

1980 Census of Population and Housing Summary Tape File 2, Puerto Rico. Technical Documentation

D1-D80-S200-14-TECHP

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

ACKNOWLEDGMENTS

This documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Edward Hightower was the coordinator for this file assisted by Mary Kilbride, Joann Sutton, and Barbara Shugart. It was partially adapted from materials prepared by Ray Dennis of Decennial Census Division and other staff members of Data User Services Division. Support was provided through content review by staff members from Decennial Census Division, Geography Division, Housing Division, Population Division, and Statistical Methods Division.

ABSTRACT

Census of Population and Housing, 1980:
Summary Tape File 2--Puerto Rico [machine-
readable data file] / conducted by the U.S.
Bureau of the Census. --Washington: The
Bureau [producer and distributor], 1983.

TYPE OF FILE:

Summary statistics.

UNIVERSE DESCRIPTION:

All persons and housing units in Puerto Rico.

SUBJECT-MATTER DESCRIPTION:

The Summary Tape Files 2A and 2B for Puerto Rico contain complete-count data. Population items tabulated include age in single years, sex, marital status, household type, and household relationship. Housing items tabulated include occupancy/vacancy status, tenure, contract rent, value, condominium status, number of rooms, and plumbing facilities. Selected aggregates, means, and medians are also provided. The STF's, 2A and 2B, for Puerto Rico are separate files which have identical tables but differ in geographic coverage.

GEOGRAPHIC COVERAGE:

This abstract provides general information concerning the geographic coverage of STF 2 for Puerto Rico. Detailed information about hierarchy and splits across higher levels of geography will be discussed in the "Geographic Coverage" section of the documentation.

File A provides summaries for standard metropolitan statistical areas (SMSA's) and for the following SMSA components: municipios, places 1/ of 10,000 or more inhabitants, census tracts, and totals for split census tracts. A summary is also provided for the tracted area outside of the SMSA.

1/ Places in Puerto Rico are referred to as zonas urbanas and aldeas.

File B provides summaries for Puerto Rico, the standard consolidated statistical area (SCSA) and the urban and rural portions of the SCSA, standard metropolitan statistical areas (SMSA's) and the urban and rural portions of SMSA's, urbanized areas, municipios and the rural portion of the municipios, minor civil divisions (MCD's) ^{1/}, and places of 1,000 or more inhabitants.

TECHNICAL DESCRIPTION:

FILE SIZE:

STF's 2A and 2B for Puerto Rico are separate files, each consisting of a record A and a record B. Record A has a logical record length of 15,648 characters and is divided into eight segments containing 1,956 characters each. Record B has a logical record length of 11,763 characters and is divided into six segments containing 1,956 characters each.

FILE SORT SEQUENCE:

The file is sorted by level of geographic hierarchy. For a complete explanation, see the "Geographic Coverage" section.

REFERENCE MATERIALS:

U.S. Bureau of the Census. "Census of Population and Housing, 1980: Summary Tape File 2--Puerto Rico Technical Documentation" (this document). The documentation includes this abstract, additional information about the file, and a data dictionary. One copy accompanies each file order. When ordered separately, it is available for \$5 from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

Metropolitan Map Series/Vicinity Map Series (MMS/VMS). This map series provides coverage of densely settled areas of selected municipios. These maps are referred to as the Metropolitan Map Series (MMS) when the maps cover SMSA areas and as the Vicinity Map Series (VMS) when the maps cover areas not in an SMSA. For a more detailed discussion of the MMS/VMS, see the section, "1980 Census Maps."

Municipio Maps. The maps cover all municipios except where the Metropolitan Map Series/Vicinity Map Series (MMS/VMS) sheets cover an entire municipio. For a more detailed discussion on these maps, see the section, "1980 Census Maps."

Place Maps. Place maps are used for places not shown on MMS/VMS where most of the development is confined within boundaries established for a zona urbana or aldea. For a more detailed discussion on place maps, see the section, "1980 Census Maps."

For information about the availability of the above maps, write or call Data User Services Division, Customer Services (Maps), Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

^{1/}MCD's in Puerto Rico are referred to as pueblos and barrios.

PHC80-R1 1980 Census of Population and Housing Users' Guide. This publication is a comprehensive guide to 1980 census data. It covers 1980 census subject content, procedures, geography, statistical products, limitations of the data, sources of user assistance, notes on data use, a glossary of terms, and guides for locating data in reports and tape files. The guide is issued in loose-leaf form and sold in parts (R1-A, -B, etc.) as they are prepared. Part A, Text and Part B, Glossary (published as part of Supplement 1 to the Users' Guide) are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Part A: S/N 003-024-03625-8. Price is \$5.50. Supplement 1 (including Part B): S/N 003-024-05004-8. Price is 6.00.

Monthly Product Announcement (MPA). New Census Bureau products released each month are listed in the MPA. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

RELATED PRINTED REPORTS AND MICROFICHE:

Listed below are some of the products which are currently available or will be released. For a complete listing, see the 1980 Census Users' Guide.

PHC80(V) Advance Reports. These reports contain population and housing unit counts from the 1970 and 1980 censuses and provisional 1980 race and Spanish/Hispanic origin counts. The set consists of 56 reports including a U.S. Summary and one report for each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands of the United States, and American Samoa. The reports are available from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233. Prices of reports vary.

The report for Puerto Rico shows 1970 and 1980 population and housing unit counts for the following areas: Puerto Rico, municipios, municipio subdivisions, zonas urbanas, and aldeas. The 1980 census figures presented in STF 1 and STF 2 may differ from those shown in the Advance Reports, PHC80-V. The changes reflect corrections of errors found after the PHC80-V reports were prepared. The changes may affect any geographic area in this file.

PHC80-1 Block Statistics. (Microfiche report). Data are derived from STF 1 and include final population and housing counts (totals) and statistics on selected characteristics based on responses to complete-count (100-percent) questions. Data are shown for individual blocks in the blocked portion of each standard metropolitan statistical area (SMSA), places of 10,000 or more inhabitants outside of SMSA's, and for areas which contracted with the Census Bureau to provide block statistics. There is one title for each SMSA with block-numbered areas within the SMSA, and one title for each State and Puerto Rico with block-numbered areas outside of SMSA's. Block reports and maps on paper stock are available from the U.S. Government Printing Office, Washington, D.C. 20402. Microfiche paperprints of the reports are available from Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

PHC80-2 Census Tracts. Data for selected population and housing subjects derived from STF 2 and STF 4 are shown by census tracts for standard metropolitan statistical areas (SMSA's), central cities, component SMSA counties ^{1/}, selected nonSMSA counties, and places of 10,000 or more inhabitants within SMSA's and selected counties ^{1/}. Some tables are based on 100-percent or complete-count tabulations while others are based on sample tabulations. There is one report for each SMSA and one for the tracted balance of each State and Puerto Rico. Maps are sold separately from the tract reports. Tract reports are available from the U.S. Government Printing Office, Washington, D.C. 20402.

PHC80-3 Summary Characteristics for Governmental Units and Standard Metropolitan Statistical Areas. This publication series is derived from STF 1 and STF 3 and shows selected population and housing statistics based on complete count and sample estimate data for the following areas or their equivalents ^{1/}: States, SMSA's, counties, functioning minor civil divisions (20 specified States), and incorporated places. There is one report for each State, the District of Columbia, and Puerto Rico. The publication is available from the U.S. Government Printing Office, Washington, D.C. 20402.

PC80-1-A Number of Inhabitants. These reports are largely derived from STF 1 and contain final 1980 population counts and historic counts from previous censuses for the following areas or their equivalents ^{1/}: States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas (UA's), urban and rural residence, counties, county subdivisions, incorporated places, and census designated places. Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands of the United States, American Samoa, Northern Mariana Islands and the remainder of the Trust Territory of the Pacific Islands. These reports are available from the U.S. Government Printing Office, Washington, D.C. 20402.

PC80-1-B General Population Characteristics. Data are derived from STF 2 and include statistics on household relationship, age, sex, marital status, race and Spanish origin (U.S. and Virgin Islands of U.S. only) for the following areas or their equivalents ^{1/}: States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas, counties, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations, and Alaska Native villages. These reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands of the United States, American Samoa, Northern Mariana Islands, and the remainder of the Trust Territory of the Pacific Islands. These reports are available from the U.S. Government Printing Office, Washington, D.C. 20402.

HC80-1-A General Housing Characteristics. Statistics derived from STF 2 provide data on housing unit totals, tenure, number of rooms, persons per room, units in structure, mobile home, value, contract rent and vacancy status. Data are shown for the following areas or their equivalents: States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), urbanized areas, county subdivisions, places of 1,000 or more inhabitants, American Indian reservations, and Alaska Native villages. Reports are issued separately for the United States, each State, the District of Columbia, Puerto Rico, Guam,

^{1/}For the equivalent geographic areas in Puerto Rico, refer to the glossary.

Virgin Islands of the United States, American Samoa, Northern Mariana Islands, and the remainder of the Trust Territory of the Pacific Islands. These reports are available from the U.S. Government Printing Office, Washington, D.C. 20402.

RELATED MACHINE-READABLE FILES AND MICROFICHE:

Listed below are some other 1980 census data files which have been or will be released.

Summary Tape Files (STF's) 1-5. Files 1 and 2 present data collected on a 100 percent basis. STF's 3 through 5 are based on sample data inflated to represent the total population. Files vary in terms of geographic summary levels and amount of detail.

Census of Population and Housing, 1980-- Master Area Reference File (MARF). This file contains numeric codes and names (where appropriate) of geographic areas plus selected complete-count population and housing data. This file is an extract of STF 1A.

FILE AVAILABILITY:

STF's 2A and 2B for Puerto Rico are available at 1600 bpi or 6250 bpi, 9-track, at a cost of \$140 per reel. For information on number of reels and release date for the Puerto Rico STF's, subscribe to the Monthly Product Announcement (MPA). The MPA is available without charge and may be ordered using the Census Publications order form on the following page.

STF 2--PUERTO RICO FILE DESCRIPTION

Summary Tape File 2 (STF 2) for Puerto Rico is one of a series of summary data files available from the 1980 census. The file contains complete-count or 100-percent data. It is divided into two separate parts, STF2A--Puerto Rico and STF2B--Puerto Rico. STF 2A focuses primarily on standard metropolitan statistical areas and their components while STF 2B focuses on Standard Consolidated Statistical Area, Standard Metropolitan Statistical Areas, Urbanized Areas, Municipios, and Places. (See figures 3 and 4.)

STF 2--Puerto Rico File Suppression

STF2--Puerto Rico (both 2A and 2B) is presented in two types of records, record A and record B, each record containing different tables. Record A contains 97 tables while record B contains 45 tables. The census logical record size for record A is 15,648 characters and for record B, 11,736 characters. Because of its large census logical record size, STF 2 is divided into segments to conform with ANSI standards. Each segment is 1,956 characters in length. Record A is divided into eight segments while record B is divided into six segments.

The first segment for each census logical record begins with 252 characters of geographic information and suppression flags. Each subsequent segment in the census logical record begins with 102 characters of geographic information.

The record segments have been arranged so that individual tables do not cross segment boundaries. Because of this, each segment has some padding at the end. The following charts illustrate the segmentation in record A and record B.

Figure 1. Record A Segment Arrangement

Segment No.	No. of Chars. (Geography)	Tables	No. of Chars. (Tables)	No. of Chars. (Padding)	Total Chars.
1	252	A1-A14	837	867	1,956
2	102	A15-A17	1,818	36	1,956
3	102	A18-A28	1,665	189	1,956
4	102	A29-A38	1,631	223	1,956
5	102	A39-A48	1,524	330	1,956
6	102	A49-A59	1,548	306	1,956
7	102	A60-A82	1,341	513	1,956
8	102	A83-A97	1,017	837	1,956
<u>Total</u>	966	A1-A97	11,381	3,301	15,648

Figure 2. Record B Segment Arrangement

Segment No.	No. of Chars. (Geography)	Tables	No. of Chars. (Tables)	No. of Chars. (Padding)	Total Chars.
1	252	B1-B6	1,395	309	1,956
2	102	B7	792	1,062	1,956
3	102	B8	1,854	0	1,956
4	102	B9-B11	1,827	27	1,956
5	102	B12-B27	1,710	144	1,956
6	102	B28-B45	1,353	501	1,956
<u>Total</u>	762	B1-B45	8,931	2,043	11,736

Geographic Coverage

STF 2A. STF 2A provides data for census tracts within SMSA's or SMSA portions, as well as the non-SMSA tracted remainder of Puerto Rico. The chart below indicates the geographic hierarchy of the file.

Figure 3. Geographic Hierarchy of STF 2A--Puerto Rico

SMSA
Municipio
Place of 10,000+ ^{1/}
Census Tract
Totals for split census tracts

The standard metropolitan statistical area (SMSA) record (summary level 08) contains a summary for each SMSA within Puerto Rico in FIPS SMSA code sequence. A record for the tracted area outside of the SMSA's has a pseudo SMSA code of 9999.

The municipio record (summary level 17) contains a summary for each municipio within the SMSA. These summaries are in FIPS municipio code sequence. Municipios in the tracted area outside the SMSA have a pseudo SMSA code of 9999.

^{1/}Places in Puerto Rico are referred to as zonas urbanas and aldeas.

The place record (summary level 23) contains a summary for each "place" or portion of a place (if the place crosses municipio boundaries) within each component municipio. In this summary, "places" are defined as 1) central cities of SMSA's, 2) places of 10,000 or more inhabitants, and/or 3) remainder of municipio. The places are in census place code sequence. The "remainder of municipio" record has a pseudo place code of 9999.

The census tract record (summary level 24) contains a summary for each tract or portion of a tract within the place, place segment, or remainder of the tracted municipio. These summaries are in census tract code sequence. If a portion of the SMSA is not tracted, the summary will have a pseudo tract code of 999999.

The split census tract total record (summary level 32) contains a summary for each tract which is split by one or more places of 10,000 or more inhabitants. If the tract is not split, no summary for the tract will appear.

STF 2B. STF 2B presents data for Puerto Rico and also smaller geographic levels within Puerto Rico. The chart below indicates geographic summary levels of this file.

Figure 4. Geographic Hierarchy of STF 2B

Municipio
Municipio (rural portion)
MCD 1/
Ciudades and Pueblos
Places of 1,000+ 2/

The State record (summary level 04) contains a summary for Puerto Rico. It is followed by a summary for each of the component parts listed below. If there are no data for a specific component, the summary contains zeroes in the data cells. These components are further identified by the urban/rural code (positions 12-13) or the SMSA component code (positions 14-15).

1/MCD's in Puerto Rico are referred to as pueblos and barrios.

2/Places in Puerto Rico are referred to as zonas urbanas and aldeas.

Urban/Rural Components

Urban

Inside urbanized areas

Central cities

Urban fringe

Outside urbanized areas

Rural

The standard consolidated statistical area (SCSA)/State record (summary level 06) contains a summary for the SCSA. Following this summary is a summary for the urban part of the SCSA followed by a summary for the rural part of the SCSA.

The standard metropolitan statistical area (SMSA)/State record (summary level 08) contains a summary for each SMSA in Puerto Rico. These summaries are in FIPS SMSA code sequence. Following this summary is a summary for the urban part of the SMSA followed by a summary for the rural part of the SMSA.

The urbanized area (UA)/State record (summary level 10) contains a summary for each UA in Puerto Rico. These summaries are in census UA code sequence.

The municipio record (summary level 11) contains a summary for each municipio in FIPS county code sequence. This is followed by a summary for the rural portion of the municipio.

The minor civil division (MCD) record (summary level 12) contains a summary for each MCD within the municipio in census code sequence.

The place record (summary level 27) contains a summary for each place of 1,000 or more persons in census place code sequence.

The ciudad and pueblo record (summary level 28) contains a summary for ciudades and pueblos. Ciudades and pueblos are treated as minor civil divisions (MCD's) for census purposes.

Computation of Medians in STF 2--Puerto Rico

A minimum and maximum value has been determined for each computed median. Any computed median falling outside these ranges will be set to that value. Listed below are the ranges for each of the types of medians.

Median Age by Sex (1 implied decimal)

<u>Value</u>	<u>Description</u>
000000009	Median age has been determined to be .9 or less. The value has been set to .9.
000001101	Median age has been determined to be 110.1 or more. The value has been set to 110.1.

