1The Census Publications Catalog and Subject Guide includes regular monthly and quarterly reports.
**Guides to Census Publications**

The Bureau of the Census prepares two publications designed to help librarians, businessmen, research workers, and others find needed information in the large number of reports issued by the Bureau of the Census.

The **Catalog and Subject Guide** is a quarterly publication which is cumulated to an annual issue. It includes a complete listing of all reports issued during the period covered, a subject guide to the contents of these reports, and, from time to time, a special appendix designed to aid users of Census publications. In the 1947 issue, the appendix provided a detailed index to the principal publications for the 1945 Census of Agriculture. The January-September 1948 and the 1948 annual issues have, as an appendix, a complete listing of war-time and current Facts for Industry series.

The Catalog and Subject Guide is available on a subscription basis from the Superintendent of Documents, Washington 25, D. C. The price is $2.50 for four consecutive issues. Each issue is also individually priced.

The **List of Publications Issued** supplements the Catalog by providing monthly a list of all reports except those issued regularly on a monthly or quarterly basis. This list is available upon request from the Bureau of the Census.

1947 CENSUS OF MANUFACTURES

The statistics of the 1947 Census of Manufactures will be published in four convenient reference volumes within the next few months. The first volume to be issued will be Volume II - 'Statistics by Industry.' This will be followed shortly by Volume III 'Statistics by States,' Volume I, 'General Summary,' and published last will be the 'Product Supplement.'

In addition to collecting the statistics of the individually published series, 'Industry Pamphlets' and 'State Pamphlets,' which have already been published, the volumes will incorporate some revisions which were found necessary after publication of the pamphlets.

Advance orders for these publications are now being accepted by the Superintendent of Documents, Washington 25, D. C. They will also be available from the Department of Commerce Field Service Offices located in various cities. The four volumes to be published, their prices, and probable dates of publication are listed below:

**Volume I - GENERAL SUMMARY**

This volume contains a United States summary and nine chapters showing statistics for industries and for geographic areas on the following subjects: Employment and pay rolls, size distributions of establishments, type of organization, inventories, capital expenditures, fuel consumption, highway motor vehicles, consumption of important materials, and metalworking operations.

Price (bound in buckram)........ $2.75  
Probable issue date........ May-June 1950

**Volume II - STATISTICS BY INDUSTRY**

This volume contains a United States summary and 82 chapters for groups of related industries, showing for each industry statistics on employment, pay rolls, cost of materials, value added by manufacture, inventories, capital expenditures, and the quantity and value of products shipped and important materials consumed.

Price (bound in buckram)........ $4.50  
Probable issue date........ March-April 1950

**Volume III - STATISTICS BY STATES**

This volume contains a United States summary and 49 chapters, showing for each State, its important metropolitan areas and industrial counties, summary general statistics (number of establishments, employment, pay rolls, value added by manufacture, and capital expenditures) for each industry of consequence in that State or its subdivision. Total for all industries are shown for all counties and for urban places of more than 10,000 population.

Price (bound in buckram)........ $4.50  
Probable issue date........ April-May 1950

**PRODUCT SUPPLEMENT**

This volume assembles all the product statistics published in the more than 100 product tables of 'Volume II - Statistics by Industry.' It presents in convenient reference form the 1947 and comparative 1939 statistics for approximately 6,500 products manufactured by United States industry.

Price (bound in buckram).... Not available  
Probable issue date........ June-July 1950

A list of Industry and State pamphlets, with prices for each, can be obtained from the Bureau of the Census upon request.

HOW TO USE THIS PUBLICATION

This issue of the CENSUS PUBLICATIONS CATALOG AND SUBJECT GUIDE has been revised to give users of published Census statistics an easier, faster, and more direct method of locating the desired information. The descriptive information relating to published reports, which was previously included in the SUBJECT GUIDE of this volume, has been transferred to the CATALOG section.

The subject entries in the SUBJECT GUIDE are now directly keyed to the reports listed in the CATALOG by the use of a reference numbering system. All publications are arranged in the CATALOG under the following subject headings: Agriculture (1), Business (2), Foreign Trade (3), Governments (4), Industry (5), Population (6), and Miscellaneous (7). The first digit of the reference number designates the major subject within which the report is listed. Thus, all reports relating to agriculture have reference numbers beginning with 1. Reference numbers for all Business reports have 2 in the first digit, etc. The second digit of the reference number further classifies the reports by broad categories of reports. For example, Business Division reports on Retail Trade are classified under 2-1, Trade Studies, 2-2, Wholesale Trade, 2-3, etc. Reports carrying a series number are further identified by the Series Number shown in parentheses following the 2-digit reference number.

The user of the CATALOG AND SUBJECT GUIDE may first consult the SUBJECT GUIDE and secure the reference number or numbers shown for the subject on which he is looking for information. The references number is then used as a key in locating the desired reports in the CATALOG section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page.

These revisions in the CATALOG AND SUBJECT GUIDE are expected to facilitate its use as a more rapid finding medium for Census publications. However, the changes in this issue are exploratory and it is expected that further improvements will be made in future issues. Comments on the effectiveness of these changes will be appreciated.

Catalog of Publications Issued During January–March 1949

The following list of Census publications includes those issued during the January–March 1949 period. The publications are listed alphabetically by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population, and Miscellaneous. Changes in series from those shown in the similar list for 1948 are indicated.

Publications for which a price is given are for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Other publications are free upon request from the Bureau of the Census. In requesting copies, please refer to the series number or title and state the period for which information is wanted.

1. AGRICULTURE DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the census of population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925. Thus, since 1920, there has been a Federal Census of Agriculture every fifth year. The next Census of Agriculture will be taken as part of the Decennial Census of Agriculture in 1950.

Each year the Agriculture Division collects statistics and issues its periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on the dates prescribed by Congress.

1-1. Cotton Ginning Reports

Series A/C & O–1 CG

Report on Cotton Ginning. Preliminary. Quantity (running bales). Reports are issued for cotton ginned prior to specified dates during the ginning season.

Reports issued during the period covered by this catalog were for the periods prior to January 16, 1949 (crop of 1948), with comparative figures for preceding two years, and for the crops of 1948, 1947, and 1946. 1 page and 1 table, each report.

Number of bales ginned from growth of current season prior to specified date, and comparative statistics to the corresponding date for the preceding two seasons, by the named cotton-growing States. (Table.) Consumption, stocks, imports, and exports are also shown in the report.

Note.—A free post card duplicate of this report is available about a week later than the mimeographed release upon application to the Bureau of the Census.

Reports issued during the period covered by this catalog were for the periods prior to January 16, 1949 (crop of 1948), with comparative figures for the 1947 crop, and for the crops of 1948 and 1947. 1 to 2 pages. 1 table each report.

The following ten States are covered by separate reports, with an additional report for all other cotton-growing States:

Alabama North Carolina
Arkansas Oklahoma
Georgia South Carolina
Louisiana Tennessee
Mississippi Texas

This bulletin summarizes the available cotton statistics which are published monthly in several series of releases (including those listed in the Industry Division section of this catalog, Facts for Industry, Series M15–1, 2 and 3, and Series M17–1, 3, and 4, the last three of which were replaced by Series M17–1 revised) and M17–1A, covering data for January 1949. These reports cover data on cotton production, consumption, stocks, cotton seed, seed cotton, cottonseed oil, and cottonseed products. (Tables.)

Text gives source of statistics, definitions of cotton year, and description of cotton reports issued periodically.

1 For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent direct to that office with order.
2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1920, 1933, 1935, and 1939. The first and the last of these were taken as part of the Decennial Census, 1930 and 1940. The other two were special projects. The next Census of Business is being taken in 1949, covering 1948, and will be taken every fifth year thereafter under new legislation.

Current reports on business are outlined below.

2–1. Retail Trade Reports

The basic statistics from the Retail Trade Reports consist of a series of monthly figures on the trends in total receipts of sales. These figures are arranged to compare the current month's trade volume with that for the previous month and for the current month a year ago.

MONTHLY RETAIL TRADE REPORT. United States Summary (Kinds of Business and Large Cities). By nine broad geographic areas (Cities and Areas).

5. INDUSTRY DIVISION

A Census of Manufactures was taken in 1948, covering 1947. Preliminary releases of data obtained in this Census are listed below. New legislation provides that the next Census of Manufactures be taken in 1954, covering 1953, and every five years thereafter.

Current statistics on industry are issued in the Facts for Industry series. The purpose of this series of releases is to make available to manufacturers, trade groups, and other users of industrial data, current figures that are useful to them in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

5-1. Census of Manufactures: 1947

Preliminary Reports

The series numbers of the Census of Manufactures, 1947, preliminary releases listed below follow the pattern of the Facts for Industry series, with the prefix MC instead of M to identify them as Census of Manufactures, 1947, releases. The additional number following the dash iden-
...tifies a particular report on a specified subject. Each of the releases presents general statistics for the industry for 1947, with comparative data for 1939. In addition, many of the reports show general statistics for selected States, 1947, and give preliminary data on production and shipments for 1947.

These preliminary reports are available without charge, but bulletins presenting final and more detailed data will be for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Bulletin numbers and prices of the report which will contain the final data for products included in each individual preliminary report are shown in parentheses below, following the series number of the preliminary report. A list of the individual preliminary releases in this series issued during the period covered by this catalog follows:

Red cedar shingles. Production, shipments, and mill operations. Quantity (squares). Reports were issued during the period covered by this catalog for the year 1948 (3 pages, 2 tables) and for each month November 1948-January 1949. Each monthly report 1 page and 2 tables.

Red cedar shingles and shakes: Production, shipments, and mill operations, in the United States. Production and shipments of red cedar shingles, by grade and length; and total production and shipments of shakes. Data are for the preceding month, current month, and corresponding month of the preceding year, and cover all known producers of red cedar shingles in the United States. They are for use in connection with the Reciprocal Trade Agreement entered into with the Dominion of Canada. (Tables.) Published since January 1936.

Summary for 1948 shows the same data, by months, for the year.

Series M14A (Monthly)

Pulp and paper manufacture in the United States. Production, consumption, and inventories. Quantity (cords; tons).

Reports were issued during the period covered by this catalog for the year 1948 and for each month November 1948-January 1949. Each report 6 pages, 11 tables. Monthly reports, 3 charts; 1948 summary, 1 chart.

Receipts, consumption, and inventories of fibrous materials in pulp and paper manufacture, by kind of materials, and of pulpwod, by geographic regions and by kinds, current month and preceding month. Wood pulp, paper, and board: Base and actual production, by major grades, and production, by mill classes, current month. Production, consumption, and inventories of wood pulp, by grades, current month and preceding month. Wood pulp: Supply—production, transfers, shipments, and producers' inventories; receipts, consumption, and consumers' inventories in paper and board manufacture; receipts at paper and board mills; each by grades; and consumption and inventories of wood pulp at integrated, partially integrated, and nonintegrated paper and board mills; current month. Consumption of pulpwod, wood pulp, and other fibrous materials, by mill classes, current month. Production of paper and board, by type, preceding month, current month, and corresponding month preceding year. (Tables.) Analysis precedes tables. Comparable monthly data on the production of paper and paperboard since January 1943.

Report for 1948 summarizes the data for the year and gives comparative figures for 1947 for the major items. The production of paper and board, by type, is shown for each year, 1946-1948.

RAYON BROAD WOVEN GOODS. Production (linear yards); yarn consumed (pounds); machinery in place and active (number).

Report issued during the period covered by this catalog was for the 4th quarter 1948. 10 pages, 5 tables, 1 unnumbered summary table, and 6 charts.

Summary of production, by class of fabric. Production of total cotton woven goods over 12 inches in width (except tire fabrics and laundry nettings) and by nine types, by kind of goods. Production of tire cord and fabric, total, and by type of fabric. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarn consumed in the production of the fabrics reported, by type. Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). (Tables.) Analysis precedes tables. Published since January 1943. All known manufacturers in the industry were canvassed.

RAYON BROAD WOVEN GOODS. Production (linear yards); yarn consumed and stocks of rayon yarn (pounds). Machinery in place and active (number).

Report issued during the period covered by this catalog was for the 4th quarter 1948. 4 pages, 6 tables, and 1 unnumbered summary table.

Summary of production, by class of fabric. Production of total rayon broad woven fabrics and by four types and all other rayon mixtures, by type of fabric. Production of silk, nylon, glass, and other fabrics, total, and by kind. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarn consumed in the production of fabrics reported by type. Stocks of filament rayon yarn on hand owned by reporting plants. Consumption and stocks of synthetic staple fibers, current and preceding quarters. Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter

COTTON AND LINERS. Consumption, stocks, imports and exports, and active cotton spindles. Quantity (running bales, counting round as half bales, except foreign cotton, which is in equivalent 500-lb. gross bales; bale weights used in conversion: Egyptian, 725; Peruvian, 587; Indian, 400). Active cotton spindles (number). Preliminary.

Reports were issued during the period covered by this catalog for each month December 1948 and 1947—February 1949 and 1948. Each report 1 page and 2 tables.

Cotton: Total consumption during current month, corresponding month preceding year, and cumulative season totals current year and preceding year, for the United States and for three geographic areas (cotton growing States, New England States, all other States); on hand end of current month and corresponding month preceding year (1) in consuming establishments and (2) in public storage and at compresses, by same State groups. Included in these totals and also shown separately are figures on Egyptian cotton, Peruvian cotton, Indian cotton, other foreign cotton, and American-Egyptian cotton. Total number of spindles active last working day of current month and corresponding month preceding year, for the United States and for the geographic areas.

Linters: Total consumed; and on hand (1) in consuming establishments and (2) in storage and at compresses, same periods as for cotton. Figures for flinters are not included in cotton totals.

Exports of foreign cotton and linters, by country of production, and exports of domestic cotton and linters, by country to which exported: Preceding month, corresponding month preceding year, and cumulative season totals ending preceding month and corresponding month preceding year. (Tables.)

CONFECTIONERY AND COMPETITIVE CHOCOLATE PRODUCTS. Manufacturers' sales. Value. Quantity (pounds).

Reports were issued during the period covered by this catalog for each month November 1948-January 1949. Each report 2 pages, 2 tables, and 2 charts.

Sales by kind of business for specified States and for geographic division totals (Middle Atlantic and South Atlantic combined): Number of firms reporting: percent change in sales, current month from preceding month, and from corresponding month preceding year, and dollar volume of sales, current month; and sales of firms reporting year-to-date (dollar volume and percent change). Manufacturers' sales (poundage, value, and average value), by type of house (package, bar, bulk goods, general line, and unclassified), current month and corresponding month preceding year; and year-to-date figures (pounds and value), current year and preceding year, with percent change. (Tables.)

Series M17–1 (Monthly)

Reports were issued during the period covered by this catalog for December 1948 and January 1949. Each report 2 pages. December report, 2 tables; January report, 3 tables.

Report covering data for December 1948 shows factory production and consumption, and factory and warehouse stocks, in the United States, of the following products, by type: Vegetable oils; animal fats; fish and marine mammal oils; greases; secondary products; and other products. Factory consumption and factory stocks of raw materials used to produce vegetable oils. Data are for current month and preceding month.

Report covering data for January 1949 shows the following preliminary data: Receipts, crushings, and stocks of raw materials at oil mills; production, shipments and transfers, and stocks, of primary products except crude oil, at crude oil mill locations; factory production and consumption, and factory and warehouse stocks of primary materials (vegetable oils, animal fats, fish and marine mammal oil, and for fats, raw and acidulated soap stock), in the United States, each by type. Data are for current month and preceding month.

Note.—The report issued in March 1949, covering data for January 1949, was divided into two sections, listed as Series M17–1–19 (preliminary) and Series M17–1–19 (preliminary). These reports replace the monthly releases previously published as Series M17–1, M17–3, and M17–4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. Data appearing in these releases are also summarized in report entitled "Cotton Production and Distribution," (Bulletin 185), Season of 1947–48, listed in this catalog under Agriculture Division, Cotton Ginning Reports. See also Series M17–1, below.

Series M17–1A

One release, issued in March 1949, covering data
for January 1949, was issued during the period covered by this catalog. 2 pages and 3 tables.

Factory production and consumption, and factory and warehouse stocks of secondary products, in the United States; cottonseed—Receipts, crushings, and stocks at oil mills, by States; and cottonseed products—Production and stocks at oil mill locations, by States. Data are for current month and preceding month. (Tables.)

NOTE.—See note regarding revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils on Series M17-1, above.

Series M17-2 (Quarterly)

FATS AND OILS. Factory consumption of primary and secondary animal and vegetable fats and oils, by uses. Quantity (pounds).

Report issued during the period covered by this catalog was for the 4th quarter 1948. 2 pages and 2 tables.

Consumption of primary and of secondary animal and vegetable fats and oils, by kinds; total used in refining; total consumption other than in refining: (1) processed in fat splitting (hydrolysis), winterizing and pressing except for salad oil manufacture, sulphonation, and winterizing for salad oil; and (2) used in production of edible products (shortening, oleomargarine, other) and inedible products (soap, paint and varnish, linoleum and oleo-cholesterol, printing inks, lubricants and greases, and other). (Tables.)

Series M17-3 (Monthly)

COTTONSEED PRODUCTS. Production and Stocks at Oil Mills. Quantity (units vary). Preliminary report.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 2 pages and 2 tables.

Crude oil (pounds), cake and meal (tons), hulls (tons), and linters (running bales): Produced August 1 through current month for seasons named, by certain specified States and all other States combined; and stocks at oil mills, end of current month, same season and same States.

Cotton linters: Production (running bales) and average gross bale weights (pounds) by type of cut (first cut, second cut, and mill run), through current month, same season and same States. United States totals. (Tables.)

NOTE.—This is the final release in this series. Data for January 1949 are included in the revised Series M17-1 and M17-1A which replace the old Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17-1 and M17-1A, above.

Series M17-4 (Monthly)

COTTONSEED AND COTTONSEED PRODUCTS. Quantity (units vary). Preliminary report.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 1 page and 2 tables.

Cottonseed (tons) received at mills and crushed, August 1 through current month, and on hand at mills end of current month, for seasons named, by certain specified States and all other States combined. United States totals. Cottonseed products (seven named), same seasons: On hand at beginning of season (August 1), produced August 1 through current month, shipped out August 1 through current month, and on hand end of current month. (Tables.)

NOTE.—This is the final release in this series. Data for January 1949 are included in the revised Series M17-1 and M17-1A which replace the old Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17-1 and M17-1A, above.

GRAY IRON CASTINGS. Shipments and unfilled orders. Quantity (short tons).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. Each report 3 pages, 1 table, and 5 charts.
Shipments (for sale, for own use, and total) and unfilled orders for sale of total gray iron castings, miscellaneous gray iron castings, molds for heavy steel ingots, chilled iron railroad car wheels, cast iron pressure pipe and fittings, and cast iron soil pipe and fittings; Preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years for shipments data. (Table.) All the data in this series have been adjusted to represent complete coverage of the industry.

Series M21B (Monthly)
MALLEABLE IRON CASTINGS. Shipments, orders booked, and unfilled orders. Quantity (short tons).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. Each monthly report 2 pages, 1 table, and 2 charts.
Shipments (for sale, for own use, and total); orders booked, less cancellations, for sale; unfilled orders, end of month, for sale; and monthly index of shipments: Preceding month, current month, and corresponding month of the two preceding years. Cumulative totals to date for the three years. (Table.) Coverage of the industry is complete. Summary report for 1948 gives monthly shipments, orders booked, and unfilled orders (table 1); and yearly shipments and orders booked, 1935—1948 (table 2).

Series M22A (Monthly)
STEEL CASTINGS. Shipments and unfilled orders. Quantity (short tons).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. Each report 2 pages, 2 tables, and 2 charts.
Shipments, for sale and for own use, and unfilled orders for sale, by type of casting (carbon steel; alloy, including stainless, steel), preceding month, current month, and corresponding month preceding year. Shipments by type of furnace and grade of steel, same periods, and cumulative shipments to date for the two years. (Tables.) All data in this series have been adjusted to represent complete coverage of the industry.

Series M22C (Monthly)
COMMERCIAL STEEL FORGINGS. Shipments and unfilled orders. Quantity (short tons).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. Each report 2 pages, 1 table, and 2 charts.
Shipments and unfilled orders, each by type of forging (drop and upset forgings and press and open hammer forgings), carbon steel and alloy steel, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Table.) All data in this series have been adjusted to represent complete coverage of the industry, including the commercial output of captive forge shops.

ALUMINUM WROUGHT PRODUCTS. Shipments. Quantity (pounds).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. Each report 2 pages, 1 table, and 4 charts.
Producers’ monthly net shipments, total, and by four major types of product (plate, sheet, and strip; rolled structural shapes, rod, bar, and wire; extruded shapes, tube blooms, and tubing; and powder, flake, and paste), each month, preceding year to date current year. (Table.) Analysis precedes table.

Series M24E (Monthly)
NONFERROUS CASTINGS. Shipments. Unfilled orders. Quantity (pounds).
Reports were issued during the period covered by this catalog for each month November 1948—January 1949. 4 to 5 pages, 6 tables, and 4 charts.
Shipments (for sale, for own use, and total) and unfilled orders for sale of nonferrous castings, summary, current month; same data for each of five types of castings (aluminum, magnesium, copper, zinc and zinc-base alloy, and lead and lead-base alloy die castings), by kind of casting, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Tables.) Analysis precedes tables.

Series M24G (Monthly)
MAGNESIUM WROUGHT PRODUCTS. Shipments. Quantity (pounds).
Reports were issued during the period covered by this catalog for each month November 1948—February 1949. Each report 2 pages, 1 table, and 1 chart.
Shipments, total, and by two types (extrusions, including forging stock; and plate, sheet, and strip), each month, preceding year to date current year. (Table.) Coverage of the industry is complete. Report covering data for December 1948 also gives totals for each year 1944—48.

Series M25A—08 (Annual)
STEEL BOILERS. (100 Square Feet of Heating Surface and Over.) New orders. Quantity (units; square feet).
1948. 4 pages. 3 tables. 1 chart. Released March 14, 1949.
New orders for steel boilers of 100 square feet of heating surface and over (stationary, power boilers over 15 pounds pressure; steel heating, as differentiated from power boilers; and marine), by type, each year 1940—1948, and six-month totals, January—June 1948, July—December 1948, 1947,
and 1946. Stationary power (water tube boilers; water walls; steam generating capacity; and horizontal return tubular), each month January–June 1948, August 1947, and May 1946.

Note.—The report covering data for June 1948 was the last monthly release in this series, and the report listed here is the first annual. Future releases will continue to be issued on an annual basis.

Series M26B (Monthly)

CLAY CONSTRUCTION PRODUCTS. Production and shipments. Quantity (units vary).

Reports were issued during the period covered by this catalog for each month November 1948–January 1949. Each report 4 pages, 4 tables, and 3 charts.

Number of plants, total production, and shipments (quantity and value) of unglazed brick (common and face), for the United States, Census geographic divisions, and States, current month and preceding month (revised). Same data for unglazed structural tile, vitrified clay sewer pipe, drain tile, glazed and unglazed hollow facing tile, and glazed and unglazed floor and wall tile and accessories including quarry tile, for the United States and for Census geographic divisions, same periods. (Each of the nine geographic divisions report data on certain products; other products are reported by selected divisions or combinations of divisions.)

Same data for unglazed brick (common and face) and unglazed structural tile, by 17 regional marketing areas, same periods. (Tables.) Published since 1928; comparable data for some products since September 1942. Statistics cover virtually all known manufacturers of the specified products except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M26D (Monthly)

ASPHALT AND TAR ROOFING AND SIDING PRODUCTS. Shipments. Quantity (squares; square feet; tons).

Reports were issued during the period covered by this catalog for each month November 1948–January 1949. Each report 2 pages, 2 tables, and 3 charts.

Shipments of the following products, United States total, Eastern area, and Western area, current month and preceding month (revised): Asphalt roofing, total and by kind; asphalt sidings, total and by kind; insulated brick siding, all types and finishes; asphalt board products; saturated felts, total and by kind; and saturated sheathings and coated sheathings. Shipments of asphalt roofing, asphalt sidings, and saturated felts, by geographic divisions, current month. (Tables.) Published since January 1928; comparable data published since September 1943. Statistics are based on practically complete coverage of the industry, except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M31B-08 (Annual)

Shipments (number and value) of domestic water systems, summary by jet and non-jet types and by deep- and shallow-well types; domestic hand and windmill pumps; pump jacks; cylinders, sold separately; windmill heads; and windmill towers; January–June (revised) and July–December 1948, and by years, 1944–1948. Shipments of domestic water systems, hand and windmill pumps, windmill heads, and windmill towers, total number and value, by years, 1922–1948. (Tables.) Analysis precedes tables. Published since 1926.

Note.—The June 1948 release which was issued under the title "Domestic Water Systems, Pumps, and Windmills" was the last one in this series to be issued on a monthly basis. The term "Farm Pumps," as now used to describe the survey, encompasses the same group of products as were covered by the monthly survey referred to above. The report listed here is the first annual in this series. Future releases will be issued on an annual basis.

Series M31E (Quarterly)

FANS, BLOWERS, AND UNIT HEATERS. Shipments and orders booked. Value.

Report issued during the period covered by this catalog was for 4th quarter 1948. 1 page and 1 table.

Fan and blower group: Centrifugal fans and blowers: propeller fans; and axial fans; each by type; and parts for fans and blowers. Unit heater group: unit heaters, by type; unit ventilators; heat transfer coils, by type; and parts for unit heaters and unit ventilators. Air washers. Data for shipments are for current quarter and preceding quarter (revised); orders booked, preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). (Table.) Analysis precedes table. Published since January 1931. The manufacturers in this survey account for more than 90 percent of total shipments of these products.

Series M36A (Quarterly)

Report issued during the period covered by this catalog was for 4th quarter 1948. 3 pages and 4 tables.

Shipments by major types, current quarter and preceding quarter (revised). Excavating and earth-moving equipment (other than power cranes and shovels), total shipments and shipments for export (number and value), by type of equipment, current quarter and preceding quarter (revised). Data are shown for the following types of equipment: Road construction and maintenance machinery (ditchers and trenchers, scrapers, graders, rippers and rooters, rollers, loaders, etc.); construction machinery for mounting on tractors (cranes, shovel-type loaders, dozers, and cable power control units); tracklaying tractors, by horsepower; wheel-type heavy-duty industrial tractors; and portable well and blast hole drills. Shipments of
power cranes and shovels, current quarter and preceding quarter. (Tables.) Analysis precedes tables.

Series M42A (Monthly)
Complete Aircraft and Aircraft Engines. Shipments and unfilled orders. Plant employment. Exports. Reports were issued during the period covered by this catalog for each month November 1948-January 1949. Each report 4 pages, 9 tables, and 4 charts.

Complete aircraft shipments, number and airframe weight (pounds), by type of aircraft, current and preceding months, cumulative total to date current year and corresponding period preceding year, and total for 12 months to date current year and corresponding period preceding year. Shipments of complete civil aircraft and of civil aircraft engines and other products of plants manufacturing complete aircraft and aircraft engines, current and preceding months, and cumulative total to date current year and corresponding period preceding year; shipments of aircraft engines (number and horsepower)—number data, same periods, and horsepower data, current month and preceding month only.

Unfilled orders (number) for civil transport-type aircraft, each month, current year to date. Number of employees in complete aircraft and aircraft engine plants, each month, preceding year to date current year. United States exports of domestic aircraft and aircraft engines (number and value), current and preceding months and cumulative total to date current year and corresponding period preceding year. Coverage of the industry is complete. (Tables.) Analysis precedes tables.

