

1990 Census of Population and Housing Summary File 4 (Tape): Virgin Islands of the United States Technical Documentation

D1-D90-S400-14-TECHV

Note: This technical documentation was issued at same time as the corresponding data file and does not necessarily reflect changes to the data file that may have been made later. We offer it as a service to our customers who have purchased the file, but we do not in general offer technical support for past data files. Note that although the documentation may refer to data on tape, the U.S. Census Bureau no longer releases data on magnetic tape; customers purchasing files previously released on tape will receive the file in ASCII on CD-ROM. For information about this and other technical documentation, please contact the Customer Services Center at 301-763-INFO (4636).

Additionally, Census Bureau organization, telephone numbers, and staff cited in this technical documentation are not current. For updated information, see our Telephone Contacts site at <http://www.census.gov/contacts/www/contacts.html> or Staff Search at <http://www.census.gov/cgi-bin/main/email.cgi>.

CITATION

Census of Population and Housing, 1990: Summary Tape File 4 (Virgin Islands of the United States) [machine-readable data files] / prepared by the Bureau of the Census. —Washington: The Bureau [producer and distributor], 1993.

TYPE OF FILE

Summary statistics.

UNIVERSE DESCRIPTION

All persons and housing units in the U.S. Virgin Islands.

SUBJECT MATTER DESCRIPTION

Summary Tape File 4 (STF 4) for the Virgin Islands contains data derived from questions asked of the entire population and about every housing unit. Although data were collected on a 100-percent basis in the Virgin Islands, the content of this file is comparable to the Stateside version of STF 4 which is based on sample data. Below is a list of population and housing items included in this file for the Virgin Islands. Please see the List of Tables chapter for a complete listing.

Population items include:

Ability to speak English	Group quarters
Age	Hispanic origin
Ancestry	Household type and relationship
Class of worker	Industry
Citizenship	Language spoken at home
Earnings in 1989	Marital status
Educational attainment	Means of transportation to work
Family type and employment status	

Mobility	School enrollment and type of school
Occupation	Sex
Period of military service	Subfamily type
Place of birth	Travel time to work
Place of work	Urban, rural, and farm residence
Poverty status in 1989	Veteran status
Presence and age of children	Workers in family in 1989
Private vehicle occupancy	Year of entry
Race	
Residence in 1985	

Housing items include:

Age of householder	Race of householder
Bedrooms	Rooms
Cooking fuel	Selected monthly owner costs
Condominium status	Sewage disposal
Gross rent	Telephone availability
Hispanic origin of householder	Tenure
Housing units	Units in structure
Kitchen facilities	Vacancy status
Meals included in rent	Value of housing unit
Mortgage status	Vehicles available
Occupancy status	Water source
Plumbing facilities	Year householder moved into unit
Purchase of water from water vendor	Year structure built

Data are presented in A and B records. The A records have 122 population (PA) and 81 housing (HA) tables. The A records provide data for all persons for each summary level and geographic component level within a unit of geography.

The B records present more detailed data in 176 population (PB) and 87 housing (HB) tables. The B records are available for all persons and for specific race and Hispanic origin characteristics (note that the housing tables are based on the race and Hispanic origin of the householder) for each summary level and geographic component level within a unit of geography. Chart 1 in the How to Use This File chapter of this technical documentation gives a complete list of the race and Hispanic origin characteristics.

The Table (Matrix) Outlines chapter gives a complete description of all tables in the A and B records. Note that many of the tables contain data for selected aggregates and medians.

GEOGRAPHIC COVERAGE

STF 4 provides data for the Virgin Islands and its component areas, in a geographic hierarchy of Virgin Islands/island/census subdistrict/place/BNA, with summaries for split places and BNA's.

This abstract lists only the most frequently accessed geographic levels. The Summary Level Sequence Chart chapter outlines the hierarchical and inventory summaries in their entirety.

RELATED PRINTED REPORTS

Listed below are the 1990 census printed reports containing data from STF 3 and STF 4. These reports will be available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. An order form follows this abstract.