Median Rooms by Tenure (1 implied decimal)

<u>Value</u>	<u>Description</u>
000000010	Median number of rooms has been determined to be 1.0.
000000086	Median number of rooms has been determined to be 8.6 or more. The value has been set to 8.6.

Median Persons per Unit by Tenure (2 implied decimals)

<u>Value</u>	<u>Description</u>
000000100	Median number of persons per unit has been determined to be 1.00.
000000851	Median number of persons per unit has been determined to be 8.51 or more. The value has been set to 8.51.

Median Value

<u>Value</u>	<u>Description</u>
000001900	Median value has been determined to be \$1,900 or less. The value has been set to \$1,900.
000100100	Median value has been determined to be \$100,100 or more. The value has been set to \$100,100.

NOTE: The last two digits of the above median will always contain 0's.
Median is computed and rounded to the nearest hundred dollars.

Median Contract Rent

<u>Value</u>	<u>Description</u>
000000029	Median rent has been determined to be \$29 or less and has been set to \$29.
000000401	Median rent has been determined to be \$401 or more and, has been set to that value.

SUPPRESSION

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its public data, in print or on tape, do not disclose information about particular individuals or housing units; therefore, the Bureau suppresses tabulations of characteristics for very small groups of people or housing units. (Flag fields which indicate suppression are shown on each record.) On summary tapes, zeroes are entered in suppressed cells. However, a zero in a cell does not automatically mean suppression. Only by checking the suppression flag can it be determined if the zero in a specific table is suppressed data or an actual count of zero.

This discussion outlines the rules for suppression, how its occurrence can be identified by the user, and how to handle it.

No Suppression

The following counts will never be suppressed:

- Total population
- Total housing units
- Seasonal housing units
- Year-round housing units
- Occupied housing units
- Vacant year-round housing units

Primary Suppression

Suppression of Population Characteristics. Characteristics of persons are shown only if there are 15 or more persons in the geographic area. On a record for a census tract with a population of 1 to 14 persons, population characteristics such as age and relationship are suppressed. Only the count for the total population is provided.

Suppression of Year-round Housing Characteristics. Characteristics of year round housing units which are not classified by occupancy status (e.g., number of rooms, plumbing facilities, etc.) are suppressed when there are fewer than five year-round housing units in the geographic area being tabulated, regardless of the number of occupied housing units or the number of persons.

Suppression of Family, Household, or Occupied Housing Characteristics. Characteristics of families, households, or occupied housing units are shown if there are at least five occupied housing units within the geographic area tabulated.

Suppression of Owner or Renter Characteristics. Distributions of data for owners or renters are shown only when the number of owners is at least five and the number of renters is also at least five.

Complementary Suppression

In some cases complementary suppression is applied to prevent the derivation of suppressed data by subtraction. For instance, there must be at least five owners and five renters for the renter data to be shown in a table giving the number of persons in unit for all households and also for renters; otherwise the characteristics of the owners could be derived by subtracting renter data from data for all households.

Examples of Suppression

The following examples show two tables from the STF 2--Puerto Rico Data Dictionary. The first table (A7) is never suppressed because total population counts have no suppression attached to them. The second table (A22) will only be suppressed if there are 1-4 year-round housing units in the geographic area tabulated.

Example:

Table A7. URBAN AND RURAL (3)

This table has no suppression

Universe: Persons

This table has no suppression because a count of persons is never suppressed.

Urban:
 Inside urbanized areas
 Outside urbanized areas, in places of 2,500 or more
Rural

Table A22. ROOMS (6)

SUPFLG02 applies to all cells

Universe: Condominium Housing Units

This table will be suppressed when there are 1-4 year-round housing units in the area

1 room
2 rooms
3 rooms
4 rooms
5 rooms
6 or more rooms

Programming with Suppression

Suppressed data cells contain zeroes. To distinguish between zeroes as suppression and zeroes as valid data, occurrences of suppression are identified by a series of flag fields in the geographic identification portion of each logical record. Programmers developing software should include procedures to check these fields for the presence of suppression and, if necessary, to flag the output of any cumulation which includes one or more suppressed fields.

In reviewing the data dictionary, the programmer can determine which suppression flags indicate suppression for particular tables by checking either the table description or the flag description. An example of each follows.

Example: The boxed illustration below is the table description as it appears in the data dictionary. The next portion illustrates the suppression flag to which the table description refers.

Table A32. CONTRACT RENT (26)

SUPFLG06 applies to all cells

SUPFLG06 Renter Occupied Housing Unit
 Suppression Flag
 A 1 in this field indicates suppression because there are fewer than five renter housing units in the geographic area being summarized or complementary suppression is applied.
 It will affect the following tables:

A29
 A32
 A33

Blank = No suppression
 1 Suppression

Figure 5 below, lists each suppression flag, its location within the record, and the tables or cells within tables which are affected when suppression is applied. The suppression flag field which applies to each table or portion of a table is also identified in the table description in the data dictionary. The flags are located in the geographic identification section of each record in positions 205-210.

SUPFLGB5	209	B19 (cell 4), B37-B39
SUPFLGB6	210	B19 (cells 2, 3, 5, 6), B40-B42

Evaluating the Effect of Suppression

In most cases, suppressed data values are small (fewer than 5 or 15) except where a large population is affected by complementary suppression. Therefore, in certain noncritical applications, users may simplify programming operations by ignoring suppression and treating suppressed cells as zero cells. However, when geographic entities are being summed to higher levels or new geographic areas are being created, suppression will usually result in a downward bias in the totals.

STF 2--PUERTO RICO DATA FINDER

This data finder is a locator for the variables which are tabulated on STF 2.

Universe: Persons In Group
Quarters Who Were Not Sub-
stituted But For Whom Age
- Was Allocated

Allocated from other person in
same group quarters
Allocated from pre-1980 census
distribution
- A74. PERSONS IN GROUP QUARTERS
15 YEARS AND OVER WHO
WERE NOT SUBSTITUTED BUT
FOR WHOM MARITAL STATUS WAS
ALLOCATED FROM 1980 CENSUS
DISTRIBUTION 20/ 23/ [1]
- A75. ALLOCATION OF RELATIONSHIP, SEX,
AGE AND MARITAL STATUS (16)
20/ 23/ [16]
Universe: Persons Not Substituted

None of the four characteristics--
relationship, sex, age, and
marital status--was allocated
Only one of the four was allocated:
Relationship
Sex
Age
Marital status
Two of the four were allocated:
Relationship and sex
Relationship and age
Relationship and marital status
Sex and age
Sex and marital status
Age and marital status
Three of the four were allocated:
Relationship, sex, and age
Relationship, sex, and marital
status
Relationship, age, and marital
status
Sex, age, and marital status
All four were allocated
- NOTE: In tabulation A75, persons under
15 years old with an assigned
marital status of "single" (i.e.,
never married) are tallied as
having an allocation in marital
status.

 Universe: Specified Renter-Occupied Housing Units 12/

FOOTNOTE SECTION

- 01 The count of households in the complete-count tabulations by definition equals the number of occupied housing units. For this documentation the term "Household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case the term "Occupied housing unit" is used.
- 02 (See footnote 21.)
- 03 (See footnote 21.)
- 04 Vacant seasonal units are excluded from all matrices except as noted specifically in the documentation.
- 05 This matrix can be used to derive data based on the 1970 "household head" concept. 1980 householders differ from 1970 household heads primarily where the wife in a married-couple family was listed as the "person in column 1" on the questionnaire. In 1970 the husband was automatically assumed to be the "head" of such a family. Therefore, to compute "age of head" for married-couple families, add the distribution of male householders to the distribution of male spouses.
- 06 Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in Unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case the phrase "Persons in unit" is used. Tabulations of "Persons in households" and "Persons in unit" based on sample data are not necessarily the same because of differences in the procedures used to inflate sample population and housing data.
- 07 Lacking complete plumbing (facilities) for exclusive use includes one or more of the following:
- a) No piped water
 - b) Bathtub or shower but used by another household
 - c) No bathtub or shower
 - d) Flush toilet but used by another household
 - e) No flush toilet
- 08 This aggregate, along with the relevant count, will permit the computation of a mean. For example, the aggregate value for

specified owner-occupied non-condominium units will yield the mean value when divided by the count of specified owner-occupied noncondominium units, and the aggregate rooms for occupied and vacant year-round units divided by the count of occupied and vacant year-round units yields mean rooms. (See footnote 13 prior to computing mean value or price asked.)

- 09 Households may be counted more than once in this tabulation.
- 10 "Nonrelatives" include the questionnaire categories: "Roomer, boarder," "Roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.
- 11 Value and price asked are tabulated separately for noncondominium and condominium units.

The noncondominium value distribution is restricted to certain kinds of "owner-occupied" units; the non-condominium price asked distribution is restricted to certain kinds of "vacant-for-sale-only" units. The following are excluded from the tabulations on value and price asked for noncondominium units:

- a. Units in a structure with two or more units
- b. Units on three or more cuerdas
- c. Units with a commercial establishment or medical office on the property
- d. Mobile homes or trailers
- e. Boats, tents, vans, etc.

The condominium value distribution is tabulated for all "owner-occupied" condominium units; the condominium price asked distribution is tabulated for all "vacant-for-sale-only" condominium units.

- 12 Contract rent is tabulated for all "renter occupied" units except one-family houses on a property of three or more cuerdas. Rent asked is tabulated for all "vacant-for-rent" units except one-family houses on a property of three or more cuerdas. Units tabulated in the "No Cash Rent" category are all occupied housing units reported as "No Cash Rent" except one-family houses on three or more cuerdas.
- 13 Multiply the aggregate value and price asked by \$250 to obtain the true value or price asked. The tabulation was scaled by a factor of \$250 for tally purposes.
- 14 Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," "Held

- for occasional use," and "Other vacant." Tabulations of "Other vacants" include all categories not shown separately in the matrix.
- 15 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.
- 16 Relatives include householder, spouse and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.
- 17 Householders and spouses must be 15 years old or over.
- 18 Family households must have 2 or more persons; the category of "1 person" in family households will always contain a zero.
- 19 (See footnote 21.)
- 20 This matrix, while similar to the corresponding matrix on the summary tape files for the 50 States and the District of Columbia, has been modified to reflect data gathering and/or presentation procedures unique to Puerto Rico.
- 21 Some questions that were included on questionnaires used in the 50 States and the District of Columbia, such as race and Spanish origin, were not asked on the forms used in Puerto Rico. Matrices and footnotes referring to such items have been omitted or were not used in the Puerto Rico summary tape files. However, the Puerto Rico documentation maintains the same numbering scheme used for comparable summary tape files for the 50 States and the District of Columbia.
- 22 This matrix does not appear on STF's for the 50 States and the District of Columbia.
- 23 The tabulation matrices for marital status include the following categories: "Now married," "Consensually married," "Separated," "Widowed," "Divorced," and "Never married." The category "Consensually married" identifies persons who reported living in a marital union without having a civil or religious matrimonial contract. In this area, a spouse may be either "Now married" or "Consensually married." When marital status is not reported, it is allocated according to the relationship to the household and sex and age of the person.
- 24 "Year-round housing units with one or more housing items allocated" includes allocations of "Units in structure," "Access," "Piped water," "Bathtub or shower," "Toilet facilities," "Rooms," "Tenure," "Condominium status," "Property land area (cuerdas)," "Commercial establishment," "Medical office," "Other office," "Value" or "Price asked," "Contract rent" or "Rent asked," "Vacancy indicator," "Vacancy status," "Boarded up status," and "Duration of vacancy."
- 25 Allocations of marital status for persons under 15 years old are not included in "Persons with one or more items allocated."
- 26 The term "cell not used" indicates that a data item or "cell" contains no data.
- 27 In this matrix, "With cash rent" and "No cash rent" are presented for all renter occupied housing units. Contract rent is tabulated for specified renter occupied housing units (see footnote 12).

HOW TO USE THE DATA DICTIONARY

The data dictionary contains complete information regarding geographic codes, table information, and a detailed table layout. The following is an outline of information provided in both the geographic and table identification portions of the file.

Geographic Identification.

The first line of each geographic identification variable gives the name, size/scale, begin position, relative begin position, and the variable label. Following those items, on subsequent lines, are any applicable notes and value codes. Each of these items is defined below.

1. Name. This is an arbitrarily assigned 8-character identifier. It may be a mnemonic such as "STATE" or "EDNUMBER", or a sequential identifier such as "TAB1", "TAB2", etc.
2. Size/Scale. The size of a data item is given in characters. The scale of a data item is given in powers of 10. Implied decimals or multipliers (in powers of ten only) are indicated by a "-" or a "+" followed by a number. For example, 123.45 would appear on the data tape as 12345, and the size/scale value would be 5/-2. A number recorded in thousands (12,345,000 for example) would appear on the data tape as 12345 and the size/scale value would be 5/+3. Scale factors which are not a power of ten are identified in the notes following the description and in the footnotes.
3. Begin. This is the location in the data record of the first character of the data item.
4. Relative Begin. This value indicates the beginning location of a data item within the segment files with segmented records. For example, STF 1 has a census logical record length of 3276 characters which is segmented into two segments of 1638 characters each. The data item beginning in position 1639 of the census logical record would have a relative begin value of 1.
5. Data Type. The data type indicates that the data item is alphanumeric (A).
6. Description. Following the Data Type is a description of the data item. This heading is not labeled on the data dictionary. This section also provides any relevant notes or footnote references. In addition, any value codes necessary for the data item are listed and labeled here.

Table Identification.

The documentation of tables begins with the name, size/scale, begin position, relative begin position for the table, data type, and the number of cells. This information is followed by the table title, applicable suppression flags, universe definition, applicable footnotes, stratifier identification, and a listing of the cells. These items are defined below.

The size/scale information is the same as defined above for geographic identification. Any scale value identified here applies to all cells of the table.

This item is the same as defined above for geographic identification, except that it identifies the location in the data record of the first cell in the table.

The data type indicates the data item is numeric (N). An "N" denotes that an actual figure is provided.

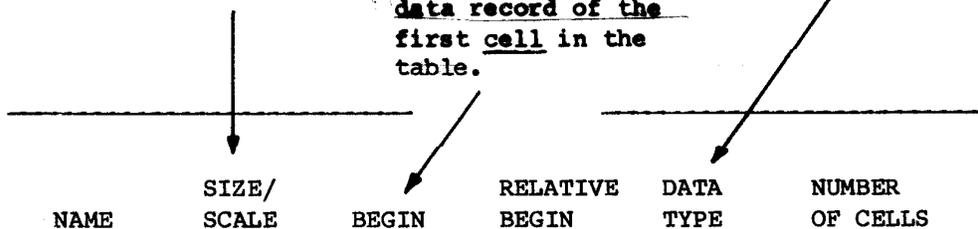

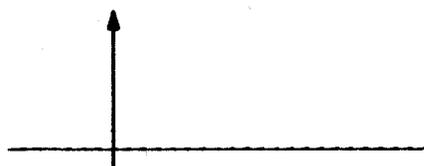

TABLE A15 (TAB A15)	9	2059	103	N	154
------------------------	---	------	-----	---	-----

This is an 8 character identifier of the table number. The convention used here, shown in parentheses, is to follow "TAB" with the table number, which identifies the data item as a table for CENSPAC. The "TABLE A15" is generated by the CENSPAC Documentor program.

This item gives the total number of data items, or cells, in the table. The number of cells is the product of the number of categories for each stratifier in the table.

This item identifies the location in the data record, relative to the beginning of the current segment, of the first cell in the table.

Table Title. The title of the table identifies the stratifiers used in the table, and in parentheses following each stratifier the number of categories for that stratifier. For example, this title indicates that there are six categories of rooms and seven categories of value identified in the table.

TABA28
ROOMS (6) BY VALUE (7)

Suppression Flags. This section of the table documentation identifies by name any applicable suppression flags and the cells to which they apply.

SUPFLG05 applies to all cells

Universe. The universe identifies the unit of observation for the table. For example, the cells in this table are counts of specified owner-occupied noncondominium housing units.

UNIVERSE: Specified Owner-Occupied Noncondominium Housing Units

Footnotes. This section identifies any footnotes, listed at the end of the data dictionary, which apply to the table.

