1950 CENSUS OF POPULATION

SERIES P-C BULLETINS

The Series P-C Bulletins (Detailed Characteristics of the Population) are preprints of Chapter C of the corresponding part of Volume II, *Characteristics of the Population*. The series comprises 53 separate bulletins, as indicated in the listing below.

The bulletins contain final 1950 Census data showing cross-classifications of population characteristics for States, for the urban, rural-nonfarm, and rural-farm parts of States, and for standard metropolitan areas and cities of 100,000 or more, with some data for cities of 50,000 to 100,000 inhabitants. Population characteristics cross-classified by age include race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, and employment status. For most of these subjects, data are shown by single years of age where such detail is especially relevant. Marital status and school enrollment are presented by labor force status. Labor force status in 1950 is shown by number of weeks worked in 1949. Detailed occupation and detailed industry are presented for employed persons and for the total experienced labor force. The intermediate occupational classification and the intermediate industrial classification are shown by age, race, class of worker, and personal income in 1949. The intermediate occupational classification is shown by urban-rural residence, and the intermediate industrial classification is shown by major occupation group and number of weeks worked in 1949. Data on personal income in 1949 are given by age, race, family status, class of worker, number of weeks worked in 1949, and source of income. Comparable data from the 1940 Census are shown on wage or salary income of persons. Data on all subjects are classified by sex.

Bulletins in this series will be published during the winter and early spring months. Copies may be obtained from the SUPERINTENDENT OF DOCUMENTS, GOVERNMENT PRINTING OFFICE, WASHINGTON 25, D. C., or from the Department of Commerce Field Offices, at the following prices:

INTRODUCTION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is issued on a current basis each quarter and cumulated to the annual volume. A MONTHLY SUPPLEMENT to this CATALOG, which does not include regular monthly and quarterly publications, enables users to be informed more currently on publications as they appear. Each subscription to the quarterly CATALOG (\$1.50 a year) will include a combination of 4 quarterly issues of the CATALOG and 12 copies of the MONTHLY SUPPLEMENT.

The record of the Bureau of the Census publications since the first Census in 1790 through the year 1945 is available in the "Catalog of United States Census Publications 1790-1945" (Government Printing Office, \$1.50). This catalog was prepared by the Census Library Project sponsored by the Library of Congress and the Bureau of the Census. Publications issued after 1945 are shown in the annual issues of CENSUS PUBLICATIONS CATALOG AND SUBJECT GUIDE for 1946 and subsequent years, through 1951.

The BUSINESS SERVICE CHECK LIST of the Department of Commerce, issued weekly at a subscription cost of \$1.50 a year, includes a list of Census publications. Subscriptions can be placed with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or with the field offices of the Department of Commerce listed on the back cover of this publication.

HOW TO USE THIS PUBLICATION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is designed to give users of published Census statistics a direct method of locating needed information. The catalog contains detailed descriptions of the contents of the published reports and is followed by two indexes, an index to reports by geographic areas, and an index to reports by subject.

The entries in the two indexes are directly keyed to the reports listed in the catalog by the use of a reference numbering system. All publications are arranged in the catalog by general subject field, following the organization pattern of the Bureau, namely: 1. Agriculture; 2. Business; 3. Foreign Trade; 4. Governments; 5. Industry; 6. Population and Housing; and 7. Miscellaneous. The first digit of the reference number designates the major subject within which the report is listed. Thus, all Agriculture Division reports have reference numbers beginning with 1; reference numbers for all Business Division reports have 2 as the first digit, etc. The second part of the reference number further classifies the reports

INTRODUCTION

by broad categories. For example, Business Division reports on Retail Trade are classified under 2-21; Wholesale Trade, 2-22; Trade Studies, 2-23; etc. Reports carrying a series number are further identified by the series number shown in parentheses following the group reference number, where it is feasible to include such numbers in the indexes.

The user of the CATALOG may first consult either the index by geographic areas or the index by subject and secure the reference number or numbers shown for the item on which he is looking for information. The reference number is then used as a key in locating the desired reports in the catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page in the catalog section. In order to avoid the indexing of large lists of commodities, general references are made in those instances where coverage is all inclusive; reports are indexed under specific commodities only when the reports are limited to the specific item.

