared. Part A, Text and Part B, Glossary (published as part of Supplement 1 to the Users' Guide) are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Part A: S/N 003-024-03625-8. Price is \$5.50. Supplement 1 (including Part B): S/N 003-024-05004-8. Price is \$6.00.

Monthly Product Announcement (MPA). New Census Bureau products released each month are listed in the MPA. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

RELATED PRINTED REPORTS AND MICROFICHE:

Listed below are some of the products which are currently available or will be released. For a complete listing, see the 1980 Census Users' Guide. The products may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 unless otherwise indicated.

Neighborhood Publication Area (NPA) Reports. A report on microfiche or paperprints is available for each NPA. Data are presented for the total NPA, each neighborhood in the NPA, and the remainder of the NPA; i.e., that portion of the NPA containing no neighborhoods. The reports can be ordered from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

PC80-1-A Number of Inhabitants. These reports are largely derived from STF 1 and contain final 1980 population counts and historic counts from previous censuses for States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas (UA's), urban and rural residence, counties, county subdivisions, incorporated places, and census designated places (and towns and townships in selected States). Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands of the United States, American Samoa, Northern Mariana Islands, and the remainder of the Trust Territory of the Pacific Islands.

HC80-1-A General Housing Characteristics. Statistics on units at address, tenure, condominium status, number of rooms, persons per room, plumbing facilities, value, contract rent, and vacancy status are shown for some or all of the following areas or their equivalents: States, counties, county subdivisions, places (and towns and townships in selected States) of 1,000 or more inhabitants, SCSA's, SMSA's, urbanized areas, American Indian reservations, and Alaska Native villages. Selected tables contain housing characteristics for urban and rural areas.

PHC80-1 Block Statistics (Microfiche report). Data provided are derived from STF 1 and include final population and housing counts (totals) and statistics for selected characteristics based on responses to complete-count (100-percent) questions. Data are shown for individual blocks in the blocked portion of each standard metropolitan statistical area (SMSA), and for urbanized areas, places of 10,000 or more inhabitants, and areas that contracted with the Census Bureau to provide block statistics outside of SMSA's. There is one title for each SMSA with block-numbered areas within the SMSA, one title for each State and Puerto Rico with block-numbered areas outside SMSA's, and a U.S. Summary which is an index to the set. Block reports on microfiche and maps on paper stock are available from the U.S. Government Printing Office, Washington, D.C. 20402. Microfiche paperprints of the reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

PHC80-3 Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas. This publication series is derived from STF 1 and STF 3 and shows selected population and housing statistics based on complete count and sample estimate data for States, standard metropolitan statistical areas (SMSA's), counties, functioning minor civil divisions (20 specified States), and incorporated places. There is one report for each State, the District of Columbia, and Puerto Rico.

RELATED MACHINE-READABLE FILES AND MICROFICHE:

Listed below are some of the 1980 census data files which have been or will be released.

Census of Population and Housing, 1980: Neighborhood Equivalency File. This file contains area names and numeric codes for neighborhood publication areas, neighborhoods, counties, minor civil divisions (MCD's)/census county divisions (CCD's), and places. Also included are codes for tracts, block groups, blocks, and States.

Census of Population and Housing, 1980: Summary Tape Files (STF's).

STF 1 (Files A, B, C, D, E, and F) provide 321 cells of complete-count population and housing data. This file set includes data shown in the PHC80-1, PHC80-3, and PC80-1-A reports.

On files A, B, and C, data are summarized for different levels of geography. These areas include the United States, regions, divisions, States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas, congressional districts for the 96th Congress, counties, county subdivisions, places, census tracts, enumeration districts in unblocked areas, and blocks and block groups in blocked areas. All files have been released. Data from the STF 1A and STF 1C files are also available on microfiche.

STF 1D, has data for States, counties, places of 10,000 or more (and, MCD's of 10,000 or more in eleven selected States), and congressional districts for the 98th Congress. These districts were determined after the 1980 census. All STF 1D State files have been released.

STF 1E provides data for North Dakota only based on 1970 census geography. Data are provided for the State, counties, and census county divisions. This file has been released.

STF 1F presents data by State for each school district and county or county portion within each school district. The files are being released by State as of March 1983.

STF 2 contains 2,292 cells of detailed complete-count population and housing data, of which 962 are repeated for race and/or Spanish origin groups present in the tabulation area. Data are summarized for the United States, regions, divisions, States, standard consolidated statistical areas (SCSA's), urbanized areas, counties, county subdivisions, places of 1,000 or more inhabitants, census tracts, American Indian reservations, and Alaska Native villages. This file set includes data shown in the PHC80-2, PC80-1-B, and HC80-1-A reports. All State files have been released. STF 2C is expected to be released in late 1983.