1990 CPH-3-55, *Population and Housing Characteristics for Census Tracts and Block Numbering Areas*. Data on most of the population and housing subjects included in the 1990 census are shown for the Virgin Islands, islands, places, and block numbering areas. This is a new report for the Virgin Islands. Scheduled for release in 1993.

1990 CPH-5-55, *Summary Social, Economic, and Housing Characteristics*. This report provides detailed population and housing data for the Virgin Islands, its islands, census subdistricts, and places. This a new report for the Virgin Islands. Scheduled for release in 1993.

1990 CP-2-55, *Social and Economic Characteristics*. This report provides detailed population data for the Virgin Islands, its islands, census subdistricts, places, and summary geographic areas. Scheduled for release in 1993.

1990 CH-2-55, *Detailed Housing Characteristics*. This report provides data for the Virgin Islands, its islands, census subdistricts, places, and summary geographic areas. Scheduled for release in 1993.

Special Supplementary Report, Detailed Population and Housing Characteristics. This report includes a series of cross-tabulations of detailed population and housing data. It is designed to meet the specific needs of the Virgin Islands. Scheduled for release in 1993.

RELATED REFERENCE MATERIALS

1990 CPH-I-6VI, *1990 Census of Population and Housing Tabulation and Publication Program for the Virgin Islands of the United States*. This booklet provides descriptions of the data products available

from the 1990 census for the Virgin Islands. Available without charge from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. Telephone: 301-763-4100. FAX: 301-763-4794.

Census '90 Basics. This booklet provides a general overview of the census activity and detailed information on census content, geographic areas, and products. Available without charge from Customer Services (see above).

Census ABC's—Applications in Business and Community. This booklet highlights key information about the 1990 census and illustrates a variety of ways the data can be used. Available without charge from Customer Services (see above).

1990 CPH-R-1A, *1990 Census of Population and Housing Guide, Part A*. Text. This provides detailed information about all aspects of the census. Available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. GPO S/N 003-024-08574-7. Price: \$11.

1990 CPH-R-1B, *1990 Census of Population and Housing Guide, Part B*. Glossary. This is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. GPO S/N 003-024-08679-4. Price: \$5.50. Part C, Index, provides an index of Summary Tape Files 1-4 and will be available later.

TECHNICAL DESCRIPTION

The A records for STF 4 Virgin Islands have 39,765 characters divided into 5 segments of 7,953 characters each. The B records for STF 4 have 63,624 characters divided into 8 segments of 7,953 characters each. The first 300 characters of each segment contain geographic information.

FILE AVAILABILITY

The STF 4 Virgin Islands files are available by individual race or Hispanic origin characteristic from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. (See above for phone and FAX information.) A machine-readable data dictionary is included on the tape without charge. Options include 6250 or 1600 bpi, ASCII or EBCDIC, labeled or unlabeled. The files also are available on tape cartridge (IBM 3480 compatible) for the same price. When ordering, please use the order form at the end of this chapter.

PART B, GLOSSARY 1990 Census of Population and Housing Guide

electronic media. (The geographic, population, and housing definitions are drawn from appendixes to 1990 census reports and technical documentation.)

Part B, Glossary (1990 CPH-R-1B) is the second part of the 3-part *1990 Census of Population and Housing Guide*. It defines terms used in the census.

- **Geographic** definitions cover specific characteristics of an entity, such as type of geographic code and how boundaries are determined.
- **Population and housing** definitions identify the related item numbers on the 1990 census questionnaire (included as an appendix), define the concepts involved, and note the items comparability to previous censuses.
- **Technical** terms associated with the collection, processing, and tabulation of 1990 census data also are included, along with terms used in working with data files on

Previously Published—Part A, TEXT

If you are using 1990 census results, you will find the *Guide, Part A, Text* an indispensable reference. It offers the information you need on such subjects as:

- Data products
- Geographic terms and products
- Where to find assistance
- Population and housing concepts
- Census procedures

Still to come is an index to the 1990 census Summary Tape Files, which will be Part C.