HOW TO OBTAIN BUREAU OF THE CENSUS PUBLICATIONS

Priced publications, except as otherwise noted in this catalog, can be purchased from the Superintendent of Documents, Washington 25, D. C., or from the U. S. Department of Commerce Field Offices which are listed on the back cover. Other publications, which are not published by the Government Printing Office, can be ordered from the Bureau of the Census, Washington 25, D. C. For these publications, checks or money orders must be made out to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment. Remittances are required in advance of any shipment.

Unpriced publications may be obtained from the Bureau of the Census, Washington 25, D. C. When requesting publications, please be as specific as possible.

Supplies of publications are limited. Priority in meeting requests will be given to government agencies, large public libraries, school officials, and certain other groups when the reports are needed for official use or will be made available to large numbers of users of data.

AVAILABILITY OF UNPUBLISHED DATA

Detailed information in the files of the Bureau that has been tabulated but not published, can be made available, upon request, for the cost of transcribing or reproducing the data. Requests for statistics, addressed to the Director, Bureau of the Census, Washington 25, D. C., will be studied for availability of material. If unpublished data are available, an estimate of the cost of preparing and furnishing the data will be made.

A recent statement of the policy governing special work, including the making available of the special tabulations, and a list of some of the work performed, was included in the appendix to the 1952 issue of the CATALOG OF UNITED STATES CENSUS PUBLICATIONS.

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

JANUARY-MARCH 1953

The following list of Census publications includes those issued from January through March 1953. The publications are listed by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population and Housing, and, for Bureau-wide materials, Miscellaneous. Group numbers are assigned to each section and are shown on the upper outside corner for the first entry on each page. These group numbers are assigned to all index entries to facilitate reference from the subject guide to the specific reports listed in the Catalog.

Each report is described and the date of issue is given for all reports except regular monthly or quarterly series.

1. AGRICULTURE DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the Census of Population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925; thus, there has been a Federal Census of Agriculture every fifth year since 1920.

Each year the Bureau collects statistics and issues periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on dates prescribed by Congress. Five of these reports are issued jointly with the Department of Agriculture as the "Consolidated Cotton Report."

1-10. 1950 CENSUS OF AGRICULTURE

FINAL REPORTS

There will be five principal final volumes resulting from the 1950 Census of Agriculture: Volume I.—*Counties and State Economic Areas*, published in 34 parts for specified States and the Territories and possessions; Volume II.—*General Report, Statistics by Subjects*; Volume III.—*Irrigation of Agricultural Lands*; Volume IV.—*Drainage of Agricultural Lands*; and Volume V.—*Special Reports*. The chapters or parts of Volumes II and III are being issued as separate bulletins. The ten special reports of Volume V will be issued in separate pamphlets. Part 2 and Part 3, issued during the quarter, are described below.

Volume I, *Counties and State Economic Areas*, in 34 separate parts, is arranged by census geographic divisions for the continental United States. These bulletins supersede the reports in the preliminary Series AC50-1-5. All reports, except that for Puerto Rico and the combined reports on the Territories and possessions, were issued in 1952.

Volume I. Counties and State Economic Areas¹

v. p., tables, map, appendix.

Pt. 34. Territories and possessions; Alaska, American Samoa, Guam, Hawaii, Puerto Rico, and Virgin Islands of the United States. 260 p. \$1.25.

Number of farms, farm characteristics, acreage in farms; value of farm land and buildings, cropland, other uses of land; farm facilities and equipment; number of various kinds of livestock; acres and production of various crops; value of farms; and data by size of farm, by tenure of operator, by type, and by economic class for the 1950 Census of Agriculture; together with comparative data from earlier Censuses.

The questionnaire used for each Territory or possession in the 1950 Census of Agriculture forms the appendix for each report combined in Part 34 of Volume I.

Part 34.5 Territories and possessions; Puerto Rico.

96 p. *Preprint bulletin.* 60 cents.