Series M45F (Monthly)
Truck Trailers. Production and shipments. Quantity (units).
Reports were issued during the period covered by this catalog for each month November 1948-January 1949. Each report 2 pages, 2 tables, and 1 chart.

Production and shipments (number of units) of complete trailers, by type (vans, platforms, tanks, pole and logging, low-bed heavy haulers, dump trailers, off highway, and all other trailers) and trailer chassis. Production (units) and shipments (units and dollar value) of truck trailers, each month preceding year to date current year. (Tables.) Analysis precedes tables.

Series M51B (Monthly)
Mechanical Stokers. Factory sales. Quantity (units).
Reports were issued during the period covered by this catalog for each month November 1948-January 1949. Each report 2 pages, 1 table, and 2 charts.

Total sales and sales by five classes of stokers, for preceding month, current month, and corresponding month of preceding two years. Total each class, combined totals, and year-to-date totals, each of three years. Detailed statistics for each class. (Table.) Published since January 1923. Definition of classes given. Coverage of the industry is complete.

Series M51H (Quarterly)
Plumbing Fixtures. Production, shipments, and stocks. Quantity (units).
Report issued during the period covered by this catalog was for the 4th quarter 1948. 2 pages, 2 tables, and 3 charts.

Value of shipments, by type of material (vitreous china, concrete and composition glazed earthware, and metal), preceding quarter, current quarter, and corresponding quarter preceding year. Production, shipments, and stocks at end of quarter, by type of fixture, current and preceding quarters. (Tables.) Analysis precedes tables. Coverage of the industry is complete.

Series M51N (Monthly)
Heating and Cooking Equipment. Shipments, inventories, and unfilled orders. Quantity (units).
Reports were issued during the period covered by this catalog for each month October-December 1948. Each report 10 pages, 8 tables, and 10 charts.

Cast iron boilers, radiators, and convectors, shipments and inventory. Oil burners for central heating, steam generation plants, and industrial process equipment: Total shipments of burners and units, shipments of boiler-burner units, and of furnace-burner units (number only); shipments of burners separately (value data for current month and preceding month only); and inventory and unfilled orders of burners and units. Warm air furnaces: Total shipments and inventories of warm air furnaces, of steel furnaces, shipments of cast iron furnaces, and of steel furnaces. Domestic heating stoves, domestic cooking appliances (except electric), and water heaters (except electric) and range boilers: Shipments, inventory, and unfilled orders, for each of the three classifications. Floor and wall furnaces: Shipments: Inventory and unfilled orders, for current month and preceding month only. Gas appliances, by type of gas, shipments (number only). (Tables.) Analysis precedes tables.

Data on shipments are for preceding month, current month, corresponding month preceding year, and year-to-date current year and preceding year, and show quantity and value, except as noted. Data on inventories and unfilled orders are for preceding month, current month, and corresponding month preceding year, except as noted, and show quantity only, as of the end of period.

Series M67B (Monthly)
Cuttings of Selected Men's Garments. "Men's and Boys' Clothing and Cotton and Allied Garments" for releases covering data through September 1948. Number of garments cut.
Reports were issued during the period covered by this catalog for October and November 1948. Each report 3 pages, 1 table, and 4 charts.

Total cuttings and average weekly cuttings of selected men's garments, by type of garment (suits, overcoats and topcoats, separate dress and sport trousers, work pants, dungarees and waistband overalls, bib overalls, shirts, pajamas, and undershorts made from woven fabric), preceding period,
current period, and corresponding period preceding year, and cumulative totals to date for the two years. (Table.) Analysis precedes table. Published since 1923. Charts show average weekly production of men's suits (including summer), overcoats and topcoats, dress and business shirts, and dress and sport trousers.

Note.—The coverage of this report has been reduced to a limited group of manufacturers, restricting the publication of detailed data showing the number of garments cut in each of the principal producing areas, previously shown in this report.

Series M67C (Monthly)

Knit Underwear and Nightwear. Production, consumption, and shipments. Quantity (underwear and nightwear, dozens; materials consumed, pounds).

Reports were issued during the period covered by this catalog for October and November 1948. Each report 4 pages, 4 tables, and 1 chart.

Summary statistics for production and materials consumed, by type; production and shipments of knit cotton and/or wool and other knit underwear and nightwear and of knit outerwear shirts made in underwear mills, by type and age-sex group; consumption of yarns and of purchased knit fabrics, by type; and value of net shipments in the knit underwear industry. Data are for preceding period, current period, and corresponding period preceding year. (Tables.) Analysis precedes tables. Published since 1924.

Series M67H (Quarterly)

Women's, Misses', and Juniors' Outerwear. Production and shipments. Quantity (units vary).

Report issued during the period covered by this catalog was for 3d quarter 1948. 9 pages, 2 tables, 4 unnumbered summary tables, and 4 charts.

Value of net shipments and of returns, by industry and area of production, current quarter and preceding quarter. Production, by type of garment and price group: Preliminary total for current quarter; and production by type of fiber, preceding quarter.

Summary tables show dollar shipments by industry and by area, current quarter, corresponding quarter preceding year, and cumulative totals current year to date and corresponding period preceding year; percent returns to gross shipments, by industry, same periods; and cuttings of selected garments by type of garment and wholesale price group, preceding quarter, current quarter, corresponding quarter preceding year, and cumulative totals current year to date and corresponding period preceding year. (Tables.) Analysis precedes tables.

Series M68A (Monthly)

Shoes and Slippers. Production and shipments. Quantity (pairs).

Reports were issued during the period covered by this catalog for each month October—December 1948. Each report 5 pages, 5 tables, and 1 chart.

Summary of production, by kind of footwear, preceding month, current month, and corresponding month preceding year; and percent of production, by type of outsoles, current month. Production and shipments, by States, current month, preceding month, and cumulative totals to date current year and preceding year. Production by kind of footwear, by age-sex groups, preceding month, current month, and corresponding month preceding year, and cumulative total to date current year. Production by kind of footwear, by type of upper, and by type of outsoles, by age-sex groups, current month. (Tables.) Analysis precedes tables. Some comparable data available since 1921. Coverage of the industry is virtually complete.

Series M75–1 (Monthly)

Containers and Closures. Production, shipments, stocks, and unfilled orders. Quantity (units vary).

Report covering December 1948 data gives shipments of metal cans for sale and for own use, by type of product packed, for third and fourth quarters 1948 and fourth quarter 1947, for the United States and Hawaii, by geographic divisions (Pacific and Hawaii combined).

6. POPULATION DIVISION

The Census of Population is taken every ten years, the last being that for 1940. Currently, population estimates are prepared from available data. The Current Population Survey obtains information on employment and unemployment from a sample of 25,000 households each month. This survey also yields considerable information on changes in population characteristics. Current national housing data are also obtained by means of supplements to the Current Population Survey.
6-1. Special Reports

Patients in Mental Institutions

Patients in hospitals for mental disease: Text tables and detailed tables on movement of population, diagnosis (first admissions and discharges), and administration. (Text tables i-xv; detailed tables 1-47.)

Patients in institutions for mental defectives and epileptics: Text tables and detailed tables on movement of population, diagnosis of mental defectives and of epileptics (first admissions and discharges), and administration. (Text tables xvi-xxxi; detailed tables 48-78.)

Consolidated data for mental defectives and epileptics: Data on first admissions and on discharges, by type of institution and control. (Detailed tables 79-82.)

Appendices give definitions of terms and explanations, and coverage for hospitals for mental disease and institutions for mental defectives and epileptics. An index of data found in the detailed tables is given on pages xiv-xviii.

NOTE.—This survey was transferred to the United States Public Health Service in February 1948.

6-2. Current Population Reports

Population Characteristics

Series P-20

Migration status and type of migration of the civilian population, April 1948: by urban-rural residence and sex; born on or before April 1, 1947, by age and sex; males 18 years old and over, by veteran status and age. Migration status of the civilian population 14 years old and over, by marital status, duration of marital status, and age, April 1948. (Tables.) Analysis precedes tables.

No. 23. Marital Status, Number of Times Married, and Duration of Present Marital Status: April, 1948. 21 pages. 11 tables. Dated March 4, 1949.

Marital status, by age and sex, for the U. S., urban and rural, civilian population, April 1948: With comparative data for total population, April 1940 (table 1); and number of times married for persons 14 years old and over ever married (table 2). Marital status, number of times married, and duration of present marital status: For persons ever married, by age and sex; by relationship to head of household; by number of own children under 6 and 6 to 17 years old; by labor force status and number of own children under 6 years old; for employed persons by major occupation group; and by age and sex, for urban and rural areas (tables 3-9). Percent distribution of urban and rural nonfarm persons with money income, by marital status, number of times married, duration of present marital status, total money income level in 1947, and sex (table 19). Age at first marriage, remarriage, widowhood, and divorce, for persons ever married, by sex and present marital status (table 11). Data are for persons 14 years old and over, for the U. **Labor Force**

Series P–50

Employment status of the noninstitutional population: By sex (table 1); civilian, by color and sex (table 14); male veterans of World War II in the civilian population (table 16). Civilian labor force and persons not in the labor force, by age and sex (tables 3, 8). Persons employed in non-agricultural industries and in agriculture: By hours worked during survey week, 1948 and 1947 (table 2); persons at work, by average number of hours worked during survey week, 1948–49, including revised figures for March 1943–June 1945 (table 11); by class of worker and sex (tables 9, 10); and by age and sex (tables 5, 6). Employed persons: By age and sex (table 4); with a job but not at work, by reason for not working (table 13); and by major occupation group, by sex (table 15). Unemployed persons: By age and sex, and by duration of unemployment (tables 7, 12). Data are for 1948 and 1947, except as indicated, and are for persons 14 years of age and over.

The tables give summary of estimates, 1948, 1947, and 1940; occupational distribution of the experienced civilian labor force, April 1948 and March 1940; labor force participation rates and unemployment rates, by age and sex, 1948 and 1940. Text discusses developments in employment and in unemployment, comparability with related data, and gives definitions, explanations, and source and reliability of the estimates.

Series P–57

Reports were issued during the period covered by this catalog for each month December 1948–February 1949. 12 pages, 13 tables, and 1 chart, each report.

Summary of estimates of the number of persons 14 years of age and over, by employment status, preceding month, current month, and corresponding month preceding year. Estimates of agricultural and nonagricultural employment, by sex, same periods; and by hours worked during the survey week, current month and specified prior months. Estimates of the noninstitutional population, by employment status and sex, and of the male veterans of World War II, current month and specified prior months. (Tables 1–5.) The remaining tables contain detailed labor force data for a week in the current month. An unnumbered table shows the approximate differences that may arise as a result of sampling variability for estimates of selected sizes. Chart illustrates trends in the labor force, 1940 to date current year.

**Consumer Income**

Series P–60

HOW TO USE THIS PUBLICATION

This issue of the Census Publications Catalog and Subject Guide has been revised to give users of published Census statistics an easier, faster, and more direct method of locating the desired information. The descriptive information relating to published reports, which was previously included in the Subject Guide of this volume, has been transferred to the Catalog section.

The subject entries in the Subject Guide are now directly keyed to the reports listed in the Catalog by the use of a reference numbering system. All publications are arranged in the Catalog under the following subject headings: Agriculture (1), Business (2), Foreign Trade (3), Governments (4), Industry (5), Population (6), and Miscellaneous (7). The first digit of the reference number designates the major subject within which the report is listed. Thus, all reports relating to agriculture have reference numbers beginning with 1. Reference numbers for all Business reports have 2 in the first digit, etc. The second digit of the reference number further classifies the reports by broad categories of reports. For example, Business Division reports on Retail Trade are classified under 2-1, Trade Studies, 2-2, Wholesale Trade, 2-3, etc. Reports carrying a series number are further identified by the Series Number shown in parentheses following the 2-digit reference number.

The user of the Catalog and Subject Guide may first consult the Subject Guide and secure the reference number or numbers shown for the subject on which he is looking for information. The reference number is then used as a key in locating the desired reports in the Catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page.

These revisions in the Catalog and Subject Guide are expected to facilitate its use as a more rapid finding medium for Census publications. However, the changes in this issue are exploratory and it is expected that further improvements will be made in future issues. Comments on the effectiveness of these changes will be appreciated.

CATALOG and SUBJECT GUIDE

Catalog of Publications Issued During January–June 1949

The following list of Census publications includes those issued during the January–June 1949 period. The publications are listed alphabetically by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population, and Miscellaneous. Changes in series from those shown in the similar list for 1948 are indicated. Publications for which a price is given are for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Other publications are free upon request from the Bureau of the Census. In requesting copies, please refer to the series number or title and state the period for which information is wanted.

1. AGRICULTURAL DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the census of population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925. Thus, since 1920, there has been a Federal Census of Agriculture every fifth year. The next Census of Agriculture will be taken as part of the Decennial Census of Agriculture in 1950.

Each year the Agriculture Division collects statistics and issues its periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on the dates prescribed by Congress.

1-1. Cotton Ginning Reports

Series A/C & O–1 CG

REPORT ON COTTON GINNING. Preliminary. Quantity (running bales). Reports are issued for cotton ginned prior to specified dates during the ginning season.

Reports issued during the period covered by this catalog were for the periods prior to January 16, 1949 (crop of 1948), with comparative figures for preceding two years, and for the crops of 1948, 1947, and 1946. 1 page and 1 table, each report.

Number of bales ginned from growth of current season prior to specified date, and comparative statistics to the corresponding date for the preceding two seasons, by the named cotton-growing States. (Table.) Consumption, stocks, imports, and exports are also shown in the report.

Note.—A free post card duplicate of this report is available about a week later than the mimeographed release upon application to the Bureau of the Census.

Reports issued during the period covered by this catalog were for the period prior to January 16, 1949 (crop of 1948), with comparative figures for the 1947 crop, and for the crops of 1948 and 1947. 1 to 2 pages. 1 table each report.

The following ten States are covered by separate reports, with an additional report for all other cotton-growing States:

Alabama North Carolina
Arkansas Oklahoma
Georgia South Carolina
Louisiana Tennessee
Mississippi Texas

Running bales (counting round as half bales) and equivalent 500-pound bales (gross weight) ginned from the crop of 1948, by 18 named States and United States total. Comparative figures for 1947 and 1946. Linters not included. (Table.)

This bulletin summarizes the available cotton statistics which are published monthly in several series of releases (including those listed in the Industry

Division section of this catalog, Facts for Industry, Series M15–1, 2, and 3, and Series M17–1, 3, and 4, the last three of which were replaced by Series M17–1 (revised) and M17–1A, covering data for January 1949. These reports cover data on cotton production, consumption, stocks, cotton spindles, spindle activity, cottonseed, and cottonseed products. (Tables.)

Text gives source of statistics, definitions of cotton year, and description of cotton reports issued periodically.

1-2. Census of Agriculture: 1945

Report includes statistics compiled for a sample of all farms included in the 1945 Census of Agriculture. Includes data by color and tenure of operator for farms and farm acreage; facilities in farm dwellings; farm equipment; farm population; the number of principal kinds of livestock and the production of important livestock products; acreage and production of principal crops; and the value of farm products sold or used by farm families.

1-3. Special Reports

Estimated number of nonfarm households reporting vegetables raised and estimated area of vegetable plot, by size of vegetable plot per household. Estimated number of nonfarm households reporting, and estimated number of hens and pullets and estimated number of eggs laid the day before the survey, by number of hens and pullets per household, November 1948. (Tables.) Text gives analysis of tables and reliability of estimates.

Note.—The information contained in this report was obtained as part of the Current Population Survey.

2. Business Division

Complete Censuses of Business were taken for the years 1929, 1933, 1935, and 1939. The first and the last of these were taken as part of the Decennial Census, 1930 and 1940. The other two were special projects. Census of Business is being taken in 1949, covering 1948, and will be taken every fifth year thereafter under new legislation.

Current reports on business are outlined below.

2-1. Retail Trade Reports

The basic statistics from the Retail Trade Reports consist of a series of monthly figures on the trends in total receipts of sales. These figures are arranged to compare the current month's trade volume with that for the previous month and for the current month a year ago.

Monthly Retail Trade Report. United States Summary (Kinds of Business and Large Cities). By nine broad geographic areas (Cities and Areas).

Reports issued during the period covered by this catalog, for each of the following geographic areas, were for each month December 1948–May 1949, except as indicated by dates in parenthesis. Each United States summary, 4 pages. Individual area reports, 3 to 8 pages.

United States Summary

5. INDUSTRY DIVISION

A Census of Manufactures was taken in 1948, covering 1947. Preliminary releases of data obtained in this Census are listed below. New legislation provides that the next Census of Manufactures be taken in 1954, covering 1953, and every five years thereafter.

Current statistics on industry are issued in the Facts for Industry series. The purpose of this series of releases is to make available to manufacturers, trade groups, and other users of industrial data, current figures that are useful to them in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.
5-1. Census of Manufactures: 1947

Preliminary Reports

The series numbers of the Census of Manufactures, 1947, preliminary releases listed below follow the pattern of the Facts for Industry series, with the prefix MC instead of M to identify them as Census of Manufactures, 1947, releases. The additional number following the dash identifies a particular report on a specified subject. Each of the releases presents general statistics for the industry for 1947, with comparative data for 1939. In addition, many of the reports show general statistics for selected States, 1947, and give preliminary data on production and shipments for 1947.

These preliminary reports are available without charge, but bulletins presenting final and more detailed data will be for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Bulletin numbers and prices of the report which will contain the final data for products included in each individual preliminary report are shown in parentheses below, following the series number of the preliminary report. A list of the individual preliminary releases in this series issued during the period covered by this catalog follows:

of materials, and of pulpwood, by geographic regions and by kinds, current month and preceding month. Wood pulp, paper, and board: Base and actual production, by major grades, and production, by mill classes, current month. Production, consumption, and inventories of wood pulp, by grades, current month and preceding month. Wood pulp: Supply — production, transfers, shipments, and producers' inventories; receipts, consumption, and consumers' inventories in paper and board manufacture; receipts at paper and board mills; each by grades; and consumption and inventories of wood pulp at integrated, partially integrated, and nonintegrated paper and board mills, current month. Consumption of pulpwood, wood pulp, and other fibrous materials, by mill classes, current month. Production of paper and board, by type, preceding month, current month, and corresponding month preceding year. (Tables.) Analysis precedes tables. Comparable monthly data on the major items. The production of paper and board, by type, is shown for each year, 1946-1948.

Series M15-1 (Monthly)

COTTON AND LINTERS. Cotton Consumption and Stocks, by States. Linters Consumption and Stocks, by Type of Consumer and in Storage. Quantity (running bales, counting round as half-bales, except foreign cotton, which is in equivalent 500-lb. gross bales). Preliminary report.

Reports were issued during the period covered by this catalog for each month December 1948 and 1947-May 1949 and 1948. Each report 1 page and 2 tables.

Cotton (exclusive of linters): Consumed during current month and corresponding month preceding year, and on hand (1) in consuming establishments and (2) in public storage and at compresses, end of current month and end of corresponding month preceding year, for each 20 named States and all other States combined. United States totals. (Table.)

Linters: Consumed by bleachers of linters and by all other consumers, and on hand in consuming establishments and in public storage and at compresses. Same period data. (Table.) Published since 1912.

COTTON SYSTEM SPINNING ACTIVITY. Spindles in place, active, and spindle hours operated. Preliminary.

Reports were issued during the period covered by this catalog for each month December 1948-May 1949. Each report 1 page and 1 table.

Cotton system spinning spindles: In place end of current month; consuming 100% cotton and consuming other than cotton — active last working day and spindle hours during month; spindle hours operated on all fibers — total hours and average per spindle in place: For the United States, for three geographic areas (cotton-growing States, New England States, and all other States), and for each of 15 named States and all other States. (Table.) Published since 1912.

COTTON BROAD WOVEN GOODS. Production (linear yards); yarn consumed (pounds); machinery in place and active (number).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 and 1st quarter 1949. 10 pages, 5 tables, 1 unnumbered summary table, and 6 charts.

Summary of production, by class of fabric. Production of total cotton woven goods over 12 inches...
in width (except tire fabrics and laundry nettings) and by nine types, by kind of goods. Production of tire cord and fabric, total, and by type of fabric. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarns consumed in the production of the fabrics reported, by type. Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). (Tables.) Analysis precedes tables. Published since January 1945. All known manufacturers in the industry were canvassed.

Series M15C (Quarterly)

RAYON BROAD WOVEN GOODS. Production (linear yards); yarn consumed and stocks of rayon yarn (pounds). Machinery in place and active (number).

Reports issued during the period covered by this catalog were for November 1948-March 1949. 4 pages, 6 tables, and 1 unnumbered summary table.

Summary of production, by class of fabric. Production of total rayon broad woven fabrics and by four types and all other rayon mixtures, by type of fabric. Production of silk, nylon, glass, and other fabrics, total, and by kind. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarn consumed in the production of fabrics reported by type. Stocks of filament rayon yarn on hand owned by reporting plants. Consumption and stocks of synthetic staple fibers, current and preceding quarters. Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised), except as indicated. (Tables.) Analysis precedes tables. Published since January 1945. All known manufacturers in the industry were canvassed.

Series M15H (Monthly)

Reports were issued during the period covered by this catalog for each month November 1948-March 1949. 10 to 11 pages, 7 tables, 3 unnumbered tables and 4 to 7 charts.

Summary: Machinery and hours operated; consumption on woolen and worsted systems (pounds, scoured basis); and production of tops and yarns (pounds). Woolen and worsted machinery and machinery activity: Machinery in place end of current month, and in operation one or more days during month; and hours operated (first shift, second shift, third shift). Consumption of shorn and pulled wool of the sheep: Apparel class, on woolen and worsted systems, scoured basis; carpet class, greasy basis and scoured basis. Fibers consumed for spinning on the woolen and worsted systems (for yarns, except carpet, and for carpet and rug yarns). Production of tops and noils, each by type (wool of the sheep, mohair, rayon, all other). Yarns (except carpet) and carpet yarns spun on the woolen and worsted systems. Data are weekly averages for preceding month, current month, and corresponding month preceding year, and aggregates, current year-to-date and preceding year-to-date. (Tables.) Analysis precedes tables. Most of the data have been published since 1934. In the March issue aggregates are shown for the quarters, January to March 1949, and 1948. Yearly figures are shown for January-December 1948 and 1947.

Series M16A (Monthly)

FLOUR MILLING PRODUCTS. Production. Quantity (units vary).

Reports were issued during the period covered by this catalog for each month November 1948-April 1949. 2 to 3 pages, 3 to 4 tables.

Wheat flour milling statistics, current month and specified prior months: Wheat ground (bushels); production (wheat flour, sacks; offal, tons); daily 24-hour capacity in wheat flour (sacks); wheat flour production as percent of capacity; average pounds of wheat per sack of flour; average pounds of offal per sack of flour; and flour extraction rate (percent).

Wheat flour production, by 20 named States and other States combined, current month and specified prior months. Rye flour milling statistics, current month and specified prior months: Rye ground (bushels); rye flour produced (sacks); and offal produced (tons). (Tables.) Data on wheat flour and stocks since 1925. Report covering December 1948 data shows flour stocks end of quarter, current year and preceding year.

Series M16C (Monthly)

CONFECTIONERY AND COMPETITIVE CHOCOLATE PRODUCTS. Manufacturers' sales. Value. Quantity (pounds).

Reports were issued during the period covered by this catalog for each month November 1948-March 1949. Each report 2 pages, 2 tables, and 2 charts.

Sales by kind of business for specified States and for geographic division totals (Middle Atlantic and South Atlantic combined): Number of firms reporting; percent change in sales, current month from preceding month, and from corresponding month preceding year, and dollar volume of sales, current month; and sales of firms reporting year-to-date (dollar volume and percent change). Manufacturers' sales (poundage, value, and average value), by type of house (package, bar, bulk goods, general line, and unclassified), current month and corresponding month preceding year; and year-to-date figures (pounds and value), current year and preceding year, with percent change. (Tables.)

Series M17-1 (Monthly)

Reports were issued during the period covered by this catalog for December 1948-April 1949. 2 to 5 pages. 2 to 8 tables.

Report covering data for December 1948 shows factory production and consumption, and factory and
warehouse stocks, in the United States, of the following products, by type: Vegetable oils; animal fats; fish and marine animal oils; greases; secondary products; and other products. Factory consumption and factory stocks of raw materials used to produce vegetable oils. Data are for current month and preceding month.

Report covering data for January 1949 shows the following preliminary data: Receipts, crushings, and stocks of raw materials at oil mills; production, shipments and transfers, and stocks, of primary products except crude oil, at crude oil mill locations; factory production and consumption, and factory and warehouse stocks of primary materials (vegetable oils, animal fats, fish and marine mammal oil, and for foots, raw and acidulated soap stock), in the United States, each by type. Beginning with February issue reports include figures on secondary products; factory production and consumption, and factory and warehouse stocks; cottonseed; and cottonseed products. Quantity (units vary). Preliminary data. (Tables.)

NOTE.—The report issued in March 1949, covering data for January 1949, was divided into two sections, listed as Series M17-1-19 (preliminary) and Series M17-1A-19 (preliminary). These reports replace the monthly releases previously published as Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. Data appearing in these releases are also summarized in report entitled “Cotton Production and Distribution” (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports. See also Series M17-1A, below.

Series M17-1A

One release, issued in March 1949, covering data for January 1949, was issued during the period covered by this catalog. 2 pages and 3 tables.

Factory production and consumption, and factory and warehouse stocks of secondary products, in the United States; cottonseed—Receipts, crushings, and stocks at oil mills, by States; and cottonseed products—Production and stocks at oil mill locations, by States. Data are for current month and preceding month. (Tables.)

NOTE.—See note regarding revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils on Series M17-1, above.

Series M17-2 (Quarterly)

FATS AND OILS. Factory consumption of primary and secondary animal and vegetable fats and oils, by uses. Quantity (pounds).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 and 1st quarter 1949. 2 to 6 pages and 2 to 3 tables.

Consumption of primary and of secondary animal and vegetable fats and oils, by kinds; total used in refining; total consumption other than in refining: (1) processed in fat splitting (hydrolysis), winterizing and pressing except for salad oil manufacture, sulfonation, and winterizing for salad oil; and (2) used in production of edible products (shortening, oleomargarine, other) and inedible products (soap, paint and varnish, linoleum and oilcloth, printing inks, lubricants and greases, and other). 3. Primary materials: (Vegetable oils, animal fats, fish and marine mammal oils); (total of primary products (other than vegetable oils) not shown separately); secondary products; (total of secondary products not shown separately).

Series M17-3 (Monthly)

COTTONSEED PRODUCTS. Production and Stocks at Oil Mills. Quantity (units vary). Preliminary report.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 2 pages and 2 tables.

Crude oil (pounds), cake and meal (tons), hulls (tons), and linters (running bales): Produced August 1 through current month for seasons named, by certain specified States and all other States combined; and stocks at oil mills, end of current month, shipped out August 1 through current month, same seasons and same States.

Cotton linters: Production (running bales) and average gross bale weights (pounds) by type of cut (first cut, second cut, and mill run), through current month, same seasons and same States. United States totals. (Tables.)

NOTE.—This is the final release in this series.

Series M17-4 (Monthly)

COTTONSEED AND COTTONSEED PRODUCTS. Quantity (units vary). Preliminary report.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 1 page and 2 tables.

Cottonseed (tons) received at mills and crushed, August 1 through current month, and on hand at mills end of current month, for seasons named, by certain specified States and all other States combined. United States totals. Cottonseed products (seven named), same seasons: On hand at beginning of season (August 1), produced August 1 through current month, shipped out August 1 through current month, and on hand end of current month. (Tables.)

