

1980 Census of Population and Housing Summary Tape File 5, Housing File Supplement: Puerto Rico. Technical Documentation

D1-D80-S500-14-TECHP

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

Marshall L. Turner, Jr., Assistant Chief
for User Services

ACKNOWLEDGMENTS

This documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Annette Ralston was the coordinator for this file. It was partially adapted from materials prepared by Linda Brudvig and Stephen Goldman of Decennial Planning Division, Henry Woltman of Statistical Methods Division, and William Peil of Population Division. Clerical support was provided by Mary Thomas.

data items

H16-2. ²⁶TENURE (2)

~~20~~
2

Universe: Occupied Housing Units

Owner Occupied:

Renter occupied:

Footnotes

- 1/ Value and price asked are tabulated differently for noncondominium (referred to as "specified") and condominium units.

The noncondominium value distribution is restricted to certain kinds of "owner-occupied" units; the noncondominium price asked distribution is restricted to certain kinds of "vacant-for-sale only" units. The noncondominium selected monthly owner costs distribution is restricted to certain kinds of "owner-occupied" units. The following are excluded from the tabulations on value, price asked, and selected monthly owner costs for noncondominium units:

- a. Units in a structure with two or more units
- b. Units on ~~30~~ or more ~~acres~~ *cuerdas*
- c. Units with a commercial establishment or medical office on the property
- d. Mobile home or trailer
- e. *Boats, Tents, Vans, etc.*

The condominium value distribution is tabulated for all "owner-occupied" condominium units; the condominium price asked distribution is tabulated for all "vacant-for-sale only" condominium units. Selected monthly owner costs are not accumulated for condominium units.

- 2/ This aggregate, along with relevant count, will permit the computation of a mean. For example, the aggregate value for specified owner-occupied noncondominium units will yield the mean value when divided by the count of specified owner-occupied noncondominium units, and the aggregate rooms for occupied and vacant year-round units divided by the count of occupied and vacant year-round units yields mean rooms. (See footnote 7 prior to computing mean value or price asked.)

- 3/ Lacking complete plumbing (facilities) for exclusive use includes: ~~Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities,~~ ^{one or} ~~more of the following:~~
- a. No piped water
 - b. Bathub or shower but used by another household
 - c. No bathub or shower
 - d. Flush toilet but used by another household
 - e. No flush toilet

- 4/ Fuels include "Utility gas" (see footnote 19), "Bottled, tank, or LP gas," "Electricity," "Fuel oil, kerosene, etc.," ~~Coal or coke,~~ "Wood," "Other fuel," and "No fuel used." Tabulations of "Other" include all categories not shown separately in the matrix.

- 5/ "Vehicles" includes automobiles, trucks and vans.
- 6/ Gross rent and contract rent are tabulated for all "renter-occupied" units except one-family homes on a property of ~~10~~ or more ~~acres~~^{acres}. Units tabulated in the "No Cash Rent" category also excluded one-family homes on ~~10~~ or more ~~acres~~^{acres}. A unit classified as "No Cash Rent" in contract rent will remain no cash rent in the gross rent distribution even if the unit's occupants pay for utilities themselves. Gross rent is the sum of contract rent and utility costs. Rent asked is tabulated for "vacant-for-rent" units except one-family homes on ~~10~~ or more ~~acres~~^{acres}.
- 7/ Multiply the aggregate value and price asked by \$250 to obtain the true value or price asked. The tabulation was scaled by a factor of 250 for tally purposes.
- 8/ "Utilities" include "Electricity," "Gas," "Water," and "Oil, ~~coal~~^{charcoal}, kerosene, wood, etc."
- 9/ The initial interval for distributions of household, family, or unrelated individual income include the following:
- units with appropriate net positive amounts (e.g., \$1 to ~~\$2,499~~^{\$499})
 - units with no income
 - units with positive and negative dollar amount netting to "0"
 - units with negative total income
- 10/ "Selected Monthly Owner Costs" is the sum of payments for real estate taxes, property insurance, utilities (see footnote 8), and regular mortgage payments.
- 11/ Includes households with zero or negative income and units tabulated in the "No cash rent" category when tabulating specified renter-occupied housing units.

12/ Aggregate income is tabulated in two words since it can exceed the capacity of a single 36 bit computer word. The first (most significant) word contains tabulated income increments in \$5000 amounts. The second (least significant) word contains tabulated income remainders (under \$5000) scaled to \$5 amounts. For example, a family income of \$27,500 is represented on the detail file in five's of dollars as \$5500 in one or more income categories for one or more persons. Such a householder with a weight of seven yields a product of \$38,500. This quantity is represented as 38 (38,500 divided by 1000) in the first (most significant) word and 500 in the second (least significant) word. When two or more cases are aggregated, each component word may be a positive or negative value. During summarization of the tallies, the first (most) and second (least significant) words are accumulated normally since each word is algebraically independent. To reconstitute the number as a single item, multiply the first (most significant) word by 1000, add the second (least significant) word, then multiply the combined quantity by five using double precision capability.