HOW TO USE THIS FILE

CONTENTS

Introduction	2-1
Using the File	2-2

INTRODUCTION

This chapter serves as a guide for data users to both the tape and the technical documentation. Novice users trying to understand how to use the documentation and the file should read this chapter first.

The STF 4 file for Virgin Islands has A and B records. The A record presents data for all persons in 122 population (PA) and 81 housing (HA) tables. The B records present more detail in 176 population (PB) and 87 housing (HB) tables. The B records are available for all persons and for 30 separate race and Hispanic origin characteristics. The Table (Matrix) Outlines chapter gives a complete description of all tables in the A and B records.

Documentation Chapters

The Abstract chapter in this documentation provides a quick overview of the file, including the formal title, geographic coverage, subject coverage, and file availability. Also shown are citations for related reference materials and printed reports. Their titles and geography are included in this section, along with purchasing information.

The Subject Locator is an aid to finding which tables provide the information needed. The List of Tables (Matrices) and the Table (Matrix) Outlines provide two types of presentations for the tables available in the file. The List of Tables (Matrices) has the table titles and universes. The Table (Matrix) Outlines offer a detailed presentation of the tables. When reviewing the tables, remember that a colon (:) following an entry indicates the entry is a heading, not a data cell.

User and Technical Notes

Information about file or documentation changes sometimes becomes available after the documentation has been printed. User notes inform the user community about these changes. These are issued in a numbered series. If there are technical documentation changes, revised pages usually accompany them. The revised pages should be inserted in their proper location, but the user note cover sheet should be filed in the User Notes chapter. Technical notes, which contain

file errata, are also issued by the Census Bureau. We suggest filing these following appendix I.

Data Dictionary

The data dictionary describes the file and provides character locations for each variable and each table. It has two elements, the identification section and the table (matrix) section.

In the identification section, the components include the field name; the data dictionary reference name, a short mnemonic for use with software packages; field size; starting position; and data type (alphabetic, numeric, or alphanumeric). Some of the field and reference names in the identification section are not applicable to the Virgin Islands data and usually are filled with 9's or 0's as appropriate.

The identification section of the data dictionary is identical for all summary tape files. It provides a list of the geographic codes or refers the user to the appropriate source. Review the footnotes carefully; they provide explanations for various terms. These footnotes are listed at the end of the identification section of the data dictionary.

The table (matrix) section provides information on the table (matrix) number; table (matrix) description; number of implied decimals in each cell (if not 0); starting position within the record, within the segment, and for all cells within the first-level variable; and cell coordinates.

There also is a machine-readable data dictionary file on the data tape. This dictionary is designed to be converted for use with various software packages.

Appendixes

Detailed information on geographic areas is in appendix A followed by subject-matter definitions in appendix B. Appendix C provides detailed statistical information about the data while appendix D outlines the data collection and processing procedures. A facsimile of the 1990 census questionnaire for the Virgin Islands is in appendix E.

Appendix F furnishes detailed information on all the data products for the Virgin Islands, as well as suggested sources of information and assistance. Map information is included in appendix G. The record layout for the machine-readable data dictionary file that accompanies each tape order is in appendix H.

Appendix I contains the code lists used in processing the data. These are especially helpful in determining the components included in categories such as race or

group quarters. These codes are used in conjunction with the table (matrix) outlines and data dictionary chapters. In the file presentation included in those chapters, some cell entries are followed by numeric codes in parentheses. These are the codes included in that cell. For example, in a table including race, the entry for Asian or Pacific Islander is followed by (600-699, 976-985). The code list for race in appendix I identifies all the race codes included in the Asian or Pacific Islander category.

Count Corrections

The Census Bureau issues population count corrections on an occasional basis. Count corrections for geography at the place level and above are available from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. Count corrections for geography at the census tract/BNA level or below are available from Population Division, Bureau of the Census, Washington, DC 20233. When requesting these corrections, please include the desired census tract/BNA, block group, or block numbers.