This bulletin has been incorporated in the final report, Pt. 34, listed above. The introduction to this report is in Spanish and English, while the questionnaire which appears in the appendix is in Spanish only.

Volume III, *Irrigation of Agricultural Lands*, comprises 18 separate State reports with statistics for counties and drainage basins, and a United States summary report. These reports will be combined in a final volume. Volume III bulletins supersede reports in Series IR50-1.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Vol. III. Irrigation of Agricultural Lands (States)¹

v. p., tables, maps.

Data cover: enterprises, irrigation works, farms and acreage irrigated, investment, water used, and cost. Includes an irrigation summary, 1890 to 1950 for: farms, number and acreage, number irrigated, irrigated acreage reported by farms and irrigation enterprises and total capital investment in irrigation enterprises. Characteristics of irrigation enterprises—number, type, total land irrigated, acreage irrigated by type of enterprise and by source of water, irrigation works, capital investment, total, and by type of enterprise. Data for 1949 on: enterprise characteristics; use of surface, ground, pumped and stored water; source of surface water; drainage of irrigated land; irrigation works (1950); season of irrigation; capital investment, 1950 and 1940 and indebtedness (1950); cost of water to farms and quantities of water reported, 1949. Complete system irrigation enterprises by surface, ground, gravity and pumped water; and by acreage irrigated.

Similar county data on the number of irrigated farms and irrigation enterprises and their characteristics is shown for 1950 and 1945 for irrigated farms, and for 1950 and 1940 for irrigation enterprises, and by drainage basins, censuses of 1950 and 1940 for irrigation enterprises.

Pt. 14. Oregon. 55 p. 40¢.

Pt. 17. Washington. 48 p. 35¢.

Pt. 15. Texas. 71 p. 45¢.

Pt. 18. Wyoming. 55 p. 40¢.

Pt. 16. Utah. 57 p. 40¢.

Volume IV, Drainage of Agricultural Lands, supersedes Series DR 50-1, and includes in the one book, the State reports with statistics for counties and a summary for the United States.

Vol. IV. Drainage of Agricultural Lands¹

307 p., tables, charts, maps, appendix. February 1953. \$1.50.

Data on land in enterprises, number and types of enterprises, cost of drainage, indebtedness, assessments and drainage works, for the 30 drainage-district States and the 10 county-drain States, and a summary chapter for the 40 States.

The introduction includes a history of the census of drainage, the legal basis for the 1950 Census of Drainage, the scope of the censuses of drainage and other related material. The appendix shows the drainage questionnaires used for the County-Drain States (D1) and the District-Drain States (D2); instructions for the D1 and D2 enumerators; a County List of Enterprises (Forms 702-11); and a letter to State auditors.

Volume V comprises 10 special reports by subject. These are also being issued as preprints and will be bound into a final volume. Part 1 of Volume V, *Horticultural Specialties*, replaces the preliminary Series HS50-1-4, and the United States summary, *Horticultural Specialties*, issued in 1952.

Vol. V. Special Reports¹

v. p., tables, charts, maps, appendix.

Part 2. Multiple-unit Operations. 486 p. \$2.25

The report presents statistics for specified counties and State economic areas in 13 southern States, and Missouri, on: multiple-unit operations compared with farms not in multiple units, for the multiple-unit area, and specified data for the multiple-unit area compared with State and United States totals; number of landlord-tenant and multiple-unit operations by States and economic areas; specified averages for all farms, multiple units and farms in or not in multiple units; percentage of all farms, multiple units, and farms not in multiple units reporting specified items; also percentage of all cropland harvested; multiple-unit operations by—size of unit, with percent of cropland harvested by specified crops; color and tenure of operator; type of farm; acres of cropland harvested; number of subunits; kind of tenant in landlord-tenant operations.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Vol. V. Special Reports—Continued

The introduction includes the history of census enumeration of multipleunits; description of questionnaire used; enumeration of land in more than one enumeration district or county, and a description of office procedure in connection with the enumeration. Maps illustrated the use made of acreage in farm multiple-unit operations. The appendix shows a reduced facsimile of an agriculture questionnaire typical of those used in the multiple-unit areas (Georgia); a reduced facsimile of a 1950 Landlord-Tenant Operations Questionnaire, and the Instructions to Enumerators including a list of the States and counties in the multiple-unit area.