NOTE.—This is the final release in this series.

Data for January 1949 are included in the revised Series M17-1 and M17-1A which replace the old Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17-1 and M17-1A, above.
Series M19A (Monthly)

**INORGANIC CHEMICALS. United States Production.**

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each report 2 pages, 1 table, and 4 charts.

Primary production of specified inorganic chemicals in the United States, including quantities produced for further processing in the same plant, for intracompany transfer, and for sale, preceding month, current month, and corresponding month preceding year. (Table.) All the data in this series have been adjusted to represent complete coverage of the industry.

Series M19B (Monthly)

**MALLEABLE IRON CASTINGS.** Shipments, orders booked, and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each monthly report 2 pages, 1 table, and 2 charts.

Shipments (for sale, for own use, and total); orders booked, less cancellations, for sale; unfilled orders, end of month, for sale; and monthly index of shipments: Preceding month, current month, and corresponding month of the two preceding years. Cumulative totals to date for the three years. (Table.) Coverage of the industry is complete. Summary report for 1948 gives monthly shipments, orders booked, and unfilled orders (table 1); and yearly shipments and orders booked, 1935–1948 (table 2).

Series M21A (Monthly)

**GRAY IRON CASTINGS.** Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each report 3 pages, 1 table, and 5 charts.

Shipments (for sale, for own use, and total) and unfilled orders for sale of total gray iron castings, miscellaneous gray iron castings, molds for heavy steel ingots, chilled iron railroad car wheels, cast iron pressure pipe and fittings, and cast iron soil pipe and fittings; Preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years for shipments data. (Table.) All data in this series have been adjusted to represent complete coverage of the industry.

Series M21B (Monthly)

**STEEL CASTINGS.** Orders booked, and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each report 2 pages, 1 table, and 2 charts.

Shipments, for sale and for use, and unfilled orders for sale, by type of casting (carbon steel); alloy, including stainless, steel, preceding month, current month, and corresponding month preceding year. Shipments by type of furnace and grade of steel, same periods, and cumulative shipments to date for the two years. (Tables.) All data in this series have been adjusted to represent complete coverage of the industry.

Series M22A (Monthly)

**COMMERCIAL STEEL FORGINGS.** Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each report 2 pages, 1 table, and 2 charts.

Shipments and unfilled orders, each by type of forging (drop and upset forgings and press and open hammer forgings), carbon steel and alloy steel, preceding month, current month, and corresponding month preceding year. Shipments by type of furnace and grade of steel, same periods, and cumulative shipments to date for the two years. (Tables.) All data in this series have been adjusted to represent complete coverage of the industry, including the commercial output of captive forge shops.

Series M22B (Monthly)

**ALUMINUM WROUGHT PRODUCTS.** Shipments. Quantity (pounds).

847614–49—4
Reports were issued during the period covered by this catalog for each month November 1948--April 1949. Each report 2 pages, 1 table, and 4 charts.

Producers' monthly net shipments, total, and by four major types of product (plate, sheet, and strip; rolled structural shapes, rod, bar, and wire; extruded shapes, tube blooms, and tubing; and powder, flake, and paste), each month, preceding year to date current year. (Table.) Analysis precedes table.

Series M24E (Monthly)
NONFERROUS CASTINGS. Shipments. Unfilled orders. Quantity (pounds).

Reports were issued during the period covered by this catalog for each month November 1948--April 1949. 4 to 5 pages, 0 to 6 tables, and 4 charts.

Shipments (for sale, for own use, and total) and unfilled orders for sale of nonferrous castings, summary, current month; same data for each of five types of castings (aluminum, magnesium, copper, zinc and zinc-base alloy, and lead and lead-base alloy die castings), by kind of casting, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Tables.) Analysis precedes tables.

Series M24G (Monthly)
MAGNESIUM WROUGHT PRODUCTS. Shipments. Quantity (pounds).

Reports were issued during the period covered by this catalog for each month November 1948--April 1949. Each report 2 pages, 1 table, and 1 chart.

Shipments, total, and by two types (extrusions, including forging stock; and plate, sheet, and strip), each month, preceding year to date current year. (Table.) Coverage of the industry is complete.

Report covering data for December 1948 also gives totals for each year 1944--48. Reports for 1949 include totals by month for 1948.

Series M25A-08 (Annual)
STEEL BOILERS. (100 Square Feet of Heating Surface and Over.) New Orders. Quantity (units; square feet).

1948. 4 pages. 3 tables. 1 chart. Released March 14, 1949.

New Orders for steel boilers of 100 square feet of heating surface and over (stationary, power boilers over 15 pounds pressure; steel heating, as differentiated from power boilers; and marine), by type, each year 1940--1946, and six-month totals, January--June 1948, July--December 1948, 1947, and 1946. Stationary power (water tube boilers; water walls; steam generating capacity; and horizontal return tubular), each month January--June 1948, August 1947, and May 1946.

Series M26B (Monthly)
CLAY CONSTRUCTION PRODUCTS. Production and shipments. Quantity (units vary).

Reports were issued during the period covered by this catalog for each month November 1948--April 1949. Each report 4 pages, 4 tables, and 3 charts.

Number of plants, total production, and shipments (quantity and value) of unglazed brick (common and face), for the United States, Census geographic divisions, and States, current month and preceding month (revised). Same data for unglazed structural tile, vitrified clay sewer pipe, drain tile, glazed and unglazed hollow facing tile, and glazed and unglazed floor and wall tile and accessories including quarry tile, for the United States and for Census geographic divisions, same periods. (Each of the nine geographic divisions report data on certain products; other products are reported by selected divisions or combinations of divisions.)

Same data for unglazed brick (common and face) and unglazed structural tile, by 17 regional marketing areas, same periods. (Tables.) Published since 1928; comparable data for some products since September 1942. Statistics cover virtually all known manufacturers of the specified products except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M26D (Monthly)
ASPHALT AND TAR ROOFING AND SIDING PRODUCTS. Shipments. Quantity (squares; square feet; tons).

Reports were issued during the period covered by this catalog for each month November 1948--April 1949. Each report 2 pages, 2 tables, and 3 charts.

Shipments of the following products, United States total, Eastern area, and Western area, current month and preceding month (revised): Asphalt roofing, total and by kind; asphalt sidings, total and by kind; insulated brick siding, all types and finishes; asphalt board products; saturated felts, total and by kind; and saturated sheathings and coated sheathings. Shipments of asphalt roofing, asphalt sidings, and saturated felts, by geographic divisions, current month. (Tables.) Published since January 1928; comparable data published since September 1943. Statistics are based on practically complete coverage of the industry, except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M31B-08 (Annual)
FARM PUMPS. Shipments. Value. Quantity (units).

Shipments (number and value) of domestic water systems, summary by jet and nonjet types and by deep- and shallow-well types; domestic hand and windmill pumps; pump jacks; cylinders, sold separately; windmill heads; and windmill towers; January–June (revised) and July–December 1948; and by years, 1944–1948. Shipments of domestic water systems, hand and windmill pumps, windmill heads, and windmill towers, total number and value, by years, 1922–1948. (Tables.) Analysis precedes tables. Published since 1926.

Note.—The June 1948 release which was issued under the title "Domestic Water Systems, Pumps, and Windmills" was the last one in this series to be issued on a monthly basis. The term "Farm Pumps," as now used to describe the survey, encompasses the same group of products as were covered by the monthly survey referred to above. The report listed here is the first annual in this series. Future releases will be issued on an annual basis.

Series M31E (Quarterly)

Fans, Blowers, and Unit Heaters. Shipments and orders booked. Value.

Reports issued during the period covered by this catalog were for 4th quarter 1948 and 1st quarter 1949. 1 page and 1 table.

Fans and blower group: Centrifugal fans and blowers; propeller fans; and axial fans; each by type; and parts for fans and blowers. Unit heater group: unit heaters by type; unit ventilators; heat transfer coils, by type; and parts for unit heaters and unit ventilators. Air washers. Data for shipments are for current quarter and preceding quarter (revised); orders booked, preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). (Table.) Analysis precedes table. Published since January 131. The manufacturers in this survey account for more than 90 percent of total shipment of these products.

Series M32B–08 (Annual)

Electric Lamps. Production shipments, and stocks. Value. Quantity (units).

Annual release contains revised statistics for 1948 on the number of lamps produced, shipped, and held in factory stocks. It incorporates all the statistics published in this series for 1947.

Series M35A–08 (Annual)

33 pages. 8 tables. 11 charts. Released June 24, 1949.

Farm machines and equipment: Summaries of manufacturers' shipments (complete units, attachments and parts, total) and shipments by product groups, 1936–1948. Percentage distribution of manufacturers' shipments between complete units and attachments and parts, and between domestic shipments and shipments for export, each by product groups, 1948 and 1947. Value of shipments by geographic divisions and States, 1948. Summary of production (number) and manufacturers' shipments (value), by individual items, 1948 and 1947.

Manufacturers' shipments, including tractors for farm use and nonfarm use (complete units, attachments and parts, total), 1929–1948. (Tables.) Tractors: Manufacturers' shipments, by farm use and nonfarm use, 1945–1948. (Table.) Charts show: Shipments of farm machines and equipment, 1936–1948; shipments by States and geographic division, 1948; and manufacturers' shipments of selected farm machines and equipment, 1936–1948 (six types).

Series M36A (Quarterly)

Reports issued during the period covered by this catalog were for 4th quarter 1948 and 1st quarter 1949. 3 pages and 4 tables.

Shipments by major types, current quarter and preceding quarter (revised). Excavating and earth-moving equipment (other than power cranes and shovels), total shipments and shipments for export (number and value), by type of equipment, current quarter and preceding quarter (revised). Data are shown for the following types of equipment: Road construction and maintenance machinery (ditchers and trenchers, scrapers, wagons, graders, rippers and rooters, rollers, loaders, etc.); construction machinery for mounting on tractors (cranes, shovel-type loaders, dozers, and cable power control units); tracklaying tractors, by horsepower; wheel-type heavy-duty industrial tractors; and portable well and blast hole drills. Shipments of power cranes and shovels, current quarters and preceding quarter. (Tables.) Analysis precedes tables.

Series M37A–08 (Annual)

9 pages. 8 tables. 9 charts. Released April 27, 1949.

Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export), by type of tractor (complete, wheel type, tracklaying, garden), each year 1922–48 (except 1932–34). Manufacturers' domestic shipments and shipments for export, by farm and nonfarm use, by type of tractor, 1948 and 1947. Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export), by type and horsepower of tractor, 1948 and 1947. Value of manufacturers' shipments (total, domestic, and for export) of tractor attachments and parts, by type of product, 1948 and 1947, and annual totals, 1923–48 (except 1932–34). The statistics represent complete coverage of the industry. (Tables.) Analysis precedes tables.

Charts show production of tractors, by type, 1936–48; and shipments for farm and nonfarm use, and domestic and export shipments, by type, 1948 and 1947.

Series M42A (Monthly)

Reports were issued during the period covered by this catalog for each month November 1948–April
1949. Each report 4 pages, 9 tables, and 3 to 4 charts.

Complete aircraft shipments, number and airframe weight (pounds), by type of aircraft, current and preceding months, cumulative total to date current year and corresponding period preceding year, and total for 12 months to date current year and corresponding period preceding year. Shipments of complete civil aircraft and of civil aircraft engines and other products of plants manufacturing complete aircraft and aircraft engines, current and preceding months, and cumulative total to date current year and corresponding period preceding year; shipments of aircraft engines (number and horsepower)—number data, same periods, and horsepower data, current month and preceding month only.

Unfilled orders (number) for civil transport-type aircraft, each month, current year to date. Number of employees in complete aircraft and aircraft engine plants, each month, preceding year to date current year. United States exports of domestic aircraft and aircraft engines (number and value), current and preceding months and cumulative total to date current year and corresponding period preceding year. Coverage of the industry is complete. (Tables.) Analysis precedes tables.

Series M42E-08 (Annual) revised

AIRCRAFT PROPELLERS. Propellers and parts shipped (value) and number of employees in aircraft plants.

1948. 2 pages. 3 tables. Released June 7, 1949.

For Revised figures on this report see M42E-08 (annual) revised, below.

Series M42E-08 (Annual) revised

AIRCRAFT PROPELLERS. Propellers and parts shipped (value), and number of employees in aircraft plants.

1948. 2 pages. 1 errata sheet. 3 tables. Released June 27, 1949.

Contains corrected figures on the data published in the annual (M42E-08), above. It is a compilation of reports received from all known companies manufacturing aircraft propellers. Reports on the value of goods shipped to military and civilian groups and on the number of employees in the plants.

Series M45F (Monthly)

TRUCK TRAILERS. Production and shipments. Quantity (units).

Reports were issued during the period covered by this catalog for each month November 1948–April 1949. Each report 2 pages, 2 tables, and 1 chart.

Production and shipments (number of units) of complete trailers, by type (vans, platforms, tanks, pole and logging, low-bed heavy haulers, dump trailers, off highway, and all other trailers) and trailer chassis. Production (units) and shipments (units and dollar value) of truck trailers, each month preceding year to date current year. (Tables.) Analysis precedes tables.

Series M51B (Monthly)

MECHANICAL STOKERS. Factory sales. Quantity (units).

Report covering December 1948 data gives shipments of metal cans for sale and for own use, by type of
product packed, for third and fourth quarters 1948 and fourth quarter 1947, for the United States and Hawaii, by geographic divisions (Pacific and Hawaii combined).

Series M77E-08 (Annual)

Includes figures for 1948 and 1947. The figures for 1948 include only products manufactured from glass produced in the reporting establishment. The 1947 figures include in addition some products made from purchased glass.

6. POPULATION DIVISION

The Census of Population is taken every ten years, the last being that for 1940. Currently, population estimates are prepared from available data. The Current Population Survey obtains information on employment and unemployment from a sample of 25,000 households each month. This survey also yields considerable information on changes in population characteristics. Current national housing data are also obtained by means of supplements to the Current Population Survey.

6-1. Special Reports

Patients in Mental Institutions

Patients in hospitals for mental disease: Text tables and detailed tables on movement of population, diagnosis (first admissions and discharges), and administration. (Text tables i-xy; detailed tables 1-47.)

Patients in institutions for mental defectives and epileptics: Text tables and detailed tables on movement of population, diagnosis of mental defectives and of epileptics (first admissions and discharges), and administration. (Text tables xvi-xxx; detailed tables 48-78.)

Consolidated data for mental defectives and epileptics: Data on first admissions and on discharges, by type of institution and control. (Detailed tables 79-82.)

Appendices gives definitions of terms and explanations, and coverage for hospitals for mental disease and institutions for mental defectives and epileptics.

An index of data found in the detailed tables is given on pages xiv-xviii.

NOTE.—This survey was transferred to the United States Public Health Service in February 1948.

SUBJECT GUIDE
HOW TO USE THIS PUBLICATION

This issue of the Census Publications Catalog and Subject Guide has been revised to give users of published Census statistics an easier, faster, and more direct method of locating the desired information. The descriptive information relating to published reports, which was previously included in the Subject Guide of this volume, has been transferred to the Catalog section.

The subject entries in the Subject Guide are now directly keyed to the reports listed in the Catalog by the use of a reference numbering system. All publications are arranged in the Catalog under the following subject headings: Agriculture (1), Business (2), Foreign Trade (3), Governments (4), Industry (5), Population (6), and Miscellaneous (7). The first digit of the reference number designates the major subject within which the report is listed. Thus, all reports relating to agriculture have reference numbers beginning with 1. Reference numbers for all Business reports have 2 in the first digit, etc. The second digit of the reference number further classifies the reports by broad categories of reports. For example, Business Division reports on Retail Trade are classified under 2-1, Trade Studies, 2-2, Wholesale Trade, 2-3, etc. Reports carrying a series number are further identified by the Series Number shown in parentheses following the 2-digit reference number.

The user of the Catalog and Subject Guide may first consult the Subject Guide and secure the reference number or numbers shown for the subject on which he is looking for information. The reference number is then used as a key in locating the desired reports in the Catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page.

These revisions in the Catalog and Subject Guide are expected to facilitate its use as a more rapid finding medium for Census publications. However, the changes in this issue are exploratory and it is expected that further improvements will be made in future issues. Comments on the effectiveness of these changes will be appreciated.

Catalog of Publications Issued During January-September 1949

The following list of Census publications includes those issued during the January-September 1949 period. The publications are listed alphabetically by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population, and Miscellaneous. Changes in series from those shown in the similar list for 1948 are indicated.

Publications for which a price is given are for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Other publications are free upon request from the Bureau of the Census. In requesting copies, please refer to the series number or title and state the period for which information is wanted.

1. AGRICULTURAL DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the census of population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925. Thus, since 1920, there has been a Federal Census of Agriculture every fifth year. The next Census of Agriculture will be taken as part of the Decennial Census of Agriculture in 1950.

Each year the Agriculture Division collects statistics and issues its periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on the dates prescribed by Congress.

1-1. Cotton Ginning Reports

Consolidated Cotton Report. (Issued jointly by the Bureau of Agricultural Economics, of the Department of Agriculture, and the Bureau of the Census, of the Department of Commerce.)

Ginnings to date for five specified dates during the ginning season.

Reports issued for the period covered by this catalog were for periods prior to the eighth of August, and the eighth of September 1949. Each 1 p.

Ginnings to September 1, indicated total production. Condition September 1, indicated abandonment, indicated area left for harvest, indicated yield of lint cotton.

Series A/C & O-1 CG

Reports issued during the period covered by this catalog were for the period prior to September 14, 1949 (crops of 1949 and 1948), with comparative figures for the 1947 crop, and for the crops of 1948 and 1947. p. 1-2, tables.

The following ten States are covered by separate reports, with an additional report for all other cotton-growing States:

Alabama
Arkansas
Georgia
Louisiana
Mississippi
North Carolina
Oklahoma
South Carolina
Tennessee
Texas

Running bales (counting round as half bales) and equivalent 500-pound bales (gross weight) ginned from the crop of 1948, by 18 named States and United States total. Comparative figures for 1947 and 1946. Linters not included. (Table.)

This bulletin summarizes the available cotton statistics which are published monthly in several series of releases (including those listed in the Industry Division section of this catalog, Facts for Industry, Series M15-1, 2, and 3, and Series M17-1, 3, and 4, the last three of which were replaced by Series M17-1 (revised) and M17-1A, covering data for January 1949). These reports cover data on cotton production, consumption, stocks, cotton spindles, spindle activity, cottonseed, and cottonseed products. (Tables.)

Text gives source of statistics, definitions of cotton year, and description of cotton reports issued periodically.

Makes available for the first time final figures for cotton ginning and production 1948 crop. Statistics are based upon reports collected from all cotton gins in the United States. The reports were collected during the cotton ginning season. Preliminary releases were issued 8 days after the end of the reporting period for cotton ginned prior to August 1, 1, September 1, 16, October 1, 15, November 1, 14, December 1, 13 and January 16 and at the end of the cotton-ginning season.

In order to measure accurately the size of a crop, it is necessary to convert running bales, which vary in weight into bales of uniform weight. On this basis, the weighted gross weight of running bales and the number of equivalent 500-pound bales has been computed for each county and State.

1-2. Census of Agriculture: 1945

This special report, presents information for farms by class of work power, subdivided by size of farm. It supplements other reports of the 1945 Census of Agriculture. The statistics give a detailed picture of work power in relation to the size of the farm and the acreage of cropland harvested. Statistics are estimated on the basis of tabulations of a cross section, or sample, of all farms included in the 1945 Census of Agriculture. State totals, based on all farms enumerated in the 1945 Census of Agriculture give data on the number of farms, croplands harvested, mules, horses, and tractors by class of work power groups, by size of farm. The State is the smallest geographic area for which the data are given in this report.

1 For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent direct to that office with order.

Report includes statistics compiled for a sample of all farms included in the 1945 Census of Agriculture. Includes data by color and tenure of operator for farms and farm acreage; facilities in farm dwellings; farm equipment; farm population; the number of principal kinds of livestock and the production of important livestock products; acreage and production of principal crops; and the value of farm products sold or used by farm families.

1-3. Special Reports

Estimated number of nonfarm households reporting vegetables raised and estimated area of vegetable plot, by size of vegetable plot per household, 1948. Estimated number of nonfarm households reporting, and estimated number of hens and pullets and estimated number of eggs laid the day before the survey, by number of hens and pullets per household, November 1948. (Tables.) Text gives analysis of tables and reliability of estimates.

Note.—The information contained in this report was obtained as part of the Current Population Survey.

2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1929, 1933, 1935, and 1940. The first and the last of these were taken as part of the Decennial Census, 1930 and 1940. The other two were special projects. Census of Business is being taken in 1949, covering 1948, and will be taken every fifth year thereafter under new legislation.

Current reports on business are outlined below.

2-1. Retail Trade Reports

The basic statistics from the Retail Trade Reports consist of a series of monthly figures on the trends in total receipts of sales. These figures are arranged to compare the current month's trade volume with that for the previous month and for the current month a year ago.

Reports were issued during the period covered by this catalog for December 1948–August 1949. p. 12–27.

A monthly pamphlet containing information supplementing the United States statistics on imports, exports, and shipping currently issued in statistical reports and tabulations. The publication also provides information on unusual transactions appearing in the statistics, special import and export programs, changes in the types of shipments included in the statistics, problems of commodity and country classification, problems of valuation, changes in the kind of foreign trade and shipping statistics compiled and published, and similar information.
4. GOVERNMENTS DIVISION

The Governments Division collects data and prepares reports showing current and bench mark statistical data relating to the characteristics and functions of State and local governments and their administration in the United States. Primary attention is given to public finance (revenue, expenditure, debt, enterprises, etc.) and public employment (number of employees and amount of pay roll). For the years ending in "2" a decennial Census of Governments is taken.

A two-page release titled CENSUS BUREAU PUBLICATIONS ON GOVERNMENTS, as Scheduled for the Fiscal Years, 1949 and 1950, was issued during the period covered by this catalog and is available upon request.

4-1. State Finances

State Finances: 1948. (G-SF48.)

Summary of State general revenue, general expenditure, and total debt, 1942-48. Data for 1948, by State, for the following: General revenue and borrowings; State tax revenue, by source; general expenditure—by character, for operation by function, for capital outlay and aid paid to local governments. Income and expense statement and selected transactions of the 16 State-operated alcoholic-beverage monopoly systems, by State, 1948. General and enterprise debt outstanding and long-term debt issued and retired, by character of liability and by State, 1948. Per capita general revenue, general expenditure, and total debt, by State, 1948. Fiscal year, population, and income payments, by State.

Charts show State general revenue, general expenditure, and total debt, 1940-48; and percent increase, 1947 to 1948, in State general revenue and general expenditure. Text gives analysis, definitions of selected terms, and sources and terminology.

Final report of detailed basic data, by types of data. Governmental revenue from the several types of taxes, from aid received from other governments, and from earnings and miscellaneous sources; also data on new governmental borrowings. Governmental expenditure for operation, capital outlay, and aid paid to other governments—each by governmental function (e.g., schools, health, highways, public welfare, etc.)—and for interest, provision for debt retirement, and for contributions to trust funds and enterprises. Debt outstanding, issued and retired, by character, type of obligation, and purpose, and sinking-fund offsets to debt. Transactions and assets of specified funds. Transactions of certain public-service enterprises by type, classified in accordance with commercial accounting concepts.

Summary of general revenue and general expenditure of 26 selected States, 1948 and 1947. Data for 1948, by State, for the following: General revenue and borrowings; general expenditure, by character; general expenditure for operation, by function; general expenditure for capital outlay and aid paid to local governmental units. Fiscal year, population, and income payments, by State. (Tables.) Charts show per capita amounts of general revenue and general expenditure of 26 States, 1948 and 1947; and percent increase, 1947 to 1948, in general revenue and general expenditure of 26 States. Text gives analysis, definitions of selected terms, and sources and terminology.

State Finances: 1949. (G-SF49.)

Early report of preliminary current-year data, by type of tax.

4-2. Government Employment

Government Employment: 1948. (G-GE48.)

4–4. Governmental Finances in the United States

Governmental Finances in the United States: 1948. (G-GF48.)

Gross debt of Federal, State, and local governments; percent distribution, by level of government; and index of change (1940=100): For selected years 1902 to 1948. (Table 1.) Per capita gross debt of Federal, State, and local governments and per capita national income; and percent of debt to national income: Selected years 1932 to 1948. (Table 2.) Annual interest payments on debt of Federal, State, and local governments: Selected years 1932 to 1948, with percent 1948 as of 1932, 1942, 1947. (Table 3.) Interest-bearing governmental securities outstanding on June 30, by issuer and by ownership: Selected years 1940 to 1948. (Table 4.) Long-term debt, sinking-fund offsets, and net long-term debt of State and local governments; Selected years 1922 to 1948. (Table 5.) General and enterprise debt of State and local governments, 1948. (Table 6.) Analysis of tables. Charts show total debt and State and local debt, 1940–1948. Definitions of selected terms and notes on sources and procedure.

Lists general revenue of all governments in the United States in the 1948 fiscal year. Revenue from taxes, charges for governmental services and nontax revenue are included. Figures presented relate to general revenue, including all taxes, as distinguished from the management of enterprises, and the administration of trust and sinking funds. Gross receipts of water, electric, gas supply and other government owned enterprises are included in general revenue. Net intergovernmental aid transactions are shown among the levels of governments concerned. Intergovernmental aid revenue, including that from the Federal government is omitted from the Federal-State-local totals in this respect. Charts show governmental revenue, by source: 1942–1948; State and local government revenue, by source and by type of government: 1942–1948; State and local government revenue from own sources and for own purposes: 1942–1948.
5. INDUSTRY DIVISION

A Census of Manufactures was taken in 1948, covering 1947. Preliminary releases of data obtained in this Census are listed below. New legislation provides that the next Census of Manufactures be taken in 1954, covering 1953, and every five years thereafter.

Current statistics on industry are issued in the Facts for Industry series. The purpose of this series of releases is to make available to manufacturers, trade groups, and other users of industrial data, current figures that are useful to them in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

5-1. Census of Manufactures: 1947

Preliminary Reports

The series numbers of the 1947 Census of Manufactures preliminary releases listed below follow the pattern of the Facts for Industry Series (see 5-2). The prefix M instead of M is used to identify them as 1947 Census of Manufactures releases. The additional number at the end of the series number identifies a particular report on a specified subject. Each release presents general statistics for the industry. In addition, many show general statistics for selected States; others give preliminary data on production and shipments.

These preliminary reports are available without charge, but bulletins presenting final and more detailed data will be for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. (see section 5-1-2). Bulletin numbers and prices of the report which will contain the final data for products included in each individual preliminary report are shown in parentheses below, following the series number of the preliminary report. A list of the individual preliminary releases in this series issued during the period covered by this catalog follows:

Series M13G

LUMBER PRODUCTION IN ... (specified States and groups of States).

Production of softwood and hardwood, summary 1942-47; production by kind of wood, 1947; sawmill stocks, December 31, 1947 and 1946; and production and number of active mills reporting, by counties, 1947.

Report for the Western States and Alaska shows, in addition, sawmill stocks classified by size of mill based on amount of lumber sawed in 1947, December 31, 1947 and 1946, and lumber production and number of active mills reporting in Alaska, 1942-47.