USING THE FILE

Internal File Labels

System Labels—Tape orders which specify labeled tapes will have a standard American National Standards Institute (ANSI) label. The system label consists of 17 characters. In both the A record and the B records, 15 characters are used and the last 2 are "x" filled. The 1990 STF 4 files for the Virgin Islands have Data Set Names (DSN's) of STF4AXVI.FnnAAAx (for the A record) and STF4AXVI.Fnncccxx (for the B records). The nn is a two-digit number with leading zeroes identifying the tape volume sequence. The "ccc" is the three-character iteration code for the B records. The "X", "F", and the last two "x's" in the DSN remain constant. See Chart 1 for examples of specific data set names.

User Labels—Each user tape will have six user header labels and six user trailer labels. These labels combine information from the system label and the identification portion of the first and last record. These labels enable the user to quickly identify the beginning and ending records on each tape.

User Header Labels—The user header labels are designated UHL1 through UHL6. UHL1 and UHL2 repeat information from the system label in HDR1 and HDR2. UHL3 and UHL4 contain information from the identification portion of the first record on the tape. UHL5 through UHL6 contain a statement regarding the data.

User Trailer Labels—The user trailer labels are designated UTL1 through UTL6. UTL1 and UTL2 contain in-

formation from the system trailer label. UTL3 and subsequent user trailer labels contain identification information from the last record on the tape. The unused portion of UTL6 is blank filled.

Specific File Information

Specific file information, such as record counts, is not provided in the technical documentation. However, each tape order is accompanied by a tape creation sheet. This sheet provides the file name, file label (HDR1), the third user header label (UHL3), record size, block size, and record count. The third user header label for each reel identifies the geography for the first record on the reel. For example, the UHL3 at the beginning of each reel of a three-reel file for a State provides the geography for the first record. If the geography needed is on reel three, only reel three needs to be processed.

The tape creation sheet received with the tape should be filed in the technical documentation notebook or with other tape information maintained by the user.

Summary Level Sequence Chart And Geographic Area Component Codes

The Summary Level Sequence Chart chapter and the geographic area component codes provide important information for using the 1990 census summary tape files.

The Summary Level Sequence Chart chapter for STF 4 Virgin Islands identifies the geographic levels for which data are provided. It is easy to determine this if you remember that the last geographic area type listed in the sequence identifies the geography of the summary level; the prior codes simply define the hierarchy. For example, in summary level 140, the hierarchy listed is State—county—census tract/block numbering area (BNA). The record actually contains data for a census tract/BNA within a given island in the Virgin Islands.

When reading the Summary Level Sequence Chart chapter, it is important to recognize that dashes (—) separate the individual hierarchies while slashes (/) separate different types of geography within the same hierarchy.

After identifying the summary level code, turn to chart 3 at the end of this chapter to determine the geographic area codes and area characteristics provided on the tape for this summary level. Remember that an asterisk (*) indicates a code in that field. The code may be one of the standard codes described below.

The Summary Level Sequence Chart chapter also provides geographic component code information. This code identifies the various geographic components for which the record is repeated within the summary level. These component codes are provided in the data dictionary beginning in position 14. For example, the Summary Level Sequence Chart for STF 4 indicates that

the summary level for State records (040) has geographic component codes 00, 01, and 05-11. Always check the geographic codes, the summary level (beginning in position 11 of the data dictionary), and the geographic component code (beginning in position 14 of the data dictionary) for complete identification of an STF 4 Virgin Islands record.

A and B Records

STF 4 for the Virgin Islands has data represented in A and B records. The A and B records can be identified by the characteristic iteration field (CHARITER, position 16 in the data dictionary).

Each record type presents a different set of tables. The Table (Matrix) Outlines chapter gives a complete description of all tables in the A and B records.

The A record has 122 population (PA) and 81 housing (HA) tables. These include 5 population tables and 1 housing table with 37 categories of race and 5 population tables and 1 housing table with 26 categories of Hispanic origin. The A record provides data for all persons for each summary level and geographic component level within a unit of geography. Since the characteristic iteration in the A record is always all persons, the A record can be identified by blanks in the characteristic iteration field.