Pt. 3. Ranking Agricultural Counties. 61 p. 40 cents.

Presents statistics for selected items of inventory and agricultural production for the leading counties in the United States. Gives for the 100 leading counties, in each instance, the quantity and value of leading classes of livestock on farms and of poultry and poultry products sold; field crops harvested; vegetables harvested for sale, excluding Irish and sweet potatoes; and of all fruits, nuts and horticultural specialties sold, Censuses of 1950 and 1945.

A summary table presents the quantity and value of specified items of livestock and livestock products, field crops harvested, vegetables harvested for sale and fruits, nuts and horticultural specialties: United States totals, total, and percent of United States total, for the 100 leading counties in 1950; the name of the county, the county total and the percent of the United States total. Maps show the distribution of most of the products for the Census of 1950.

1-20. COTTON GINNING REPORTS**A/C-O-ICG Report on Cotton Ginned: Crops of 1952, 1951, and 1950**

1 p., table. March 20, 1953. End-of-season report.

See descriptive text for Report on Cotton Ginning (below).

A/C-O-ICG Report on Cotton Ginning. Preliminary

Eleven releases during season with an additional end-of-season report (see above) issued in March of the following year. Each report 1 p., table. January 23, March 24, 1953.

Number of bales of cotton ginned from the season's growth prior to specified date, comparative statistics, corresponding date for two preceding years for 18 named cotton-growing States; United States summary figures on consumption, stocks, imports, and exports of cotton also given. Quantity shown in running bales.

NOTE.—A post card duplicate of this report is available about a week later than the mimeographed release upon application to the Bureau of the Census.

Cotton Ginned Prior to (specified date) in (specified State): Crops of 1952 and 1951

11 reports, p. 1-2, table. January 30, March 24, 1953.

Reports are released pertaining to five specified dates during each cotton-ginning season, with an additional end-of-season report. They contain preliminary figures by counties ginned from the year's crop prior to the specified dates, with comparative figures for the previous year's crop. Ten States are covered by separate reports, with an additional report for "Specified States" (all other cotton-growing States, see below). Quantities are in running bales, not including linters.

Arkansas	Tennessee
Georgia	Texas
Louisiana	Specified States (Arizona, California, Florida,
Mississippi	Illinois, Kentucky, Missouri, New Mexico,
North Carolina	Virginia)
Oklahoma	

1-90. SPECIAL STUDIES ON A COST BASIS

NOTE.—For further information write to the Director, Bureau of the Census, Washington 25, D. C.

Minor civil division data for selected counties in New Mexico, New York, Pennsylvania, Maryland, Kansas and California.

Special tabulations including all farms reporting hired labor expenditures of \$2,500 or more in 1949.

2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1929, 1933, 1935, 1939, and 1948. Those for 1929 and 1939 were taken as part of the 1930 and 1940 Decennial Censuses; those for 1933 and 1935 were special projects. The Census of Business will be taken next in 1954 covering 1953 and every fifth year thereafter, simultaneously with the Censuses of Manufactures, Mineral Industries, and Transportation.

Current reports are issued monthly showing national estimates of the dollar volume of retail sales and trends in retail sales and wholesale sales and inventories. An annual retail survey is taken from which will be produced national estimates of the dollar volume of inventories, the ratio of sales to inventories and the amount of charge and installment plan receivables as of the end of the year, by kinds of business in the United States. Other reports are issued on special topics, such as the *Canned Food Report* and the report on *Petroleum Products—Secondary Inventories and Storage Capacity*.