Note.—Reports in this series maintain the Facts for Industry series number. Series M13G-07 (originally issued as C-4) and Series M13G-1-07 through M13G-4-07, for the Middle Atlantic States, Indiana, the New England States, the Lake and Prairie States, and for three of the South Atlantic States (N. C., S. C., and Va.) were issued during 1948.

5-2. Facts for Industry

Facts for Industry uses the letter "M" for Manufactures. The first two digits represent the group classification. They are the same as those used at the 2-digit level of the Standard Commodity Classification. The specific survey is shown by the single letter following the group classification numbers.

Series M13B (Monthly)
Softwood Plywood. Production, shipments and consumption, and stocks. Consumption and stocks of materials (logs and glue). Quantity (units vary).

Reports were issued during the period covered by this catalog for the year 1948 (4 pages, 3 tables) and for November 1948–July 1949. Each, 2 p., table.

Softwood plywood (total, all types; interior; exterior): Production, shipments and consumption, stocks (sq. ft. %" equivalent). Logs: Consumption and stocks (ft. log scale). Glue: Consumption and stocks, by type (pounds). Data are for preceding month, current month, and corresponding month preceding year. (Table.) Analysis precedes table. Published since September 1941. Summary for 1948 shows the same data, by months, for the year and gives comparative figures for 1947. Production, shipments and consumption data show for each year, 1942–1946.

Series M13C (Monthly)
Red Cedar Shingles. Production, shipments, and mill operations. Quantity (squares).

Reports were issued during the period covered by this catalog for the year 1948 (3 pages, 2 tables) and for November 1948–July 1949. Each, 1 p., tables.

Red cedar shingles and shakes: Production, shipments, and mill operations, in the United States. Production and shipments of red cedar shingles by grade and length; and total production and shipments of shakes. Data are for the preceding month, current month, and corresponding month of the preceding year, and cover all known producers of red cedar shingles in the United States.
They are for use in connection with the Reciprocal Trade Agreement entered into with the Dominion of Canada. (Tables.) Published since January 1936. Summary for 1948 shows the same data, by months, for the year.

Series M14A (Monthly)

**PULP AND PAPER MANUFACTURE IN THE UNITED STATES.**

Production, consumption, and inventories. Quantity (cords; tons).

*Reports were issued during the period covered by this catalog for the year 1948 and for November 1948—July 1949. Each, 6 p., tables, charts. 1948 summary, 1 chart.*

Receipts, consumption, and inventories of fibrous materials in pulp and paper manufacture, by kind of materials, and of pulpwood, by geographic regions and by kinds, current month and preceding month. Wood pulp, paper, and board: Base and actual production, by major grades, and production, by mill classes, current month. Production, consumption, and inventories of wood pulp, by grades, current month and preceding month. Wood pulp: Supply—production, transfers, shipments, and producers' inventories; receipts, consumption, and consumers' inventories in paper and board manufacture; receipts at paper and board mills; each by grades; and consumption and inventories of wood pulp at integrated, partially integrated, and nonintegrated paper and board mills, current month. Consumption of pulpwood, wood pulp, and other fibrous materials, by mill classes, current month. Production of paper and board, by type, preceding month, current month, and corresponding month preceding year. Wood pulp, wood pulp, and other fibrous materials, by mill classes, current month. Production of paper and board, by type, preceding month, current month, and corresponding month preceding year. (Tables.) Analysis precedes tables. Comparable monthly data on the production of paper and paperboard since January 1943.

Report for 1948 summarizes the data for the year 1948 and gives comparative figures for 1947 for the major items. The production of paper and board, by type, is shown for each year, 1940–1948.

**MI4D-08 (Preliminary Report)**

**PAPER AND BOARD: PRODUCTION 1948**

A preliminary report, which will follow a final report 14A-08 when issued.

Series M15–1 (Monthly)

**COTTON AND LINTERS.** Cotton Consumption and Stocks, by States. Linters Consumption and Stocks, by Type of Consumer and in Storage. Quantity (running bales, counting round as half-bales, except foreign cotton, which is in equivalent 500-lb. gross bales). Preliminary.

*Reports were issued during the period covered by this catalog for December 1948 and 1947—August 1949 and 1948. 1 p., tables.*

Cotton (exclusive of linters): Consumed during current month and corresponding month preceding year, and on hand (1) in consuming establishments and (2) in public storage and at compresses, end of current month and end of corresponding month preceding year, for each 20 named States and all other States combined. United States totals. (Table.)

Linters: Consumed by bleachers of linters and by all other consumers, and on hand in consuming establishments and in public storage and at compresses. Same period data. (Table.) Published since 1912.

Note.—Data appearing in this report are also summarized in report entitled “Cotton Production and Distribution,” (Bulletin 185), Season of 1947–48, listed in this catalog under Agriculture Division, Cotton Ginning Reports.

Supplement to Series M15–1 & 2

**SUPPLY AND DISTRIBUTION OF DOMESTIC AND FOREIGN COTTON IN THE UNITED STATES, SEASON OF 1948–49.**

Preliminary.

Series M15–2 (Monthly)

**COTTON AND LINTERS.** Consumption, stocks, imports and exports, and active cotton spindles. Quantity (running bales, counting round as half bales, except foreign cotton, which is in equivalent 500-lb. gross bales); bale weights used in conversion: Egyptian, 725; Peruvian, 557; Indian, 400). Active cotton spindles (number). Preliminary.

*Reports were issued during the period covered by this catalog for December 1948 and 1947—July 1949 and 1948. 1 p., tables.*

Cotton: Total consumption during current month, corresponding month preceding year, and cumulative season totals current year and preceding year, for the United States and for three geographic areas (cotton-growing States, New England States, all other States); on hand and of current month and corresponding month preceding year (1) in consuming establishments and (2) in public storage and at compresses, by same State groups. Included in these totals and also shown separately are figures on Egyptian cotton, Peruvian cotton, Indian cotton, other foreign cotton, and American-Egyptian cotton. Total number of spindles active last working day of current month and corresponding month preceding year, for the United States and for the geographic areas.

Linters: Total consumed; and on hand (1) in consuming establishments and (2) in storage and at compresses, same periods as for cotton. Figures for linters are not included in cotton totals.

Imports of foreign cotton and linters, by country of production, and exports of domestic cotton and linters, by country to which exported; Preceding month, corresponding month preceding year, and cumulative season totals ending preceding month and corresponding month preceding year. (Tables.) Published since 1912.

Note.—Data appearing in this report are also summarized in report entitled “Cotton Production and Distribution,” (Bulletin 185), Season of 1947–48, listed in this catalog under Agriculture Division, Cotton Ginning Reports.
Series M15-3 (Monthly)
COTTON SYSTEM SPINNING ACTIVITY. Spindles in place, active, and spindle hours operated. Preliminary.

Reports were issued during the period covered by this catalog for December 1948—August 1949. 1 p., table.

Cotton system spinning spindles: In place end of current month; consuming 100% cotton and consuming other than cotton—active last working day and spindle hours during month; spindle hours operated on all fibers—total hours and average per spindle in place: For the United States, for three geographic areas (cotton-growing States, New England States, and all other States), and for each of 13 named States and all other States. (Table.) Published since 1912.

Note.—Data appearing in this report are also summarized in report entitled "Cotton Production and Distribution," (Bulletin 185), Season of 1947—48, listed in this catalog under Agriculture Division, Cotton Ginning Reports.

Series M15A (Quarterly)
COTTON BROAD WOVEN GOODS. Production (linear yards); yarn consumed (pounds); machinery in place and active (number).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 2nd quarter 1949. 10 p., tables, summary table, charts.

Summary of production, by class of fabric. Production of total cotton woven goods over 12 inches in width (except tire fabrics and laundry nettings) and by nine types, by kind of goods. Production of tire cord and fabric, total, and by type of fabric. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarns consumed in the production of the fabrics reported, by type. Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). (Tables.) Analysis precedes tables. Published since January 1943. All known manufacturers in the industry were canvassed.

Series M15C (Quarterly)
RAYON BROAD WOVEN GOODS. Production (linear yards); yarn consumed and stocks of rayon yarn (pounds). Machinery in place and active (number).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 to 2d quarter 1949. 4 p., tables, summary table.

Summary of production, by class of fabric. Production of total rayon broad woven fabrics and by four types and all other rayon mixtures, by type of fabric. Production of silk, nylon, glass, and other fabrics, total, and by kind. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarn consumed in the production of fabrics reported by type. Stocks of filament rayon yarn on hand owned by reporting plants. Consumption and stocks of synthetic staple fibers, current and preceding quarters. Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised), except as indicated. (Tables.) Analysis precedes tables. Published since July 1943. All known manufacturers in the industry were canvassed.

Series M15G (Annual)

Data compiled from reports filed by finishers bleaching, dyeing or printing cotton, rayon, silk, nylon, and other synthetic broad woven fabrics. The statistics in the summary table for 1947 are from the 1947 Census of Manufactures, with no break-down available by type of fabric or end-use. Table 3 shows quantity of fabric finished in 1948 by State, and by type of finish. End-use was reported for 8,585 million yards of finished fabric.

Series M15H (Monthly)

Reports issued during the period covered by this catalog were for November 1948—July 1949. p. 10—11, tables, charts.

Summary: Machinery and hours operated; consumption on woolen and worsted systems (pounds, scoured basis); and production of tops and yarns (pounds). Woolen and worsted machinery and machinery activity: Machinery in place end of current month, and in operation one or more days during month; and hours operated (first shift, second shift, third shift). Consumption of shorn and pulled wool of the sheep: Apparel class, on woolen and worsted systems, scoured basis; carpet class, greasy basis and scoured basis. Fibers consumed for spinning on the woolen and worsted systems (for yarns, except carpet, and for carpet and rug yarns). Production of tops and noils, each by type (wool of the sheep, mohair, rayon, all other). Yarns (except carpet) and carpet yarns spun on the woolen and worsted systems. Data are weekly averages for preceding month, current month, and corresponding month preceding year, and aggregates, current year-to-date and preceding year-to-date. (Tables.) Analysis precedes tables. Most of the data have been published since 1934. In the March issue aggregates are shown for the quarters, January to March 1949, and 1948. Yearly figures are shown for January—December 1948 and 1947.

Series M15K-08 (Annual)

Includes two kinds of statistics: (1) 1947 and 1948 data for a group of identical establishments classified in the knit cloth for sale industry, which reflect
differences in the scope and pattern of operations between these years; and (2) 1947 Census of Manufacturers data, showing total United States output of all known mills for that year.

Series M16A (Monthly)

**FLOUR MILLING PRODUCTS. Production, Quantity (units vary).**

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2-3 p., tables.

Wheat flour milling statistics, current month and specified prior months: Wheat ground (bushels); production (wheat flour, sacks; offal, tons); daily 24-hour capacity in wheat flour (sacks); wheat flour production as percent of capacity; average pounds of wheat per sack of flour; average pounds of offal per sack of flour; and flour extraction rate (percent). Wheat flour production, by 20 named States and other States combined, current month and specified prior months. Rye flour milling statistics, current month and specified prior months: Rye ground (bushels); rye flour produced (sacks); and offal produced (tons). (Tables.) Data on wheat flour and stocks since 1925.

Report covering December 1948 data shows flour stocks end of quarter, current year and preceding year.

Series M16C (Monthly)

**CONFECTIONERY AND COMPETITIVE CHOCOLATE PRODUCTS.** Manufacturers' sales. Value. Quantity (pounds).

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2 p., tables, charts.

Sales by kind of business for specified States and for geographic division totals (Middle Atlantic and South Atlantic combined): Number of firms reporting; percent change in sales, current month from preceding month, and from corresponding month preceding year; and dollar volume of sales, current month; and sales of firms reporting year-to-date (dollar volume and percent change). Manufacturers' sales (poundage, value, and average value), by type of house (package, bar, bulk goods, general line, and unclassified), current month and corresponding month preceding year; and year-to-date figures (pounds and value), current year and preceding year, with percent change. (Tables.)

Series M17-1 (Monthly)

**FATS AND OILS. Factory production and consumption.** Factory and warehouse stocks. Quantity (units vary). Preliminary.

Reports were issued during the period covered by this catalog for December 1948-July 1949. p. 2-6, tables.

Report covering data for December 1948 shows factory production and consumption, and factory and warehouse stocks, in the United States, of the following products, by type: Vegetable oils; animal fats; fish and marine mammal oils; greases; secondary products; and other products. Factory consumption and factory stocks of raw materials used to produce vegetable oils. Data are for current month and preceding month.

Report covering data for January 1949 shows the following preliminary data: Receipts, crushings, and stocks of raw materials at oil mills; production, shipments and transfers, and stocks, of primary products except crude oil, at crude oil mill locations; factory production and consumption, and factory and warehouse stocks of primary materials (vegetable oils, animal fats, fish and marine mammal oil, and for foots, raw and acidulated soap stock), in the United States, each by type. Beginning with February issue reports include figures on secondary products: factory production and consumption, and factory and warehouse stocks; cottonseed; cottonseed products, soybeans and soybean products: receipts, crushings, and stocks at oil mills, by States. Data are for current month and preceding month. (Tables.)

NOTE.—The report issued in March 1949, covering data for January 1949, was divided into two sections, listed as Series M17-1-19 (preliminary) and Series M17-1A-19 (preliminary). These reports replace the monthly releases previously published as Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. Data appearing in these releases are also summarized in report entitled "Cotton Production and Distribution" (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports. See also Series M17-1A, below.

Series M17-1A

One release, issued in March 1949, covers data for January 1949. 2 p., tables.

Factory production and consumption, and factory and warehouse stocks of secondary products, in the United States: Cottonseed—Receipts, crushings, and stocks at oil mills, by States; and cottonseed products—Production and stocks at oil mill locations, by States. Data are for current month and preceding month. (Tables.)

NOTE.—See note regarding revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils on Series M17-1, above.

Series M17-2 (Quarterly)

**FATS AND OILS. Factory consumption of primary and secondary animal and vegetable fats and oils, by uses.** Quantity (pounds).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 to 2nd quarter 1949. p. 2—6, tables.

Consumption of primary and of secondary animal and vegetable fats and oils, by kinds; total used in refining; total consumption other than in refining:
(1) processed in fat splitting (hydrolysis), winterizing and pressing except for salad oil manufacture, sulphonation, and winterizing for salad oil; and (2) used in production of edible products (shortening, oleomargarine, other) and inedible products (soap, paint and varnish, linoleum and oilcloth, printing inks, lubricants and greases, and other). 3. Primary materials: (Vegetable oils, animal fats, fish and marine mammal oils); (total of primary products) (other than vegetable oils) not shown separately); secondary products; (total of secondary products not shown separately).

Series M17–2 (Monthly)

Beginning with this issue Fats and Oils will be discontinued as a quarterly publication and will be on a monthly basis.

Series M17–3 (Monthly)

COTTONSEED PRODUCTS. Production and Stocks at Oil Mills. Quantity (units vary). Preliminary.

Report issued during the period covered by this catalog was for December 1948, seasons 1948–49 and 1947–48. 2 p., tables.

Crude oil (pounds), cake and meal (tons), hulls (tons), and linters (running bales): Produced August 1 through current month for seasons named, by certain specified States and all other States combined; and stocks at oil mills, end of current month, same seasons and same States.

Cotton linters: Production (running bales) and average gross bale weights (pounds) by type of cut (first cut, second cut, and mill run), through current month, same seasons and same States. United States totals. (Tables.)

Note.—This is the final release in this series. Data for January 1949 are included in the revised Series M17–1 and M17–1A which replace the old Series M17–1, M17–3, and M17–4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17–1 and M17–1A, above.

Series M17–4 (Monthly)

COTTONSEED AND COTTONSEED PRODUCTS. Quantity (units vary). Preliminary.

Report issued during the period covered by this catalog was for December 1948, seasons 1948–49 and 1947–48. 1 p., tables.

Cottonseed (tons) received at mills and crushed, August 1 through current month, and on hand at mills end of current month, for seasons named, by certain specified States and all other States combined. United States totals. Cottonseed products (seven named), same seasons: On hand at beginning of season (August 1), produced August 1 through current month, shipped out August 1 through current month, and on hand end of current month. (Tables.)

Note.—This is the final release in this series. Data for January 1949 are included in the revised Series M17–1 and M17–1A which replace the old Series M17–1, M17–3, and M17–4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17–1 and M17–1A, above.

Series M19A (Monthly)

INORGANIC CHEMICALS. United States Production, Quantity (units vary).

Reports were issued during the period covered by this catalog for November 1948–July 1949. 2 p., tables, charts.

Primary production of specified inorganic chemicals in the United States, including quantities produced for further processing in the same plant, for intra-company transfer, and for sale, preceding month, current month, and corresponding month preceding year. (Table.) Analysis precedes table. Published since 1941.

Series M19D (Monthly)

SUPERPHOSPHATE. Production, receipts, disposition, and stocks, by type. Quantity (short tons).

Reports were issued during the period covered by this catalog for the year 1948 (3 p., tables) and for November 1948–July 1949. 2 p., table.

Figures for preceding month, current month, and corresponding month preceding year: Stocks on hand beginning and end of month, production, received from other acidulators (including exchange transfers), book adjustments (account of inventory), total supply; disposition (shipments, used in reporting plants, total); for three types—normal (18% available phosphoric acid), concentrated (45% APA), and wet-base goods (18% APA). (Table.) Published since 1928; comparable data published since 1942. Number of plants reporting data on each of the three types of superphosphate. Report for 1948 summarizes the data for the year and gives comparative figures for 1947.

Series M19J (Monthly)

PAINT, VARNISH, LACQUER, AND FILLER. Sales.

Reports were issued during the period covered by this catalog for the year 1948 (1 page, 1 table) and for November 1948–July 1949. 1 p., table.

Total sales reported by 650 establishments, preceding month (revised), current month, and corresponding month preceding year. Of these, 580 establishments reported classified sales as: Trade sales of paint, varnish, and lacquer; and industrial sales (paint and varnish; lacquer). The remaining 100 establishments reported unclassified sales. (Table.) Comparable statistics for these establishments are available by months beginning with January 1936.

Series M21A (Monthly)

GRAY IRON CASTINGS. Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948–July 1949. 3 p., table, charts.

Shipments (for sale, for own use, and total) and unfilled orders for sale of total gray iron castings.
miscellaneous gray iron castings, molds for heavy steel ingots, chilled iron railroad car wheels, cast iron pressure pipe and fittings, and cast iron soil pipe and fittings; Preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years for shipments data. (Table.) All the data in this series have been adjusted to represent complete coverage of the industry.

Series M21B (Monthly)

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2 p., table, chart.

Shipments (for sale, for own use, and total); orders booked, less cancellations, for sale; unfilled orders, end of month, for sale; and monthly index of shipments: Preceding month, current month, and corresponding month of the two preceding years. Cumulative totals to date for the three years. (Table.) Coverage of the industry is complete.

Summary report for 1948 gives monthly shipments, orders booked, and unfilled orders (table 1); and yearly shipments and orders booked, 1933-1948 (table 2).

Series M22A (Monthly)

Steel Castings. Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2 p., tables, charts.

Shipments, for sale and for use, and unfilled orders for sale, by type of casting (carbon steel); alloy, including stainless, steel), preceding month, current month, and corresponding month preceding year. Shipments by type of furnace and grade of steel, same periods, and cumulative shipments to date for the two years. (Tables.) All data in this series have been adjusted to represent complete coverage of the industry.

Series M22C (Monthly)

Commercial Steel Forgings. Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2 p., table, charts.

Shipments and unfilled orders, each by type of forging (drop and upset forgings and press and open hammer forgings), carbon steel and alloy steel, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Table.) All data in this series have been adjusted to represent complete coverage of the industry, including the commercial output of captive forge shops.

Series M24-1-79 (Monthly)

Aluminum and Magnesium Wrought Products: July 1949.

This release is a combination of two Facts for Industry releases formerly issued by the Bureau of the Census—
Series M24B, Aluminum Wrought Products.
Series M24G, Magnesium Wrought Products.

Series M24B (Monthly)

Reports were issued during the period covered by this catalog for November 1948-June 1949. 2 p., table, charts.

Producers’ monthly net shipments, total, and by four major types of product (plate, sheet, and strip; rolled structural shapes, tube blooms, and tubing; and powder, flake, and paste), each month, preceding year to date current year. (Table.) Analysis precedes table.

Series M24E (Monthly)

Reports were issued during the period covered by this catalog for November 1948-June 1949. 4-5 p., tables, charts.

Shipments (for sale, for own use, and total) and unfilled orders for sale of nonferrous castings, summary, current month; same data for each of five types of castings (aluminum, magnesium, copper, zinc and zinc-base alloy, and lead and lead-base alloy die castings), by kind of casting, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Tables.) Analysis precedes tables.

Series M24G (Monthly)

Magnesium Wrought Products. Shipments. Quantity (pounds).

Reports were issued during the period covered by this catalog for November 1948-June 1949. 2 p., table, chart.

Shipments, total, and by two types (extrusions, including forging stock; and plate, sheet, and strip), each month, preceding year to date current year. (Table.) Coverage of the industry is complete.

Report covering data for December 1948 also gives totals for each year 1944-48. Reports for 1949 include totals by month for 1948.

Note—This release has been combined with M24B and will be published under the title Aluminum and Magnesium Wrought Products.

29
Series M25A-08 (Annual)

New Orders for steel boilers of 100 square feet of heating surface and over (stationary, power boilers over 15 pounds pressure; steel heating, as differentiated from power boilers; and marine), by type, each year 1940-1948, and six-month totals, January-June 1948, July-December 1948, 1947, and 1946. Stationary power (water tube boilers; water walls; steam generating capacity; and horizontal return tubular), each month January-June 1948, August 1947, and May 1946.

NOTE.—The report covering data for June 1948 was the last monthly release in this series, and the report listed here is the first annual. Future releases will continue to be issued on an annual basis.

Series M26B (Monthly)

CLAY CONSTRUCTION PRODUCTS. Production and shipments. Quantity (units vary).

Reports were issued during the period covered by this catalog for November 1948-July 1949. 4 p., tables, chart. March 15, 1949.

Number of plants, total production, and shipments (quantity and value) of unglazed brick (common and face), for the United States, Census geographic divisions, and States, current month and preceding month (revised). Same data for glazed structural tile, vitrified clay sewer pipe, drain tile, glazed and unglazed hollow facing tile, and glazed and unglazed floor and wall tile and accessories including quarry tile, for the United States and for Census geographic divisions, same periods. (Each of the nine geographic divisions report data on certain products; other products are reported by selected divisions or combinations of divisions.)

Same data for unglazed brick (common and face) and unglazed structural tile, by 17 regional marketing areas, same periods. (Tables.) Published since 1926. The magnitude of the estimates is given in the footnotes.

Series M26D (Monthly)

ASPHALT AND TAR ROOFING AND SIDING PRODUCTS. Shipments. Quantity (square; square feet; tons).

Reports were issued during the period covered by this catalog for November 1948-July 1949. 2 p., tables, chart.

Shipments of the following products, United States total, Eastern area, and Western area, current month and preceding month (revised): Asphalt roofing, total and by kind; asphalt sidings, total and by kind; insulated brick siding, all types and finishes; asphalt board products; saturated felts, total and by kind; and saturated sheathings and coated sheathings. Shipments of asphalt roofing, asphalt sidings, and saturated felts, by geographic divisions, current month. (Tables.) Published since January 1928; comparable data published since September 1943. Statistics are based on practically complete coverage of the industry, except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M31B-08 (Annual)

Shipments (number and value) of domestic water systems, summary by jet and nonjet types and by deep- and shallow-well types; domestic hand and windmill pumps; pump jacks; cylinders, sold separately; windmill heads; and windmill towers; January-June (revised) and July-December 1948; and by years, 1944-1948. Shipments of domestic water systems, hand and windmill pumps, windmill heads, and windmill towers, total number and value, by years, 1922-1948. (Tables.) Analysis precedes tables. Published since 1926.

NOTE.—The June 1948 release which was issued under the title “Domestic Water Systems, Pumps, and Windmills” was the last one in this series to be issued on a monthly basis. The term “Farm Pumps,” as now used to describe the survey, encompasses the same group of products as were covered by the monthly survey referred to above. The report listed here is the first annual in this series. Future releases will be issued on an annual basis.

Series M31E (Quarterly)

FANS, BLOWERS, AND UNIT HEATERS. Shipments and orders booked. Value.

Reports issued during the period covered by this catalog were for 4th quarter 1948 to 2nd quarter 1949. 1 p., table.

Fan and blower group: Centrifugal fans and blowers; propeller fans; and axial fans; each by type; and parts for fans and blowers. Unit heater group: unit heaters by type; unit ventilators; heat transfer coils, by type; and parts for unit heaters and unit ventilators. Air washers. Data for shipments are for current quarter and preceding quarter (revised); orders booked, preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). (Table.) Analysis precedes table. Published since January 131. The manufacturers in this survey account for more than 90 percent of total shipment of these products.

Series M32B-08 (Annual)

Annual release contains revised statistics for 1948 on the number of lamps produced, shipped and held in factory stocks. It incorporates all the statistics published in this series for 1947.
Series M34A-08 (Annual)

MACHINE TOOLS: 1948.

Series M35A-08 (Annual)

FARM MACHINES AND EQUIPMENT: Summaries of manufacturers' shipments (complete units, attachments and parts, total) and shipments by product groups, 1936-1948. Percentage distribution of manufacturers' shipments between complete units and attachments and parts, and between domestic shipments and shipments for export, by each product group, 1945 and 1947. Value of shipments by geographic divisions and States, 1948. Summary of production (number) and manufacturers' shipments (value), by individual items, 1948 and 1947. Manufacturers' shipments, including tractors for farm use and nonfarm use (complete units, attachments and parts, total), 1929-1948. (Tables.) Tractors: Manufacturers' shipments, by farm use and nonfarm use, 1943-1948. (Table.) Charts show: Shipments of farm machines and equipment, 1936-1948; shipments by States and geographic division, 1948; and manufacturers' shipments of selected farm machines and equipment, 1936-1948 (six types).

Series M36A (Quarterly)

Reports issued during the period covered by this catalog were for 4th quarter 1948 to 2nd quarter 1949. 3 p., tables.

Shipments by major types, current quarter and preceding quarter (revised). Excavating and earth-moving equipment (other than power cranes and shovels), total shipments and shipments for export (number and value), by type of equipment, current quarter and preceding quarter (revised). Data are shown for the following types of equipment: Road construction and maintenance machinery (ditchers and trenchers, scrapers, wagons, graders, rippers and rooters, rollers, loaders, etc.); construction machinery for mounting on tractors (cranes, shovel-type loaders, dozers, and cable power control units); tracklaying tractors, by horsepower; wheel-type heavy-duty industrial tractors; and portable well and blast hole drills. Shipments of power cranes and shovels, current quarters and preceding quarter. (Tables.) Analysis precedes tables.

Series M37A-08 (Annual)

Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export), by type of tractor (complete, wheel type, tracklaying, garden), each year 1922-48 (except 1932-34). Manufacturers' domestic shipments and shipments for export, by farm and nonfarm use, by type of tractor, 1948 and 1947. Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export) of tractor attachments and parts, by type of product, 1948 and 1947, and annual totals, 1923-48 (except 1932-34). The statistics represent complete coverage of the industry. (Tables.) Analysis precedes tables. Charts show production of tractors, by type, 1926-48; and shipments for farm and nonfarm use, and domestic and export shipments, by type, 1948 and 1947.

Series M42A (Monthly)

Reports were issued during the period covered by this catalog for November 1948-July 1949. 4 p., tables, charts.