STF 3 (Files A, B, C, D, F, and G) contains 1,126 cells of population and housing data estimated from the sample. This file set includes data shown in the PHC80-3 reports. Files A and C provide data for the same areas as Files A and C of STF 1, excluding blocks. STF 3A files have been released for all States. File B provides summaries for each 5-digit ZIP code area within States, standard metropolitan statistical areas (SMSA's), and counties. STF 3B is a special tabulation contracted by a private organization. All files have been released. STF 3A and STF 3C are also available on microfiche. STF 3D, which will be released during early 1983 provides summaries for States, counties, places of 10,000 or more (and, MCD's of 10,000 or more in 11 selected States), and congressional districts for the 98th Congress. These districts were determined after the 1980 census. STF 3F provides sample data for the same areas as STF 1F. State files will be released on a flow basis in early 1983. STF 3G presents sample data for neighborhood publication areas that are in the Neighborhood Statistics Program. Files will be released in mid-1983.

STF 4 is the geographic counterpart of STF 2, but the number of cells of data is approximately three times greater. STF 4 provides detailed population and housing data estimated from the sample, most of which are repeated for race, Spanish origin, and ancestry groups. Data are summarized for areas similar to those shown for STF 2, except that data for places are limited to those with 2,500 or more inhabitants. This file set includes data shown in the PC80-1-C, HC80-1-B, and PHC80-2 reports. STF 4 is scheduled to be released in mid-1983.

STF 5 contains over 100,000 cells of population and housing data estimated from the sample and provides highly detailed tabulations and cross-classifications for States, standard metropolitan statistical areas (SMSA's), and counties and cities of 50,000 or more inhabitants. Most subjects are classified by race and Spanish origin. This file set includes data shown in the PC80-1-D and HC80-2 reports. STF 5 is tentatively scheduled to be available in late 1983.

Census of Population and Housing, 1980: Geographic Identification Code Scheme. The file lists names and numeric codes for States, counties, county subdivisions (MCD's/CCD's), and places for which 1980 census data were tabulated. It includes much of the information from the PHC80-R5 Geographic Identification Code Scheme report.

Census of Population and Housing, 1980: Public-Use Microdata Samples. Public-use microdata samples are computerized files containing records for a sample of housing units, with information on the characteristics of each unit and the persons in it. These files do not contain names or addresses, and geographic identification is sufficiently broad to protect

confidentiality. There are three mutually exclusive samples, the A sample including 5 percent, and the B and C samples each including 1 percent of all persons and housing units. Three 1-in-1,000 samples were also prepared, one each extracted from the A, B, and C samples. Each sample features a different geographic scheme. Microdata files allow the user to prepare customized tabulations. These files are being released on a flow basis by State beginning in April 1983.

Census of Population and Housing, 1980: Master Area Reference File (MARF). An extract of STF 1A, this file contains numeric codes and names (where appropriate) of geographic areas plus selected complete-count population and housing data. All State files have been released.

Census of Population and Housing, 1980: P.L. 94-171 Population Counts (Released February/March 1981). The file, organized by State, provides counts for total population, and provisional counts for five racial categories and Spanish/Hispanic origin. Summaries are provided for the State, counties, minor civil divisions (MCD's) or census county divisions (CCD's), incorporated places or place segments within MCD's/CCD's, remainders of MCD's/CCD's, election precincts in certain States or portions of certain States, census tracts or block numbering areas, block groups and blocks or, for areas that are not block numbered, enumeration districts (ED's). The figures presented in P.L. 94-171 may differ from those shown in STF 1. The changes reflect corrections of errors found after P.L. 94-171 was prepared. Microfiche (and paper photo copy of microfiche) of the P.L. 94-171 Population Counts file is also available.

Census Software Package (CENSPAC). CENSPAC is a generalized data retrieval system developed by the Census Bureau for use with Census Bureau statistical data files. CENSPAC provides file processing capabilities primarily for summary data files, but also provides some features which apply to microdata files. A manual describing the software accompanies the file order or may be purchased separately.

FILE AVAILABILITY:

STF 1G files are sold by State. Tapes are available at 1600 bpi and 6250 bpi, 9-track, at a current cost of \$140 per reel. STF 1G files can be ordered using the Customer Services order form for tapes on the following page. When ordering, please refer to file number Cu SUM 80 026 and indicate the name of the State.

The Neighborhood Equivalency File is sold separately and may also be ordered from Customer Services.

For information on the release date and the number of reels for each State, subscribe to the Monthly Product Announcement (MPA). The MPA is available without charge and may be ordered using the Customer Services order form for publications.