See FOOTNOTE 11

Stratifiers. This section lists the stratifiers used in the table, in the order that they appear on the data tape. For example, this table begins with the first category of rooms cross classified by the seven value categories. This is followed by the five remaining categories of rooms, each of which is cross classified by the seven categories of value. Headers representing stratifiers are followed by a colon and are not to be counted as cells.

The STRATIFIERS ARE:

ROOMS BY VALUE

- 1 To 3 Rooms:
 - Less Than \$5,000
 - \$5,000 To \$9,999
 - \$10,000 To \$19,999
 - \$20,000 To \$29,999
 - \$30,000 To \$39,999
 - \$40,000 To \$49,999
 - \$50,000 Or More
- 4 Rooms:
 - Repeat Value (7)
- 5 Rooms:
 - Repeat Value (7)
- 6 Rooms:
 - Repeat Value (7)
- 7 Rooms:
 - Repeat Value (7)
- 8 Or More Rooms:
 - Repeat Value (7)

Calculating the Location of Cells in STF 2 Puerto Rico

The location of the beginning character position for the first cell in each table is indicated in the "Begin" column. The begin position for succeeding cells can be calculated by the following method.

$$\left(\begin{array}{c} \text{Begin position} \\ \text{of first cell} \end{array} \right) + \left[\left(\begin{array}{c} \text{Size of} \\ \text{each cell} \end{array} \right) \times \left(\begin{array}{c} \text{Number of} \\ \text{previous cell} \\ \text{in table} \end{array} \right) \right] = \left(\begin{array}{c} \text{Begin position} \\ \text{of desired cell} \end{array} \right)$$

Example 1. Location of Begin Position for Condominium

NAME	SIZE/ SCALE	BEGIN	RELATIVE BEGIN	DATA TYPE	NUMBER OF CELLS
TABLE A43 (TABA43)	10	8710	886	N	2

AGGREGATE PRICE ASKED BY CONDOMINIUM STATUS (2)
 THIS TABLE HAS NO SUPPRESSION
 UNIVERSE: SPECIFIED VACANT-FOR-SALE-
 ONLY HOUSING UNITS

SEE FOOTNOTE 8 11 13 20

NONCONDOMINIUM (cell 1)
 CONDOMINIUM (cell 2)

$$(8710) + \left[(10) \times (1) \right] = (8720)$$

Example 2. Location of begin position for renter occupied, female householder with no husband present, with complete plumbing facilities.

NAME	SIZE/ SCALE	BEGIN	RELATIVE BEGIN	DATA TYPE	NUMBER OF CELLS
TABLE A17 (TABA17)	9	3697	1741	N	20

TENURE (2) BY HOUSEHOLD TYPE (5) BY PLUMBING
 FACILITIES (2)
 SUPFLG03 APPLIES TO CELLS 1-10
 SUPFLG04 APPLIES TO CELLS 11-20
 UNIVERSE: OCCUPIED HOUSING UNITS WITH
 1.01 OR MORE PERSONS PER ROOM

SEE FOOTNOTE 7 20 23

THE STRATIFIERS ARE
TENURE BY
HOUSEHOLD TYPE BY
PLUMBING FACILITIES

TOTAL:

MARRIED-COUPLE FAMILY:

COMPLETE PLUMBING FOR EXCLUSIVE USE (cell 1)

LACKING COMPLETE PLUMBING FOR

EXCLUSIVE USE (cell 2)

OTHER FAMILY:

MALE HOUSEHOLDER, NO WIFE PRESENT:

REPEAT PLUMBING FACILITIES (2)

FEMALE HOUSEHOLDER, NO HUSBAND PRESENT:

REPEAT PLUMBING FACILITIES (2)

NONFAMILY HOUSEHOLD:

MALE HOUSEHOLDER:

REPEAT PLUMBING FACILITIES (2)

FEMALE HOUSEHOLDER:

REPEAT PLUMBING FACILITIES (2)

RENTER OCCUPIED:

REPEAT HOUSEHOLD TYPE BY PLUMBING FACILITIES (10)

$$(3697) + [(9) \times (14)] = (3823)$$

CENSPAC users who want a data dictionary report listing the beginning position of all cells may use the CENSPAC Documentor program with the "long" option and the machine-readable data dictionary for STF 2 to obtain such a listing.

CENSUS OF POPULATION AND HOUSING, 1980:

Summary Tape File 2 Puerto Rico

Technical Documentation

DATA DICTIONARY

TEXT SECTION

STF 2 FOR PUERTO RICO IS DIVIDED INTO SEGMENTS. EACH SEGMENT IS 1,956 CHARACTERS IN LENGTH. RECORD A IS DIVIDED INTO EIGHT SEGMENTS WHILE RECORD B IS DIVIDED INTO SIX SEGMENTS. THE CENSUS LOGICAL RECORD SIZE FOR RECORD A IS 15,648 CHARACTERS AND FOR RECORD B IS 11,736 CHARACTERS.

GEOGRAPHIC INFORMATION IN POSITIONS 1-204 OF THIS FILE ARE IN A STANDARD GEOGRAPHIC RECORD FORMAT WHICH WILL BE FOLLOWED FOR ALL 1980 SUMMARY TAPE FILES. EACH FIELD OF THIS STANDARD FORMAT IS IDENTIFIED IN THIS DICTIONARY, ALTHOUGH IT MAY NOT BE USED IN STF 2 FOR PUERTO RICO.

WHEN PROCESSING THIS FILE, THE GEOGRAPHIC IDENTIFICATION PORTION OF EACH RECORD SEGMENT SHOULD BE READ AS ALPHANUMERICS. THE SUPPRESSION FLAGS SHOULD ALSO BE READ AS ALPHANUMERICS. THE REMAINING PORTION OF THE FILE SHOULD BE READ AS NUMERICS.

FOOTNOTE SECTION

- 01 THE COUNT OF HOUSEHOLDS IN THE COMPLETE-COUNT TABULATIONS BY DEFINITION EQUALS THE NUMBER OF OCCUPIED HOUSING UNITS. FOR THIS DOCUMENTATION THE TERM "HOUSEHOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC., IN WHICH CASE, THE TERM "OCCUPIED HOUSING UNIT" IS USED.
- 02 (SEE FOOTNOTE 21.)
- 03 (SEE FOOTNOTE 21.)
- 04 VACANT SEASONAL UNITS ARE EXCLUDED FROM ALL MATRICES EXCEPT AS NOTED SPECIFICALLY IN THE DOCUMENTATION.
- 05 THIS MATRIX CAN BE USED TO DERIVE DATA BASED ON THE 1970 "HOUSEHOLD HEAD" CONCEPT. 1980 HOUSEHOLDERS DIFFER FROM THE 1970 HOUSEHOLD HEADS PRIMARILY WHERE THE WIFE IN A MARRIED-COUPLE FAMILY WAS LISTED AS THE "PERSON IN COLUMN 1" ON THE QUESTIONNAIRE. IN 1970 THE HUSBAND WAS AUTOMATICALLY ASSUMED TO BE THE "HEAD" OF SUCH A FAMILY. THEREFORE, TO COMPUTE "AGE OF HEAD" FOR MARRIED-COUPLE FAMILIES, ADD THE DISTRIBUTION OF MALE HOUSEHOLDERS TO THE DISTRIBUTION OF MALE SPOUSES.
- 06 TABULATIONS OF "PERSONS IN HOUSEHOLD" BASED ON 100-PERCENT DATA BY DEFINITION ARE THE SAME AS TABULATIONS OF "PERSONS IN UNIT." THE PHRASE "PERSONS IN HOUSEHOLD" IS USED UNLESS THE MATRIX IS STRATIFIED BY A HOUSING ITEM SUCH AS TENURE, PLUMBING FACILITIES, ETC., IN WHICH CASE THE PHRASE "PERSONS IN UNIT" IS USED. TABULATIONS OF "PERSONS IN HOUSEHOLDS" AND "PERSONS IN UNIT" BASED ON SAMPLE DATA ARE NOT NECESSARILY THE SAME BECAUSE OF DIFFERENCES IN THE PROCEDURES USED TO INFLATE SAMPLE POPULATION AND HOUSING DATA.
- 07 LACKING COMPLETE PLUMBING (FACILITIES) FOR EXCLUSIVE USE INCLUDES ONE OR MORE OF THE FOLLOWING:
- A) NO PIPED WATER
 - B) BATHTUB OR SHOWER BUT USED BY ANOTHER HOUSEHOLD
 - C) NO BATHTUB OR SHOWER
 - D) FLUSH TOILET BUT USED BY ANOTHER HOUSEHOLD
 - E) NO FLUSH TOILET
- 08 THIS AGGREGATE, ALONG WITH THE RELEVANT COUNT, WILL PERMIT THE COMPUTATION OF A MEAN. FOR EXAMPLE, THE AGGREGATE VALUE FOR SPECIFIED OWNER-OCCUPIED NON-CONDOMINIUM UNITS WILL YIELD THE MEAN VALUE WHEN DIVIDED BY THE COUNT OF SPECIFIED OWNER-OCCUPIED NONCONDOMINIUM UNITS, AND THE AGGREGATE ROOMS FOR OCCUPIED AND VACANT YEAR-ROUND UNITS DIVIDED BY THE COUNT OF OCCUPIED AND VACANT YEAR-ROUND UNITS YIELDS MEAN ROOMS. (SEE FOOTNOTE 13 PRIOR TO COMPUTING MEAN VALUE OR PRICE ASKED).

- 09 HOUSEHOLDS MAY BE COUNTED MORE THAN ONCE IN THIS TABULATION.
- 10 "NONRELATIVES" INCLUDE THE QUESTIONNAIRE CATEGORIES: "ROOMER, BOARDER," "ROOMMATE," "PAID EMPLOYEE," AND "OTHER NONRELATIVE." TABULATIONS OF "NONRELATIVES" INCLUDE ALL CATEGORIES NOT SHOWN SEPARATELY IN THE MATRIX.
- 11 VALUE AND PRICE ASKED ARE TABULATED SEPARATELY FOR NONCONDOMINIUM AND CONDOMINIUM UNITS.

THE NONCONDOMINIUM VALUE DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "OWNER-OCCUPIED" UNITS; THE NONCONDOMINIUM PRICE ASKED DISTRIBUTION IS RESTRICTED TO CERTAIN KINDS OF "VACANT-FOR-SALE-ONLY" UNITS. THE FOLLOWING ARE EXCLUDED FROM THE TABULATIONS ON VALUE AND PRICE ASKED FOR NONCONDOMINIUM UNITS:

- A. UNITS IN A STRUCTURE WITH TWO OR MORE UNITS
- B. UNITS ON 3 OR MORE CUERDAS
- C. UNITS WITH A COMMERCIAL ESTABLISHMENT OR MEDICAL OFFICE ON THE PROPERTY
- D. MOBILE HOMES OR TRAILERS
- E. BOATS, TENTS, VANS, ETC.

THE CONDOMINIUM VALUE DISTRIBUTION IS TABULATED FOR ALL "OWNER-OCCUPIED" CONDOMINIUM UNITS; THE CONDOMINIUM PRICE ASKED DISTRIBUTION IS TABULATED FOR ALL "VACANT-FOR-SALE-ONLY" CONDOMINIUM UNITS

- 12 CONTRACT RENT IS TABULATED FOR ALL "RENTER OCCUPIED" UNITS EXCEPT ONE-FAMILY HOUSES ON A PROPERTY OF THREE OR MORE CUERDAS. RENT ASKED IS TABULATED FOR ALL "VACANT-FOR-RENT" UNITS EXCEPT ONE-FAMILY HOUSES ON A PROPERTY OF 3 OR MORE CUERDAS. UNITS TABULATED IN THE "NO CASH RENT" CATEGORY ARE ALL OCCUPIED HOUSING UNITS REPORTED AS "NO CASH RENT EXCEPT ONE-FAMILY HOUSES ON 3 OR MORE CUERDAS.
- 13 MULTIPLY THE AGGREGATE VALUE AND PRICE ASKED BY \$250 TO OBTAIN THE TRUE VALUE OR PRICE ASKED. THE TABULATION WAS SCALED BY A FACTOR OF \$250 FOR TALLY PURPOSES.
- 14 VACANT HOUSING UNITS INCLUDE THE QUESTIONNAIRE CATEGORIES: "FOR RENT," "FOR SALE ONLY," "RENTED OR SOLD, NOT OCCUPIED," "HELD FOR OCCASIONAL USE," AND "OTHER VACANT." TABULATIONS OF "OTHER VACANTS" INCLUDE ALL CATEGORIES NOT SHOWN SEPARATELY IN THE MATRIX.
- 15 A "CHILD OF HOUSEHOLDER" INCLUDES ANY SON, DAUGHTER, STEPCHILD, OR ADOPTED CHILD OF THE HOUSEHOLDER. AN "OWN CHILD OF HOUSEHOLDER" IS A NEVER-MARRIED CHILD UNDER 18 YEARS OF AGE WHO IS A SON, DAUGHTER, STEPCHILD, OR ADOPTED CHILD OF THE HOUSEHOLDER. "RELATED CHILDREN" INCLUDE NOT ONLY OWN CHILDREN, BUT ALSO ALL OTHER FAMILY MEMBERS, REGARDLESS OF MARITAL STATUS, WHO ARE UNDER 18 YEARS OLD, EXCEPT THE HOUSE-

STF2PR DATA DICTIONARY 10/26/83
HOLDER OR SPOUSE. FOSTER CHILDREN ARE
INCLUDED IN THE "NONRELATIVE" CATEGORY.

- 16 RELATIVES INCLUDE HOUSEHOLDER, SPOUSE AND THE QUESTIONNAIRE CATEGORIES: "SON/DAUGHTER," "BROTHER/SISTER," "FATHER/MOTHER," AND "OTHER RELATIVE." TABULATIONS OF "OTHER RELATIVES" INCLUDE ALL CATEGORIES NOT SHOWN SEPARATELY IN THE MATRIX.
- 17 HOUSEHOLDERS AND SPOUSES MUST BE 15 YEARS OLD OR OVER.
- 18 FAMILY HOUSEHOLDS MUST HAVE 2 OR MORE PERSONS; THE CATEGORY OF "1 PERSON" IN FAMILY HOUSEHOLDS WILL ALWAYS CONTAIN A ZERO.
- 19 (SEE FOOTNOTE 21.)
- 20 THIS MATRIX, WHILE SIMILAR TO THE CORRESPONDING MATRIX ON THE SUMMARY TAPE FILES FOR THE 50 STATES AND THE DISTRICT OF COLUMBIA, HAS BEEN MODIFIED TO REFLECT DATA GATHERING AND/OR PRESENTATION PROCEDURES UNIQUE TO PUERTO RICO.
- 21 SOME QUESTIONS THAT WERE INCLUDED ON QUESTIONNAIRES USED IN THE 50 STATES AND THE DISTRICT OF COLUMBIA, SUCH AS RACE AND SPANISH ORIGIN, WERE NOT ASKED ON THE FORMS USED IN PUERTO RICO. MATRICES AND FOOTNOTES REFERRING TO SUCH ITEMS HAVE BEEN OMITTED OR WERE NOT USED IN THE PUERTO RICO SUMMARY TAPE FILES. HOWEVER, THE PUERTO RICO DOCUMENTATION MAINTAINS THE SAME NUMBERING SCHEME USED FOR COMPARABLE SUMMARY TAPE FILES FOR THE 50 STATES AND THE DISTRICT OF COLUMBIA.
- 22 THIS MATRIX DOES NOT APPEAR ON STF'S FOR THE 50 STATES AND THE DISTRICT OF COLUMBIA.
- 23 THE TABULATION MATRICES FOR MARITAL STATUS INCLUDE THE FOLLOWING CATEGORIES: "NOW MARRIED," "CONSENSUALLY MARRIED," "SEPARATED," "WIDOWED," "DIVORCED," AND "NEVER MARRIED." THE CATEGORY "CONSENSUALLY MARRIED" IDENTIFIES PERSONS WHO REPORTED LIVING IN A MARITAL UNION WITHOUT HAVING A CIVIL OR RELIGIOUS MATRIMONIAL CONTRACT. IN THIS AREA, A SPOUSE MAY BE EITHER "NOW MARRIED" OR "CONSENSUALLY MARRIED." WHEN MARITAL STATUS IS NOT REPORTED, IT IS ALLOCATED ACCORDING TO THE RELATIONSHIP TO THE HOUSEHOLDER AND SEX AND AGE OF THE PERSON.
- 24 "YEAR-ROUND HOUSING UNITS WITH ONE OR MORE HOUSING ITEMS ALLOCATED" INCLUDES ALLOCATIONS OF "UNITS IN STRUCTURE," "ACCESS," "PIPED WATER," "BATHTUB OR SHOWER," "TOILET FACILITIES," "ROOMS," "TENURE," "CONDOMINIUM STATUS," "PROPERTY LAND AREA (CUERDAS)," "COMMERCIAL ESTABLISHMENT," "MEDICAL OFFICE," "OTHER OFFICE," "VALUE" OR "PRICE ASKED," "CONTRACT RENT" OR "RENT ASKED," "VACANCY INDICATOR," "VACANCY STATUS," "BOARDED UP STATUS," AND "DURATION OF VACANCY."