Complete aircraft shipments, number and airframe weight (pounds), by type of aircraft, current and preceding months, cumulative total to date current year and corresponding period preceding year, and total for 12 months to date current year and corresponding period preceding year. Shipments of complete civil aircraft and of civil aircraft engines and other products of plants manufacturing complete aircraft and aircraft engines, current and preceding months, and cumulative total to date current year and corresponding period preceding year; shipments of aircraft engines (number and horsepower)—number data, same periods, and horsepower data, current month and preceding month only.

Unfilled orders (number) for civil transport-type aircraft, each month, current year to date. Number of employees in complete aircraft and aircraft engine plants, each month, preceding year to date current year. United States exports of domestic aircraft and aircraft engines (number and value), current and preceding months and cumulative total to date current year and corresponding period preceding year. Coverage of the industry is complete. (Tables.) Analysis precedes tables.

Series M42 D (Quarterly)

BACKLOG OF ORDERS FOR AIRCRAFT COMPANIES.

Reports issued during the period covered by this catalog were for the first two quarters of 1949. 2 p., table, charts.

Backlog of orders, total new orders, and net sales reported in this series. Comparative figures are given for 1948 and 1949.
Series M51B (Annual)
AIRCRAFT PROPellers. Propellers and parts shipped (value) and number of employees in aircraft plants. 1948.
For Revised figures on this report see M42E-08 (annual) revised, below.

Series M42E-08 (Annual) revised
AIRCRAFT PROPellers. Propellers and parts shipped (value), and number of employees in aircraft plants. 1948. 2 p., errata sheet, tables. June 27, 1949
Contains corrected figures on the data published in the annual (M42E-08), above. It is a compilation of reports received from all known companies manufacturing aircraft propellers. Reports on the value of goods shipped to military and civilian groups and on the number of employees in the plants.

Series M42E-1-6-9 (Semi-Annual)
Includes data on the value of shipments of propellers and propeller parts, and all other products made in plants producing propellers. Data are also shown on number of civil aircraft propellers shipped and number of employees in propeller plants.

Series M43F (Monthly)
TRUCK TRAILERS. Production and shipments. Quantity (units).
Reports were issued during the period covered by this catalog for October 1948–June 1949. 10 p., tables, charts.
Cast iron boilers, radiators, and convectors, shipments and inventory. Oil burners for central heating, steam generation plants, and industrial process equipment: Total shipments of burners and units, shipments of boiler-burner units, and of furnace-burner units (number only); shipments of burners separately (value data for current month and preceding month only); and inventory and unfilled orders of burners and units. Warm air furnaces: Total shipments and inventory of cast iron and steel furnaces, shipments of cast iron furnaces, and of steel furnaces. Domestic heating stoves, domestic cooking appliances (except electric), and water heaters (except electric) and range boilers: Shipments, inventory, and unfilled orders, for each of the three classifications. Floor and wall furnaces: Shipments, inventory (current months and preceding month only). Gas appliances, by type of gas, shipments (number only). (Tables.) Analysis precedes tables.
Data on shipments are for preceding month, current month, corresponding month preceding year, and year-to-date current year and preceding year, and show quantity and value, except as noted. Data on inventories and unfilled orders are for preceding month, current month, and corresponding month preceding year, except as noted, and show quantity only, as of the end of period.

Series M51H (Quarterly)
PLUMBING FIXTURES. Production, shipments, and stocks. Quantity (units).
Reports issued during the period covered by this catalog were for the 4th quarter 1948 to 2nd quarter 1949. 2 p., tables, charts.
Value of shipments, by type of material (vitreous china, concrete and composition glazed earthenware, and metal), preceding quarter, current quarter, and corresponding quarter preceding year. Production, shipments, and stocks at end of quarter, by type of fixture, current and preceding quarters. (Tables.) Analysis precedes tables. Coverage of the industry is complete.

Series M51N (Monthly)
HEATING AND COOKING EQUIPMENT. Shipments, inventories, and unfilled orders. Quantity (units vary).
Reports were issued during the period covered by this catalog for October 1948–June 1949. 10 p., tables, charts.
Manufacturers’ shipments (number and value) of air conditioning equipment; components and accessories for air conditioning and commercial refrigeration equipment. Detailed information by type of product. Summary data on domestic and export shipments, by major class of product.
releases covering data through December 1948. Number of garments cut.

Reports were issued during the period covered by this catalog for October 1948 to May 1949. 3 p., table, charts.

Total cuttings and average weekly cuttings of selected men's garments, by type of garment (suits, overcoats and topcoats, separate dress and sport trousers, work pants, dungarees and waistband overalls, bib overalls, shirts, pajamas, and undershorts made from woven fabric), preceding period, current period, and corresponding period preceding year, and cumulative totals to date for the two years. (Table.) Analysis precedes table. Published since 1923. Charts show average weekly production of men's suits (including summer), overcoats and topcoats, dress and business shirts, and dress and sport trousers.

Note.—The coverage of this report has been reduced to a limited group of manufacturers, restricting the publication of detailed data showing the number of garments cut in each of the principal producing areas, previously shown in this report.

Series M67B-08 (Annual)

Men's and Boys' Apparel: Summary 1948.
5 p., tables, charts. September 1, 1949.

The 1948 figures are based on reports of firms previously covered in the Facts for Industry release. The figures include estimates of production for those companies which reported in the Census of Manufactures but not in the Current survey. In the few cases where an estimate of more than 30 percent would have been required no figures are shown.

Series M67C (Monthly)

Knit Underwear and Nightwear. Production, consumption, and shipments. Quantity (underwear and nightwear, dozens; materials consumed, pounds).

Reports were issued during the period covered by this catalog for October 1948-June 1949. 4 p., tables, chart.

Summary statistics for production and materials consumed, by type; production and shipments of knit cotton and/or wool and other knit underwear and nightwear and of knit outerwear shirts made in underwear mills, by type and age-sex group; consumption of yarns and of purchased knit fabrics, by type; and value of net shipments in the knit underwear industry. Data are for preceding period, current period, and corresponding period preceding year. (Tables.) Analysis precedes tables. Published since 1924.

Series M67C.1-08 (Annual)

Knit Rayon and Nylon Underwear and Nightwear: 1948.

Release covers all production and shipments in the United States of the items named. Data for 1947 are based on the Census of Manufacturers, and are derived from reports filed by all known manufacturers, including cut-and-sew shops as well as knitting mills.

Statistics for 1948 have been compiled from reports received from producers accounting for 89 percent output. Data for 1949 have been adjusted to include estimated output and shipments of firms which did not report their 1948 operations.

Series M67D (Annual)

Gloves and Mittens: Summary for 1948.

Pairs of dress and work gloves produced by age-sex group, and by material and construction types. Published since 1944. Comparative figures for 1947 and 1948.

Series M67G (Annual)

Knit Outerwear: 1948

Garments produced, by approximately 60 sex, age, fiber content, and kind of garment classifications; quantity of yarns and purchased knit fabrics consumed, by fiber content; and value of shipments by States, with United States totals for 1948 and 1947.

Series M67H (Quarterly)

Women's, Misses', and Juniors' Outerwear. Production and shipments. Quantity (units vary).

Reports issued during the period covered by this catalog were for 3d and 4th quarters 1948 and 1st quarter 1949. 9 p., tables, summary tables, charts.

Value of net shipments and of returns, by industry and area of production, current quarter and preceding quarter. Production, by type of garment and price group; Preliminary total for current quarter; and production by type of fiber, preceding quarter.

Summary tables show dollar shipments by industry and by area, current quarter, corresponding quarter preceding year, and cumulative totals current year to date and corresponding period preceding year; percent returns to gross shipments, by industry, same periods; and cutings of selected garments by type of garment and wholesale price group, preceding quarter, current quarter, corresponding quarter preceding year, and cumulative totals current year to date and corresponding period preceding year. (Tables.) Analysis precedes tables.

Series M67J (Annual)

Garments cut, by fiber and price group, for various types of garments. Value of shipments and returns by area and State of production.

Series M67K (Annual)

Children's and Infants' Outerwear: Summary for 1948.

Value of shipments and returns of the children's and infants' outerwear industries, by industry and area of production. Production of outerwear by type of garment and fabric.

**SHOES AND SLIPPERS.** Production and shipments. Quantity (pairs).

Reports were issued during the period covered by this catalog for October 1948–June 1949. 5 p., tables, chart.

Summary of production, by kind of footwear, preceding month, current month, and corresponding month preceding year; and percent of production, by type of outsoles, current month. Production and shipments, by States, current month, preceding month, and cumulative totals to date current year and preceding year. Production by kind of footwear, by age-sex groups, preceding month, current month, and corresponding month preceding year, and cumulative total to date current year. Production by kind of footwear, by type of upper, and by type of outsoles, by age-sex groups, current month. (Tables.) Analysis precedes tables. Some comparable data available since 1921. Coverage of the industry is generally complete.

Series M68A (Annual).

**SHOES AND SLIPPERS: SUMMARY FOR 1948.**

Gives comparative figures for the production of shoes and slippers, by kind for 1948 as compared with 1947. Explains the relationship between the 1944 Census of Manufactures and Facts for Industry figures. For further description see M68A (monthly).

Series M75-1 (Monthly)

**CONTAINERS AND CLOSURES.** Production, shipments, stocks, and unfilled orders. Quantity (units vary).

Reports were issued during the period covered by this catalog for October 1948–June 1949. 12-1/4 p., tables, charts.

Summary of shipments of containers and closures, and total shipments, stocks, and unfilled orders of steel shipping barrels, drums, and pails, preceding month, current month, and corresponding month preceding year; shipments, stocks, and unfilled orders of steel shipping barrels and drums (heavy type, light type) and of steel shipping packages, kegs, and pails produced for sale, preceding month, current month, corresponding month preceding year, and cumulative totals to date for the two years; shipments and stocks of steel shipping packages, kegs, and pails produced for own use, same periods; shipments of metal cans by type of product packed, same periods, and for sale and for own use, each month, preceding year to date current year; shipments, production, and stocks of glass containers, current and preceding months, and cumulative total to date current year for shipments and production; production and shipments of commercial and home closures for canning and packaging containers, preceding month, current month, corresponding month preceding year, and cumulative totals to date for the two years, and raw materials consumed in the manufacture of these products, current and preceding months and cumulative total to date current year. (Tables.) Analysis precedes tables. Coverage of the industry is virtually complete.

Series M77E-08 (Annual)

**PRESSED AND BLOWN GLASSWARE (EXCEPT GLASS CONTAINERS).** Shipments (Quality and Value). 1948.

Includes figures for 1948 and 1947. The figures for 1948 include only products manufactured from glass produced in the reporting establishment. The 1947 figures include in addition some products made from purchased glass.

### 6. POPULATION DIVISION

The Census of Population is taken every ten years, the last being that for 1940. Currently, population estimates are prepared from available data. The Current Population Survey obtains information on employment and unemployment from a sample of 25,000 households each month. This survey also yields considerable information on changes in population characteristics. Current national housing data are also obtained by means of supplements to the Current Population Survey.

Age at first marriage, remarriage, widowhood, and divorce, for persons ever married, by sex and present marital status (table 11). Data are for persons 14 years old and over, for the U. S. civilian population, April 1948.

Text gives analysis, related reports, definitions of terms and explanations, and source and reliability of the estimates.

Special Reports (P-23)

No. 1. THE DEVELOPMENT OF THE URBAN—RURAL CLASSIFICATION IN THE UNITED STATES: 1874 TO 1949, BY LEON E. TRUESDELL, CHIEF DEMOGRAPHER, BUREAU OF THE CENSUS.

The population of the United States was first classified into "urban" and "rural" in 1874. Text of this report traces, from that date through each subsequent decennial census, the development of the standards applied, and methods used in distinguishing "urban" from "rural" population areas into "farm" and "non-farm" beginning with the Census of 1930. States the classification standards to be used in the Census of 1950. Tables show:

1. Population in places of 8,000 and over, places of 2,000 and over from 1794 to 1949.
2. Figures for urban, rural, non-farm and rural farm population for 1920, 1930 and 1940.
4. Changes made between one Census and another in 1900 and 1910, urban totals for certain States.
5. Rural population, 1890 and 1880, as defined in 1890.
Population Estimates (P–25)

Forecasts of the population of the United States including armed forces overseas, July 1, 1948, to 1955, and current provisional estimates, July 1, 1947: By age and sex, with allowance for 1,000,000 net immigration, and with no allowance for immigration; population under 25 years of age (total, male, female), by single years of age, with no allowance for immigration. Forecasts of elementary and high school enrollment, by grades, for the United States, April 1948 to 1960, and current estimates, April 1947. (Tables.) Analysis precedes tables. Text discusses revision of earlier forecasts of population, assumptions and methods, and gives limitations and reliability of the forecasts.

Note.—This report includes revised forecasts of population for July 1, 1948, to 1955, which supplement the figures published in the report entitled Forecasts of the Population of the United States, 1948–1975, issued in March 1948.

Estimated population of the United States, both including and excluding persons in the armed forces overseas, and estimated civilian population, November 1 and December 1, 1948, and January 1, 1949.

Includes estimates for all ages from children under five to people over sixty-five; estimates of population including and excluding armed forces overseas. Age composition, methods used, their limitations, and reliability are discussed. Percent distribution is given by age, of the estimated population of continental United States including armed forces overseas, July 1, 1948, with comparative figures for 1948. (Tables.)

Note.—Estimates for July 1 of each year, 1930–1945, comparable to those for 1946 to 1948 given here, have been published in Population—Special Reports, Series P–47, No. 3, and P–45, No. 5.

1 p., June 2, 1949.

Estimated population of the United States, both including and excluding persons in the armed forces overseas, and estimated civilian population, February 1, 1949, March 1, 1949, and April 1, 1949.

Estimates of the nonwhite population, by race, including the armed forces overseas for July 1 of each year 1940–1947, are shown in the accompanying table of the release. It states proportionate increases by group. Estimates presented are based on the 1940 Population Census. Presents five nonwhite groups: American Indian, Chinese, Japanese, Negro, and an inclusive group for other races. Further estimates (which include the white race) arranged by age and sex distribution may be found in Population—Special Reports, Series P–47, No. 3, and Current Population Reports, Series P–25, No. 2.

1 p., table, June 30, 1949.

Estimated population of the United States: 1940–1949, both including and excluding persons in the armed forces overseas, and estimated civilian population, monthly, from January 1 to May 1, 1949; from May 1 to December 1, 1948, and annual figures from April 1, 1940, to July 1, 1947.

Gives the population of the United States both including and excluding the figures for the armed forces overseas. Table presents provisional figures for 1947, 1948, and 1949.

The estimates in this report supersede the figures for February 1, 1947, to June 1, 1949, given in Current Population Reports, Series P–25, No. 23.

Report gives estimates of the total population of the Washington, D. C., Metropolitan area: 1940 to 1948, including armed forces stationed in the area; also gives estimates of the civilian population of the Washington, D. C., Metropolitan area: 1940 to 1948.
No. 29. Estimates of the Population of Hawaii, Puerto Rico, the Panama Canal Zone, and the Virgin Islands of the United States: 1940 to 1948.
Estimates of total population include the civilian population and the armed forces in the area. Figures for the civilian population exclusive of the armed forces are included in the table.

Table lists total population, civilian population and total population of continental United States, including armed forces overseas. Figures are for years 1949, 1948, and 1940 to 1947. Comparable estimates for each month in 1947 are available in Current Population Reports, Series P-25, No. 27.

Persons employed in non-agricultural industries and in agriculture: By hours worked during survey week, 1948 and 1947 (table 2); persons at work, by average number of hours worked during survey week, 1943-48, including revised figures for March 1943-June 1945 (table 11); by class of worker and sex (tables 9, 10); and by age and sex (tables 5, 6). Employed persons: By age and sex (table 4); with a job but
not at work, by reason for not working (table 13); and by major occupation group, by sex (table 15). Unemployed persons: By age and sex, and by duration of unemployment (tables 7, 12). Data are for 1948 and 1947, except as indicated, and are for persons 14 years of age and over.

Text tables give summary of estimates, 1948, 1947, and 1940: occupational distribution of the experienced civilian labor force, April 1948 and March 1940; labor force participation rates and unemployment rates, by age and sex, 1948 and 1940. Text discusses developments in employment and in unemployment, comparability with related data, and gives definitions, explanations, and source and reliability of the estimates.

Years of schooling completed by noninstitutional persons, 14 years of age and over, by age, color, sex, and veteran's status for the United States for October 1946 to 1948, and for April 1940 (Table 1). Employed persons, 14 to 19 years, by hours worked during the survey week, by age, school enrollment and sex (October 1948) (Table 2). Employment status for same group (Table 3). Same age group employed in agriculture, and in nonagricultural industries, by class of worker, school enrollment and sex (October 1948) (Table 4). Major occupation of employed persons 18–64 years old, by years of schooling completed and sex.

No. 15. WORK EXPERIENCE OF THE POPULATION IN 1948.

8 p., tables, June 29, 1949.

Estimates are based on a sample of the type of work experience, by persons who worked for pay or profit. (Table 1.) Average number of persons employed in specified types of work by sex during 1948. (Table 2.) Work experience in 1948 of the civilian noninstitutional population 14 years old and over, by employment status and by labor force status and age in December 1948, by sex. (Tables 3 and 4.)

P-57 (Monthly)

THE MONTHLY REPORT ON THE LABOR FORCE.

Reports were issued during the period covered by this catalog for December 1948-August 1949. 12 p., tables, chart.

Summary of estimates of the number of persons 14 years of age and over, by employment status, preceding month, current month, and corresponding month preceding year. Estimates of agricultural and nonagricultural employment, by sex, same periods; and by hours worked during the survey week, current month and specified prior months. Estimates of the noninstitutional population, by employment status and sex, and of the male veterans of World War II, current month and specified prior months. (Tables 1–5.) The remaining tables contain detailed labor force data for a week in the current month. An unnumbered table shows the approximate differences that may arise as a result of sampling variability for estimates of selected sizes. Chart illustrates trends in the labor force, 1940 to date current year.

P-59 (Monthly)

GROSS CHANGES IN THE LABOR FORCE.

Reports were issued during the period covered by this catalog for January-August 1949. 4 p., tables.

Summary of net change and of gross changes (total additions and total reductions) in employment status, by sex. Gross changes in the civilian labor force, by age and sex. Gross changes, by type of change and sex, in the following: Civilian labor force; agricultural employment; nonagricultural employment; and in unemployment. (Tables.) Text gives analysis of tables, definitions and explanations, and source and reliability of the data.

NOTE.—The report covering data for January–February 1949 is the first release in this series which was more detailed information on labor force dynamics than is available in the P-57 series listed above.

Consumer Income (P-60)

No. 5. INCOME OF FAMILIES AND PERSONS IN THE UNITED STATES: 1947.

Distribution of families and individuals, by total money income level, for the United States, urban and rural, 1947: Total, urban (by size of place) and rural; by color; by status; by age of head; by veteran status; by migration status of head; by number of paid workers; distribution of families, by number of children under 18 years of age, and by percent of family total money income received by female members of the family. Comparable data on total money income levels for 1944 to 1946. Primary families and individuals, with wage or salary income—distribution by wage or salary level and receipt of nonwage income (1939 and 1944 to 1947), and median wage or salary income by selected characteristics (1947 and 1939).

Distribution of persons 14 years of age and over, by total money income level, by sex, for the United States, urban and rural, 1947: By age and veteran status; by relationship to head of family; by major occupation group and industry group; by receipt of wages or salaries. Comparable data for 1944 to 1946. Persons 14 years old and over, with wage or salary income: Distribution, by wage or salary level, by receipt of nonwage income; and median wage or salary income, by color and major industry group, by sex, 1947 and 1939. (Tables.)

The statistics in this report are based on supplementary questions asked in May 1948, which were
included to obtain statistics on the relative importance of the criteria which identify living quarters as separate dwelling units. Characteristics include: bathing equipment, cooking equipment, kitchen sink and entrance, for occupied units (Tables 1 and 4). A summary of selected equipment items, urban and rural (Table 2). Entrance by number of rooms in multi-unit structures (Table 3). Cooking equipment by number of burners, built in ovens, etc. (Table 5). Principal fuel used for cooking (Table 6). Eating arrangements of lodgers, urban and rural (Table 7). Entrance to the living quarters and bathing equipment for lodgers (Table 7).

Prisoners (P-80)

Prisoners executed, by offense (all offenses, murder, rape) and by race, for each of 30 named States. Prisoners executed, by age and race, same States. (Tables.) Analysis precedes tables.

Census Publication Series

CATALOG AND SUBJECT GUIDE. Quarterly and cumulative. A classified guide to the contents of all publications issued to date during the year. Subscription price $1.50 for four consecutive issues (domestic) and $2 (foreign). Quarterly issues individually priced.1

Reports covering 3d quarter 1948 and 1st quarter 1949 were issued during the period covered by this catalog. p. 42-130.

viii, 363 p., tables. $2.50 (buckram.)

Presents in compact form for ready reference, approximately 3,000 statistical time series which cover various periods from 1789 to 1945. These statistics reflect economic, social, and political development of the Nation since the Federal government was formally established. It is designed to serve two immediate needs. (1) To provide through brief descriptive text and precise source notes, a guide to the types of historical data available, so as to inform the user where future data can be obtained.

Objectives are similar to those of the annual Statistical Abstract of the United States, except that the annual volume emphasizes current data with limited historical data as background.

The historical statistics selected for presentation consist primarily of data readily available in Federal agencies.

MANUAL OF TABULAR PRESENTATION; an outline of Theory and Practice in the Presentation of Statistical Data in Tables for publication; prepared by Bruce L. Jenkinson, Chief, Statistical Abstract Unit, Bureau of the Census. 1949.

xiv, 266 p. $1.50 (buckram.)

The Manual is designed as a reference aid for use by analysts and technicians of the Bureau of the Census.

This volume is intended to lead the analyst or technician towards the solution of his particular problem in table design and preparation.

HOW TO USE THIS PUBLICATION

CENSUS PUBLICATIONS, 1949, CATALOG AND SUBJECT GUIDE is designed to give users of published Census statistics an easy, fast, and direct method of locating desired information. The descriptive information relating to published reports, which was previously included in the SUBJECT GUIDE of this volume, has been transferred to the CATALOG section.

The subject entries in the SUBJECT GUIDE are directly keyed to the reports listed in the CATALOG by the use of a reference numbering system. All publications are arranged in the CATALOG under the following subject headings: Agriculture (1), Business (2), Foreign Trade (3), Governments (4), Industry (5), Population (6), and Miscellaneous (7). The first digit of the reference number designates the major subject within which the report is listed. Thus, all reports relating to agriculture have reference numbers beginning with 1. Reference numbers for all business reports have 2 in the first digit, etc. The second digit of the reference number further classifies the reports by broad categories. For example, Business Division reports on Retail Trade are classified under 2–1, Trade Studies, 2–2, Wholesale Trade, 2–3, etc. Reports carrying a series number are further identified by the series number shown in parentheses following the 2-digit reference number.

The user of the CATALOG AND SUBJECT GUIDE may first consult the SUBJECT GUIDE and secure the reference number or numbers shown for the subject on which he is looking for information. The reference number is then used as a key in locating the desired reports in the CATALOG section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page.

RELATIONSHIP TO OTHER CATALOGS AND GUIDES

The CATALOG AND SUBJECT GUIDE is issued on a current basis each quarter and cumulated to the annual volume. Thus, this volume replaces the January–March, January–June, and January–September issues of the CATALOG AND SUBJECT GUIDE for 1949. A monthly LIST OF PUBLICATIONS ISSUED, which does not include regular monthly and quarterly publications, enables users to be informed more currently on publications as they appear.

This publication does not replace the two other catalogs of Census publications, the CATALOG OF SIXTEENTH DECENNIAL CENSUS PUBLICATIONS and the CATALOG OF CURRENT CENSUS PUBLICATIONS. The first, the CATALOG OF SIXTEENTH DECENNIAL CENSUS PUBLICATIONS, lists all the publications of the 16th Decennial Census with the exception of a few special reports which were issued subsequent to March 31, 1946. The CATALOG OF CURRENT CENSUS PUBLICATIONS lists all Census publications issued for a few years prior to the beginning of 1946. For the most part, it lists all publications in a field since the last major census covering that field. The annual CATALOG AND SUBJECT GUIDE for 1946, 1947, and 1948 should be considered as supplementary to these two catalogs.

A catalog is now being prepared which will bring together all data on Census publications issued since 1790 into a single basic volume which will be, in effect, a revision of the CIRCULAR OF INFORMATION CONCERNING CENSUS PUBLICATIONS, 1790 to 1916, published in 1917.

The BUSINESS SERVICE CHECK LIST of the Department of Commerce, issued weekly at a subscription cost of $1 a year, furnishes a list of Census publications to those for whom early information is important.

This volume was prepared in the Statistical Reports Section of the Office of the Assistant Director for Statistical Standards. Many persons on the staff of the Bureau of the Census furnished information of great value in the preparation of this publication.
INTRODUCTION

CENSUS PUBLICATIONS, 1949, CATALOG AND SUBJECT GUIDE is the fourth of an annual series, listing for the calendar year the publications of the Bureau of the Census and furnishing a guide to their contents. The introductory section (pp. 1 to 5) indicates, in summary form, the principal publication-program changes which took place during the year. The catalog section (pp. 7 to 58) lists all publications issued by the Bureau of the Census during the calendar year and includes a list of technical articles prepared by staff members and published during the year. The subject guide section (pp. 59 to 111) indicates the subjects covered in all the publications issued except the staff articles and a few general publications so indicated.

Special appendices.—The appendix to this volume contains several items of interest relating to the statistical reporting of the Bureau.

NOTES ON PUBLICATION PROGRAMS

Highlights of the Bureau’s publication program for 1949 and plans for 1950 publications are outlined below to serve as an aid to librarians and others in organizing Census materials and anticipating their needs for Census publications.

General

Of utmost importance to users of statistical data are the results of major censuses. During 1949, as indicated in the catalog, almost all the results of the 1947 Census of Manufactures appeared in bulletin form. In 1950, the final volumes will be issued. During 1950, also, the results of the 1948 Census of Business will become available in a pattern similar to that of all major censuses, i. e., preliminary reports, bulletins, and final volumes.

The enumeration for the Seventeenth Decennial Census which will cover population, housing, and agriculture will start in April 1950. Preliminary results for population and housing will be available as soon as field enumeration is complete, that is, from June through the end of the year. Preliminary data on agriculture will probably begin to be available about September.

In planning Census publications, especially those resulting from major censuses, the Bureau of the Census desires to adopt a style which will facilitate the identification and use of its reports. A recent survey designed to furnish the Bureau with such advice was conducted by the Committee on Public Documents of the American Library Association under the leadership of Jerome K. Wilcox, chairman of the committee. The results of this survey were reported in College and Research Libraries for October 1949, and are summarized in a letter sent to the acting director of the Bureau of the Census by Mr. Wilcox. This letter is included as the first document in the appendix.

Recommendations such as these are gratefully received and will be followed to the extent that the procedures and resources of the Bureau permit. Comments of individual librarians will help the Bureau improve its publication program by bringing out the problems encountered by users of Census reports.

Of particular interest to librarians who have complete collections of census material or who have need for checking the collections is the forthcoming publication “Catalog of United States Census Publications, 1790–1945,” prepared by Henry J. Dubester, chief of the Census Library Project, Library of Congress. This publication attempts a classification listing of all materials issued by the Bureau of the Census and its predecessor organizations starting with the first decennial census report of 1790 and ending with the publications released to the close of calendar year 1945. This would make available a list which could then be used in connection with the annual issues of this Catalog and Subject Guide which began with the 1946 number.