The B records present more detail in 176 population (PB) and 87 housing (HB) tables. The B records are available in separate files for all persons and for specific race and Hispanic origin characteristics (note that the housing tables are based on the race and Hispanic origin of the householder) for each summary level and geographic component level within a unit of geography. The B records are identified by numbers in the characteristic iteration field. Chart 1 gives the data set names and examples of characteristic iterations for the A and B records. Chart 2 lists the characteristic iteration codes for the A and B records.

Chart 1. Data Set Names for A and B Records of STF 4 (Virgin Islands)

A Record	
All persons	STF4AXVI.F01AAxx
B Record	
All persons	STF4AXVI.F01000xx
Black	STF4AXVI.F01031xx
White	STF4AXVI.F01032xx
	STF4AXVI.F01nthxx
	STF4AXVI.F01nthxx
	STF4AXVI.F01nthxx

Comparing Characteristics—In the B records, each characteristic iteration with all of its tables, is available in a separate file. Therefore, to compare data for two or more characteristic iterations (for race or Hispanic origin), you must extract the desired data from separate files and create a file containing data for characteristics you wish to compare.

Chart 2. Characteristic Iterations

Summary Tape File 4 (Virgin Islands)	
A Record	
Blanks All persons	
B Record	
000	All persons
031	Black
032	White
051	Asian or Pacific Islander
052	American Indian, Eskimo, or Aleut
053	Other race
100	Hispanic origin (of any race)
101	Mexican
102	Puerto Rican
103	Cuban
104	Other Hispanic
135	Dominican (Dominican Republic)
136	Central American
137	Costa Rican
138	Guatemalan
139	Honduran
140	Nicaraguan
141	Panamanian
142	Salvadoran
143	South American
144	Argentinian
145	Chilean
146	Colombian
147	Ecuadorian
148	Peruvian
149	Venezuelan
120	White, not of Hispanic origin
121	Black, not of Hispanic origin
122	American Indian, Eskimo, or Aleut, not of Hispanic origin
123	Asian or Pacific Islander, not of Hispanic origin
124	Other race, not of Hispanic origin

Record Identification

Each record on a summary tape file is uniquely identified by a combination of specific geographic codes (for example, State, county, and county subdivision); summary level; geographic component codes; and characteristic iteration codes. Chart 2 indicates that for the A record, data are presented for all persons in STF 4

(Virgin Islands). The B records are available for all persons or an individual race or Hispanic origin characteristic as shown in the same chart.

For example, if you have a Virgin Islands STF 4 file and want to know the total population for St. John Island, table PA1 in the A record provides data for all persons. The record providing these data is retrieved by specifying the summary level code for county records (050), the total record for geographic component (00), the characteristic iteration for the A record (blanks) and the county code for St. John Island (020).

For another example, if you want to know more detailed information about the Mexican population, the B records provide tables for a specific race or Hispanic population. The record is retrieved by specifying the summary level code for county records (050), the total record for geographic component (00), the characteristic iteration for the B record (101 for Mexican), and the county code for St. John Island (020).

Remember, you must check all four fields—the summary level code, the geographic component code, the characteristic iteration, and the county code—or you will find multiple records.

Record Segmentation

Logical records are divided into segments, each containing identification information and specific tables. The logical record has a record sequence number which is repeated in each segment. This is the logical record number which appears in position 19 of each segment. Following this, beginning in positions 25 and 29, are the logical record part number and the total number of parts in the record. By viewing these two fields together, the sequence of the segment and the total number of segments can be quickly determined. For example, 1 in the logical record part number field and 5 in the total number of parts in record field indicates that this is segment 1 of the 5 segments which comprise the logical record.

The A record file of STF 4 Virgin Islands has 39,765 characters divided into 5 segments. The B records files have 63,624 characters divided into 8 segments. Each segment of the A record file and the B records files has 7,953 characters including 300 characters of geographic identification information followed by tables (matrices). Tables split across segments are indicated in Chart 3. The geographic identification information layout for each segment is identical to the identification section described in positions 1-300 of the data dictionary. Filler characters appear in the record to complete a record segment and also appear in place of some tables that are not used. The tables containing filler are PA2, PA3, PA3A, HA2, HA3, and HA3A. The A record and each B record are sold as a separate file.