- 25 ALLOCATIONS OF MARITAL STATUS FOR PERSON 35 YEARS OLD ARE NOT INCLUDED IN "PERSON WITH ONE OR MORE ITEMS ALLOCATED."
- 26 THE TERM "CELL NOT USED" INDICATES THAT A DATA ITEM OR "CELL" CONTAINS NO DATA.
- 27 IN THIS MATRIX, "WITH CASH RENT" AND THE "NO CASH RENT" ARE PRESENTED FOR ALL RENTER OCCUPIED HOUSING UNITS. CONTRACT RENT IS TABULATED FOR SPECIFIED RENTER OCCUPIED HOUSING UNITS (SEE FOOTNOTE 12)

PART II

Information Applicable to Summary Tape Files 1-5

173

OVERVIEW

1980 Census Summary Tape Program

Computer-readable data from the 1980 census include both summary data and microdata. Summary data include Summary Tape Files (STF's) 1 to 5, which are generally comparable to the First Count through Sixth Count files from the 1970 census. In addition to the files in the STF series, other summary data for Puerto Rico released by the Bureau include the Master Area Reference File which provides geographic items from STF 1A and selected population and housing items. All of these files contain data summarized to various levels of geography. Microdata files, on the other hand, contain disclosure-free household and person records from the census. These files are similar to the 1970 Public Use Sample files and will be available some time after the release of STF 4.

Content and Geographic Coverage of Summary Tape Files

Summary Tape Files vary by summary level of geography, detail of information, and whether they include 100-percent or sample data. STF's 1 and 2 provide data based on the set of census questions asked of all persons and housing units. These data are 100-percent data. STF's 3, 4, and 5 are based on sample data. These data are estimates based on the responses of a sample of the population and housing units and contain more extensive housing and population information.

The geographic detail of STF 1 is the maximum possible detail available from the census: data for individual blocks in block-numbered areas and for enumeration districts outside block-numbered areas. The lowest level of geography provided by STF 2 is census tract, or minor civil division/(MCD) and places of 1,000 or more inhabitants in nontraced areas. The lowest level for STF 3 is the block group or enumeration district, while the smallest geographic unit for STF 4 is census tract, or MCD and places of 2,500 or more inhabitants in nontraced areas. STF 5's lowest geographic level is the standard metropolitan statistical area (SMSA), central city(ies), other places of 50,000 or more inhabitants, and municipios of 50,000 or more inhabitants. Figure 6 on the following page details the geographic levels in each Summary Tape File.

For comparison purposes, STF 1 is similar in subject matter and geographic detail to the First and Third Count files for 1970. STF's 2 and 4 are roughly comparable to the 1970 Second and Fourth Counts, respectively. STF 3 is comparable to the 1970 Fifth Count, while STF 5 corresponds to the 1970 Sixth Count. To summarize, STF 1 contains more detailed geography but less subject matter detail than STF 2. Similarly, STF 3 contains more detailed geography but less subject matter detail than STF 4. STF's 1 and 2 contain complete-count data while STF's 3 and 4 contain sample estimates. Finally, STF 5 contains sample estimates aggregated to a higher level of geography than other files, but which are presented in the most subject matter detail.

1980 Census Maps

The maps used in conjunction with the above summary tape files consist of four basic types: municipio maps, place maps, place-and-vicinity maps, and Metropolitan Map Series (MMS) or Vicinity Map Series (VMS). Ordering

NOTE: Minor civil divisions are referred to as barrios, and pueblitos. Urban places are referred to as zonas urbanas and aldeas.

FOOTNOTES TO FIGURE 5

1/ In addition to summary areas presented on the Summary Tape Files, geographic area codes are included for areas such as Subbarrio, District Office, and Standard Federal Administrative Region.

2/ Population size cutoffs for the presentation of Place level data in the STF's are as follows:

STF 1A	all places	STF 3A	all places
STF 1B	all places		
STF 2A	10,000 or more	STF 4A	10,000 or more
STF 2B	1,000 or more	STF 4B	2,500 or more
		STF 5	50,000 or more

3/ Multiple summary level codes for a Summary Area indicate a series of very similar summary levels which are presented in identical STF files. A specific listing is shown below of summary levels which are grouped together from the chart. (A slash mark "/" is used to indicate "within.")

Grouping 13, 14, 15, and 16:

13. Place/MCD/Municipio/Puerto Rico
14. Tract (BNA)/Place/MCD/Municipio/Puerto Rico
15. BG/Tract (BNA)/Place/MCD/Municipio/Puerto Rico
16. ED/Tract/Place/MCD/Municipio/Puerto Rico

Grouping 18, 19, 20, 21, and 22:

18. MCD/Municipio/SMSA/Puerto Rico
19. Place/MCD/Municipio/SMSA/Puerto Rico
20. Tract (BNA)/Place/MCD/Municipio/SMSA/Puerto Rico
21. Block/Tract (BNA)/Place/MCD/Municipio/SMSA/Puerto Rico
22. ED/Tract/Place/MCD/Municipio/SMSA/Puerto Rico

Grouping 23 and 24:

23. Place/Municipio/SMSA/Puerto Rico
24. Tract (BNA)/Place/Municipio/SMSA/Puerto Rico

Grouping 25 and 26:

25. Block/Tract (BNA)/Place/Municipio/SMSA/Puerto Rico
26. ED/Tract/Place/Municipio/SMSA/Puerto Rico

information for these maps may be obtained from Bureau of the Census, 1201 East 10th Street, Jeffersonville, IN 47132.

All four map types have several characteristics in common:

- To improve legibility, most 1980 maps are at a larger scale than were the comparable 1970 maps. Also, there is a separate set of municipio maps for each municipio.
- Symbols used for the various boundaries are consistent for all four types of maps.
- Names, associated codes, and boundaries are shown where appropriate on all maps for municipios, minor civil divisions (MCD's), places, census tracts or block numbering areas (BNA's) where present, enumeration districts (ED's) (in those areas which are not block numbered), and blocks.
- All maps show metric, feet, and mile scales.
- All maps containing block-numbered areas are available from the U.S. Government Printing Office.

The following paragraphs present a brief description of each type of map.

Municipio Maps. Municipio maps are the backbone of the Bureau's map coverage. Theoretically, with a complete set of these maps, the overall picture of the census geographic framework for all of Puerto Rico is shown. Most maps in the municipio series are at a scale of 1:20,000, or about 3 inches to the mile. Municipio maps were created by superimposing boundaries of areas for which data are tabulated on maps reformatted by the Bureau from base maps prepared by the U.S. Geological Survey (USGS), and updated by local government agencies in Puerto Rico. The following geographic area boundaries are shown on municipio maps where appropriate: municipios, minor civil divisions, barrios and pueblos, places, zonas urbanas and aldeas, census tracts or block numbering areas (BNA's), and enumeration districts (ED's) or numbered blocks.

Place Maps. For places not covered on MMS or VMS sheets where most of the development is contained within the boundaries established for them, the Bureau uses place maps. The scale of place maps varies from place to place. Most were created by superimposing boundaries for areas for which data are tabulated on base maps supplied by the Puerto Rico government. On the municipio map, shading is added to indicate the area covered by the place map; i.e., the place map is regarded as an inset to the municipio map. The geographic area boundaries shown on place maps are the same as for municipio maps.

Place-and-Vicinity Maps. For places not covered on MMS or VMS sheets, but for which geographic areas are shown outside the boundaries established for a place, the Bureau uses place-and-vicinity maps. Also included in this category are maps of two or more places that appear on the same map sheet. In all other respects, place-and-vicinity maps have the same characteristics as place maps. As with the place maps, all area covered by the place-and-vicinity map is shaded on the municipio map, and the place-and-vicinity map is considered to be an

inset to the municipio map. The geographic area boundaries defined on place-and-vicinity maps are the same as those specified for municipio maps.

Metropolitan Map Series/Vicinity Map Series (MMS/VMS). For the major built-up areas of Puerto Rico, the Bureau has developed its own maps to provide uniform coverage of such areas. These maps are referred to as the Metropolitan Map Series (MMS) when the maps relate to areas within an SMSA and as the Vicinity Map Series (VMS) when the maps cover areas which are not related to any SMSA. The scale for the MMS and VMS is 1:20,000, or about 1 inch represents 1,667 feet. In selected areas with very dense development, some sheets are at 1:10,000, or about 1 inch represents 833 feet. The MMS and VMS are considered to be insets to the municipio maps and the areas covered by MMS and VMS are shaded on municipio maps; in a few instances, MMS/VMS map sheets entirely cover a municipio, in which case no separate municipio maps exist. The geographic area boundaries shown on the MMS and VMS are the same as those specified for municipio maps, but also include the boundaries of urbanized areas.

In addition to the four types of maps described above, there are a number of "outline" maps (maps that do not show any data, only the areas to which data can be related) that are prepared and published as part of the various printed report series. As was the case with the maps previously described, the maps included in the printed reports share common characteristics. Both metric and mile scales are shown. Map scale and content are similar to 1970 except where noted below; however, presentation has been improved to make the maps more readable and consistent from series to series.

The Municipio Subdivision Map Series consists of 22 pages showing the names and boundaries for each municipio, minor civil division (MCD), and place. The scale of the Puerto Rico map requires that it be presented in sections. For 1980, the boundaries (not just the locations) of places with fewer than 2,500 inhabitants are shown for the first time. The maps are derived from the base maps of the U.S. Geological Survey National Mapping Program and appear in PC80-1-A, B and HC80-1-A. A single-sheet version of the municipio subdivision map series also has been published at a scale of 1:200,000, or about 1 inch representing 3.2 miles.

The Urbanized Area Outline Map Series consists of one or more map sheets for each urbanized area (UA) defined on the basis of the 1980 census results. The names and boundaries of all municipios, MCD's, and places in and adjacent to the area are shown, plus the extent of territory defined as "urbanized." These maps appear in PC80-1-A and HC80-1-A.

The SCSA/SMSA Outline Map shows municipio names and boundaries, names and locations of all places with a population of 25,000 or more or designated as the central city of an SMSA, and names and boundaries of the standard consolidated statistical area (SCSA) and standard metropolitan statistical areas (SMSA's). These maps appear in PC80-1-A, B, C, D; HC80-1-A, B; and HC80-2.

The Census Tract Outline Map Series covers each of the areas for which tracts have been defined for 1980. These maps show the boundaries and code identification number for each census tract; the names of streets or other features used as census tract boundaries; and the names and boundaries of municipios, MCD's, and all places (not just those over 25,000 as in 1970). Street detail within tracts is not shown. Separate insets of larger scale than

the base maps are included for densely developed areas; however, fewer insets are used than in 1970. Scale varies from map to map. For 1980, tract outline maps have been prepared for tracted municipios outside SMSA's. These maps appear in the PHC80-2 for Puerto Rico and are also available separately.

Map sets will be printed for all block-numbered areas, grouped by SMSA and the nonSMSA portion of Puerto Rico. In addition to the printed copies of the municipio, place, place-and-viceinity, and Metropolitan Map Series/Vicinity Map Series (MMS/VMS) sheets having block-numbered areas, there will be an index map depicting the extent of the block-numbered area for each SMSA and for Puerto Rico. The SMSA Index to Block-Numbered Areas Maps show the extent of the SMSA; municipio, MCD, and place names and boundaries; and the extent of block-numbered area within the SMSA, shown by means of shading. The Puerto Rico Index to Block-Numbered Areas Map was prepared by superimposing the extent of all block-numbered areas in Puerto Rico over the municipio subdivision map. This index map also shows the boundaries of the SMSA(s) so that the reader can determine whether the data for any block-numbered area are available with the SMSA tabulations or the balance-of-Puerto Rico tabulations.

Relevant Articles and Publications

The following is a list of reference materials which provide additional information concerning the 1980 census.

PHC80-R1. Users' Guide.

Part A, Text and Part B, Glossary (published as part of Supplement 1 to the Users' Guide), is a comprehensive guide to 1980 census data. The guide is issued in loose leaf form. Part A Text and Part B Glossary of the Users' Guide are sold separately and are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Part A Text: S/N 003-024-03625-8, \$5.50. Part B Glossary: S/N 003-024-05004-8, \$6.00. Other parts of the guide will be issued as they are prepared.

Data User News. This monthly newsletter provides continuous reporting on Census Bureau programs and products. A subscription is available from the Government Printing Office for \$20 a year.

Monthly Product Announcement. This free announcement lists new products released each month from the Census Bureau. These products include publications, technical documentation, data files, published maps, and microfiche. To be added to the mailing list, contact Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

TECHNICAL INFORMATION

Nonsampling Errors

Since 1980 population counts shown in this file were tabulated from the entries for persons on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors do occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to include every household or person in the counts, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, or the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling errors in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum.

Editing and Allocation of Data Items

The objective of the processing operation is to produce a set of statistics that describes the population as accurately and clearly as possible. To meet this objective, certain unacceptable entries and blank items were edited.

Editing. In the field, questionnaires were reviewed for omissions and certain inconsistencies by a census clerk or an enumerator and, if necessary, a followup was made for missing information. In addition, a similar review of questionnaires was done in the central processing offices. As a rule, however, editing was performed by hand only when it could not be done effectively by machine.

As one of the first steps in computerized editing, the configuration of marks on the questionnaire column was scanned electronically to determine whether it contained information for a person or merely spurious marks. If the column contained entries for at least two of the basic characteristics (relationship, sex, age, marital status), the inference was made that the marks represented a person. In cases in which two or more basic characteristics were available for only a portion of the people in the unit, other information on the questionnaire provided by an enumerator was used to determine the total number of persons. Names were not used as a criterion of the presence of a person because the electronic scanning was unable to distinguish an entry in the name space.

Allocation. Allocations, or assignments of acceptable codes in place of unacceptable entries, are needed most often when an entry for a given item is lacking or when the information reported for a person or housing unit on that item is inconsistent with other information for the person or housing unit. The usefulness of the data is considered to be enhanced through the assignment of acceptable codes in place of blanks or unacceptable entries.

For housing data, the assignment is based on related information reported for the housing unit or on information reported for a similar unit in the immediate neighborhood. For example, if tenure for an occupied unit is omitted but a rental amount is reported for that unit, the computer edits tenure to "rented for cash rent." On the other hand, if the unit is reported as rented but the amount of rent is missing, the computer assigns the rent from the preceding renter-occupied unit that had a rental amount reported.

The general procedure for changing unacceptable population entries is to assign an entry for a person that is consistent with entries for other persons with similar characteristics. Thus, a person who is reported as a 20-year old son of the householder but for whom marital status is not reported, is assigned the same marital status as that of the last son processed in the same age group. The allocation technique may be illustrated by the procedure used in the assignment for unknown age. The process is carried out in the following steps:

1. The computer stores reported ages of persons by selected characteristics, including sex, relationship, marital status, and characteristics of other household members.
2. Each stored age is retained in the computer only until a person having the same set of characteristics and with age reported is processed through the computer in the edit operation. Then the age of this succeeding person is substituted for the age previously stored.
3. When a person processed has no report of age, or the entry is unacceptable, the age assigned to him or her is that which was stored for the last person who otherwise has the same set of characteristics.