Also in preparation is a Small Area Data Book which revises and consolidates the two previously issued supplements to the Statistical Abstract, the Cities Supplement and the County Data Book. This publication will probably be available in the fall of 1950.

Geographic areas.—There are reproduced in the appendix (items 2, 3, and 4) three statements prepared for the press which present information on geographic areas which the Bureau of the Census plans to use for presenting its statistics.
Agriculture Division

One special report based on data from the 1945 Census of Agriculture entitled “Farms and Farm Characteristics by Color and Tenure of Operator” was issued in May 1949. Another special report, “Farm Work Power,” was issued in July 1949. These reports, prepared to supplement other reports of the 1945 Census of Agriculture, aid in giving a detailed picture of our agricultural resources; the characteristics of farms and farm operators in their relationships to tenure of farm operator; and work power in relation to size of farm and the acreage of cropland harvested.

Enumeration for the 1950 Census of Agriculture will start in April 1950. It is anticipated that preliminary results will become available starting about September 1950.

Business Division

1948 Census of Business

The results of the 1948 Census of Business will be released in 1950. The 1948 Census of Business, the first taken since 1939, was conducted during 1949 and was an enumeration of the retail, wholesale, and service establishments in continental United States, Alaska and Hawaii.

The tabulated statistics will be made available during 1950 in four general sets of reports: (1) Preliminary county releases, largely during the first quarter of the year; (2) final Area Bulletins (States, including counties), largely during the second quarter; and (3) and (4) final Subject and Trade Bulletins during the remainder of the year.

Preliminary releases.—Census results for counties and cities, based on a preliminary tabulation of Census reports, are scheduled for issuance largely during the first quarter of 1950. For each county, data will be shown for up to 10 major retail kind-of-business groups, 4 major service groups, for the 5 operating types in wholesale trade, and the 6 major kind-of-business groups in the merchant wholesaler category. Less detail will be provided for counties with a relatively small number of business establishments, in order to avoid disclosure of figures for individual businesses.

Each county release will contain, in addition to county data, information for cities of over 2,500 inhabitants in the county. The preliminary statistics for cities will consist of totals for the major trade divisions—retail, wholesale, and service—and for hotels, tourist courts, and places of amusement, where there is a sufficient number of establishments. Figures to be shown in the preliminary releases include: Number of business establishments; 1948 sales and receipts; number of paid employees, total—November 15, 1948, pay period; number of employees, full workweek—November 15, 1948, pay period; number of proprietors of unincorporated businesses.

A copy of the preliminary release for a single county will be supplied free of charge. Single copies of releases for other counties will be furnished at a charge of 10 cents for lots of 10 or fewer counties (for example, a charge of 30 cents would be made for all releases for a State having 23 counties). The charge for a complete set of all county releases for the United States is $30. Information on the charge for more than a single copy of individual releases may be obtained on request. Since the preliminary releases will be issued at various times during the first half of 1950, it will not be possible to fill some orders upon receipt. All orders will be filled as soon as the data for the counties requested become available. Payment must be included with the order with checks or money orders made payable to the Treasurer of the United States. Orders should be addressed to Director, Bureau of the Census, Washington 25, D. C.

Bulletins.—Following the issuance of the preliminary releases the final results of the 1948 Census of Business will be issued in the form of a number of individual bulletins. Later the bulletins will be consolidated to form the final printed Census volumes. Three types of bulletins will be issued—(a) area bulletins, (b) subject bulletins, and (c) trade bulletins. Within each of these major types of bulletins, there will be a separate subseries for the retail, wholesale, and service trade divisions.

(a) Area bulletins.—This series, scheduled for issuance in the second quarter of 1950, will include individual bulletins for each State, the District of Columbia, Alaska, and Hawaii, and a continental United States summary, for each of the three major trade divisions. These bulletins will contain the basic Census data—stores, sales, pay roll, and personnel—summarized for the State by detailed kinds of business. For counties and cities, final Census figures will replace the figures in the previously issued preliminary releases. They will also show more detailed kind-of-business information in all places where there are a sufficient number of establishments. Data for a number of the standard metropolitan areas also will be shown in this series.

(b) Subject bulletins.—Individual bulletins for a number of subjects are scheduled for issuance during the third and fourth quarters of 1950. Some of the major subjects for which bulletins are planned include: credit sales and accounts receivable; sales by merchandise lines; sales by class of customer for wholesale trade; operating expense analysis for wholesale trade; inventories; employment and payroll; trucks and truck-tractors operated; legal form of organization; operating types; sales-size, firm-size (i. e., number of units operated) and employee-size analysis; leased department operations; cooperatives in wholesale trade.

(c) Trade bulletins.—Individual bulletins for selected trades or trade groups will be issued during the third and fourth quarters of 1950 and the first quarter of 1951.
Current Business Statistics

Current statistics on trends in sales of large independent retail stores are carried in the Monthly Retail Trade Reports series. Separate reports are issued for the United States and for each of the nine geographic regions. These reports contain trend figures comparing current month’s sales with the month’s sales a year previous and those of the previous month. Trends on sales in the year to date compared with those in the same period in the previous year also are provided. These figures, classified by kinds of retail business, are shown for the United States as a whole and for a number of large cities and other local areas. For an additional number of cities, trend figures are shown only for all retail trades combined. The Monthly Retail Trade Reports are based on reports from retailers in 68 Census sample areas and in 5 States where reporting programs are conducted by the Bureaus of Business Research in the State universities in cooperation with the Bureau of the Census. The Annual Inventory Report for independent retailers was not issued for 1948 as figures will be available for that year from the 1948 Census of Business. The 1949 survey has been made mandatory in accordance with the provisions of Public Law 671 (see document 5 in the appendix).

Current statistics on the trends in chain store sales, for a number of kinds of business, are included in a monthly release, with figures provided on a United States summary basis.

The Monthly Canned Foods Report, previously issued to show wholesalers’ stocks at four intervals during the year, was changed to a monthly report beginning with November 1, 1949. Resumption of this program on a monthly basis reflects the need of growers, canners, and distributors for current information on the supply position of important canned foods. The report will show wholesale distributors’ stocks of 14 canned foods each month, with figures for an additional 10 items provided 4 times a year and for a total of 33 items at the end of the year.

Current statistics on trends in wholesalers’ sales and inventories are carried in the Monthly Wholesale Trade Report. This report shows figures for a number of kinds of wholesale business summarized for the United States and for the geographic divisions. The trend figures published include comparisons of the current month with the same month in the previous year and with the previous month, as well as of the year to date with the same period in the previous year.

Included in the Bureau’s monthly trade studies are separate trend reports for the drug trade, dry goods trade, electrical goods trade, grocery trade, jewelry trade, tobacco trade, and wines and spirits trade. These reports contain figures on wholesalers’ sales and inventory trends, and also on trends in retail sales. Estimates of the dollar volume of sales and inventory, from the Office of Business Economics, Department of Commerce, are included in these trend reports.

At the request of the Secretary of Commerce, the Bureau of the Census conducted a one-time survey of Coffee Inventories in the United States as of November 30, 1949. These data were furnished to the congressional subcommittee of the Senate Committee on Agriculture and Forestry, by Philip M. Hauser, acting director on December 14, 1949. A final report will be issued in 1950.

Foreign Trade Division

Current foreign trade reports, which are available on a free basis or for a small nominal charge, are also listed in a separate catalog Monthly United States Foreign Trade Statistical Publications, which is available on request.

In addition, there are a number of special monthly foreign trade statistical reports which are prepared on a cost basis, on request. These reports contain information not available or not readily available in the reports listed in the catalog. The available special tabulations are listed in Foreign Trade Statistics Notes.

Effective with release of data for January 1949, the report “Participation of Army- or Navy-Operated Vessels (American Flag) in Shipments Under the United States Foreign Relief Program” was changed to Shipments Under the United States Foreign Aid Programs Made on Army- or Navy-Operated Vessel (American Flag) by Port of Lading by Country of Destination.

Governments Division

During 1949, it was necessary to drop the previous series of annual reports on county government finances, and to dispense currently with the preparation of further publications in the series of State and Local Government Special Studies.

Several releases were issued in each of four established series of current reports. Annual revenue, expenditure, and debt statistics were provided, through the State Finances and City Finances series, respectively: For the 48 States, individually and in total; and for the 397 cities of over 25,000 individually, for size groups, and in total. Statistics as to national totals of governmental debt and revenue, by type of government, were supplied through the series entitled “Governmental Finances in the United States.” Data on public employees and pay rolls were reported, in terms of national totals each quarter and with greater detail in annual releases, through the series on Government employment.

A two-page summary description of publications in this field, Census Bureau Publications on Governments, is available on request.

Industry Division

1947 Census of Manufactures

The complete series of 82 industry bulletins covering approximately 460 industries was published during the year. All State bulletins, with the exception of those for
New York and Massachusetts, which are scheduled for early release were also published. Four convenient reference volumes will be issued in 1950. The first volume to be issued will be volume II, Statistics by Industry. This will be followed by volume III, Statistics by States, volume I, General Summary, and published last will be the Product Supplement. In addition to collecting the statistics of the individually published series of Industry and State bulletins, the volumes will incorporate some revisions which were found necessary after publication of the pamphlets. Advance orders for these publications are now being accepted by the Superintendent of Documents, Washington 25, D. C.

1949 Annual Survey of Manufactures

The Bureau of the Census is now taking a 1949 Survey of Manufactures. (See appendix document No. 6.) The first survey is being financed by the National Security Resources Board but it is planned to include future surveys in the regular Bureau program.

These annual surveys will carry forward the basic measures of manufacturing activity (employment, pay rolls, man-hours, inventories, value added by manufacture, and expenditures for new plant and equipment) presented in greater detail in the 1947 Census of Manufactures reports. Statistics on the industrial classification, size, and location of manufacturing establishments and on shipments of products, by broad product classes, will also be provided.

The 1949 survey will cover about 40,000 representative manufacturing establishments out of a total of about 240,000. The final tables will show for 1949 as many of the 1947 Census industry and geographic totals as possible, after taking into account the rules prohibiting the disclosure of figures for individual companies, and the sampling errors of the estimates. Thus, estimated totals will be published for all major industry groups, nearly all industry subgroups, approximately 200 individual industries, most States, the 53 largest metropolitan areas, and principal industrial counties. All tables will present comparable statistics for 1947 and, in the case of a few general summary tables, for 1939 as well.

Facts for Industry

During the year, three new reports were added to the Facts for Industry series:

- Series M14D—Wood Pulp, Paper and Board (annual).
- Series M42D—Backlog of Orders for Aircraft Companies (quarterly).
- Series M42E—Air Aircraft Propellers (semiannual).

Two reports which had been discontinued with the report covering June 1948 were reissued on a monthly basis beginning with the report covering July 1949. These reports are series M19M.1a—Gelatin, except Photographic, and series M19M.2a—Animal Glue.

A special one-time release was issued in 1949, under the title of "Selected Athletic Goods (series M79A—07)."

Several reports were combined during the year:

1. Fats and Oils (series M17—1), Cottonseed Products (series M17—3), and Cottonseed and Cottonseed Products (series M17—4) were combined into a single report under the title of "Fats and Oils" (series M17—1).
2. The two series covering cotton and linters (series M15—1 and M15—2) were combined into a single report under the title of Cotton and Linters (series M15—1).
3. Aluminum Wrought Products (series M24B) and Magnesium Wrought Products (series M24G) were combined into a single report under the title of "Aluminum and Magnesium Wrought Products" (series M24—1).

There were significant changes in the scope of two Facts for Industry reports:

1. Series M67B—Men's Apparel (formerly Men's and Boys' Clothing and Cotton and Allied Garments). Beginning with the September 1948 report, some of the men's apparel items and all of the boys' apparel items were dropped from the monthly report and continued only on an annual basis.
2. Series M67II—Women's, Misses', and Juniors' Outerwear. All items except seven, which are reported by price class, were dropped from the quarterly report and continued on an annual basis. This change was introduced with the report covering the third quarter of 1948.

There was a change in periodicity of series M17—2, Fats and Oils, Consumption by Use. This report was changed from quarterly to monthly basis. The last period covered on a quarterly basis was the second quarter of 1949.

Several annual reports for which data were published only as part of the 1947 Census of Manufactures were again reissued as separate Facts for Industry releases for the year 1948. These are series M34A, Machine Tools; series M77E, Pressed and Blown Glassware; and series M27C, Refractories.

Population Division

In addition to preparing for the Seventeenth Decennial Census of Population and Housing, current work on population included the Current Population Survey, the preparation of current population estimates, and related work.

A special report entitled "The Development of the Urban-Rural Classification in the United States: 1874 to 1949," by Leon E. Truesdell, chief demographer of the Bureau, was issued as series P-23, No. 1.

In addition, libraries may be interested in a recent cooperative publication "The American Family, a Factual Background." This publication was prepared by a number of Federal Government agencies, including the Bureau of the Census, participating in the Inter-Agency Committee for the National Conference on Family Life. The first chapter, Basic Family and Population Statistics, summarizes data on families from the information available in the Bureau of the Census and the National Office of Vital Statistics. The volume is for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C., at the price of $1.25.
During May 1949 the Bureau of the Census cooperated with the Chicago Community Inventory of the University of Chicago in conducting a survey of the city of Chicago and the Chicago metropolitan area. Six releases have been issued to date by the Chicago Community Inventory. These reports deal with age, color, and sex of the population; income; the labor force; education and migration; and nativity. Copies can be obtained from the Chicago Community Inventory, 1126 East Fifty-ninth Street, Chicago 37, Ill.

Miscellaneous

The Bureau of the Census maintains in the Office of the Coordinator, International Statistics, a unit to supply statistical information concerning foreign nations to government and business in the United States and to international organizations, and to service requests received from foreign countries concerning censuses and related statistics of the United States. Source materials on foreign censuses, statistical organizations, demographic data, and related subjects are supplied by more than 75 countries of the world in accordance with exchange agreements established between the Bureau and the various foreign census and statistical agencies. Over 600 reports are received each quarter and are listed in an annotated bibliography, *Publications on Foreign Countries*. In connection with this program, *Industrial Censuses of the American Nations* was prepared; this publication is available from the Superintendent of Documents, Washington 25, D. C., at the price of 20 cents.

The *Bureau of the Census Manual of Tabular Presentation*, prepared by Bruce L. Jenkinson, chief, Statistical Abstract Unit of the Bureau, was published during the year. This manual is devoted largely to an outline of theory and practice in the presentation of statistical data in tables for publication, illustrated by specific examples throughout. It was designed to provide an operating reference manual for the use of analysts and technicians within the Bureau of the Census in connection with the planning and review of statistical tables which are to appear in census publications; and to provide a general statement in this field, with specific reference to the standards and practices of the Bureau of the Census, for the convenience of other producers of statistics, of technicians, and of students of the subject. xiv, 266 pages, $1.50 (buckram). Available from the Superintendent of Documents, Washington 25, D. C.

The Census Library Project, sponsored jointly by the Bureau of the Census and the Library of Congress, has continued its program of preparation of bibliographies of considerable interest to users of census data. In the past year, the project has prepared for publication early in 1950 the volume *Population Censuses and Other Official Demographic Statistics of British Africa*, the first of two bibliographies on Africa. The *Catalog of United States Census Publications, 1790–1945*, referred to above (p. 1) was also prepared for early publication.

For the information of users of Census materials, a list of technical articles prepared by Census staff members and published during 1949 is given on page 58. These articles are not indexed in the Subject Guide.
CENSUS PUBLICATIONS
1949

CATALOG OF PUBLICATIONS
ISSUED DURING 1949

The following list of Census publications includes those issued during the calendar year. In cases of nonrepetitive series, all of whose parts were not released during 1949, an indication is made in a note of further reports in the series expected to appear in early 1950 or of reports in the series made available earlier than 1949. The publications are listed alphabetically by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population, and Miscellaneous.

Each title is followed by a description of the contents of the publication. Groups of publications are numbered to facilitate indexing in the Subject Guide portion of this publication. These group numbers are indicated on the upper outside corner of each page.

Each report is described as to format, and, except for regular series includes the date of issue. Serials and special reports are accompanied by a descriptive text of the subject matter. All of the reports have been indexed in the Subject Guide—the second part of the catalog. Group numbers to facilitate finding are shown at the beginning of each section and in the upper outside corner of each page of the catalog.

Publications for which a price is given are for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C., or from Department of Commerce field offices located in principal cities as shown on the back cover. Other publications are free upon request from the Bureau of the Census. In requesting copies, please refer to the series number or title and state the period for which information is wanted.
The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the census of population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925. Thus, since 1920, there has been a Federal Census of Agriculture every fifth year. The next Census of Agriculture will be taken as part of the Decennial Census of Agriculture in 1950.

Each year the Agriculture Division collects statistics and issues its periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on the dates prescribed by Congress.

1-1. Cotton Ginning Reports

Consolidated Cotton Report. (Issued jointly by the Bureau of Agricultural Economics, of the Department of Agriculture, and the Bureau of the Census, of the Department of Commerce.)

Ginnings to date for five specified dates during the ginning season.

Reports issued for the period covered by this catalog were for periods prior to the eighth of December 1949. Each 1 p.

These reports cover ginnings (running bales); condition (percent of normal); indicated production (bales, 500 pounds gross) and indicated yield of lint cotton (pounds per acre for harvest) for the first of each month in which a report is issued.

Series A/C & O-1 CG

Report on Cotton Ginning. Preliminary. Quantity (running bales). Reports are issued for cotton ginned prior to specified dates during the ginning season.

Reports issued during the period covered by this catalog were for the periods prior to December 13, 1949, with comparative figures for the 1947 and 1948 crops. p. 1-2, tables.

The following ten States are covered by separate reports, with an additional report for all other cotton-growing States:

- Alabama
- Arkansas
- Georgia
- Louisiana
- Mississippi
- North Carolina
- Oklahoma
- South Carolina
- Tennessee
- Texas

Running bales (counting round as half bales) and equivalent 500-pound bales (gross weight) ginned from the crop of 1948, by 18 named States and United States total. Comparative figures for 1947 and 1946.Linters not included. (Table.)

This bulletin summarizes the available cotton statistics which are published monthly in several series of releases (including those listed in the Industry Division section of this catalog, Facts for Industry, Series M15-1, 2, and 3, and Series M17-1, 3, and 4).

4, the last three of which were replaced by Series M17-1 (revised) and M17-1A, covering data for January 1949. These reports cover data on cotton production, consumption, stocks, cotton spindles, spindle activity, cottonseed, and cottonseed products. (Tables.) Text gives source of statistics, definitions of cotton year, and description of cotton reports issued periodically.

Makes available final figures for cotton ginning and production 1948 crop. Statistics are based upon reports collected from all cotton gins in the United States. The reports were collected during the cotton ginning season. Preliminary releases were issued 8 days after the end of the reporting period for cotton ginned prior to August 1, 16, September 1, 16, October 1, 18, November 1, 14, December 1, 18 and January 16 and at the end of the cotton-ginning season.

In order to measure accurately the size of a crop, it is necessary to convert running bales, which vary in weight, into bales of uniform weight. On this basis, the weighted gross weight of running bales and the number of equivalent 500-pound bales has been computed for each county and State.

1-2. Census of Agriculture: 1945

U. S. CENSUS OF AGRICULTURE: 1945. SPECIAL REPORT. FARM WORK POWER. FARMS, CROPLAND HARVESTED, TRACTORS, HORSES, AND MULES, BY CLASS OF WORK POWER, BY SIZE OF FARM; BY STATES. 62 p., tables, charts, maps. July 1949. 30 cents.¹

This special report presents information for farms by class of work power, subdivided by size of farm. It supplements other reports of the 1945 Census of Agriculture. The statistics give a detailed picture of work power in relation to the size of the farm and the acreage of cropland harvested. Statistics are estimated on the basis of tabulations of a cross section, or sample, of all farms included in the 1945 Census of Agriculture. State totals, based on all farms enumerated in the 1945 Census of Agriculture give data on the number of farms, croplands harvested, mules, horses, and tractors by class of work power groups, by size of farm. The State is the smallest geographic area for which the data are given in this report.

U. S. CENSUS OF AGRICULTURE: 1945. SPECIAL REPORT: FARMS AND FARM CHARACTERISTICS BY COLOR AND TENURE OF OPERATOR. Price $1.25.²

Estimated number of nonfarm households reporting vegetables raised and estimated area of vegetable plot, by size of vegetable plot per household, 1948. Estimated number of hens and pullets and estimated number of eggs laid the day before the survey, by number of hens and pullets per household, November 1948. (Tables.) Text gives analysis of tables and reliability of estimates.

² NOTE.—The information contained in this report was obtained as part of the Current Population Survey.
Complete Censuses of Business were taken for the years 1929, 1933, 1935, and 1939. The first and the last of these were taken as part of the Decennial Census, 1930 and 1940. The other two were special projects. Census of Business has been taken in 1949, covering 1948, and will be taken every fifth year thereafter under new legislation. Current reports on business are outlined below.

2. BUSINESS DIVISION

2–1. Retail Trade Reports

The basic statistics from the Retail Trade Reports consist of a series of monthly figures on the trends in total receipts of sales. These figures are arranged to compare the current month's trade volume with that for the previous month and for the current month a year ago.

MONTHLY RETAIL TRADE REPORT. United States Summary

Reports issued during the period covered by this catalog, for each of the following geographic areas, were for each month December 1948–October 1949, except as indicated by dates in parenthesis.

Each United States summary, 4 p., tables, chart, map. Individual area reports, p. 3–8, tables, map.

3. FOREIGN TRADE DIVISION

Statistical information on United States imports and exports is compiled from information contained in shipper's export declarations and import entries, filed with Collectors of Customs by exporters and importers and transmitted to the Bureau. The statistics compiled include information on the dollar value, and net quantity (bales, square yards, gallons, etc.) of United States imports and exports by commodities, countries of origin and destination, and customs districts through which the merchandise enters and leaves the United States. In addition, information is compiled on the shipping weight of vessel imports and exports, the domestic to foreign port routing of the shipments by vessel and the nationality of the carrier for shipments by vessel. Information is also available on the number and tonnage of vessels entering and clearing in the foreign trade of the United States. All data for the year are summarized in the final report, FOREIGN COMMERCE AND NAVIGATION OF THE UNITED STATES. Preliminary annual data are available in the format of the current monthly reports. A catalog of current monthly foreign trade statistical publications may be obtained gratis on request.

A Census of Manufactures was taken in 1948, covering 1947. Preliminary releases of data obtained in this Census are listed below. New legislation provides that the next Census of Manufactures be taken in 1954, covering 1953, and every five years thereafter.

Current statistics on industry are issued in the Facts for Industry series. The purpose of this series of releases is to make available to manufacturers, trade groups, and other users of industrial data, current figures that are useful to them in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

5-1. Census of Manufactures: 1947

Preliminary Reports

The series numbers of the 1947 Census of Manufactures preliminary releases listed below follow the pattern of the Facts for Industry Series (see 5-2). The prefix MC instead of M is used to identify them as 1947 Census of Manufactures releases. The additional number at the end of the series number identifies a particular report on a specified subject. Each release presents general statistics for the industry. In addition, many show general statistics for selected States; others give preliminary data on production and shipments.

These preliminary reports are available without charge, but bulletins presenting final and more detailed data will be for sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. (see section 5-1-2). Bulletin numbers and prices of the report which will contain the final data for products included in each individual preliminary report are shown in parentheses below, following the series number of the preliminary report. A list of the individual preliminary releases in this series issued during the period covered by this catalog follows:

Series M13G

Lumber Production In . . . (specified States and groups of States).

Production of softwood and hardwood, summary 1942-47; production by kind of wood, 1947; sawmill stocks, December 31, 1947 and 1946; and production and number of active mills reporting, by counties, 1947.
Report for the Western States and Alaska shows, in addition, sawmill stocks classified by size of mill based on amount of lumber sawed in 1947, December 31, 1947 and 1946, and lumber production and number of active mills reporting in Alaska, 1942-47.

Note.—Reports in this series maintain the Facts for Industry series number. Series M13G-07 (originally issued as C-4) and Series M13G.1-07 through M13G.4-07, for the Middle Atlantic States, Indiana, the New England States, the Lake and Prairie States, and for three of the South Atlantic States (N. Sawyer, Hon. Charles, Secretary of Commerce.

A report submitted by Secretary of Commerce, Charles Sawyer, to the Honorable Emanuel Celler, Chairman, Subcommittee on Study of Monopoly Power, Committee on the Judiciary, House of Representatives, Washington, D. C.

The report summarizes the concentration of production in each of 452 industries, as shown by the 1947 Census of Manufactures. Includes tables showing proportionate concentration in the top 4, 8, 20 and 50 companies. Gives comparative figures to show concentration ratios in 1947 and 1935. Although not issued by the Bureau of the Census, this report is included here because of its close relation to the reports of the 1947 Census of Manufactures.

5-2. Facts for Industry

Facts for Industry uses the letter “M” for Manufactures. The first two digits represent the group classification. They are the same as those used at the 2-digit level of the Standard Commodity Classification. The specific survey is shown by the single letter following the group classification numbers.

Series M13B (Monthly)

Softwood Plywood. Production, shipments and consumption, and stocks. Consumption and stocks of materials (logs and glue). Quantity (units vary).

Reports were issued during the period covered by this catalog for the year 1948 (4 pages, 3 tables) and for November 1948-October 1949. Each, 2 p., table.

Softwood plywood (total, all types; interior: exterior): Production, shipments and consumption, stocks (sq. ft. %" equivalent). Logs: Consumption and stocks (ft. log scale). Glue: Consumption and stocks, by type (pounds). Data are for preceding month, current month, and corresponding month preceding year. (Table.) Analysis precedes table. Published since September 1941. Summary for 1948 shows the same data, by months, for the year and gives comparative figures for 1947. Production, shipments and consumption data shown for each year, 1942-1946.

Series M13C (Monthly)

Red Cedar Shingles. Production, shipments, and mill operations. Quantity (squares).

Reports were issued during the period covered by this catalog for the year 1948 (3 pages, 2 tables) and for November 1948-October 1949. Each, 1 p., table.

Red cedar shingles and shakes: Production, shipments, and mill operations, in the United States. Production and shipments of red cedar shingles, by grade and length; and total production and shipments of shakes. Data are for the preceding month, current month, and corresponding month of the preceding year, and cover all known pro-
of Consumer and in Storage. Quantity (running bales, counting round as half-bales, except foreign cotton, which is in equivalent 500-lb. gross bales). Preliminary.

Reports were issued during the period covered by this catalog for December 1948 and 1947-November 1948 and 1948. 1–4 p., tables.

Cotton (exclusive of linters): Consumed during current month and corresponding month preceding year, on hand (1) in consuming establishments and (2) in public storage and at compresses, end of current month and end of corresponding month preceding year, for each 20 named States and all other States combined. United States totals. (Table.)

Linters: Consumed by bleachers of linters and by all other consumers, and on hand in consuming establishments and in public storage and at compresses. Same period data. (Table.)

NOTE.—Data appearing in this report are also summarized in report entitled "Cotton Production and Distribution," (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports,

Quantity (running bales, counting round as half-bales, except foreign cotton, which is in equivalent 500-lb. gross bales; bale weights used in conversion: Egyptian, 725; Peruvian, 587; Indian, 400). Active cotton spindles (number). Preliminary.

Reports were issued during the period covered by this catalog for December 1948 and 1947-July 1949 and 1948. 1 p., tables.