13/ The count of households in sample tabulations may differ from the number of occupied housing units. This is a result of the weighting process used to minimize differences between complete counts and sample estimates. An indication of the type of weight (population and housing) for each matrix is listed in footnote 16.

See footnote 26.
14/ ~~"Asian and Pacific Islander," in 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian and Pacific Islander group in the "Other" category.~~

See footnote 26.
15/ ~~For data tabulated on a 100-percent basis, includes all persons in the category "Other." For data tabulated from the sample, excludes those persons who have a write-in entry of an Asian and Pacific Islander group in the "Other" category.~~

16/ Each sample person and housing unit was assigned a weight as the result of a complex ratio estimation procedure. Sample housing units were assigned one weight each and sample persons were assigned two types of weights. The first weight for persons applies to sample data except Place of Work, Travel Time to Work, and Migration (i.e., Residence in 1975) tabulations; this weight was assigned to all sample persons. The second weight for persons, which applies to Place of Work, Travel Time to Work, and Migration data, was assigned to those sample persons who were included in the Place of Work and Migration coding operation. These weights vary from person to person and from housing unit to housing unit, but on the average they are approximately equal to the inverse of each records sample selection probability. The tabulations in this file are based on summing the weights of the appropriate persons or housing units relating to the tabulation. For specified aggregates, indicated below, the characteristic data are multiplied by the weight; for example, in aggregate income for persons the amount of income is multiplied by the weight. In medians, the weights are brought to bear indirectly through the distribution used to calculate the measure. For family and household tabulations (population type), only the weights of the householder are used. For subfamily tabulations, the weights used are those assigned to the subfamily reference person (i.e., the person who is the equivalent of a householder for the subfamily). The following is a listing of the weights used in producing each tabulation:

Person weights--tabulations 7-28, 9-16 through 9-25, and 10-15.

Housing weights--tabulations 1-1 through 1-9, 1-11, 1-13 through 1-28, 1-30, 1-32 through 1-41; 2-1 through 2-7, 2-9, 2-11, 2-13 through 2-19, 2-21 through 2-23; 3-1 through 3-3, 3-5, 3-6, 3-8 through 3-17, 3-19, 3-20, 3-22 through 3-31, 3-33, 3-34, 3-36 through 3-50; 4-1 through 4-3, 4-5, 4-6, 4-8 through 4-18, 4-20, 4-21, 4-23 through 4-33, 4-35, 4-36, 4-38 through 4-53; 5-1 through 5-7, 5-9, 5-11 through 5-16; 7-1 through 7-6, 7-8, 7-10 through 7-20, 7-22, 7-24 through 7-27, 7-29, 7-30; 8-1 through 8-8, 8-10, 8-11, 8-13 through 8-19, 8-22 through 8-26; 9-1 through 9-15; 10-1, 10-2, 10-4 through 10-6, 10-8 through 10-14; 11-1 through 11-9; 12-1 through 12-5, 12-7 through 12-13; and 13-1 through 13-12.

Unweighted count--tabulations 14-1, 14-2, and 15-1.

17/ A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "own child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

- 18/ Vacant seasonal/~~migratory~~ units are excluded from all matrices except as noted specifically in the documentation.
- 19/ "Utility gas" includes "Gas: From underground pipes serving the neighborhood."
- 20/ Poverty status is determined for families and unrelated individuals. The poverty status assigned to a family is also assigned to each family member. Unrelated individuals are each assigned poverty status according to their individual incomes. Occupied housing units are classified below the poverty level when the total 1979 income of the family or the nonfamily householder is below the appropriate poverty threshold. The income of persons living in a housing unit who are not related to the householder is not considered when determining the poverty status of an occupied housing unit. Tabulations of poverty status exclude inmates of institutions, persons in military group quarters and in college dormitories, and unrelated individuals under 15 years.
- 21/ *See footnote 26.* For ~~"Stories in Structure,"~~ an attic or ~~basement~~ is counted ~~as a story only~~ if it ~~has any finished rooms for living purposes.~~
- 22/ "Nonrelatives" include the questionnaire categories: "Roomer, boarder," ~~"Partner,~~ Roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.
- 23/ *See footnote 26.* In ~~this matrix,~~ persons are classified by the ~~race,~~ Spanish origin, ~~and ancestry~~ of the householder (or ~~subfamily reference person~~).

- 24/ Complete kitchen facilities are all of the following: A range or cooking stove for this household only, a sink with piped water for this household only, and a mechanical refrigerator for this household only.
- 25/ This matrix, while similar to the corresponding matrix on the summary tape files for the 50 States and the District of Columbia has been modified to reflect data gathering and/or presentation procedures unique to Puerto Rico.
- 26/ Some questions which were included on questionnaires used in the 50 States and the District of Columbia, such as race and Spanish origin, were not asked on the forms used in Puerto Rico. Matrices and footnotes referring to such items have been omitted or were not used in the Puerto Rico summary tape files. However, the Puerto Rico documentation maintains the same numbering scheme used for comparable summary tape files for the 50 States and the District of Columbia.
- 27/ This matrix does not appear on STF's for the 50 States and the District of Columbia.