Substitution. The editing process also includes another type of correction, namely the assignment of a full set of characteristics for a person or a housing unit. The assignment of the full set of housing characteristics occurs when there is no housing information available. If the housing unit is determined to be occupied, the housing characteristics are assigned from the previously processed occupied units. If the housing unit is vacant, the housing characteristics are assigned from the previously processed vacant unit.

The assignment of a full set of characteristics for a person in a household containing no information for all or most of the people, although persons were known to be present, is done in the following manner. A previously processed household is selected as a substitute and the full set of population characteristics for each substituted person is duplicated. These duplications fall into two classes: (1) "persons substituted due to noninterview," e.g., a housing unit indicated as occupied but the occupants are not listed on the questionnaire, and (2) "persons substituted due to mechanical failure," e.g., where the questionnaire page on which persons are listed was not properly microfilmed.

The editing process ensures that the distribution of characteristics for persons and housing units assigned by the computer corresponds closely to the distribution of characteristics for persons and housing units actually reported in the census. Before the advent of the computer, this type of process was not feasible and the distribution of characteristics to be used for assignment purposes was drawn from the preceding census or another source.

Specific tolerances are established for the number of computer allocations and substitutions that are permitted. If the number of corrections is beyond tolerance, the questionnaires in which the errors occurred are clerically reviewed. If it is found that the errors resulted from damaged questionnaires, from improper microfilming, from faulty reading by FOSDIC ^{1/} of undamaged questionnaires, or from other types of machine failure, the questionnaires are reprocessed.

STF 2 includes three tables (A53, B43, and B44) that allow users to determine the extent of allocation and substitution for a given geographic area. For example, if a user wants to determine the extent of substitution in a particular municipio, table B43 provides the total number of substituted persons in creating tabulations for that municipio. In addition, tables B44 and A53 provide data on the extent of allocation. For example, a user interested in the number of persons with sex or marital status allocated for a particular geographic area would want to know the value in the appropriate cells (3 and 5) of table B44. Similarly, the 11 cells of table A53 provide data on the number of housing units for which particular characteristics were allocated.

^{1/} Film Optical Sensing Device for Input to Computers.

GLOSSARY

Complete Count Concept Definitions

AGE. Age at last birthday, i.e., number of completed years from birth to April 1, 1980, based on replies to a question on month and year of birth. This item was asked on a complete-count basis.

Because of the central importance of the data on age, the question contains redundancies. The age entry on the basic tape record is derived from the FOSDIC entries of quarter and year of birth. For those persons who do not provide this information but who do provide "age at last birthday," the census enumerator or clerk uses an equivalency table to mark the appropriate FOSDIC circles. The item "age at last birthday" is used only secondarily because of the tendency of some people, in reporting their ages, to round off to "0" or "5" (and to report even rather than odd numbers). The write-in entries of month and year of birth are requested because some people have difficulty with (and therefore skip) the FOSDIC marking system in this question.

Age is tabulated by single years of age and by many different groupings, such as five-year age groups. Basic records identify single years (and quarter years on sample basic records) to 112.

Median age. Calculated as the value which divides the age distribution into two equal parts, one-half of the cases falling below this value, one-half above. Median age is computed from the age intervals or groupings shown in the particular tabulation, and thus a median based on a less detailed distribution may differ slightly from a corresponding median for the same population based on a more detailed distribution. If the median falls in the terminal category, e.g., 75 years and over, the median is shown as the initial age of the category with a plus sign, e.g., 75+.

Limitations: In previous censuses, undercoverage of the population has been associated with age. Young adults were missed at a higher rate than other segments of the population.

Historical comparability: Age data have been collected in each census since 1910.

See also: AGE OF HOUSEHOLDER

AGE OF HOUSEHOLDER. Derived from the age responses for the householders. (See the definition of householder under Household Relationship). Age and household relationship were determined on a complete-count basis.

The most frequent applications of age of householder in 1980 tabulations involve only two categories: under 65 years old, and 65 years and over. More detailed categories appear among the housing tabulations, for example: less than 25 years, 25 to 29, 30 to 34, 35 to 44, 45 to 59, 60 to 64, and 65 years and over. Age of householder is also derivable from age tabulations cross-classified by household relationship (STF 2). Age of householder is derivable from basic records in single years 15 to 112.

Historical comparability: In 1970 and previous censuses, age of head was tabulated instead of age of householder (See Household Relationship).

ALDEA. Aldeas are closely settled population centers with no legally defined limits. Aldea boundaries are delineated by the Puerto Rico Planning Board following procedures established by the Census Bureau. To be recognized in the 1980 census, aldeas must have had a minimum 1980 population of 1,000 inhabitants.

SEE ALSO: PLACES

BARRIO. See MUNICIPIO SUBDIVISIONS

BLOCK. Normally a rectangular piece of land, bounded by four streets. However, a block may also be irregular in shape or bounded by railroad tracks, streams, or other features. Blocks do not cross the boundaries of municipios, census tracts, or block numbering areas (BNA's). They may cross place boundaries and the boundaries of minor civil divisions (MCD's). When blocks cross place boundaries or MCD boundaries, separate statistical summaries are presented for each part of the block.

Census blocks are normally compact units, but there are important exceptions. For example, in some suburbs, houses cluster around cul-de-sacs. In these areas a census block may be fairly large since only those features that serve as the perimeter of an enclosed area are treated as block boundaries. Also, in those rural areas where they are numbered, blocks may be quite large, depending on the frequency of intersections of roads, rivers, mountain ridges, or other physical features.

Census data are tabulated by block in all urbanized areas (UA's) and generally for some territory extending beyond the UA boundaries. Data will also be tabulated by block in areas which contracted with the Census Bureau for the collection of block statistics.

A block is identified by a 3-digit code which is unique within census tract or, where tracts do not exist, BNA. Since separate summaries are provided for the parts of a block split by a place boundary or an MCD boundary, Puerto Rico tape users often will need to specify the place or MCD code, along with other codes, to retrieve data for a block. Blocks are defined on detailed census maps: Metropolitan Map Series (MMS), Vicinity Map Series (VMS), and place maps. The extent of block statistics coverage is reflected on maps by the presence of the 3-digit block number and the absence of ED boundaries and numbers.

On census maps, when a block boundary ignores a physical feature, such as a stream, a "fishhook" (↔) across the feature indicates that the block includes area on both sides of the feature. Alternatively, the separate parts of such a block may have identical block numbers, each followed by an asterisk.

The maps used for enumeration activities were, of necessity, obtained several years prior to the census and therefore do not reflect recently constructed streets. Only those features shown on the maps can serve as block boundaries.

Statistics were collected for almost 16,000 blocks in Puerto Rico in the 1980 census. Block statistics are included in PHC80-1 Block Statistics microfiche series and in file B of Summary Tape File 1 (STF 1B).

Historical comparability: In 1970, block statistics were prepared for UA's (and some territory beyond) located in SMSA's existing at the time of the census, as well as for contract areas. Unlike 1980, they were not prepared for UA's in not-yet-defined SMSA's.

Some blocks defined for 1970 will have new boundaries in 1980, primarily those on the edges of UA's and other areas of new development where the street patterns have changed. To help the user notice a change wherever a block has been redefined by splitting or other adjustment, the 1970 block number will generally not be reused. In many areas, however, many block boundaries and numbers will be the same in 1980 as in 1970.

BLOCK GROUP (BG). A combination of census blocks that is a subdivision of a census tract or BNA and is defined in all areas where block statistics are collected. (In areas where blocks are not identified, ED's are used.)

BG's are not outlined on census maps, but are defined as that set of blocks sharing the same first digit within a census tract or BNA. For example, Block Group "3" within a particular census tract would include all blocks numbered between 301 and 399. In most cases, the numbering would generally involve substantially fewer than 50 blocks, since gaps are occasionally left in the numbering; e.g., block 312 might be followed by block 316.

BG's are defined within census tract or BNA. They may cross, and be split by, the boundaries of minor civil divisions (MCD's), places, and urbanized areas. When this occurs, statistical summaries (data records) are provided for each component or part. To avoid mistaking a component summary for a complete BG summary, users should carefully study census maps to note any BG's split by place, MCD, or urbanized area boundaries.

Statistics will be prepared for almost 2,400 BG's in Puerto Rico. BG data, together with data for ED's, appear on STF's 1A and 3A, and in any corresponding microfiche. There are no published data for BG's.

Historical comparability: There were no BG's in Puerto Rico in 1970.

BLOCK NUMBERING AREA (BNA). An area defined for the purpose of grouping and numbering blocks in block-numbered areas where census tracts have not been defined--typically, contract block areas. BNA's do not cross municipio boundaries. They are identified by census tract-type numbers ranging from 9901.00 to 9989.99 which are unique within a municipio. While BNA numbers are similar to census tract numbers, BNA's are not census tracts and are not included in STF's 2 or 4.

BNA's may be split by the boundaries of places and MCD's. Statistical summaries appear in STF 1B and PHC80-1 Block Statistics microfiche series for the component parts of BNA's created when BNA's are split by the boundaries of places and MCD's. Such component summaries appear in STF 1A and 3A when BNA's are split by the boundaries of MCD's.

Historical comparability: While BNA's were also used in previous censuses, any historical comparability is generally coincidental.

BOARDED-UP STATUS. Determined for vacant units intended for year-round use. Boarded-up units have windows and doors covered by wood, metal, or similar materials to protect the interior and prevent entry. A single unit structure or a unit(s) in a multi-unit structure may be boarded-up in this way.

Historical comparability: This item is new for 1980.

CENSUS TRACT. A small statistical subdivision of a municipio. Tracts generally have stable boundaries. When census tracts are established, they are designed to be relatively homogeneous areas with respect to population characteristics, economic status, and living conditions. Tracts generally have between 2,500 and 8,000 residents. All standard metropolitan statistical areas (SMSA's) recognized before the 1980 census are completely tracted. In all, there are over 43,300 census tracts for the 1980 census (including 465 in Puerto Rico).

Census tract boundaries are established cooperatively by local Census Statistical Areas Committees and the Census Bureau in accordance with guidelines that impose limitations on population size and specify the need for visible boundaries. Geographic shape and area/size of tracts are of relatively minor importance. Tract boundaries are established with the intention of being maintained over a long time so that statistical comparisons can be made from census to census. Census tracts observe municipio lines and cover all of the territory within each tracted municipio. Within a municipio, tract boundaries may be split by other geographic boundaries.

Census tracts are identified by a 4-digit basic code and may have a 2-digit suffix, e.g., 6059.02. On tape, the decimal is implied. Many census tracts do not have a suffix. In such cases, tapes give the 4-digit code followed by two blanks. Leading zeros in a tract number (e.g., 0025.02) do not appear on the maps (e.g., 25.02).

Tract numbers are always unique within a municipio and also within an SMSA. All valid census tract numbers are in the range 0001 to 9899.99; a number between 9901 and 9989.99 denotes a block numbering area (BNA).

Census tract boundaries are shown on all detailed census maps, such as place maps and municipio maps. In addition, there will be census tract outline maps for each SMSA and each tracted municipio outside SMSA's. Tract outline maps show only those streets and other features which serve as census tract boundaries. In addition, the boundaries of places, MCD's, and municipios appear on tract outline maps.

Census tract data are presented in STF's 1A, 1B, 2A, 3A, and 4A, and in PHC80-2 Census Tracts reports. In STF 1A and 3A, tract data are presented in hierarchical sequence within place within MCD. In a case where a tract is split by place or MCD boundaries, the tape files will have summaries for each of its parts. To get data for the whole tract, it will be necessary to add up the components. In STF 1B, the situation is similar. In the major summaries for census tracts--those in STF 2A and 4A and in PHC80-2 Census Tracts series--tract summaries observe the boundaries of places of 10,000 or more population. Separate summaries provide totals for split tracts.

Historical comparability: Census tracts are defined with an overall goal of census-to-census comparability. Some 1970 tracts have been subdivided due to

increased population, but the new tracts can be recombined by the user for comparison with 1970 tracts. This affects about 8 percent of all 1970 tracts. Other changes have included combinations of two or more small 1970 tracts (less than 1 percent of all 1970 tracts) and adjustments to tract boundaries where old boundary features have disappeared or better boundaries (e.g., freeways) have come into being.

Whereas 1970 Census Tracts reports gave data for tract parts created when tracts were split by the boundaries of only those places with 25,000 or more population, 1980 reports observe boundaries of places as small as 10,000. 1980 STF's 2 and 4 present data for the components of split tracts, as well as for whole tracts, whereas their 1970 counterparts did not provide separate summaries for the components of split tracts.

CENTRAL BUSINESS DISTRICT (CBD). An area of very high land valuation characterized by a high concentration of retail businesses, service businesses, offices, theaters, and hotels, and by a high traffic flow. A CBD follows census tract boundaries, i.e., it consists of one or more whole census tracts. CBD's are identified only in central cities of SMSA's and other places with a population of 50,000 or more, and are designated in Puerto Rico by the Census Statistical Areas Committee in consultation with the Census Bureau.

The CBD's recognized in the 1980 census were delineated for the 1977 Economic Censuses. The Bureau does not plan to prepare 1980 statistics for CBD's, but users may derive data by aggregating data for component census tracts or smaller areas. Records for such areas on machine-readable 1980 files include a CBD code when the area is in a CBD.

Historical comparability: At the time of the 1970 census, CBD's were defined only in places of 100,000 or more persons.

CENTRAL CITY. See STANDARD METROPOLITAN STATISTICAL AREA;
URBANIZED AREA

CHILDREN. See HOUSEHOLD RELATIONSHIP

CIUDAD. See MUNICIPIO SUBDIVISIONS

CONDOMINIUM STATUS. A type of ownership of an apartment in a building--or a house in a development--where ownership of common areas is shared.

Condominium. Ownership in which the owner has an individual deed (and likely also an individual mortgage) on the unit, and also holds a common or joint ownership in all common areas, such as grounds, lobbies, and elevators. A condominium unit need not be occupied by the owner to be counted.

Noncondominium. All other types of ownership, including cooperatives where a share in a corporation with title to a multi-unit property entitles the owner to occupy a specific unit.

Limitations: In a test survey taken before the census, an overstatement of condominiums was noted.

Historical comparability: In 1970, owner-occupied cooperative and condominium housing units were identified together. In 1980, only condominium units are identified, since cooperative units were extensively misreported in test surveys before the census. The 1980 item also includes vacant and renter-occupied units, not just owner-occupied units as in 1970.

ENUMERATION DISTRICT (ED). An area used in the 1980 census for data collection activities and as a tabulation area where blocks are not present. ED's do not cross the boundaries of legal or statistical areas; for example, census tracts, MCD's, places, and municipios. Because of these constraints, they vary widely in population size, although they do not generally exceed a population of 1,000 in Puerto Rico. The population limits are designed so that an ED generally represents a reasonable workload for one enumerator. In areas without blocks, ED's are the smallest unit of census geography for which statistics are prepared.

ED boundaries are shown on MMS/VMS, place, and municipio maps in areas where there are no block numbers. ED's are identified by a 4-digit number (except that leading zeros, when they occur in ED numbers, do not appear on the maps). An ED number may be followed by a one-letter alphabetic suffix. The suffix is used to identify subdivisions of ED's made during data collection and processing activities where the original ED proved to be too populous for an efficient work unit, or to accommodate a revision to a place or other boundary. An ED number may also have a one-letter prefix indicating that the ED is of a special type (e.g., a military base), but the prefix is not necessary for unique identification of the ED. ED numbers do not repeat within a municipio. Any ED may be uniquely identified by accompanying its ED code with the 2-digit State code (72 for Puerto Rico) and 3-digit municipio code.

Statistics will be prepared for about 2,100 ED's in Puerto Rico. ED data, together with data for BG's, appear on STF's 1A and 3A and corresponding microfiche. In addition, ED data appear on STF 1B to complement the summaries for blocks. There are no published data for ED's.

Historical comparability: Many areas which were covered by ED's in 1970 are summarized in terms of blocks and BG's for 1980. In some cases it may be possible to add up blocks to approximate the 1970 ED's, based on detailed comparison of 1980 and 1970 maps.

In areas covered by ED's for 1980, enumeration considerations dictated ED size and design, and historical comparability does not normally enter into consideration.

FAMILY. Two or more persons, including the householder, who are related by birth, marriage (including consensually married), or adoption and who live together as one household; all such persons are considered as members of one family. (Persons not in families and not inmates of institutions are classified as unrelated individuals.) Families are defined using responses to the complete-count household relationship question.