Cotton: Total consumption during current month, corresponding month preceding year, and cumulative season totals current year and preceding year, for the United States and for three geographic areas (cotton-growing States, New England States, all other States); on hand of current month and corresponding month preceding year (1) in consuming establishments and (2) in public storage and at compresses, by same State groups. Included in these totals and also shown separately are figures on Egyptian cotton, Peruvian cotton, Indian cotton, other foreign cotton, and American-Egyptian cotton. Total number of spindles active last working day of current month and corresponding month preceding year, for the United States and for the geographic areas.

Linters: Total consumed; and on hand (1) in consuming establishments and (2) in storage and at compresses, same periods as for cotton. Figures for linters are not included in cotton totals. Imports of foreign cotton and linters, by country of production, and exports of domestic cotton and linters, by country to which exported: Preceding
month, corresponding month preceding year, and cumulative season totals ending preceding month and corresponding month preceding year. (Tables.)

Published since 1912.

NOTE.—Data appearing in this report are also summarized in report entitled “Cotton Production and Distribution,” (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports.

NOTE.—M15–2 discontinued August 1949. Combined with M15–1 which now issues the same information formerly issued in both reports.

Series M15–3 (Monthly)

COTTON SYSTEM SPINNING ACTIVITY. Spindles in place, active, and spindle hours operated. Preliminary.

Reports were issued during the period covered by this catalog for December 1948–November 1949.

1 p., table.

Cotton system spinning spindles: In place end of current month; consuming 100% cotton and consuming other than cotton—active last working day and spindle hours during month; spindle hours operated on all fibers—total hours and average per spindle in place: For the United States, for three geographic areas (cotton-growing States, New England States, and all other States), and for each of 19 named States and all other States. (Table.)

Published since 1943.

NOTE.—Data appearing in this report are also summarized in report entitled “Cotton Production and Distribution,” (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports.

Series M15A (Quarterly)

COTTON BROAD WOVEN GOODS. Production (linear yards); yarn consumed (pounds); machinery in place and active (number).

Reports were issued during the period covered by this catalog were for the 4th quarter 1948 to the 3d quarter 1949. 10 p., tables, summary table, charts.

Summary of production, by class of fabric. Production of total cotton woven goods over 12 inches in width (except tire fabrics and laundry nettings) and by nine types, by kind of goods. Production of tire cord and fabric, total, and by type of fabric. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarns consumed in the production of the fabrics reported, by type. Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). All known manufacturers in the industry were canvassed.

Series M15C (Quarterly)

RAYON BROAD WOVEN GOODS. Production (linear yards); yarn consumed and stocks of rayon yarn (pounds). Machinery in place and active (number).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 to the 3d quarter 1949. 10 p., tables, summary table.

Summary of production, by class of fabric. Production of total rayon broad woven fabrics and by four types and all other rayon mixtures, by type of fabric. Production of silk, nylon, glass, and other fabrics, total, and by kind. Fabrics containing 25 percent or more wool by weight produced on cotton, rayon, or silk looms. Yarns consumed in the production of fabrics reported by type. Stocks of filament rayon yarn on hand owned by reporting plants. Consumption and stocks of synthetic staple fibers, current and preceding quarters. Machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter (revised). Data are for preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised), except as indicated. (Tables.) Analysis precedes tables. Published since July 1943. All known manufacturers in the industry were canvassed.

Series M15G (Annual)

Data compiled from reports filed by finishers bleaching, dyeing or printing cotton, rayon, silk, nylon, and other synthetic broad woven fabrics. The statistics in the summary table for 1947 are from the 1947 Census of Manufactures, with no break-down available by type of fabric or end-use. Table 3 shows quantity of fabric finished in 1948 by State, and by type of finish. End-use was reported for 8,585 million yards of finished fabric.

Series M15H (Monthly)

Reports were issued during the period covered by this catalog were for November 1948–September 1949. 10 p., tables, charts.

Summary: Machinery and hours operated; consumption on woolen and worsted systems (pounds, scoured basis); and production of tops and yarns (pounds). Woolen and worsted machinery and machinery activity: Machinery in place end of current month, and in operation one or more days during month; and hours operated (first shift, second shift, third shift). Consumption of shorn and pulled wool of the sheep: Apparel class, on woolen and worsted systems, scoured basis; carpet class, greasy basis and scoured basis. Fibers consumed for spinning on the woolen and worsted systems (for yarns, except carpet, and for carpet and rug yarns). Production of tops and noils, each by type (wool of the sheep, mohair, rayon, all other). Yarns (except carpet) and carpet yarns spun on the woolen and worsted systems. Data are weekly averages for preceding month, current month, and corresponding month preceding year, and aggregates, current year to-date and preceding year to-date. (Tables.) Analysis precedes tables. Most of the data have been published since 1934. In the March issue aggregates are shown for the quarters, January to March 1949, and 1948. Yearly figures are shown for January–December 1948 and 1947.
Series M15K (Annual)

**KNIT CLOTH FOR SALE:** 1948.

Includes two kinds of statistics: (1) 1947 and 1948 data for a group of identical establishments classified in the knit cloth for sale industry, which reflect differences in the scope and pattern of operations between these years; and (2) 1947 Census of Manufacturers data, showing total United States output of all known mills for that year.

Series M16A (Monthly)

**FLOUR MILLING PRODUCTS.** Production. Quantity (units vary).

Reports were issued during the period covered by this catalog for the calendar year 1948 (6 p., tables, chart) and for November 1948-October 1949. 2-3 p., tables.

Wheat flour milling statistics, current month and specified prior months: Wheat ground (bushels); production (wheat flour, sacks; offal, tons); daily 24-hour capacity in wheat flour (sacks); wheat flour production as percent of capacity; average pounds of wheat per sack of flour; average pounds of offal per sack of flour; and flour extraction rate (percent).

Wheat flour production, by 30 named States and other States combined, current month and specified prior months. Rye flour milling statistics, current month and specified prior months: Rye ground (bushels); rye flour produced (sacks); and offal produced (tons). (Tables.) Data on wheat flour and stocks since 1926.

Report covering December 1948 data shows flour stocks end of quarter, current year and preceding year.

Series M16C (Monthly)

**CONFECTIONERY AND COMPETITIVE CHOCOLATE PRODUCTS.**

Manufacturers' sales. Value. Quantity (pounds).

Reports were issued during the period covered by this catalog for November 1948-October 1949. 2 p., tables, charts.

Sales by kind of business for specified States and for geographic division totals (Middle Atlantic and South Atlantic combined): Number of firms reporting; percent change in sales, current month from preceding month, and from corresponding month preceding year, and dollar volume of sales, current month; and sales of firms reporting year-to-date (dollar volume and percent change). Manufacturers' sales (poundage, value, and average value), by type of house (package, bar, bulk goods, general line, and unclassified), current month and corresponding month preceding year; and year-to-date figures (pounds and value), current year and preceding year, with percent change. (Tables.)

Series M17-1 (Monthly)

Reports were issued during the period covered by this catalog for December 1948-October 1949. p. 2-6, tables.

Series M17-1A

One release, issued in March 1949, covers data for January 1949. 2 p., tables.

Factory production and consumption, and factory and warehouse stocks of secondary products, in the United States; cottonseed—Receipts, crushings, and stocks at oil mills, by States; and cottonseed products—Production and stocks at oil mill locations, by States. Data are for current month and preceding month. (Tables.)

Note.—See note regarding revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. Data appearing in these releases are also summarized in a report entitled "Cotton Production and Distribution" (Bulletin 185), Season of 1947-48, listed in this catalog under Agriculture Division, Cotton Ginning Reports. See also Series M17-1A, below.

Series M17-2 (Quarterly)

**FATS AND OILS.** Factory consumption of primary and secondary animal and vegetable fats and oils, by uses. Quantity (pounds).

Reports issued during the period covered by this catalog were for the 4th quarter 1948 to 2nd quarter 1949. p. 2-6, tables.
Consumption of primary and of secondary animal and vegetable fats and oils, by kinds; total used in refining; total consumption other than in refining: (1) processed in fat splitting (hydrolysis), winterizing and pressing except for salad oil manufacture, sulphonation, and winterizing for salad oil; and (2) used in production of edible products (shortening, oleomargarine, other) and inedible products (soap, paint and varnish, linoleum and olibach, printing inks, lubricants and greases, and other). Primary materials: (Vegetable oils, animal fats, fish and marine mammal oils); (total of primary products) (other than vegetable oils) not shown separately; secondary products; (total of secondary products not shown separately).

Series M17-2 (Monthly)

6 p., tables.

Beginning with the July issue Fats and Oils will be discontinued as a quarterly publication and will be on a monthly basis. See above.

Series M17-3 (Monthly)

**COTTONSEED PRODUCTS.** Production and Stocks at Oil Mills. Quantity (units vary). Preliminary.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 2 p., tables.

Crude oil (pounds), cake and meal (tons), hulls (tons), and linters (running bales): Produced August 1 through current month for seasons named, by certain specified States and all other States combined; and stocks at oil mills, end of current month, same seasons and same States.

Cotton linters: Production (running bales) and average gross bale weights (pounds) by type of cut (first cut, second cut, and mill run), through current month, same seasons and same States. United States totals. (Tables.)

Note.—This is the final release in this series. Data for January 1949 are included in the revised Series M17-1 and M17-1A which replace the old Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17-1 and M17-1A, above.

Series M17-4 (Monthly)

**COTTONSEED AND COTTONSEED PRODUCTS.** Quantity (units vary). Preliminary.

Report issued during the period covered by this catalog was for December 1948, seasons 1948-49 and 1947-48. 1 p., tables.

Cottonseed (tons) received at mills and crushed, August 1 through current month, and on hand at mills end of current month, for seasons named, by certain specified States and all other States combined. United States totals. Cottonseed products (seven named), same seasons: On hand at beginning of season (August 1), produced August 1 through current month, shipped out August 1 through current month, and on hand end of current month. (Tables.)

Note.—This is the final release in this series. Data for January 1949 are included in the revised Series M17-1 and M17-1A which replace the old Series M17-1, M17-3, and M17-4, due to revision in methods of reporting and tabulating statistics on animal and vegetable fats and oils. See Series M17-1 and M17-1A, above.

Series M19A (Monthly)

**INORGANIC CHEMICALS.** United States Production. Quantity (units vary).

Reports were issued during the period covered by this catalog for November 1948–October 1949. 2 p., tables, charts.

Primary production of specified inorganic chemicals in the United States, including quantities produced for further processing in the same plant, for intracompany transfer, and for sale, preceding month, current month, and corresponding month preceding year. (Table.) Analysis precedes table. Published since 1931.

Series M19D (Monthly)

**SUPERPHOSPHATE.** Production, receipts, disposition, and stocks, by type. Quantity (short tons).

Reports were issued during the period covered by this catalog for the year 1948 (3 p., tables) and for November 1948–October 1949. 2 p., table.

Figures for preceding month, current month, and corresponding month preceding year on: Stocks on hand beginning and end of month, production, received from other acidulators (including exchange transfers), book adjustments (account of inventory), total supply; disposition (shipments, used in reporting plants, total); for three types—normal (18% available phosphoric acid), concentrated (45% APA), and wet-base goods (18% APA). (Table.) Published since 1928; comparable data published since 1942. Number of plants reporting data on each of the three types of superphosphate. Report for 1948 summarizes the data for the year and gives comparative figures for 1947.

Series M19J (Monthly)

**PAINT, VARNISH, LACQUER, AND FILLER.** Sales.

Reports were issued during the period covered by this catalog for the year 1948 (1 page, table) and for November 1948–October 1949. 1 p., table.

Total sales reported by 680 establishments, preceding month (revised), current month, and corresponding month preceding year. Of these, 680 establishments reported classified sales as: Trade sales of paint, varnish, and lacquer; and industrial sales (paint and varnish; lacquer). The remaining 100 establishments reported unclassified sales. (Table.) Comparable statistics for these establishments are available by months beginning with January 1936.

Series M19M.2a (Monthly)

**ANIMAL GLUE.**

The statistics on production, shipments and stocks covered by this report have been compiled in cooperation with the Office of Domestic Commerce from the reports of manufacturers operating 28 plants. Monthly figures for glue were formerly collected by the Bureau of the Census from July 1945 to June 1948 and published in “Facts for Industry” Series M19M. No monthly data is available from July 1948 to June 1949.

Series M21A (Monthly)

**GRAY IRON CASTINGS.** Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948-October 1949. 2 p., table, chart.

Shipments and unfilled orders, each by type of forging (drop and upset forgings and press and open hammer forgings), carbon steel and alloy steel, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. (Table.) All data in this series have been adjusted to represent complete coverage of the industry, including the commercial output of captive forge shops.

Series M21B (Monthly)

**MALLEABLE IRON CASTINGS.** Shipments, orders booked, and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948-October 1949. 2 p., table, charts.

Shipments (for sale, for own use, and total) and unfilled orders for sale of total gray iron castings, miscellaneous gray iron castings, molds for heavy steel ingots, chilled iron railroad car wheels, cast iron pressure pipe and fittings, and cast iron soil pipe and fittings; Preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years for shipments data. (Table.) All the data in this series have been adjusted to represent complete coverage of the industry.

Series M22A (Monthly)

**STEEL CASTINGS.** Shipments and unfilled orders. Quantity (short tons).

Reports were issued during the period covered by this catalog for November 1948-October 1949. 2 p., tables, chart.

Shipments, for sale and for use, and unfilled orders for sale, by type of casting (carbon steel);紧接着的句子是错误的。
types of castings (aluminum, magnesium, copper, zinc and zinc-base alloy, and lead and lead-base alloy die castings), by kind of casting, preceding month, current month, and corresponding month preceding year. Cumulative totals to date for the two years covering shipments data only. \((\text{Tables})\) Analysis precedes tables.

Series M24G (Monthly)

MAGNESIUM WROUGHT PRODUCTS. Shipments. Quantity (pounds).

Reports were issued during the period covered by this catalog for November 1948–October 1949. \(2\ p., \text{table, chart.}\)

Shipments, total, and by two types (extrusions, including forging stock; and plate, sheet, and strip), each month, preceding year to date current year. \((\text{Table})\) Coverage of the industry is complete. Report covering data for December 1948 also gives totals for each year 1944–48. Reports for 1949 include totals by month for 1948.

Note.—This release has been combined with M24B and will be published under the title Aluminum and Magnesium Wrought Products, M24-1.

Series M25A-08 (Annual)

STEEL BOILERS. (100 Square Feet of Heating Surface and Over.) New Orders. Quantity (units; square feet). 1948.

\(4\ p., \text{tables, chart. March 14, 1949.}\)

New Orders for steel boilers of 100 square feet of heating surface and over (stationary, power boilers over 15 pounds pressure; steel heating, as differentiated from power boilers; and marine), by type, each year 1940–1948, and six-month totals, January–June 1948, July–December 1948, 1944, and 1946. Stationary power (water tube boilers; water walls; steam generating capacity; and horizontal return tubular), each month January–June 1948, August 1947, and May 1946.

Note.—The report covering data for June 1948 was the last monthly release in this series, and the report listed here is the first annual. Future releases will continue to be issued on an annual basis.

Series M26B (Monthly)

CLAY CONSTRUCTION PRODUCTS. Production and shipments. Quantity (units vary).

Reports were issued during the period covered by this catalog for November 1948–October 1949. \(4\ p., \text{table, chart.}\)

Number of plants, total production, and shipments (quantity and value) of unglazed brick (common and face) for the United States, Census geographic divisions, and States, current month and preceding month (revised). Same data for glazed and unglazed floor and wall tile, and glazed and unglazed hollow facing tile, and glazed and unglazed floor and wall tile and accessories including quarry tile, for the United States and for Census geographic divisions, same periods. (Each of the nine geographic divisions report data on certain products; other products are reported by selected divisions or combinations of divisions.)

Series M26D (Monthly)

ASPHALT AND TAR ROOFING AND SIDING PRODUCTS. Shipments. Quantity (squares; square feet; tons).

Reports were issued during the period covered by this catalog for November 1948–October 1949. \(2\ p., \text{tables, chart.}\)

Shipments of the following products, United States total, Eastern area, and Western area, current month and preceding month (revised): Asphalt roofing, total and by kind; asphalt sidings, total and by kind; insulated brick siding, all types and finishes; asphalt board products; saturated felts, total and by kind; and saturated sheathings and coated sheathings. Shipments of asphalt roofing, asphalt sidings, and saturated felts, by geographic divisions, current month. \((\text{Tables})\) Published since January 1928; comparable data published since September 1943. Statistics are based on practically complete coverage of the industry, except that estimates have been made for a few establishments from which reports were not received. The magnitude of the estimates is given in the footnotes.

Series M27C (Annual)

REFRACTORIES: 1948.

\(2\ p., \text{tables. October 14, 1949.}\)

A current issue of a report was published annually in 1945 and 1946. The 1947 report was combined with the 1947 Census of Manufactures reports. This report includes data on refractories and the production, shipments, and stocks by kind for the United States 1948 and 1947.

Series M31B-08 (Annual)

FARM PUMPS. Shipments. Value. Quantity (units). 1948. \(4\ p., \text{tables. March 15, 1949.}\)

Shipments (number and value) of domestic water systems, summary by jet and nonjet types and by deep- and shallow-well types; domestic hand and windmill pumps; pump jacks; cylinders, sold separately; windmill heads; and windmill towers; January–June (revised) and July–December 1948; and by years, 1944–1948. Shipments of domestic water systems, hand and windmill pumps, windmill heads, and windmill towers, total number and value, by years, 1922–1948. \((\text{Tables})\) Analysis precedes tables. Published since 1926.

Note.—The June 1948 release which was issued under the title "Domestic Water Systems, Pumps, and Windmills" was the last one in this series to be issued on a monthly basis. The term "Farm Pumps," as now used to describe the survey, encompasses the same group of products as were covered by the monthly survey referred to above. The report listed here is the first annual in this series. Future releases will be issued on an annual basis.

**Fans, Blowers, and Unit Heaters.** Shipments and orders booked. Value.

*Reports issued during the period covered by this catalog were for 4th quarter 1948 to 3rd quarter 1949.* 1 p., table.

Fan and blower group: Centrifugal fans and blowers; propeller fans; and axial fans; each by type; and parts for fans and blowers. Unit heater group: unit heaters by type; unit ventilators; heat transfer coils, by type; and parts for unit heaters and unit ventilators. Air washers. Data for shipments are for current quarter and preceding quarter (revised); orders booked, preceding quarter (revised), current quarter, and corresponding quarter preceding year (revised). (Table.) Analysis precedes table. Published since January 1931. The manufacturers in this survey account for more than 90 percent of total shipment of these products.

Series M32B–08 (Annual)

Annual release contains revised statistics for 1948 on the number of lamps produced, shipped and held in factory stocks. It incorporates all the statistics published in this series for 1947.

12 p., tables, charts. *July 29, 1949.*

Series M35A–08 (Annual)

**Farm Machines and Equipment:** 1948. Production (number). Manufacturers' shipments (value).

33 p., tables, charts. *June 24, 1949.*

Farm machines and equipment: Summaries of manufacturers' shipments (complete units, attachments and parts, total) and shipments by product groups, 1936–1948. Percentage distribution of manufacturers' shipments between complete units and attachments and parts, and between domestic shipments and shipments for export, each by product groups, 1948 and 1947. Value of shipments by geographic divisions and States, 1948. Summary of production (number) and manufacturers' shipments (value), by individual items, 1948 and 1947. Manufacturers' shipments, including tractors for farm use and nonfarm use (complete units, attachments and parts, total), 1929–1948. (Table.) Tractors: Manufacturers' shipments, by farm use and nonfarm use, 1943–1948. (Table.)

Charts show: Shipments of farm machines and equipment, 1936–1948; shipments by States and geographic division, 1948; and manufacturers' shipments of selected farm machines and equipment, 1936–1948 (six types).

**Construction Machinery (Excavating and Earth-moving Equipment).** Shipments. Value. Quantity (units).

*Reports issued during the period covered by this catalog were for 4th quarter 1948 to 3rd quarter 1949.* 3 p., tables.

Shipments by major types, current quarter and preceding quarter (revised). Excavating and earth-moving equipment (other than power cranes and shovels), total shipments and shipments for export (number and value), by type of equipment, current quarter and preceding quarter (revised). Data are shown for the following types of equipment: Road construction and maintenance machinery (ditchers and trenchers, scrapers, wagons, graders, rippers and rooters, rollers, loaders, etc.); construction machinery for mounting on tractors (cranes, shovel-type loaders, dozers, and cable power control units); tracklaying tractors, by horsepower; wheel-type heavy-duty industrial tractors; and portable well and blast hole drills. Shipments of power cranes and shovels, current quarters and preceding quarter. (Tables.) Analysis precedes tables.

Series M37A–08 (Annual)

**Tractors:** 1948. Production and manufacturers' shipments. Quantity (units).

9 p., tables, charts. *April 27, 1949.*

Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export), by type of tractor (complete, wheel type, tracklaying, garden), each year 1922–48 (except 1932–94). Manufacturers' domestic shipments and shipments for export, by farm and nonfarm use, by type of tractor, 1948 and 1947. Number of tractors produced and number and value of manufacturers' shipments (total, domestic, and for export), by type and horsepower of tractor, 1948 and 1947. Value of manufacturers' shipments (total, domestic, and for export) of tractor attachments and parts, by type of product, 1948 and 1947, and annual totals, 1923–48 (except 1932–34). The statistics represent complete coverage of the industry. (Tables.) Analysis precedes tables. Charts show production of tractors, by type, 1938–48; and shipments for farm and nonfarm use, and domestic and export shipments, by type, 1948 and 1947.

Series M42A (Monthly)

**Complete Aircraft and Aircraft Engines.** Shipments and unfilled orders. Plant employment. Exports.

*Reports were issued during the period covered by this catalog for November 1948–September 1949.* 4 p., tables, chart.

Complete aircraft shipments, number and airframe weight (pounds), by type of aircraft, current and preceding months, cumulative total to date current.
year and corresponding period preceding year, and total for 12 months to date current year and corresponding period preceding year. Shipments of complete civil aircraft and of civil aircraft engines and other products of plants manufacturing complete aircraft and aircraft engines, current and preceding months, and cumulative total to date current year and corresponding period preceding year; shipments of aircraft engines (number and horsepower)—number data, same periods, and horsepower data, current month and preceding month only.

Unfilled orders (number) for civil transport-type aircraft, each month, current year to date. Number of employees in complete aircraft and aircraft engine plants, each month, preceding year to date current year. United States exports of domestic aircraft and aircraft engines (number and value), current and preceding months and cumulative total to date current year and corresponding period preceding year. Coverage of the industry is complete. (Tables.) Analysis precedes tables.

Series M42D (Quarterly)

Backlog of Orders for Aircraft Companies.

Reports were issued during the period covered by this catalog for the first two quarters of 1949. 2 p., table, charts.

Backlog of orders, total new orders, and net sales reported in this series. Comparative figures are given for 1948 and 1949.

Series M42E-08 (Annual)

Aircraft Propellers. Propellers and parts shipped (value) and number of employees in aircraft plants, 1948.

For Revised figures on this report see M42E-08 (annual) revised, below.

Series M42E-08 (Annual) revised

Contains corrected figures on the data published in the annual (M42E-08), above. It is a compilation of reports received from all known companies manufacturing aircraft propellers. Reports on the value of goods shipped to military and civilian groups and on the number of employees in the plants.

Series M42E-1 (Semi-Annual)

Includes data on the value of shipments of propellers and propeller parts, and all other products made in plants producing propellers. Data are also shown on number of civil aircraft propellers shipped and number of employees in propeller plants.

Series M45F (Monthly)

Truck Trailers. Production and shipments. Quantity (units).

Reports were issued during the period covered by this catalog for November 1948–August 1949. 2 p., tables, chart.

Production and shipments (number of units) of complete trailers, by type (vans, platforms, tanks, pole and logging, low-bed heavy haulers, dump trailers, off highway, and all other trailers) and trailer chassis. Production (units) and shipments (units and dollar value) of truck trailers, each month preceding year to date current year. (Tables.) Analysis precedes tables.

Series M51B (Monthly)

Mechanical Stokers. Factory sales. Quantity (units).

Reports were issued during the period covered by this catalog for the calendar year 1948 (4 p., tables) and for November 1948–October 1949. 2 p., table, chart.

Total sales and sales by five classes of stokers, for preceding month, current month, and corresponding month of preceding two years. Total each class, combined totals, and year-to-date totals, each of three years. Detailed statistics for each class. (Table.) Published since January 1923. Definition of classes given. Coverage of the industry is complete.

Summary for 1948 shows sales by class, each year, 1939–48, and by months, 1948.

Series M51H (Quarterly)

Plumbing Fixtures. Production, shipments, and stocks. Quantity (units).

Reports were issued during the period covered by this catalog for the 4th quarter 1948 to 3rd quarter 1949. 2 p., tables, chart.

Value of shipments, by type of material (vitreous china, concrete and composition glazed earthenware, and metal), preceding quarter, current quarter, and corresponding quarter preceding year. Production, shipments, and stocks at end of quarter, by type of fixture, current and preceding quarters. (Tables.) Analysis precedes tables. Coverage of the industry is complete.

**SELECTED ATHLETIC GOODS: 1947.**

A special study designed to obtain more detailed product data of quantity, production and shipments of certain carefully selected athletic goods. Quantity and shipments are for 1947, shipments for 1939. Tables show that 1947 shipments of most types of athletic goods exceeded those for 1939.
6. POPULATION DIVISION

The Census of Population is taken every ten years, the last being that for 1940. Currently, population estimates are prepared from available data. The Current Population Survey obtains information on employment and unemployment from a sample of 25,000 households each month. This survey also yields considerable information on changes in population characteristics. Current national housing data are also obtained by means of supplements to the Current Population Survey.

eran status and age, October 1946–48 (table 2); total school enrollment of persons 5 to 24 years old, October 1945–48, and enrollment in public and private elementary and high schools, October 1948, by age and sex (tables 4 and 5); and persons 5 to 24 years old, by age and sex, urban and rural, October 1948 (table 5). Percent distribution of the civilian noninstitutional population, by age, color, and sex, October 1948: By type of school, of population 5 to 17 years old enrolled in school (table 3); and by school enrollment of population 5 to 34 years old (table 6). Type of school attended by the enrolled civilian noninstitutional population 5 to 34 years old, by veteran status, age, and sex, October 1948 (table 7). Text gives analysis of tables, definitions of terms and explanations, and source and reliability of the estimates.

Tables show: Number of households, families, and married couples in 1949, 1948, 1947, and 1940 in the United States; figures on the population 14 years old and over, by marital status and sex in 1949 and 1940. Definitions of terms used are explained and a descriptive text accompanies tables.

Special Reports (P–23)

The population of the United States was first classified into "urban" and "rural" in 1874. Text of this report traces, from that date through each subsequent decennial census, the development of the standards applied, and methods used in distinguishing "urban" from "rural" population areas into "farm" and "non-farm" beginning with the Census of 1930. States the classification standards to be used in the Census of 1950. Tables show:

1. Population in places of 8,000 and over, places of 2,000 and over from 1794 to 1949.
2. Figures for urban, rural, non-farm and rural farm population for 1920, 1930 and 1940.
4. Changes made between one Census and another in 1900 and 1910 urban totals for certain States.
5. Rural population, 1890 and 1880, as defined in 1890.