3. FOREIGN TRADE DIVISION

Statistical data on United States exports and imports of merchandise and of gold and silver are collected from shippers' exports declarations and import entries. These forms are filed by exporters and importers with Collectors of Customs and transmitted to the Bureau. The statistics compiled include information on the dollar value and net quantity (bales, square yards, gallons, etc.) of United States exports and imports by commodity, country of destination and origin, customs districts through which merchandise enters and leaves the United States; trade with United States Territories and possessions. The data also show the shipping weight and dollar value of vessel imports and exports, domestic to foreign port of routing, of shipments by vessel, the nationality of the carrier, for shipments by vessel and the number and tonnage of vessels entering and clearing port in the foreign trade of the United States.

Monthly and quarterly figures are preliminary and subject to revision. Preliminary annual data are available in annual reports for most series of monthly reports. All data for the year are summarized in the final report, *Foreign Commerce and Navigation of the United States*, latest issue, 1946.

4. GOVERNMENTS DIVISION

The Governments Division collects data and prepares reports showing current and bench mark statistical data relating to the characteristics and functions of State and local governments and their administration in the United States. In current reporting, primary attention is given to public finance (revenue, expenditure, debt, and enterprise finances), and public employment (number of employees and amount of payroll). A two-page release entitled "*Census Bureau Publications on Governments, as Scheduled for the Fiscal Year 1953*" is available upon request.

During the past century, a Census of Governments has been taken at 10-year intervals—most recently for 1942—providing more complete and detailed information on State and local governments than is reported currently. Public Law 767 of the 81st Congress, approved September 7, 1950, requires that such a census be taken for the year 1952 and thereafter at 5-year (rather than 10-year) intervals. However, funds for taking the 1952 Census were not made available by the Congress.

4-1. STATE FINANCES

G-SF52 State Finances: 1952

No. 3. Revenue and Expenditure of Selected States in 1952²

17 p., tables, charts. March 1953. Preliminary. 15 cents.

Advance release of fiscal 1952 data for the first 26 States for which such figures were available. Tables provide the following, by State: summary financial aggregates, total expenditure by character and object, general revenue by source, general expenditure by function, capital outlay and intergovernmental expenditure, insurance trust revenue and expenditure, and fiscal year, population, and income payments. Per capita amounts are also shown for selected general revenue and general expenditure items.

4-2. CITY FINANCES

G-CF51 City Finances: 1951

No. 2. Compendium of City Government Finances in 1951¹

126 p., tables, charts. January 1953. 50 cents.

Final report of detailed financial data for cities of 25,000 or more for the fiscal year 1951. Summary data, by population groups, with percent changes, 1950 to 1951, and per capita amounts. Individual-city data (481 cities) showing income and outgo aggregates; total expenditure by character and object; general revenue by source; general expenditure by function; debt outstanding, issued, and retired; finances of city-operated utilities; and finances of city employee-retirement systems. There are also tables showing per capita amounts of selected financial items, by city; financial data for selected urban towns and townships; and the fiscal years of the 481 cities.

4-4. GOVERNMENT EMPLOYMENT

G-GE52 Government Employment: 1952

Public Employment in (specified month)²

4 p., tables, charts. Quarterly. No. 4. October 1952. 5 cents.

Total number of public employees (Federal, State, and local), school and nonschool, number of full-time employees, and amount of monthly payroll, by month for the current and preceding year, and yearly (showing figures for reported month only) back to 1940.

¹ For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

G-GE53 Government Employment: 1953**Public Employment in (specified month) ²**

4 p., tables, charts. Quarterly. No. 1. January 1953. 5 cents.

Same as report G-GE52, No. 4, above, but for later quarter.

4-5. SPECIAL STUDIES**G-SS State and Local Government Special Duties****No. 30. Retirement Coverage of State and Local Government Employees**

12 p., tables, chart. March 1953. 10 cents. ²

Special study of number of State and local government employees covered by retirement plans. Tables provide number and percent of employees covered by State or local retirement plan, Federal old-age and survivors insurance plan, and with no retirement coverage. Figures are shown for education and nonschool employees, by State, showing both State and local government numbers.