If the son/daughter of the person or couple who maintains the household and the son's or daughter's spouse and/or children are members of the household, they are treated as part of the householder's family. A roomer/boarder and his/her spouse who are not related to the person or persons who maintain the household,

or a resident employee and his/her spouse living in, are not counted as a family, but as individuals unrelated to the householder. Thus, a household can contain only one family for purposes of census tabulations.

A person maintaining a household alone, or with unrelated persons only, is regarded as a household but not as a family. Thus, some households do not contain a family.

(In certain Census Bureau surveys before 1980, families as defined here are referred to as "primary families." The term "secondary family" refers to a resident family unrelated to the householder, such as a roomer and his/her spouse. Tabulations of families from such surveys include secondary families.)

Historical comparability: The 1970 definition for family was similar to that used in 1980. In 1960, secondary families were separately identified.

FAMILY TYPE. Families are classified by type according to sex of the householder and the presence of relatives, based on questions on sex and household relationship asked on a complete-count basis.

Married-couple family. A family in which the householder and his/her spouse are enumerated as members of the same household (includes consensually married couples).

Other family.

Male householder, no wife present. A family with a male householder and no spouse of householder present.

Female householder, no husband present. Family with a female householder and no spouse of householder present.

Historical comparability: The terminology for the family-type categories is new for 1980. The categories are reasonably compatible with the 1970 categories, "husband-wife families," "families with other male head," and "families with female head."

See also: FAMILY; HOUSEHOLD TYPE

GROUP QUARTERS, PERSONS IN. Persons in living arrangements, such as nursing homes or rooming houses, which are not households. Group quarters status was determined on a complete-count basis.

Two general categories of persons in group quarters are recognized.

Inmate of institution. A person under care or custody at the time of enumeration. Inmates are persons in such facilities as homes, schools, hospitals, or wards for the physically or mentally handicapped; persons in hospitals or wards for mental, tubercular, or chronic diseases; persons in homes for unmarried mothers or in nursing (convalescent and rest) homes for the aged and dependent; persons in orphanages, and persons in correctional institutions. These persons are enumerated as residents of an institution--regardless of their length of stay in the particular place. Some

tabulations include data by major types of institutions (home for the aged, mental hospital, correctional institution, and other institutions).

Other persons in group quarters. A person living in noninstitutional group quarters. Noninstitutional group quarters have nine or more persons unrelated to the person in column 1 of the questionnaire, or ten or more unrelated persons, and include such living quarters as rooming and boarding houses, communes, workers' dormitories, and convents or monasteries.

Persons residing in certain other types of living arrangements are classified as living in noninstitutional group quarters, regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, in college dormitories or in sorority and fraternity houses; patients in short-term medical, maternity and surgical wards of hospitals who have no usual home elsewhere; live-in staff members of institutions and other group quarters, provided that their living arrangements do not meet the housing unit definition; and persons staying in missions, flophouses, Salvation Army shelters, railroad stations, etc.

Historical comparability: In 1970, the "other person in group quarters" was defined as a person in noninstitutional quarters with five or more persons unrelated to the head (rather than nine or more unrelated to the householder in 1980) or six or more unrelated persons altogether (as compared to ten or more in 1980).

See also: HOUSEHOLD

HOMEOWNER VACANCY RATE. The number of year-round vacant units "for sale only" as a percent of the total homeowner inventory, i.e., all owner-occupied units and all year-round vacant units for sale only. Vacant units that are seasonal or held off the market are excluded.

See also: VACANCY STATUS

HOUSEHOLD. The person or persons occupying a housing unit. Counts of households, householders, and occupied-housing units are always identical in complete-count tabulations. In sample tables, the numbers may not always be the same because of differences in weighting sample data.

See also: HOUSEHOLD RELATIONSHIP; HOUSEHOLD TYPE; HOUSING UNIT

HOUSEHOLD, PERSONS IN. The number of persons living in the housing unit. All occupants are counted--not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters.

Figures for "persons in households" match those for "persons in units" in tabulations based on complete-count data. In sample tabulations, they may differ because of the weighting process. The phrase "persons in household" is used for population tabulations, "persons in unit" for housing items. "One-person households" and "persons living alone" are synonymous.

See also: FAMILY

HOUSEHOLD RELATIONSHIP. Relationship to the person in column 1 of the census questionnaire, ascertained from replies to a complete-count question.

In household. Persons in the household include:

Householder. The person who was reported in column 1 on the questionnaire. This was to be the person or one of the persons in whose name the home was owned or rented. If there was no such person, any adult household member at least 15 years old who was not a roomer, boarder, or paid employee was to be reported in column 1. In complete-count tabulations, the number of householders is the same as the number of households or occupied housing units. In sample tabulations, the numbers may not always be the same because of differences in weighting sample data.

Family householder. A householder living with one or more persons related to him or her by birth, marriage (including consensually married), or adoption.

Nonfamily householder. A householder living alone or only with persons not related to him or her.

Spouse. For most tabulations, "spouse" is defined as the husband or wife of the householder, living with the householder. This category may include persons in consensual marriages as well as persons in formal marriages; it does not include a partner or roommate of the opposite sex. In complete-count tabulations, the number of spouses is the same as the number of married-couple families or married-couple family households. The number of spouses, however, is generally less than half of the number of "married persons with spouse present" in sample tabulations, since only spouses of householders are specifically identified as "spouse." Sample tabulations of the number of married persons with spouse present include subfamilies--see the definition of subfamily under Family--as well as married-couple families.

Child. A son, daughter, stepchild, or adopted child of the householder, regardless of the child's age or marital status. The category excludes sons-in-law, daughters-in-law, and foster children.

Own child. A never-married child under 18 years who is a son, daughter, stepchild, or adopted child of the householder. In certain tabulations, own children are further classified as living with two parents or with one parent only. Own children of the householder living with two parents are by definition found only in married-couple families.

Related child. An "own child" or any other family member (regardless of marital status) who is under 18 years, except the householder or spouse. Foster children are not included since they are not related to the householder.

Other relative. A household member related to the householder by birth, marriage, or adoption, but not included specifically in another

relationship category. The scope of this category may differ from table to table, depending on what other relationship categories are included. In detailed tabulations (STF 2, STF 5, or PC80-1-D) the following categories may also be shown:

Parent. In complete-count tabulations, the father or mother of the householder, including a stepparent or adoptive parent. On sample basic records and microdata files, fathers- and mothers-in-law constitute a separate category coded from write-in responses under "other relative" on the questionnaire. One STF 5 and PC80-1-D tabulation includes both parents and parents-in-law in the same category.

Brother or sister. In complete-count tabulations, the brother or sister of the householder, including stepbrothers, stepsisters, and brothers and sisters by adoption. On sample basic records and microdata files, brothers- and sisters-in-law constitute a separate category coded from write-in responses. One STF 5 and PC80-1-D tabulation includes brothers- and sisters-in-law along with brothers and sisters in the same category.

Son- or daughter-in-law. Spouse of a son or daughter of the householder, coded from write-in responses.

Grandchild. Grandchild of the householder, coded from write-in responses.

Other. The following categories are separately coded in sample basic records and microdata files only: nephew/niece, grandparent, uncle/aunt, cousin, and "other."

Nonrelative. Any household member, including foster children, not related to the householder by birth, marriage (including consensual marriage), or adoption. The following categories are presented in certain more detailed tabulations.

Roommate. Nonrelative who lives together and shares expenses with the householder.

Roomer or boarder. Roomer, boarder, lodger, or relative of such; foster child or ward of the householder.

Paid employee. Nonrelative who is paid to provide household services, such as a maid, housekeeper or gardener.

Other nonrelative. Nonrelative who cannot be described by the above categories, including a person who is related to a roommate or to a paid employee.

Inmate of institution and other person in group quarters. (Treated as categories of household relationship for purposes of tabulation. For definitions, see Group Quarters, Persons In.) Persons in group quarters are excluded from counts of "persons in households" or "persons in units."

Responses to the household relationship item were also used in defining families (see Family; Family Type; Household Type). Tabulations frequently report relationship for persons in family households separately from persons in nonfamily households.

Historical comparability: The question was revised from 1970 to replace the "head of household" category with a format using a reference person, i.e., the "person in column 1." The 1980 householders differ from 1970 household heads primarily where the wife in a married-couple family is listed as the "person in column 1." In 1970, the husband always was designated the "head" of such a family. In 1980 tabulations, the substitution of one spouse for the other as the reference person may affect certain of the classifications, such as "parent" or "brother or sister," within the "other relative" grouping. The person in whose name the house or apartment is owned or rented may in a few cases differ from the person considered by other household members as the "head," but this is expected to affect relatively few households.

The 1970 questionnaire category "other relative of head" was replaced by three categories, "brother/sister," "father/mother," and "other relative." Since the category "patient or inmate" is marked only by census enumerators, it was moved to the bottom of the form in a space reserved for "census use only." New nonrelative categories include "roommate" and "paid employee."

See also: GROUP QUARTERS, PERSONS IN; FAMILY; FAMILY TYPE;
HOUSEHOLD TYPE

HOUSEHOLD TYPE. Households are classified by type according to sex of the householder and the presence of relatives, based on questions asked on sex and household relationship.

This item was determined on a complete-count basis.

Family household. A household including a family. (See Family.) A family household may also include nonrelatives living with the family. The following subcategories are frequently provided: married-couple family (including couples that are consensually married); family with male householder, no wife present; and family with female householder, no husband present. (See Family Type.)

Nonfamily household. A household consisting of a person living alone or of a householder living with persons not related to him or her.

Historical comparability: In 1970, nonfamily households were termed primary individual households; a primary individual being a person living alone or the head of a household in which no relatives of the head were present.

See also: FAMILY; FAMILY TYPE; UNRELATED INDIVIDUAL

HOUSING UNIT. A house, apartment, group of rooms, or single room occupied or intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other person in the structure and which have direct access from the outside of the building or through a common hall.

The occupants of a housing unit may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the definition for Persons In Group Quarters). For vacant units, enumerators apply the criteria of separateness and direct access wherever possible to the likely use by intended occupants, or otherwise to the use by previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that recreational vehicles, tents, caves, boats, railroad cars, and the like are included only if they are occupied as someone's usual place of residence.

Historical comparability: The first Census of Housing in 1940 established the "dwelling unit" concept. Although the term became "housing unit" and the definition has been modified slightly in each succeeding census, the 1980 definition is essentially comparable to previous censuses. In 1970, the definition of a housing unit stipulated that the occupants live and eat separately and have either direct access or complete kitchen facilities. For 1980, direct access is required; the alternative of complete kitchen facilities has been dropped. Excluded in 1970, vacant mobile homes are included in the 1980 housing inventory if intended for occupancy where they stand. Also in 1970, units with six or more unrelated persons living together were classified as group quarters; for 1980 that requirement was raised to ten or more unrelated persons.

See also: OCCUPANCY STATUS; TENURE; UNITS AT ADDRESS; YEAR-ROUND HOUSING UNITS; HOUSING UNITS

INMATE OF INSTITUTION. See GROUP QUARTERS, PERSONS IN

MARITAL STATUS. All persons were asked whether they were "now married," "consensually married," "widowed," "divorced," "separated," or "never married." Marital status data are tabulated only for persons 15 years old and over. This item was asked on a complete-count basis.

Couples who live together (unmarried persons, persons in consensual marriages,) were allowed to report the marital status they considered the most appropriate.

Single. All persons who have never been married, including persons whose only marriage was annulled.

Ever married. Persons married at the time of enumeration, including those consensually married or separated, plus widowed or divorced persons.

Now Married, except consensually married and separated. Persons whose current marriage has not ended through widowhood or divorce (regardless of previous marital history). The category may also include couples who live together if they consider this category the most appropriate. Categories for consensually married and separated persons are shown separately. In certain tabulations based on sample data, currently married persons are further classified as "spouse present" or "spouse absent." See below.

Consensually married. Persons who report they live in a married union without having had a civil or religious matrimonial ceremony.

Separated. Persons legally separated or otherwise absent from their spouse because of marital discord. Included are persons who have been deserted or who have parted because they no longer want to live together but who have not obtained a divorce. Separated includes persons with a limited divorce.

Widowed. Widows and widowers who have not remarried.

Divorced. Includes persons who are legally divorced and who have not remarried.

In selected sample tabulations, data for currently married and separated persons are reorganized and combined with information on the presence of the spouse in the same household:

Now Married. All persons whose current marriage has not ended by widowhood or divorce. Includes persons categorized above as separated and consensually married.

Spouse present. Married persons whose wife or husband was enumerated as a member of the same household, including those whose spouse may have been temporarily absent for such reasons as travel or hospitalization.

Spouse absent. Married persons whose wife or husband was not enumerated as a member of the same household, and all married persons living in group quarters.

Separated. Defined above.

Spouse absent; other. Married persons whose spouse was not enumerated as a member of the same household, excluding separated. Included are those whose spouse was employed and living away from home, absent in the Armed Forces, or an inmate of an institution.

Differences between the number of currently married males and the number of currently married females arise from the fact that some husbands and wives have their usual residences in different areas, and, in sample tabulations, from different weights applied to the data. Any differences between "now married, spouse present" males and females are due solely to sample weighting; by definition the numbers should be the same.

Historical comparability: The 1980 definition of "now married" is comparable to the definition of the term "married" as used in publications of data from prior censuses. For 1980, marital status is tabulated for persons 15 years old and over, a change from the period 1950-1970 when marital status was tabulated for persons 14 years old and over. A marital status question has been asked in every census since 1880.

MINOR CIVIL DIVISION. See MUNICIPIO SUBDIVISIONS

MUNICIPIO. In Puerto Rico, the primary divisions are termed municipios. Each municipio has legally established boundaries and constitutes a governmental unit. Two municipios have been created since 1970, Canóvanas and Florida, which

were separated from Loíza and Barceloneta Municipios, respectively. Each municipio, with the exception of Florida, includes a ciudad or pueblo in which the seat of government is located. The municipio of Florida has its seat of government in the Florida Adentro barrio.

MUNICIPIO SUBDIVISIONS. Barrios are the primary subdivisions of municipios. The barrios have legally established boundaries, but do not constitute a governmental unit. "Ciudad" or "pueblo" is the name given to the barrio or group of barrios which identifies the municipio center of government. Ciudades, pueblos, and barrios essentially serve as election districts and as the basis for apportionment of the Commonwealth legislature. There are two ciudades in Puerto Rico, Ponce and San Juan, each of which consists of groups of barrios.

NONRELATIVE. See HOUSEHOLD RELATIONSHIP

OCCUPANCY STATUS. The classification of all housing units as either occupied or vacant.

Occupied. The classification of a housing unit with a person or persons living in it as a usual residence when enumerated--or only temporarily absent, for example, on vacation. A household consists of all the persons who occupy a housing unit. If all the persons staying in the unit have their usual place of residence elsewhere, the unit is classified as vacant. Therefore, counts of households and occupied housing units should match--although complete counts may differ slightly from sample data.

Vacant. The classification of a housing unit with no one living in it at the time of enumeration, unless its occupants are only temporarily absent. If, at the time of enumeration, the unit is temporarily occupied entirely by persons who have a usual residence elsewhere, it is also classified as vacant.

Historical comparability: Similar data have been collected since 1940.

See also: VACANCY STATUS

PERSONS PER ROOM. A derived measure obtained by dividing the number of persons in each occupied housing unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room. For example, the number of units with 1.01 or more persons per room is the number of units occupied by more persons than there are separate rooms.

See also: ROOMS

PLACES. Two types of places are recognized in the stateside census reports -- incorporated places and census designated places -- as defined below.

Incorporated Places. Incorporated places recognized in the reports of the census are those which are incorporated under the laws of their respective States as cities, boroughs, towns, and villages. There are no incorporated places in Puerto Rico. Although ciudades and pueblos in Puerto Rico have legally established limits, they are not incorporated and are recognized for census purposes as municipio subdivisions rather than places.

Census Designated Places. As in 1950, 1960, and 1970 censuses, the Census Bureau, in cooperation with the Puerto Rico government, delineated boundaries for closely settled population centers. In 1980, such places are referred to as "census designated places" (CDP's). In Puerto Rico, the CDP's are called "zonas urbanas" and "aldeas." To be recognized for the 1980 census, aldeas must have had a minimum 1980 population of 1,000; however, zonas urbanas are recognized regardless of population size.