STF 1G FILE DESCRIPTION

This file presents 1980 census population and housing data based on tabulations of 100-percent data for locally defined neighborhoods. (Sample data from the 1980 census for locally defined neighborhoods are available on STF 3G.)

File Structure and Geographic Coverage

For each geographic area, there will be a 3276-character census logical record. The census logical record is divided into two 1638-character record segments to conform with ASCII standards. Each segment is identified in positions 99-100. The first 102 characters on each record segment provide geographic identification (positions 1 through 102 and 1639 through 1740). The next 150 characters (positions 103 through 252) on the first segment provide additional geographic information and the suppression flags. The remaining 1386 characters on the first segment (positions 253 through 1638) and the remaining 1536 characters on the second segment (positions 1741 through 3276) provide the data for the 59 tables on STF 1. For a concise description of the geographic coverage, see Appendix A.

File STF 1G. As shown in Figure 1, summary level data are presented for the neighborhood publication area and for each neighborhood. Each summary is identified by a summary level code in positions 10-11 of the record as well as at the beginning of each segment. Following Figure 1 is a discussion of each summary level.

Figure 1. Geographic Hierarchy of STF 1G

Neighborhood publication area (NPA)

Neighborhood or remainder of the NPA

The neighborhood publication area record (Summary Level 42) contains a summary for the area within which neighborhoods were defined. It may be a city, a city plus post-census annexations, a city and adjacent territory, a township, the unincorporated portion of a county, all blocked-numbered areas in a county, etc.

The neighborhood record (Summary Level 43) contains a summary for each neighborhood within the NPA and the remainder of the NPA; i.e., the portion of each NPA that contains no neighborhoods.

Calculation of Medians in STF 1.

Calculation of median values are done assuming a continuous distribution with the whole number as the mid-point of the class interval. Figure 2 below lists the class interval definitions for each variable which has a median calculated.

Figure 2. Class Intervals for Computations of Median for Variables in STF 1.

<u>I.</u>	<u>AGE</u>	<u>Lower Limit</u>	<u>Upper Limit</u>

Census of Population and Housing, 1980:
Summary Tape File 1G

Geographic information in positions 1-252 of this file are in a standard geographic record format which will be followed for all 1980 summary tape files. Each field of this standard format is identified in this dictionary, although it may not be used in STF 1 in general or for a specific STF 1 file (Files A-G). Appendix A describes the geographic coverage for STF 1G.

When processing this file, the geographic identification portion of each record segment (position 1-252 and positions 1639-1740 of the record) should be read as alphanumeric. The remaining portion of the file should be read as numeric.

OVERVIEW

1980 Census Summary Tape Program

Computer-readable data from the 1980 census include both summary data and microdata. Summary data include Summary Tape Files (STF's) 1 to 5, which are generally comparable to the First Count through Sixth Count files from the 1970 census. In addition to the files in the STF series, other summary data to be released by the Bureau include a P.L. 94-171 Population Counts file for use in reapportionment/redistricting (released in February/March, 1981), various subject report files, and the Master Area Reference File which provides geographic items from STF 1 and selected population and housing items. All of these files contain data summarized to various levels of geography. Microdata files, on the other hand, contain disclosure-free household and person records from the census. These files are similar to the 1970 Public Use Sample files and will be available some time after the release of STF 4.

Content and Geographic Coverage of Summary Tape Files

Summary Tape Files vary by summary level of geography, detail of information, and whether they include 100-percent or sample data. STF's 1 and 2 provide data based on the set of census questions asked of all persons and housing units. These data are 100-percent data. STF's 3, 4, and 5 are based on sample data. These data are estimates based on the responses of a sample of the population and housing units and contain more extensive housing and population information. In 1980, the sampling rate was 1 in 2 in governmental units with less than 2,500 inhabitants and 1 in 6 elsewhere. Overall the sampling rate was approximately 1 in 5. The Bureau's 1977 population estimates were used to determine the sampling rate for a given area.

The geographic detail of STF 1 is the maximum possible detail available from the census: data for individual blocks in block-numbered areas and for enumeration districts outside block-numbered areas. The lowest level of geography provided by STF 2 is census tract, or minor civil division/census county division (MCD/CCD) and places of 1,000 or more inhabitants in nontraced areas. The lowest level for STF 3 is the block group or enumeration district, while the smallest geographic unit for STF 4 is census tract or MCD/CCD and places of 2,500 or more inhabitants in nontraced areas. STF 5's lowest geographic level is the standard metropolitan statistical area (SMSA), central city(ies), places of 50,000 or more inhabitants, and counties of 50,000 or more inhabitants. Figure 8 on the following page details the geographic levels in each Summary Tape File.