This report is based upon a survey conducted by the Bureau of the Census for the Bureau of Old Age and Survivors Insurance of the Social Security Administration, Department of Health, Welfare, and Education.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

5. INDUSTRY DIVISION

Current statistics on commodity production and shipments are issued in the *Facts for Industry* series. This series of releases makes available to manufacturers, trade groups, and other users of industrial data, current figures that are useful in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

Annual surveys of manufactures have been taken each year since 1949. They cover a sample of manufacturing establishments and bring up to date the statistics on employment, earnings, man-hours, value added, inventories, expenditures for new plant and equipment, and classes of products, which are shown in more detail in the quinquennial Census reports.

The Census of Manufactures, first taken in 1810 and now quinquennial (last taken for 1947) provides detailed data on manufacturing by geographic areas, by industries and by subjects. The Census of Manufactures will be taken next in 1954 covering 1953 and every fifth year thereafter, simultaneously with Censuses of Business, Mineral Industries, and Transportation.

5-2. FACTS FOR INDUSTRY

In the numbering of the Facts for Industry series, the letter "M" is used for Manufactures, the first two digits represent the group classification at the two-digit level of the Standard Commodity Classification, and the specific survey is shown by the letter following the group classification numbers.

Annual data are available in annual reports for most series of monthly or quarterly reports. In addition there are reports which are issued on an annual basis but are not a summary of the data appearing in any monthly, quarterly or semi-annual series.

M13A Hardwood Veneer and Plywood²

5 p., tables, appendix. Quarterly and annual summary. Quarterly 10 cents. Annual 15 cents. Yearly subscription including annual summary, 50 cents. Quarterly: Third quarter 1952.

Hardwood plywood production by type of core and by geographic region, by type of core and by face species; consumption of veneer and core lumber in the fabrication of hardwood plywood, by origin of material; consumption and stocks of glue at hardwood plywood mills by type of glue, data for current quarter, preceding quarter and same quarter preceding year. Production of hardwood plywood (except package and container) by plant class, and by type of core, current quarter.

NOTE.—Data for hardwood veneer production were discontinued on a quarterly basis after the second quarter 1952. They will be issued on an annual basis beginning with the annual report for the calendar year 1952.

Shipments and end-of-month unfilled orders for sale and own use: gray iron castings, miscellaneous gray iron castings, molds for heavy steel ingots, chilled iron railroad car wheels, cast iron pressure pipe and fittings and soil pipe and fittings, malleable iron castings and steel castings; carbon steel and alloy steel specialties, railway specialties and other carbon steel and other alloy steel castings, current and preceding month and same month preceding year. Production of steel castings and ingots by type of furnace, current and preceding month. Estimates are made from a sample survey conducted by the Bureau of the Census and the Bureau of Mines.

M21C Iron and Steel Foundries and Steel Ingot Producers (Report on Products Shipped and Materials Used) ²

8 p., tables, charts, appendix. Monthly and annual summary. Monthly 10 cents. Yearly subscription including the annual summary and a subscription to M21-1, Iron and Steel Castings and Steel Ingots, \$1.25. Monthly: October-December 1952.

Ferrous castings: shipments and unfilled orders for sale and own use by type of casting; steel castings and ingots—production by type of furnace, current and preceding month and same month preceding year; consumption of scrap and pig iron by type of furnace, current and preceding month; iron and steel scrap—stocks, production, receipts, consumption, and shipments by grades, current month; pig iron, coke and fluorspar—receipts, consumption and stocks, current and preceding month; shipments of iron and steel castings; production of steel ingots and pig iron, and consumption of iron and steel scrap and pig iron by State and geographic region, current month; consumers' stock of pig iron, coke and fluorspar on hand by State and geographic region, current month. Issued jointly by the Bureau of the Census and the Bureau of Mines.

M22C Steel Forgings ²

2 p., tables, charts. Monthly and annual. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: October-December 1952; January 1953.

Shipments for sale and own use by type of forging and end of month unfilled orders, by type of forging and grade of steel, current and preceding month and same month preceding year; steel consumed in forging, by type of forging and by mill shape, current month. Published since 1943.

M24-1 Aluminum and Magnesium Wrought Products ²

2 p., tables, charts. Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.