Census designated place boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for CDP's are shown on municipio subdivision maps.

PLUMBING FACILITIES. Presence of toilet facilities, bathing facilities, and piped water, ascertained for occupied and vacant housing units.

Complete plumbing for exclusive use. Piped hot and cold water or only cold water, a flush toilet, and a bathtub or shower for exclusive use by household members. All facilities must be in the living quarters, but need not be in the same room. Hot water need not be available continuously. In Puerto Rico, hot water need not be available at all. A privy or chemical toilet is not counted as a flush toilet. A bathtub or shower is counted only if it is connected to piped running water.

Lacking complete plumbing for exclusive use.

Complete plumbing facilities, but also used by another household. All facilities present, but with some or all of the plumbing facilities also regularly used by someone who is not a member of the household. This category also applies if the future occupants of living quarters now vacant would be expected to share the facilities.

Some but not all plumbing facilities. Units with one or two but not all three of these: hot and cold piped water, flush toilet, and bathtub or shower. In Puerto Rico, units with only cold piped water meet the piped water requirement.

No plumbing facilities.

Historical comparability: Data on plumbing facilities have been collected since 1940.

PUERTO RICO. In addition to the United States, the decennial census covers Puerto Rico and the outlying areas over which the United States exercises sovereignty or jurisdiction. Questionnaire design and the questions asked in Puerto Rico were developed to accommodate local conditions. The geographic subareas for which statistics were reported for Puerto Rico are as follows: blocks; ED's and BG's; census tracts and block numbering areas; zonas urbanas and aldeas; subbarrios; barrios, ciudades and pueblos; municipios; and SMSA's and the SCSA. Data for Puerto Rico and its subdivisions will appear in reports and tapes in generally the same pattern as for States and their subdivisions.

RELATED CHILDREN. See HOUSEHOLD RELATIONSHIP

RENT, CONTRACT. The monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Rent is shown for occupied units rented for cash and vacant units for rent. For vacant units, rent is the amount asked for the unit at the time of enumeration, and is sometimes labeled "rent asked." Contract rent is tabulated for "specified renter-occupied" units, which excludes one-family houses on three or more cuerdas. Respondents are to report rent only for the housing unit enumerated and to exclude any rent paid for additional units or for business premises. The rent amount for the unit is to be reported even if paid for by someone outside the household, or for some reason, not paid. Respondents who do not pay rent monthly are asked to convert the sum to a monthly average. In the computation of aggregate and mean rent, \$20 is taken as the average of the interval "less than \$30," and \$450 is taken as the average of the interval "\$400 or more."

No cash rent. Rental units occupied without payment of cash rent. The unit may be owned by friends or relatives who live elsewhere and who allow occupancy without charge. Rent-free houses or apartments may be provided to compensate caretakers, ministers, tenant farmers, sharecroppers, or others.

Historical comparability: Rent intervals reported have gone to higher dollar figures in recent decades. In 1970, the question on rent had a top category of \$200 or more; it also listed fewer rent intervals than the 1980 question. Constant dollar comparisons, 1970 to 1980, are not prepared.

RENTAL VACANCY RATE. The number of vacant units for rent as a percent of the total rental inventory--that is, all renter-occupied units and all year-round vacant units for rent. Vacant units that are seasonal or held off the market are excluded.

See also: VACANCY STATUS

ROOMS. The number of whole rooms intended for living purposes, not only in occupied housing units, but also in vacant units. These rooms include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, foyers, halls, half-rooms, utility rooms, unfinished attics or basements, or other space used for storage. A partially divided room, such as a dinette next to a kitchen or living room, is a separate room only if there is a partition from floor to ceiling, but not if the partition consists solely of shelves or cabinets.

In the computation of aggregate and mean rooms, 10 is taken as the average of the interval "9 or more rooms."

Historical comparability: Similar data have been collected since 1940.

See also: PERSONS PER ROOM

SEX. Ascertained on a complete-count basis.

Historical comparability: A question on the sex of individuals has been asked of the total population in every census.

SPOUSE. See HOUSEHOLD RELATIONSHIP

STANDARD CONSOLIDATED STATISTICAL AREA (SCSA). A large concentration of metropolitan population composed of two or more contiguous standard metropolitan statistical areas (SMSA's) which together meet certain criteria of population size, urban character, social and economic integration, and/or contiguity of urbanized areas. Each SCSA must have a population of one million or more. Thirteen SCSA's, defined by the Office of Management and Budget, were in existence at the time of the 1980 census; criteria were published by that office in Standard Metropolitan Statistical Areas: 1975. Four additional SCSA's, including one in Puerto Rico, have been established based on 1980 census results.

SCSA's are identified by a 2-digit numeric code. Summaries for SCSA's appear in many reports, and in STF's 1C, 2C, 3C, and 4C. Summaries are generally provided for SCSA totals and for within-State parts of SCSA's.

In 1982 or 1983, the SCSA concept will be replaced by the new Consolidated Metropolitan Statistical Area (CMSA) concept, with somewhat more flexible criteria, as spelled out in the Federal Register, January 3, 1980. These changes will not affect publication of 1980 census data for SCSA's.

STANDARD METROPOLITAN STATISTICAL AREA (SMSA). A large population nucleus and nearby communities which have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire municipios that meet specified standards pertaining to population, commuting ties, and metropolitan character. SMSA's are designated by the Office of Management and Budget.

Data products from the 1980 census will report on 323 SMSA's: (1) 287 defined before January 1, 1980 (including 4 in Puerto Rico); and (2) an additional 36 established as a result of 1980 census population counts. The 36 new SMSA's, including one in Puerto Rico, were designated when 1980 counts showed that they met one or both of the following criteria:

1. Included a place with a population of at least 50,000 within its limits, or
2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 100,000.

An SMSA includes a central city (zona urbana in Puerto Rico) and, generally, its entire UA and the remainder of the municipio or municipios in which the UA is located. An SMSA also includes such additional outlying municipios which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or municipios. Specific criteria governing the definition of SMSA's recognized before 1980 are published in Standard Metropolitan Statistical Areas: 1975, issued by the Office of Management and Budget.

SMSA's are identified by a FIPS 4-digit numeric code, which follows the alphabetic sequence of SMSA names. SMSA's are outlined on small-scale maps in several 1980 report series. SMSA data appear in most 1980 census publications and summary tape files.

Historical comparability: A comparison of 1970 and 1980 census products reveals two types of changes in metropolitan territory: new SMSA's were created from previously nonmetropolitan territory, and many of the SMSA's which were recognized in 1970 census tabulations were redefined prior to 1980.

In 1982 or 1983, SMSA boundaries will be re-evaluated using 1980 census data on commuting, labor force, population density, type of residence, and population growth, according to new criteria spelled out in the Federal Register, January 3, 1980 (vol. 45, no. 2, pt. VI). At that time, new outlying municipios may be added or existing ones deleted, some area titles may be changed and some new central cities may be designated, and some areas may be consolidated. Further, the term "standard metropolitan statistical area" will be shortened to "metropolitan statistical area" (MSA). These changes will not affect publication of 1980 census data for SMSA's.

STATE. A major political unit of the United States. Puerto Rico is treated as a State-equivalent in all 1980 census data series.

States are identified by a 2-digit FIPS code which follows the alphabetic sequence of State names (including the District of Columbia), and by a 2-digit Census Geographic State code. Puerto Rico has a FIPS code numerically following the State codes.

SUBBARRIOS. Subbarrios serve as electoral and representational entities, further subdividing some pueblos and, in three municipios -- Ponce, San Juan, and Salinas -- barrios other than a pueblo. There are subbarrios in 23 municipios.

TENURE. The classification of all occupied units as either owner-occupied or renter-occupied. This item was asked on a complete-count basis.

Owner-occupied. All housing units where the owner or co-owner lives in the unit, even if the unit is mortgaged or not fully paid for.

Renter-occupied. All occupied housing units which are not owner-occupied, regardless of whether or not cash rent is paid by a member of the household. ("No cash rent" units, included here, are separately identified in rent tabulations.)

Historical comparability: In 1970, the question on tenure also included a category for condominium and cooperative ownership. In 1980, condominiums are identified in a separate question.

See also: CONDOMINIUM STATUS; RENT, CONTRACT; VALUE

TRACT. See CENSUS TRACT

UNITS IN STRUCTURE. The number of housing units in the structure in which the unit is located. The number of units in structure includes all housing units whether occupied or vacant, but excludes group quarters or businesses. The statistics are presented in terms of the number of housing units in structures of specified type and size, not in terms of the number of structures with housing units. A structure is a separate building that either has open space on

all sides or is separated from other structures by dividing walls that extend from ground to roof.

Mobile home or trailer. Included if intended for occupancy where located. Mobile homes or trailers were counted whether mounted or on wheels.

Limitations: Data users sometimes use "units at address" shown in complete-count tabulations for the U.S. as a proxy for "units in structure." The concepts are not interchangeable, though, since some multi-unit buildings have more than one address and there is some variation in respondent interpretation of "units at address."

Historical comparability: Similar data were collected in 1970.

UNITS, PERSONS IN. The number of persons living in the housing unit. All occupants are counted--not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters.

UNRELATED INDIVIDUAL. An unrelated individual may be (1) a householder living alone or only with persons not related to him or her, (2) a roomer, boarder, partner, roommate, or resident employee unrelated to the householder, or (3) a group quarters resident who is not an inmate of an institution. Classification as an unrelated individual derives from the complete-count question on household relationship. Examples of unrelated individuals include a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to the householder, a maid living as a member of her employer's household, and a resident staff member living in a hospital dormitory. Persons living with one or more relatives in a household where the householder is not related to any of them are classified in the census as unrelated individuals; for example, a husband and wife who rent a room from a householder to whom they are not related.

Historical comparability: A similar concept was used in 1970.

Urban and Rural. The urban population consists of all persons living in (1) places of 2,500 or more inhabitants identified as zonas urbanas and aldeas and (2) other territory included in urbanized areas. The population not classified as urban constitutes the rural population.

In censuses prior to 1960, before urbanized areas were established in Puerto Rico, the urban population comprised all persons living in ciudades, pueblos, and aldeas of 2,500 or more inhabitants. A definition of urban population restricted to such entities having 2,500 or more inhabitants excludes a number of large and densely settled areas merely because they are not identified as places and, therefore, the inhabitants of such areas are excluded from the urban population.

To improve its measure of the urban population, the Bureau of the Census in 1950 adopted the concept of the urbanized area, which was applied to Puerto Rico in 1960. For the 1960 census, the urban population of Puerto Rico was defined as all persons residing in urbanized areas and, outside these areas, in all ciudades, pueblos, and aldeas which had 2,500 or more inhabitants. Changes since 1970 in the criteria for defining central cities have permitted urbanized

areas to be defined around smaller centers. The 1960 definition of urban has continued substantially unchanged. In 1970, however, the legal ciudad/pueblo boundaries in many municipios were disregarded to include the built-up areas of contiguous barrios. The population within these areas, incorrectly referred to as ciudades and pueblos in the 1970 reports, was included in the urban population if the number of inhabitants within the legal boundaries plus those residing in the contiguous built-up areas totaled 2,500 or more. These places are equivalent to those identified as zonas urbanas in the 1980 census.

URBAN FRINGE. See URBANIZED AREA

URBANIZED AREA (UA). A population concentration of at least 50,000 inhabitants, consisting of a central city(ies) --zona urbana(s)-- and the surrounding, closely settled, contiguous territory (suburbs).

The UA criteria define a boundary based primarily on a population density of at least 1,000 persons per square mile, but also include some less densely settled areas such as industrial parks if they are within areas of dense urban development. The density level of 1,000 persons per square mile corresponds approximately to the continuously built-up area around a central city(ies). The "urban fringe" is that part of the UA outside of a central city(ies).

Typically, an entire UA is included within an SMSA. The SMSA is usually much larger in terms of territory covered and includes territory where the population density is less than 1,000. In some cases a small part of a UA may extend beyond an SMSA boundary and possibly into an adjacent SMSA. A few 1980 UA's have been defined in areas which do not meet the 100,000 total population criterion for SMSA designation. There are seven UA's in Puerto Rico in 1980.

UA's are identified by 4-digit codes, which follow the alphabetic sequence of all UA names. When a UA has the same name as an SMSA, the UA code is the same as the SMSA code. UA boundaries are shown on final MMS/VMS maps, and at a much smaller scale on UA outline maps in PC80-1-A and HC80-1-A reports.

Historical comparability: Because UA's are defined on the basis of population distribution at the time of a decennial census, their boundaries tend to change following each census to include expanding urban development.

The criteria have been fairly constant since 1950, although in each decade some new refinements have been added. For the 1970 census, in which 252 UA's were recognized, it was necessary for the central city to have a population of 50,000 or more, or for there to be "twin cities" with a combined population of 50,000 and with the smaller city having at least 15,000. In 1974 the criteria were liberalized to allow UA recognition to certain cities between 25,000 and 50,000, and this resulted in 27 new urbanized areas. For 1980, no minimum population size is required for a central city.

VACANCY, DURATION OF. The period from the departure of the last occupants until Census Day--not the whole time the unit might stay vacant. For newly constructed and converted or merged units, never occupied, the period extends from the date of completion until Census Day.

Historical comparability: Similar data have been collected since 1960.

See also: VACANCY STATUS

VACANCY STATUS. Determined for housing units at the time of enumeration. Vacancy status pertains to year-round vacant units. Vacancy status and other characteristics of vacant units are determined by enumerators questioning landlords, owners, neighbors, rental agents, and others.

Included in the housing inventory are vacant mobile homes or trailers intended to be occupied on the site where they stand. Vacant mobile homes on dealer sales lots or in storage yards are not counted as housing units.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if open to the elements; that is, if the roof, walls, windows, or doors no longer protect the interior from the elements, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

Vacant year-round units. Vacant units intended for use, even if only occasionally, throughout the year.

For sale only. Vacant year-round units offered for sale only. The category includes mainly one-family houses, but also two types of vacant units in multi-unit buildings: (1) vacant units (which are for sale only) in a cooperative or condominium and (2) vacant units intended to be occupied by the new building owners in multi-unit buildings that are for sale. Vacant units offered for rent or sale at the same time are classified as "for rent."

For rent. Vacant year-round units offered for rent, and vacant units offered for rent or for sale at the same time, including vacant units for rent in a building for sale.

Rented or sold, awaiting occupancy. Vacant year-round units sold or rented but still unoccupied when enumerated--including units where rent is agreed on but not yet paid.

Held for occasional use. Vacant units for weekend or other occasional use throughout the year.

Other vacant. Vacant units for year-round occupancy not classified above, for example, units held for a janitor or caretaker, settlement of an estate, pending repairs or modernization, or personal reasons of the owner.

Vacant seasonal units. Vacant units used or intended for use only during certain seasons. Any unit used throughout the year, even if only occasionally, is excluded. Seasonal units include those for summer sports or recreation--beach cottages and hunting cabins, for example.

Limitations: Most tables exclude vacant seasonal units since reliable information on characteristics of such units is difficult to obtain.

Historical comparability: Similar data have been collected since 1940.

See also: BOARDED-UP STATUS; HOMEOWNER VACANCY RATE; OCCUPANCY STATUS; RENTAL VACANCY RATE; VACANCY, DURATION OF

VALUE. For owner-occupied housing units, the respondent's estimate of the current dollar worth of the property. For vacant units, value is the price asked for the property. A property is defined as the house and land on which it stands. Respondents estimated the value of house and land even if they only owned the house or owned the property jointly. Statistics on value are shown only for owner-occupied condominium units and for "specified owner-occupied" units, i.e., one-family houses on less than three cuerdas and with no business on the property. Value tabulations exclude renter-occupied units, mobile homes or trailers, houses on three or more cuerdas, houses with a commercial establishment or medical office on the property, and noncondominium units in multi-family buildings (e.g., cooperatives).

When value data are presented solely for vacant units for sale only, the term "sale price asked" is substituted. In the computation of aggregate and mean value, \$1,500 is taken as the average of the interval "less than \$2,000," and \$150,000 is taken as the average of the interval "\$100,000 or more."