For comparison purposes, STF 1 is similar in subject matter and geographic detail to the First and Third Count files for 1970. STF's 2 and 4 are roughly comparable to the 1970 Second and Fourth Counts, respectively. STF 3 is comparable to the 1970 Fifth Count, while STF 5 corresponds to the 1970 Sixth Count. To summarize, STF 1 contains more detailed geography but less subject matter detail than STF 2.

FOOTNOTES TO FIGURE 8

1/ In addition to summary areas presented on the Summary Tape Files, geographic area codes are included for areas such as Ward, State Economic Area, District Office, Indian Subreservation, and Standard Federal Administrative Region.

2/ Population size cutoffs for the presentation of Place level data in the STF's are as follows:

STF 1A	all places	STF 3A	all places
STF 1B	all places	STF 3B	All 5-digit zip code areas
STF 1C	10,000 or more	STF 3C	10,000 or more
STF 1D	10,000 or more		
STF 2A	10,000 or more	STF 4A	10,000 or more
STF 2B	1,000 or more	STF 4B	2,500 or more
STF 2C	10,000 or more	STF 4C	10,000 or more
		STF 5	50,000 or more

3/ Multiple summary level codes for a Summary Area indicate a series of very similar summary levels which are presented in identical STF files. A specific listing is shown below of summary levels which are grouped together from the chart. (A slash mark "/" is used to indicate "within.")

Grouping 13, 14, 15, and 16:

13. Place/MCD (CCD)/County/State
14. Tract (BNA)/Place/MCD (CCD)/County/State
15. BG/Tract (BNA)/Place/MCD (CCD)/County/State
16. ED/Tract/Place/MCD (CCD)/County/State

Grouping 18, 19, 20, 21, and 22:

18. MCD (CCD)/County/SMSA/State
19. Place/MCD (CCD)/County/SMSA/State
20. Tract (BNA)/Place/MCD (CCD)/County/SMSA/State
21. Block/Tract (BNA)/Place/MCD (CCD)/County/SMSA/State
22. ED/Tract/Place/MCD (CCD)/County/SMSA/State

Grouping 23 and 24:

23. Place/County/SMSA/State
24. Tract (BNA)/Place/County/SMSA/State

Grouping 25 and 26:

25. Block/Tract (BNA)/Place/County/SMSA/State
26. ED/Tract/Place/County/SMSA/State

Grouping 30 and 31:

30. Indian Reservations and Alaska Native villages by State
31. Indian Reservations and Alaska Native villages by County within State

Grouping 37, 38, and 39:

37. County/Congressional District/State
38. Place/Congressional District/State
39. MCD/Congressional District/State

Similarly, STF 3 contains more detailed geography but less subject matter detail than STF 4. STF's 1 and 2 contain complete count data, while STF's 3 and 4 contain sample estimates. Finally, STF 5 contains sample estimates aggregated to a higher level of geography than the other files, but which are presented in the most subject matter detail.

1980 Census Maps

Users may need certain types of maps for the geographic area(s) they are extracting from the file(s). To determine which maps best define the geographic area(s), compare the geographic coverage of each file (see Appendix A) with the description of each type of 1980 census map (see below).*

The maps used in conjunction with the above summary tape files consist of five basic types: county maps, place maps, place-and-vicinity maps, American Indian reservation maps, and Metropolitan Map Series (MMS) or Vicinity Map Series (VMS). Ordering information for these maps may be obtained from Data User Services Division, Customer Services (Maps), Bureau of the Census, Washington, D.C. 20233.

All five map types have several characteristics in common:

- To improve legibility, most 1980 maps are at a larger scale than were the comparable 1970 maps.
- Symbols used for the various boundaries are consistent for all five types of maps.
- Names, identifying numbers, and boundaries are shown where appropriate on all maps for counties, minor civil divisions (MCD's) or census county divisions (CCD's), places, American Indian reservations and Alaska Native villages, census tracts or block numbering areas (BNA's) where present, enumeration districts (ED's) (in those areas which are not block numbered), and blocks.
- All maps show metric, feet, and mile scales.
- All maps containing block-numbered areas will be available from the U.S. Government Printing Office.

The following paragraphs present a brief description of each type of map. The inclusion of the maps with various 1980 census products reflect the Bureau's plans as of July 1981.

County Maps. County maps are the backbone of the Bureau's map coverage. Theoretically, with a complete set of these maps the overall picture of the census geographic framework for the entire United States and its possessions is shown. Most maps in the county series are at a scale of 1 inch:1 mile. Most county maps are created by superimposing boundaries for most areas for which data are tabulated on base maps supplied by State transportation or highway

*Neighborhoods are not represented on census maps available to the public.