Producers' monthly net shipments of four major types of aluminum wrought products (plate, sheet, and strip; rolled structural shapes, rod, bar, and wire; extruded shapes, tube blooms, and tubing; powder, flake, and paste) and magnesium wrought products; number of active companies; current month, preceding month, same month preceding year; cumulative totals for two years. Includes total figures for both industries and represents complete coverage of the products. Published since 1942.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

M24E Nonferrous Castings²

2 p., tables, charts. *Monthly and annual summary. Monthly 5 cents. Yearly subscription including annual summary, 50 cents. Monthly: September, September-December (I report, 3 p.) 1952.*

Shipments for sale and own use, and unfilled orders for sale by type of casting, current month, preceding month, and same month preceding year; and for shipments, cumulative totals for two years. The data in the September-December 1952 report is shown for months only. Estimated totals are derived from a sample survey. Published since 1942.

M26B Clay Construction Products²

4 p., tables, charts, map. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Monthly: November, December 1952; January 1953.*

Production (quantity) and shipments (quantity and value) of: unglazed brick (common and face) for the United States, geographic divisions and States, and clay construction products (except unglazed brick) by type of product for the United States and geographic divisions, current and preceding month. Same data by *Structural Clay Products Institute* regional marketing areas for unglazed brick and unglazed structural tile. Published since 1928, comparable data for some products since September 1943.

M26D Asphalt and Tar Roofing and Siding Products²

1 p., table. *Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January, February 1953.*

Quantity of shipments by type of product; current and preceding month, same month preceding year, and cumulative totals for two years. Published since 1928, comparable data since September 1943.

M31B Farm Pumps²

1 p., table. *Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.*

Quantity and value of shipments of domestic water systems, pumps and windmills; current and preceding month, and cumulative total current year. Data are collected from reports of all known producers of these products.

M31E Fans, Blowers and Unit Heaters²

1 p., table. *Quarterly and annual summary. Quarterly 5 cents. Yearly subscription including annual summary, 25 cents. Quarterly: Fourth quarter 1952.*

Value of shipments and orders booked for fans, blowers, unit heaters and accessory equipment, current quarter and preceding quarter. Data include the fan and blower group (total), centrifugal fans and blowers, propeller fans, axial fans, each by type, parts for fans and blowers; unit heater group (total); unit heaters, by type; unit ventilators; heat transfer coils, by type; and parts for unit heaters and unit ventilators; and air washers. Published since January 1931.

M36A Construction Machinery (Excavating and Earthmoving Equipment)²

3 p., tables. *Quarterly and annual summary. Quarterly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 25 cents. Quarterly: Fourth quarter 1952.*

Total shipments (quantity and value) by type of equipment, and shipments for export (for other than power cranes and shovels); current quarter and preceding quarter.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

M36A Construction Machinery (Excavating and Earthmoving Equipment—Con.

Data are shown for: power cranes and shovels; road construction and maintenance machinery; construction machinery for mounting on tractors; wheel-type tractors; and tracklaying tractors by horsepower; trucks and trailers, off highway type; and portable well and blast hole drills and other excavating and earthmoving equipment. Published since 1943.

M37B Tractors (Except Garden Type) ²

2 p., tables. Quarterly 5 cents. Yearly subscription including M37A Summary (Tractors), 25 cents. Fourth quarter 1952.

Quantity of tractors shipped by type of tractor and type of fuel system; and quantity and value of shipments (domestic and for export) by type, and by horsepower rating, current quarter and preceding quarter.

M42A Complete Aircraft and Aircraft Engines ²

3 p., tables. Monthly and annual summary. Monthly or annual 10 cents. Annual subscription including subscriptions to M42D, Backlog of Aircraft Orders, and M42E, Aircraft Propellers, \$1.25. Monthly: November, December 1952; January 1953.

Shipments by plants manufacturing complete civilian aircraft and engines for civilian aircraft, current month, three months moving average, cumulative totals for two years; quantity and value of exports of civilian aircraft and engines for civilian aircraft, current and preceding month and cumulative totals for two years. Issued jointly by the Bureau of the Census and Civil Aeronautics Administration. Published since 1946.