Population Estimates (P–25)

Forecasts of the population of the United States including armed forces overseas, July 1, 1948, to 1955, and current provisional estimates, July 1, 1947: By age and sex, with allowance for 1,000,000 net immigration, and with no allowance for immigration; population under 25 years of age (total, male, female), by single years of age, with no allowance for immigration. Forecasts of elementary and high school enrollment, by grades, for the United States, April 1948 to 1960, and current estimates, April 1947. (Tables.) Analysis precedes tables. Text discusses revision of earlier forecasts of population, assumptions and methods, and gives limitations and reliability of the forecasts.

Note.—This report includes revised forecasts of population for July 1, 1948, to 1955, which supplement the figures published in the report entitled Forecasts of the Population of the United States, 1945–1975, issued in March 1948.

Estimated population of the United States, both including and excluding persons in the armed forces overseas, and estimated civilian population, November 1 and December 1, 1948, and January 1, 1949.

Includes estimates for all ages from children under five to people over sixty-five; estimates of population including and excluding armed forces overseas. Age composition, methods used, their limitations, and reliability are discussed. Percent distribution is given by age, of the estimated population of continental United States including armed forces overseas, July 1, 1948, with comparative figures for 1948. (Tables.)

Note.—Estimates for July 1 of each year, 1930–1945, comparable to those for 1946 to 1948 given here, have been published in Population—Special Reports, Series P–47, No. 3, and P–45, No. 5.

1 p., June 2, 1949.

Estimated population of the United States, both including and excluding persons in the armed forces overseas, and estimated civilian population. February 1, 1949, March 1, 1949, and April 1, 1949.

Estimates of the nonwhite population, by race, including the armed forces overseas for July 1 of each year 1940–1947, are shown in the accompanying table of the release. It states proportionate increases by group. Estimates presented are based on the 1940 Population Census. Presents five non-
white groups: American Indian, Chinese, Japanese, Negro, and an inclusive group for other races. Further estimates (which include the white race) arranged by age and sex distribution may be found in Population—Special Reports, Series P-47, No. 3, and Current Population Reports, Series P-25, No. 2.

1 p., table, June 30, 1949.
Estimated population of the United States: 1940–1949, both including and excluding persons in the armed forces overseas, and estimated civilian population, monthly, from January 1 to May 1, 1949; from May 1 to December 1, 1948, and annual figures from April 1, 1940, to July 1, 1947.

Gives the population of the United States both including and excluding the figures for the armed forces overseas. Table presents provisional figures for 1947, 1948, and 1949.

Estimates given in this report supersede the provisional estimates for the same date published in Current Population Reports, Series P-25, No. 14. Comparable estimates for July 1, of each year, 1940 to 1947, are available in Current Population Reports, Series P-25, No. 12. Report shows redistribution of population since 1940, and explains the method of estimation used in obtaining the revised figures. The map depicts the westward migration trend.

The estimates in this report supersede the figures for February 1, 1947, to June 1, 1949, given in Current Population Reports, Series P-25, No. 25.

Report gives estimates of the total population of the Washington, D. C., Metropolitan area: 1940 to 1948, including armed forces stationed in the area; also gives estimates of the civilian population of the Washington, D. C., Metropolitan area: 1940 to 1948.

No. 29. Estimates of the Population of Hawaii, Puerto Rico, the Panama Canal Zone, and the Virgin Islands of the United States: 1940 to 1948.
Estimates of total population include the civilian population and the armed forces in the area. Figures for the civilian population exclusive of the armed forces are included in the table.

Table lists total population, civilian population and total population of continental United States, including armed forces overseas. Figures are for years 1940, 1948, and 1940 to 1947. Comparable estimates for each month in 1947 are available in Current Population Reports, Series P-25, No. 27.

Table lists total population, civilian population and population of continental United States, including armed forces overseas. Figures are for years 1940, 1948, and 1940–47. Comparable estimates for each month in 1947 are available in Current Population Reports, Series P-25, No. 27.

Estimated total population of a State represents the sum of the estimated civilian population and the armed forces stationed in the State. Estimates of births and deaths include preliminary figures from January 1, 1948, to July 1, 1949. Estimates of net migration are based on statistics from 1940 census, registrations for War Ration Book No. 4, statistics on enrollment in the elementary grades of public and private schools, and statistics on immigration and emigration.

NOTE.—This report presents provisional estimates for July 1, 1949, similar to the estimates for earlier years published in Current Population Reports, Series P-25, Nos. 12 and 26.

Estimated population of the United States, including the armed forces overseas. Also estimated total population actually present in continental United States including armed forces stationed in the United States, but excluding those serving overseas, and the civilian population. Figures for 1948 and 1949 are provisional.

Table includes estimated figures for 1949, by months; 1948 from December to August; and 1941 to 1947 for July 1st of each year. The figures given for 1940 are for April 1st.

CATALOG AND SUBJECT GUIDE. Quarterly and cumulative. A classified guide to the contents of all publications issued to date during the year. Subscription price $1.50 for four consecutive issues (domestic) and $2 (foreign). Quarterly issues individually priced.1

Reports covering 3d quarter 1948-3d quarter 1949 and the calendar year 1948. 164 p. were issued during the period covered by this catalog. p. 42–130.

viii, 363 p., tables. $2.50 (buckram.)

Presents in compact form for ready reference, approximately 3,000 statistical time series which cover various periods from 1789 to 1945. These statistics reflect economic, social, and political development of the Nation since the Federal government was formally established. It is designed to serve two immediate needs. (1) To provide through brief descriptive text and precise source notes, a guide to the types of historical data available, so as to inform the user where future data can be obtained.

Objectives are similar to those of the annual Statistical Abstract of the United States, except that the annual volume emphasizes current data with limited historical data as background.

The historical statistics selected for presentation consist primarily of data readily available in Federal agencies.

A four-page house organ written for the field staff of the Office of the Coordinator, International Statistics.

KNOX, NEWTON B.

Prepared under the “Cooperation with the American Republics” program of the Interdepartmental Committee on Scientific and Cultural Cooperation, Department of State. Includes an appendix bibliography. The following is a listing by subject of the data contained in Census publications issued during the calendar year 1949 and shown in the catalog part of this publication. Each entry (except cross references) is followed by a group classification number to facilitate reference to the specific publication as listed in the catalog. Group classification numbers indicate the order of listing in the catalog and are shown in the upper outside corner of each page. This group classification is an assignment of numbers according to an alphabetical listing of the various administrative divisions of the Bureau of the Census. There are six divisions which regularly produce publications; the other publications are grouped in a seventh category which shows miscellaneous reports.

SIGNIFICANT DOCUMENTS RELATING TO
BUREAU OF THE CENSUS ACTIVITIES
1. Recommendations of the American Library Association on Seventeenth Census Publications

October 18, 1949.

Mr. Philip M. Hauser,
Acting Director, Bureau of the Census,
Department of Commerce, Washington, D.C.

My Dear Mr. Hauser: I respectfully submit the following recommendations of the Committee on Public Documents of the American Library Association concerning proposed reference works and publication policy for the Seventeenth Decennial Census:

1. A comprehensive index to all publications of the Seventeenth Decennial Census should be prepared.
2. A one-volume summary of the results of the Census should be prepared.
3. A small area data book should be prepared.
4. That the title page used in the reports of the Seventeenth Census be standardized and show detail similar to that of 1940 Population Census title pages. However, at the head of the title on each title page should appear the serialized subject title with volume and part notation (e.g., United States Seventeenth Decennial Census: 1950 Population Volume 1, Part 1).
5. That all reports of the Seventeenth Decennial Census be numbered or serialized within broad subject groups, such as population, agriculture, etc.
6. That all reports of the Seventeenth Census show the date of issue. Preliminary and advance reports in particular should be identified as to month and day of issue.
7. That each report show which earlier reports are superseded by it and, to the extent possible, which subsequent reports will replace this report.

I should also like to report that the Executive Board of the A. L. A. at its meeting in Chicago September 30–October 1, 1949, voted to approve these recommendations of the Documents Committee. I sincerely hope that the Bureau of the Census will see fit to adopt all or many of them at an early date.

Very sincerely,

(S) Jerome K. Wilcox,
Jerome K. Wilcox, Chairman,
Committee on Public Documents,
American Library Association.
2. Press Release on Standard Metropolitan Areas

January 28, 1949

EXECUTIVE OFFICE OF THE PRESIDENT

BUREAU OF THE BUDGET

Washington 25, D. C.

STANDARD METROPOLITAN AREA DEFINITIONS

The attached table gives standard definitions for 87 of the more important metropolitan areas of the United States. Definitions for additional areas with a population of 100,000 or more will be issued later.

These definitions are recommended for use by all Federal agencies compiling statistical data for general use. It is believed that State and local governments and private agencies also will find them useful, especially when comparability with basic data compiled by Federal agencies is desirable. They are designed to serve a wide variety of purposes, including the presentation of census statistics on population, industry, and trade; current employment and pay-roll data; and local labor market analysis.

Each area (except in New England) consists of one or more entire counties. It is recognized that metropolitan areas could be more accurately defined by using minor civil divisions. Experience has shown, however, that areas so defined have a limited value because many types of data with which comparisons are desired are available only on a county basis. In New England, where the use of towns rather than counties as the basic geographic unit for statistical compilations is common practice, these objections apply to a much lesser degree; and for this reason the New England metropolitan areas have been defined on a town rather than a county basis.

The use of county units sometimes results in the inclusion in a standard metropolitan area of a considerable amount of territory which would not ordinarily be considered "metropolitan." For the presentation of social and economic statistics this is of little importance, since the population in such territory is usually negligible in relation to the population of the area as a whole. In the presentation of statistics relating to land area, on the other hand, this characteristic of the standard definitions would constitute a serious weakness, and their use for such purposes would ordinarily be inappropriate.

The general concept adopted has been one of an integrated economic unit with a large volume of daily travel and communication between the central city and the outlying parts of the area. This results in an area considerably more restricted, especially for the larger cities, than the market or trading area. The following principles have been adopted as a guide in applying this general concept to the definition of individual areas:

1. Each standard metropolitan area must include at least one city of 50,000 or more; the area as a whole must have a total population of at least 100,000. Areas may cross State lines.

2. Where two cities of 50,000 or over are within 20 miles of each other, they will ordinarily be included in the same area.

3. Each county included in a standard metropolitan area must have either 10,000 nonagricultural workers or 10 percent of the nonagricultural workers in the area, or more than one-half of the county's population must have been included in the "metropolitan district" as defined by the Bureau of the Census. In addition, nonagricultural workers must constitute at least two-thirds of the total employed labor force of the county.

4. Each county included in a standard metropolitan area must be economically and socially integrated with the central counties of the area. A county has been regarded as integrated (a) if 15 percent of the workers living in the county work in the central county of the area, or (b) if 25 percent of those working in the county live in the central county of the area, or (c) if telephone calls from the county to the central county of the area average four or more calls per subscriber per month. These criteria have been selected largely because investigation indicated that they were the only direct measure of integration on which usable data might be obtained for a substantial proportion of the areas under consideration. Where satisfactory data on even these measures are lacking, considerable reliance has necessarily been placed on informed local opinion.
In New England, where areas have been defined on a town rather than on a county basis, the same principles have been applied in so far as they are applicable. Item 3 is not applicable to towns; as a substitute, a population density criterion of 150 persons per square mile, or, where strong integration is indicated, 100 persons per square mile, has been adopted.

Preliminary work on the development of standard metropolitan areas was initiated by the Bureau of the Census in 1946. At that time four principal sets of metropolitan areas were in general use by Federal statistical agencies. Metropolitan districts, following minor civil division lines and based primarily on population density, were used in the population census. Metropolitan counties, designed to approximate metropolitan districts but following county lines, had been developed for wartime population estimates based on OPA ration registration data, available only on a county basis. Industrial areas, composed of contiguous important industrial counties, had been used in the Census of Manufactures. Labor market areas, consisting of counties or minor civil divisions or some combination of the two, had been used by the United States Employment Service and its affiliated State agencies for local labor market analysis.

Investigation indicated that the differences between these sets of definitions did not stem primarily from the differences in their uses, and suggested that standardization would be both feasible and desirable. Since it seemed desirable that area definitions be worked out which could be used by other Federal agencies as well as the Census Bureau, the Division of Statistical Standards of the Budget Bureau was invited to participate in the development of standard metropolitan area definitions.

The Federal Committee on Standard Metropolitan Areas was set up by the Budget Bureau late in 1947. After approving the general principles to be followed, the committee requested the Census Bureau to prepare tentative definitions of individual areas. This work was done by a Census Bureau committee with the active participation of representatives of the Bureau of the Budget and the Bureau of Employment Security. These tentative definitions were discussed with interested local organizations by the field staff of the Bureau of the Budget or by representatives of other Federal agencies made available to the Budget Bureau for this purpose. This local clearance confirmed the tentative definitions in a large majority of the areas. There were about a dozen cases, however, where it resulted in changes in the definitions proposed. After reviewing the definitions in the light of information contained in the field reports, the Census Bureau committee prepared final definitions for approval by the Federal Committee on Standard Metropolitan Areas.

3. Press Release on Unincorporated Places in the 1950 Census

November 14, 1949

UNITED STATES DEPARTMENT OF COMMERCE

BUREAU OF THE CENSUS

Washington 25, D. C.

UNINCORPORATED PLACES IN THE 1950 CENSUS

The larger unincorporated places outside of the new urbanized areas have been bounded for the first time by the Bureau of the Census and those with a population of 1,000 or more will be reported in the 1950 Census in the same way as incorporated places of equal size. Most closely settled areas are separately incorporated, but a considerable number of them have not been incorporated for various reasons. The new treatment of unincorporated places has become necessary because of their increasing importance in the population distribution of the Nation.

In the 1950 Census the urban population of the United States will include all persons living in unincorporated places with 2,500 inhabitants or more, as well as in the incorporated places of this size, and persons living within the urbanized areas. By contrast, in 1940 only those persons living in incorporated places of 2,500 inhabitants or more and in a few places designated as urban under special rule were classified as urban population.

Approximately 2,000 separate unincorporated places will be reported, with several estimated to have populations of over 25,000. Unincorporated places with estimated populations of 800 or more have been defined but only those that have populations of 1,000 or over in 1950 will be published. The value of separate population figures for these places to many users of Census data needs no emphasis. The reporting of the larger unincorporated places represents a beginning in this program which it is hoped may be extended to include a greater number of smaller places in later censuses.

All of the unincorporated places to be reported separately lie outside the newly defined urbanized areas which are made up of each of our larger cities and their closely settled surrounding area. Many unincorporated places adjoin or are in the vicinity of large cities, but others form separate centers. Those adjoining cities of 50,000 or more will be included in the urbanized areas defined for such cities. Those adjoining cities of less than 50,000 population will be identified in the same way as outlying unincorporated areas. Each place possesses a definite nucleus of residences, and has its boundaries so drawn as to include if possible all the surrounding closely settled area. It is necessary that the boundaries be clearly defined and identifiable in order to facilitate accurate field enumeration.

The actual delimitation of the unincorporated places was accomplished with the use of aerial photographs, the latest State highway planning maps, and other source materials, and was supplemented by field inspections by Census personnel. Very considerable aid in the way of mapping and field delimitation also was given by many of the State highway departments.
4. Press Release on Urbanized Areas  
November 15, 1949  
UNITED STATES DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS  
Washington 25, D.C.  
URBANIZED AREAS  

New Statistical Areas for the 1950 Census  

In the 1950 Census of Population and Housing in the United States, the Bureau of the Census will present statistics for 157 new statistical areas which are called urbanized areas. For the definition of these areas the limits of the closely settled urban fringe have been marked around our cities having 50,000 or more inhabitants in 1940 or in a subsequent special census.

A major objective of the Bureau of the Census in delineating these areas is to provide for a better separation of urban and rural population in the vicinity of our larger cities. All of the persons living within the urbanized areas will be classified as a part of the urban population in 1950. By contrast, in 1940 only those persons living in incorporated places of 2,500 inhabitants or more and in a few places designated as urban under special rule were included in the urban population. Thus, many persons living under distinctly urban conditions in areas now within the urbanized area were classified in the rural population.

For each urbanized area the Bureau of the Census expects to publish a map showing the boundaries in detail. Total population figures will be given for each urbanized area as a whole, as well as for each incorporated place, and the urbanized portion of each minor civil division. According to present plans, limited tabulations will be prepared for both population and housing characteristics with separate figures being shown for each urbanized area as a whole, as well as for its central city or cities, the incorporated suburbs of 2,500 inhabitants or more, and the remainder of the urbanized area.

It is anticipated that this Census improvement will be of value to government organizations concerned with roads, planning, housing, health, and vital statistics, and also to private organizations concerned with advertising, marketing, utilities, transportation, and social research. The new plan has been developed with the advice of a considerable number of specialists in these fields who have indicated enthusiastic approval for the urbanized area program.

The urbanized area needs to be distinguished from two other types of areas, the metropolitan district and the standard metropolitan area. The metropolitan district was used in 1940 and earlier and was defined to include in addition to the central city with 50,000 or more inhabitants the surrounding minor civil divisions which had a population density of 150 persons per square mile. Very limited tabulations will be published in 1950 for the 1940 metropolitan districts. The standard metropolitan area, like the urbanized area, is new and will be used in population and housing tabulations for the first time in 1950. The standard metropolitan area is defined to include the entire county in which the central metropolitan city is located and also the contiguous counties which have close economic and social integration with the central city. This standard metropolitan area, consisting of whole counties, will be the area that is publicized as the metropolitan area for general use, and it will be for this area that most statistics will be published, not only from the population census, but from other sources. The urbanized area will be used primarily for the publication of population and housing statistics, and will be for more specialized use.

The criteria selected for defining the urbanized areas have been applied consistently throughout the United States to insure comparability of information. The following types of areas are included in a city's urbanized area if they are contiguous to the central city or if they are contiguous to an area already included in the urbanized area:

1. Incorporated places with 2,500 inhabitants or more.
2. Incorporated places with fewer than 2,500 inhabitants, provided the incorporated place includes an area with a concentration of 100 dwelling units or more with a dwelling unit density in this concentration of 500 or more per square mile. This density
represents approximately 2,000 persons per square mile and normally is the minimum found associated with a closely spaced street pattern.

3. Unincorporated area with at least 500 dwelling units per square mile.

4. Areas devoted to commercial, industrial, transportational, recreational, and other miscellaneous uses functionally related to the central city.

In addition, outlying noncontiguous areas, incorporated or unincorporated, which meet the residential requirements are included in the urbanized area under specified conditions. All outlying areas within 1½ miles of the central contiguous urban area, measured along the shortest connecting highway, are included. Also, those outlying areas within one-half mile of another outlying area, which is within 1½ miles of the central contiguous urban area, are included.

Since the urbanized area outside incorporated places is defined on the basis of housing or population density, its boundaries for the most part are not political but rather follow such features as roads, streets, railroads, streams, and other clearly defined lines which may be easily identified by Census enumerators in the field. The urbanized area boundaries were selected after careful examination of all available maps, aerial photographs, and other information sources, and then were checked in detail by trained investigators in the field to insure that the criteria were followed and that the boundaries are identifiable.

Maps of the urbanized areas with boundary descriptions cannot be supplied by the Bureau of the Census at the present time but will be made available to those interested as soon as possible following the completion of the 1950 Census.

5. Determination Relating to Annual Survey of Inventories and Sales of Independent Retail Trade Establishments Published in Federal Register of January 19, 1950

DEPARTMENT OF COMMERCE

Bureau of the Census

ANNUAL SURVEY OF INVENTORIES AND SALES OF INDEPENDENT RETAIL TRADE ESTABLISHMENTS

DETERMINATION

In conformity with the act of Congress approved June 19, 1948, 62 Stat. 478, and due notice of consideration having been published (14 F. R. 7136, November 24, 1949) pursuant to said act, I have determined that annual data relating to independent retail trade establishments are needed to aid the efficient performance of essential governmental functions and have significant application to the needs of the public and industry and are not publicly available from nongovernmental or other governmental sources.

Retail trade, as the outlet for the products of industry, mining, and agriculture, is of strategic importance in the economy of this country and information such as retail inventory trends and sales-inventory ratios are basic to an analysis of the functioning of the economy. Such agencies as the Council of Economic Advisers and the Board of Governors of the Federal Reserve Board require inventory data in appraising the business outlook and in connection with the review of credit policies. Because figures are needed on all major elements of business investment for the measurement of the gross national product, data on retail inventories also are needed.

Business and industry also are interested in the inventory measures as indicators of the outlook for business activity and as tools for the promotion of business efficiency and stability. Individual retailers can make use of the sales-inventory ratios, derived from the survey, as benchmarks to which their own operation can be related.

The annual survey will collect inventory data from the larger establishments in the Census Bureau's 68 sample areas. Inasmuch as sales data are already collected on a monthly basis from most of these establishments, duplication will be avoided by requesting only inventory data for those establishments which have reported monthly sales figures regularly to the Bureau. Both inventory and annual sales data will be collected from an additional group of retailers for whom monthly sales figures are not available. Information will be collected annually beginning in 1950 covering each preceding calendar year. The appropriate report form will be furnished to establishments covered by the survey. Additional copies of the forms are available on request to the Director of the Census, Washington 25, D. C.

I have, therefore, directed that an annual survey be conducted for the purpose of collecting the data hereinabove described.

Dated: January 10, 1950.

ANNUAL SURVEY OF MANUFACTURING
ESTABLISHMENTS
DETERMINATIONS

In conformity with the act of Congress, approved June 19, 1948, 62 Stat. 478, and due notice of consideration having been published (14 F. R. 7136, November 24, 1949) pursuant to said act, I have determined that annual data relating to manufacturing industries as indicated below are needed to aid the efficient performance of essential Governmental functions and have significant application to the needs of the public and industry and are not publicly available from non-Governmental or other Governmental sources.

Reports will be required from a representative group of about 45,000 manufacturing establishments. Establishments in manufacturing industries directly employ about 14 million workers; they pay out about $40 billion each year in salaries and wages, and contribute almost $75 billion to the value of manufactured goods.

The following information will be collected annually beginning in 1950 covering each preceding calendar year from a representative group of manufacturing establishments: annual payrolls, employment, man-bours, inventories, cost of materials, fuels, and supplies, expenditures for plant and equipment, value of shipments by class of products, and the quantity and cost of a limited number of materials. This information will be required of all establishments included in the survey, and the report forms will be sent each year to representative manufacturing establishments. One standard report form will be used for all industries covered in this survey, except lumber. In addition to the items listed above, the lumber form will obtain information on the production of rough lumber by species and stocks of rough lumber. Copies of the forms to be used are available on request to the Director of the Census, Washington 25, D. C.

The results of this proposed survey, in combination with data for all manufacturing establishments from the files of the Bureau of Old Age and Survivors' Insurance, will make possible national totals on an over-all basis, and many industry and geographic area statistics. These results will furnish the most important measures of manufacturing activity with the least possible burden on manufacturers. Related to the 1947 Census of Manufactures, the data will provide an indication of shifts occurring between 1947 and the years covered by the particular annual survey of manufacturing establishments.

I have, therefore, directed that annual surveys be conducted for the purpose of collecting data hereinabove described.

Acting Director.

CERTAIN COMMODITY AREAS OF MANUFACTURING

ANNUAL SURVEYS OF SPECIFIED MANUFACTURED PRODUCTS

In conformity with the Act of Congress approved June 19, 1948, 62 Stat. 478, and due Notice of Consideration having been published (14 F. R. 7185, November 29, 1949) pursuant to said act, I have determined that annual data relating to the industries listed below are needed to aid the efficient performance of essential governmental functions and have significant application to the needs of the public and industry and are not publicly available from nongovernmental or other governmental sources.

The industries listed below are significant in the textile and apparel, pulp and paper, paint, clay, asphalt, and primary metal and metal product areas of manufacturing. The establishments in these industries directly employ more than a million persons and, indirectly through their demands upon other industries for materials and services, provide jobs for several times that number. Information on the output of these industries is necessary to an adequate measurement of total industrial production. Government agencies need data on the production of these industries. Manufacturers in the industries involved, as well as their suppliers and customers and the general public, have also requested such data in the interest of business efficiency and stability.

The content of these annual reports will be identical with that of monthly or quarterly reports conducted by the Bureau of the Census on the same group of products. However, there will be no duplication inasmuch as establishments that file the monthly or quarterly reports during the year covered by the annual report will not need to submit annual reports on these products.

Information will be collected annually, beginning in 1950, covering each preceding calendar year from establishments engaged in the production of the following products:

- Cotton broad woven goods.
- Rayon and related broad woven goods.
- Woven fabrics made on woolen and worsted looms.
- Knit cotton and wool underwear.
- Pulp and paper.
- Paint, varnish, lacquer, and filler.
- Clay construction products.
- Asphalt and tar roofing and siding products.
- Cast iron products.
- Steel castings.
- Nonferrous castings.
- Steel forgings.
- Heating and cooking equipment.
- Fans, blowers, unit heaters and accessory equipment.
- Truck trailers.

In addition, data on wool consumption and machinery activity will be obtained from wool manufacturers.

The report forms will require information on shipments and/or production from the selected establishments. For "Pulp and paper," inventory and materials-consumption data will also be required. For "Heating and cooking equipment," inventories and unfilled orders will be obtained. Unfilled orders will also be requested from establishments producing castings and steel forgings, and machinery activity will be asked of establishments in the textile industries.

The above information will be required of establishments of the types described above, and the report forms will be sent each year to companies operating such establishments. Blank copies of the forms to be used are available to the producers of the listed commodities on request to the Director of the Census, Washington 25, D. C.

I have, therefore, directed that annual surveys be conducted for the purpose of collecting the data hereinabove described.

ANNUAL SURVEYS OF SPECIFIED MANUFACTURED PRODUCTS

DETERMINATIONS

In conformity with the act of Congress approved June 19, 1948, 62 Stat. 478, and due notice of consideration having been published (14 F. R. 6861, Nov. 15, 1949) pursuant to said act, I have determined that annual data relating to the industries listed below are needed to aid the efficient performance of essential governmental functions and have significant application to the needs of the public and industry and are not publicly available from nongovernmental or other governmental sources.

The industries listed below are significant in the textile, furniture, glass, and machinery and equipment areas of manufacturing. The establishments in these industries directly employ more than half a million persons and, indirectly through their demands upon other industries for materials and services, provide jobs for many times that number. Information on the output of these industries is necessary to an adequate measurement of total industrial production. Government agencies need data on the production of these industries. Manufacturers in the industries involved, as well as their suppliers and customers and the general public, have also requested such data in the interest of business efficiency and stability.

Information will be collected annually, beginning in 1950, covering each preceding calendar year from all establishments engaged in the production of the following products:

- Cotton and rayon woven goods, finished.
- Household furniture and bedding products.
- Pressed and blown glassware.
- Refractories.
- Farm machines and equipment.
- Farm pumps.
- Tractors.
- Machine tools.
- Steel boilers.
- Electric lamps.
- Air conditioning and commercial refrigeration equipment.
- In addition, inventory data will be obtained from persons and organizations having ownership of wool and related fibers in excess of 10,000 pounds.

The report forms will require information on shipments and/or production from all manufacturers of the products listed above. In addition, for "Refractories" and "Electric lamps," inventory data will be obtained. For "Steel boilers," orders booked will be required instead of production or shipments. Owners of wool and related fibers will be asked to report their holdings, by grade and origin, as of the first quarter of each year.

The above information will be required of all establishments of the types described above, and the report forms will be sent each year to companies operating such establishments. Blank copies of the forms to be used are available to the producers of the listed commodities on request to the Director of the Census, Washington 25, D. C.

I have, therefore, directed that annual surveys be conducted for the purpose of collecting the data hereinabove described.