The machine-readable data dictionary, which accompanies STF 4 files, provides information on these table (matrix) splits across segments.

Chart 3. Segmentation of STF 4 (Virgin Islands) Records

A Record

Segment 1	
Geographic Identification Information	PA1 through PA63—4 data cells 7,953 characters including 3 characters filler
Segment 2	
Geographic Identification Information	PA63—12 data cells through HA31—75 data cells 7,953 characters including 6 characters filler
Segment 3	
Geographic Identification Information	HA31—85 data cells through HA39—73 data cells 7,953 characters including 3 characters filler
Segment 4	
Geographic Identification Information	HA39—29 data cells through HA53—2 data cells 7,953 characters including 3 characters filler
Segment 5	
Geographic Identification Information	HA53—17 data cells through HA75 7,953 characters including 5,727 characters filler

B Record

Segment 1	
Geographic Identification Information	PB1 through PB44—65 data cells 7,953 characters including 3 characters filler
Segment 2	
Geographic Identification Information	PB44—63 data cells through PB61—151 data cells 7,953 characters including 3 characters filler
Segment 3	
Geographic Identification Information	PB61—37 data cells through PB89—141 data cells 7,953 characters
Segment 4	
Geographic Identification Information	PB89—19 data cells through PB113—44 data cells 7,953 characters
Segment 5	
Geographic Identification Information	PB113—56 data cells through HB19—8 data cells 7,953 characters including 3 characters filler

Geographic Identification Information	HB19—23 data cells through HB54—169 data cells 7,953 characters including 3 characters filler
Segment 7	
Geographic Identification Information	HB54—13 data cells through HB59—68 data cells 7,953 characters including 3 characters filler
Segment 8	
Geographic Identification Information	HB59—28 data cells through HB76 7,953 characters including 93 characters filler

Special Area Codes

Special area codes appear in the geographic area codes portion of the data dictionary (positions 142-171) on all STF's. The codes represented may vary across STF's. Special area code (9) is used in all summary levels.

Special area code (9)—Land/water area	
1	Significant land, significant (0.0005 or more square kilometers) water
2	Significant land, minimal (less than 0.0005 square kilometer) water
3	Significant land, zero (0) water
4	Minimal land, significant water
5	Minimal land, minimal water
6	Minimal land, zero water
7	Zero land, significant water
8	Zero land, minimal water
9	Zero land, zero water

Standard Codes

In the identification section of all STF's, there are standard codes, undefined in the data dictionary, that have identical meaning regardless of the field. The codes are the same size as the field; that is, a three-character field will have three symbols. These standard codes are listed below.

- ! Not available—The code would be shown except it had not been determined when the files were prepared (for example, metropolitan area code on a county summary level (050) on STF 1A).
- 9 Not in—This indicates a "remainder of" an area, such as a place code in the portion of a county subdivision not in a place, or the summary level is not part of any area to which the code field applies, such as a summary level which is not in an Alaska Native Regional Corporation.

Blank Not applicable—This indicates that the code is not applicable to the summary level.

Where these codes are specifically defined in the data dictionary, the defined code should be used. For example, in the division code description on the data dictionary (position 89), the code for the Pacific Division is indicated as "9." This "9" should be interpreted as the division code, not as "not in," the standard code for "9."

SUBJECT LOCATOR

CONTENTS

Index 3-1

This index is designed to quickly identify the STF 4 tables needed for the Virgin Islands. Each table variable is listed alphabetically. Both the type of entry being tabulated (universe), which is shown in italics, and the relevant table numbers appear under the variable heading. If the entry variable is cross tabulated by another variable, the variable of cross tabulation is indicated beneath the universe and is preceded by the word "by." The index entries for each variable are arranged alphabetically by universe, then by variable of cross tabulation, if any. For example, if you are looking for a table tabulating age by sex for all persons, check the index under either of the variables. Checking under age, you find an entry for one table with a universe of persons. Checking the entry, you can see that age is cross tabulated by sex in table PB5.