Limitations. A 1970 census evaluation study in the United States found that respondents tended to report a higher value of home in a reinterview survey, with more detailed questions, than in the census. On the other hand, a comparison of 1970 census reports of value with subsequent actual sale prices of a sample of homes sold one to two years later found that the census understated the median market value of those homes by only three percent (compared to the sale prices adjusted for inflation between the census and sale date). This result cannot be generalized to all census value data, however, since the sample was restricted to metropolitan areas, and since census respondents who were about to sell their homes may have been more aware of market values.

Historical comparability: Similar data have been collected in previous censuses, but value for condominiums is new for 1980. For historical comparability, tables will show condominiums and noncondominiums separately. Values for 1980 reflect increased housing prices: the highest category in 1970 was "\$30,000 or more;" in 1980, \$100,000 or more. Also, the number of categories increased from 11 in 1970 to 24 in 1980.

YEAR-ROUND HOUSING UNITS. All occupied units plus vacant units intended for year-round use. Almost all data on housing characteristics are limited to year-round units. Vacant units held for seasonal use are excluded because it is difficult to obtain reliable information for them. Counts of the total housing inventory include both year-round and seasonal units.

See also: VACANCY STATUS

ZONAS URBANAS. Zonas urbanas are composed of the municipio seat of government and the adjacent built-up area. Zonas urbanas are delineated by the Puerto Rico Planning Board under authorization of the Puerto Rico Planning Act of 1975.

Figures are published for all zonas urbanas regardless of the number of inhabitants. In 1970 (also in Arecibo in 1960), zonas urbanas were incorrectly referred to as ciudades and pueblos, simultaneously disregarding the legal ciudad/pueblo boundaries. Except for Arecibo, such areas had not been recognized prior to the 1970 census.

Questionnaire Facsimile

1980 Census of Puerto Rico

DO	A1	A2	A4	A5	A6

Your answers are confidential

By law (title 13, U.S. Code), census employees are subject to fine and/or imprisonment for any disclosure of your answers. Only after 72 years does your information become available to other government agencies or the public. The same law requires that you answer the questions to the best of your knowledge.

A message from the Director,
U.S. Bureau of the Census . . .

We must, from time to time, take stock of ourselves as a people if our Nation is to meet successfully the many national and local challenges we face. This is the purpose of the 1980 census.

The essential need for a population census was recognized almost 200 years ago when the Constitution of the United States was written. As provided by article 1, population censuses of the United States have been taken every 10 years. As part of the 1980 Census of Population and Housing, as required by title 13, United States Code, the U.S. Bureau of the Census is conducting the census of Puerto Rico as of April 1, 1980.

The law under which the census is taken protects the confidentiality of your answers. For the next 72 years — or until April 1, 2052 — only sworn census workers have access to the individual records, and no one else may see them.

Your answers, when combined with the answers from other people, will provide the statistical figures needed by public and private groups, schools, business and industry, and Federal, Commonwealth, and municipal governments. These figures will increase the understanding of how the Puerto Rican population and housing are changing. In this way, today's problems can be dealt with more effectively.

The census is a vitally important activity for Puerto Rico. Please do your part by filling out this census form accurately and completely. A census taker will visit your household to pick up the form; please keep it in a safe, convenient place until then.

Thank you for your cooperation.

NOW PLEASE ANSWER QUESTIONS H1-H12 FOR YOUR HOUSEHOLD

If you listed more than 7 persons in Question 1, please see note on page 4.

PERSON in column 7

Last name _____

First name _____ Middle initial _____

If relative of person in column 1:

Husband/wife

Son/daughter

Brother/sister

Father/mother

Other relative

If not related to person in column 1:

Roomer, boarder

Roommate

Paid employee

Other nonrelative

Male Female

a. Age at last birthday _____ c. Year of birth _____

b. Month of birth _____

Jan.-Mar.

Apr.-June

July-Sept.

Oct.-Dec.

Now married

Consensually married

Widowed

Divorced

Separated

Never married

CENSUS USE ONLY

A _____

O I O N O O

H1. Did you leave anyone out of Question 1 because you were not sure if the person should be listed - for example, a new baby still in the hospital, a lodger who also has another home, or a person who stays here once in a while and has no other home?

Yes - On page 4 give name(s) and reason left out.

No

H2. Did you list anyone in Question 1 who is away from home now - for example, on a vacation or in a hospital?

Yes - On page 4 give name(s) and reason person is away.

No

H3. Is anyone visiting here who is not already listed?

Yes - On page 4 give name of each visitor for whom there is no one at the home address to report the person to a census taker.

No

H4. Do you enter your living quarters -

Directly from the outside or through a common or public hall?

Through someone else's living quarters?

H5a. Is there hot and cold piped water in this building?

Yes, hot and cold piped water in this building

No, only cold piped water in this building

No piped water in this building

b. Is there a bathtub or shower in this building?

Yes, for this household only

Yes, but also used by another household

No bathtub or shower

c. Is there a flush toilet in this building?

Yes, for this household only

Yes, but also used by another household

No - If "No," what type of toilet? Privy Other or none

H5. How many rooms do you have in your living quarters? Count living rooms, dining rooms, kitchens, and bedrooms, but do not count bedrooms, balconies, foyers, or halls.

1 room 4 rooms 7 rooms

2 rooms 5 rooms 8 rooms

3 rooms 6 rooms 9 or more rooms

H7. Are your living quarters -

Owned or being bought by someone in this household?

Rented for cash rent?

Occupied without payment of cash rent?

H8. Is this apartment (house) part of a condominium?

No Yes, a condominium

FOR CENSUS USE ONLY

A4. Block number	A5. Serial number	B. Type of unit or quarters	For Vacant Units
		Occupied	C1. Is this unit for -
		<input type="radio"/> First form	<input type="radio"/> Year round use?
		<input type="radio"/> Continuation	<input type="radio"/> Seasonal use? - Ship C2, C3, and D.
		Vacant	C2. Vacancy status
		<input type="radio"/> Regular	<input type="radio"/> For rent
		<input type="radio"/> Usual home elsewhere	<input type="radio"/> For sale only
		Group quarters	<input type="radio"/> Rented or sold, not occupied
		<input type="radio"/> First form	<input type="radio"/> Held for occasional use
		<input type="radio"/> Continuation	<input type="radio"/> Other vacant
			C3. Is this unit boarded up?
			<input type="radio"/> Yes <input type="radio"/> No

H9. Which best describes this building? Include all apartments, flats, etc., even if vacant.

A mobile home or trailer

A one-family house detached from any other house

A one family house attached to one or more houses

A building for 2 families

A building for 3 or 4 families

A building for 5 to 9 families

A building for 10 to 19 families

A building for 20 to 49 families

A building for 50 or more families

A boat, tent, van, etc.

H10. If this is a one-family house -

a. Is the house on a property of 3 or more acres?

Yes No

b. Is any part of the property used as:

	Yes	No
(1) A commercial establishment?	<input type="radio"/>	<input type="radio"/>
(2) A medical office?	<input type="radio"/>	<input type="radio"/>
(3) Other type of office?	<input type="radio"/>	<input type="radio"/>

H11. If this is a one-family house or a condominium unit which you own or are buying - What is the value of this property, that is, how much do you think this property (house and lot or condominium unit) would sell for?

<input type="radio"/> Less than \$2,000	<input type="radio"/> \$25,000 to \$27,499
<input type="radio"/> \$2,000 to \$2,999	<input type="radio"/> \$27,500 to \$29,999
<input type="radio"/> \$3,000 to \$3,999	<input type="radio"/> \$30,000 to \$32,499
<input type="radio"/> \$4,000 to \$4,999	<input type="radio"/> \$32,500 to \$34,999
<input type="radio"/> \$5,000 to \$7,499	<input type="radio"/> \$35,000 to \$37,499
<input type="radio"/> \$7,500 to \$9,999	<input type="radio"/> \$37,500 to \$39,999
<input type="radio"/> \$10,000 to \$12,499	<input type="radio"/> \$40,000 to \$44,999
<input type="radio"/> \$12,500 to \$14,999	<input type="radio"/> \$45,000 to \$49,999
<input type="radio"/> \$15,000 to \$17,499	<input type="radio"/> \$50,000 to \$59,999
<input type="radio"/> \$17,500 to \$19,999	<input type="radio"/> \$60,000 to \$74,999
<input type="radio"/> \$20,000 to \$22,499	<input type="radio"/> \$75,000 to \$99,999
<input type="radio"/> \$22,500 to \$24,999	<input type="radio"/> \$100,000 or more

H12. If you pay rent for your living quarters - What is the monthly rent? If rent is not paid by the month, see the Questionnaire Reference Book on how to figure a monthly rent.

<input type="radio"/> Less than \$30	<input type="radio"/> \$140 to \$149
<input type="radio"/> \$30 to \$39	<input type="radio"/> \$150 to \$159
<input type="radio"/> \$40 to \$49	<input type="radio"/> \$160 to \$169

FOR CENSUS USE ONLY

D. Months vacant	E. Total persons
<input type="radio"/> Less than 1 month	
<input type="radio"/> 1 up to 2 months	
<input type="radio"/> 2 up to 6 months	
<input type="radio"/> 6 up to 12 months	
<input type="radio"/> 1 year up to 2 years	
<input type="radio"/> 2 or more years	

E. 2. Pop./F

Number _____

Please Make Sure You Have Filled This Form Completely

For persons who answered in Question 1 that they are staying here only temporarily and have a usual home elsewhere, enter the address of usual home here

House number	Street or road	Apartment number or location
City	Municipal or County	
State	ZIP Code	

For Answers to Questions H1, H2, and H3:

H1. Name of person(s) left out and reason:

H2. Name of person(s) away from home and reason away:

H3. Name of visitor(s) for whom there is no one at the home address to report the person to a Census Taker

1 Check to be certain you have:

- Answered Question 1 on page 1.
- Answered Questions 2 through 5 for each person you listed at the top of pages 2 and 3.
- Answered Questions H1 through H12 on page 3.

2 Write here the name of the person who filled the form, the date the form was completed, and the telephone number on which the people in this household can be called.

Name _____

Date _____

Respondent's telephone number _____

NOTE

If you have listed more than 7 persons in Question 1, please make sure that you have filled the form for the first 7 people. Then fill out a continuation questionnaire to obtain the information for the other people.

Thank you very much.

Complete Count Questionnaire Changes -- 1970 to 1980, Puerto Rico

The content of the 1980 census questionnaires is best viewed as a continuation of the previous decade's experience rather than a radical departure. Many census items have remained unchanged from 1970; others have been slightly modified to clarify the question wording or remove confusing instructions. In some cases, 1970 questions have been replaced with new questions which approach a subject from a different angle. For example, in the relationship question, the "head of household" terminology used in 1970 has been replaced by a format using a householder as a means to reconstruct families without implying the notion of dominance implicit in the designation of a household head. A brief item-by-item list of changes made in the census questions between 1970 and 1980 is presented below. The wordings of the 1980 census questions are provided in parentheses for each item. In this presentation, some items are listed as "No change"; this indication may, however, include some minor changes in wording or question format due to changes in basic questionnaire construction or style of presentation. It should also be noted that the phrase "this person" in the wording of census questions refers to the person for whom data are being provided, not necessarily the person completing the form.

100-percent Population

1. Name. ("What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?"): No change from 1970. The names of persons given in question 1 are listed at the top of the response columns for the 100-percent items and at the beginning of the sample pages on the long form.
2. Household relationship. ("How is ... [this person] related to the person in column 1?") Revised from 1970 to replace the "Head of household" category with a format using a reference person, i.e. the "Person in column 1."

The 1970 category "Other relative of head" has been replaced by three categories, "Brother/sister," "Father/mother," and "Other relative." Since the category "Patient or inmate" is marked only by census enumerators, it has been moved to the bottom of the form in a space reserved for "Census use only." New nonrelative categories include "Roommate" and "Paid employee." The 1970 category "Roomer, boarder, lodger" was changed to "Roomer, boarder" in 1980.

3. Sex. ("Sex"): No change from 1970.
4. Age. ("What is ...'s age, month, and year of birth?" / 4a. "Print age at last birthday." / 4b. "Print month and fill one circle." / 4c. "Print year in the spaces, and fill one circle below each number."): No change in age and month of birth. The year-of-birth question format was revised to replace the 1970

response categories with self-coding FOSDIC circles for the last three digits of the year of birth. The first digit is prefilled with a "1."

5. Marital Status. ("Which one of the following describes the marital status of ...?"): The response category "Single" was replaced with "Never married" in 1980. Response categories include: "Now married," "Consensually married," "Widowed," "Divorced," "Separated," and "Never married."

Coverage

H1

- H3. Coverage. (H1. "Did you leave anyone out of Question 1 because you were not sure if the person should be listed-"/H2. "Did you list anyone in question 1 who is away from home now-"/H3. "Is anyone visiting here who is not already listed?"): In 1970, these questions were numbered 9-11 and were included in the 100-percent population section. Question 8 in 1970 was an inquiry concerning whether the number of persons in the household exceeded seven. This question has been replaced by instructions on the questionnaire directing the respondent's action if the number of persons in the household exceeds seven.

100-percent Housing

- H4. Access to unit. ("Do you enter your living quarters-") No change from 1970; response categories specify types of access to the unit.
- H5. Plumbing facilities. (H5a. "Is there hot and cold piped water in this building?"/H5b. "Is there a bathtub or shower in this building?"/H5c. "Is there a flush toilet in this building?"): In 1980, the question "Is there a flush toilet in this building?" provided two additional responses to the "No" response category. These were "Privy" and "Other or none."
- H6. Number of rooms. ("How many rooms do you have in your living quarters?"): No change from 1970.
- H7. Tenure. ("Are your living quarters-"): This question which differentiates units that are owned, rented or occupied without payment of cash rent has been separated from the single inquiry in 1970 concerning both tenure and condominium or cooperative status.
- H8. Condominium identification. ("Is this apartment (house) part of a condominium?"): Separated from the single inquiry in 1970 concerning both tenure and condominium or cooperative status. The part of the 1970 inquiry concerning cooperatives has been deleted from the 1980 questionnaire.

H9. Units in structure. ("Which best describes this building?"): "Boat, tent, van, etc." was added to the response categories in 1980 to describe the building.

H10. Acreage, and presence of commercial establishment. (H10. "If this is a one-family house-"/ H10a. "Is the house on a property of 3 or more cuerdas?"/ H10b. "Is any part of the property used as : (1) a commercial establishment, (2) a medical office; or (3) other type of office?"): The combined 1970 inquiry about acreage and commercial establishment has been divided into separate sections, and a category of "Other type of office" was added. The inquiry about "one-family house" has been incorporated into the question wording itself. These provide a screener in the tabulation of value and rent.

H11. Value. ("If this is a one-family house or a condominium unit which you own or are buying--What is the value of this property, that is, how much do you think this property (house and lot or condominium unit) would sell for?"): Revised from 1970 to explicitly include condominiums in 1980. The number of response categories has been increased from 11 in 1970 to 24 in 1980, and the range of values now goes from "Less than \$2,000" to "\$100,000 or more."

H12. Rent. ("If you pay rent for your living quarters--What is the monthly rent?"): Revised for 1980 to eliminate the write-in space for rent which was provided in 1970 in addition to specific response categories. The number of response categories has been increased from 14 in 1970 to 24 in 1980, and the range of rent intervals now goes from "Less than \$30" to "\$400 or more."

C1, C2, C3, & D. Vacancy status. These items are filled only by census enumerators for vacant units. In addition to vacancy status and months vacant which appeared in 1970, the 1980 questionnaires will indicate whether a vacant unit is "boarded up."

1/ The functional status code will be set to "S" (statistical area) for summary levels 24 and 32.

2/ BNA's are not on this file.

3/ Will contain "9999" if the geographic summary is not wholly contained in the District Office.

- 4/ The area name on summary level 24 is derived from the previous summary level 23 or summary level 17 record and will be set as follows: (1) If the tract is in a place, then the tract will contain the place name. (2) If the tract is outside a place but the municipio contains at least one place of 10,000+, then the tract will contain the municipio name prefixed by "Remainder of." If the tract is outside the place and the municipio contains no places of 10,000+, then the tract will contain the municipio name.
- 5/ The area name on summary level 32 will contain the municipio name.