M42D Backlog of Aircraft Orders ²

2 p., tables, charts. Quarterly 10 cents. Annual subscription, \$1.25 (includes M42A, Complete Aircraft and Aircraft Engines and M42E, Aircraft Propellers). Fourth quarter 1952.

Backlog (value) end of quarter, net new orders and net sales during quarter by manufacturers of complete aircraft, aircraft engines and propellers, current quarter. Backlog (value) reported by manufacturers of complete aircraft, aircraft engines and propellers, current and preceding quarters. Issued jointly by the Bureau of the Census and Civil Aeronautics Administration. Published since 1949.

M42E Aircraft Propellers ²

2 p., tables. Semiannual (cumulative). Included in the subscription rate covering M42A, Complete Aircraft and Aircraft Engines, and M42D, Backlog of Aircraft Orders, \$1.25. Summary, 1952.

Value of shipments of aircraft propellers and parts, military and civil, and other products of plants producing propellers, by quarters, current year and preceding year; number of civil aircraft propellers shipped by months, current year and preceding year. Issued jointly by the Bureau of the Census and Civil Aeronautics Administration. Published since 1948.

M45F Truck Trailers ²

2 p., tables. Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.

Production (units) and shipments (units and value) for total trailers, current and preceding year by months; quantity of production and quantity and value of shipments of complete trailers (vans, tanks, pole and logging, platforms, low-bed heavy haulers, dump trailers, and all other trailers) and converter dollies, and trailer chassis only (for sale separately), current and preceding month.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

M51B Mechanical Stokers²

2 p., tables, charts. *Monthly and annual summary. Monthly 5 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.*

Factory sales of five classes of stokers, current month, preceding month, same month preceding year, and cumulative totals for two years; includes definitions of classes. Published since 1923.

M51H Plumbing Fixtures²

2 p., tables, charts. *Quarterly and annual summary. Quarterly 5 cents. Yearly subscription including annual summary, 25 cents. Quarterly: Fourth quarter 1952.*

Value of shipments of vitreous china; glazed earthenware, concrete and composition; and metal plumbing fixtures, current quarter, preceding quarter and same quarter preceding year. Production, shipments, and stocks of plumbing fixtures current quarter and preceding quarter. Published since 1946.

M51N Heating and Cooking Equipment²

6 p., tables, charts. *Monthly and annual. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Monthly: October-December 1952; January 1953.*

Shipments (quantity and value), inventories (quantity) and unfilled orders (quantity) of nonelectric cooking appliances; domestic heating stoves; floor and wall furnaces; cast-iron boilers, radiators and convectors; nonelectric water heaters and range boilers; oil burners; and warm air furnaces by product for each group.

Quantity and value of shipments except where noted for current and preceding month, same month preceding year and cumulative totals for two years; inventories and unfilled orders, current month only. Data published on oil burners since 1929; warm air furnaces, 1944; cooking and heating stoves, 1943; water heaters, 1944; and boilers, radiators and convectors, 1945.

M67B Men's Apparel²

2 p., table, charts. *Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.*

Total and average weekly cuttings of men's selected garments, cumulative totals to date, current year, previous year and percent change current month compared with preceding month and same month preceding year. Published since 1944.

M67C Knit Underwear and Nightwear²

2 p., tables. *Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: January 1953.*

Dollar value of net shipments of knit underwear and nightwear by selected States or area; quantity of shipments by major type of garment; cumulative totals to date; production (quantity) and shipments (quantity) of knit cotton/wool underwear and nightwear by item; current and preceding month, and same month preceding year. Published since 1943.

M67H Women's, Misses' and Juniors' Outerwear²

8 p., tables, charts. *Quarterly and annual summary. Quarterly 10 cents. Yearly subscription including annual summary, 50 cents. Quarterly: Third quarter 1952.*

For each principal women's outerwear industry (coat and suit, unit-price dress, dozen-price dress, blouse, and skirt) shows value of shipments, total returns, and

returns as percent of gross shipments, current quarter, preceding quarter, and same quarter preceding year, with percentage change, current quarter from same quarter preceding year. Production distribution by price line and by kind of fabric used in women's principal outerwear garments, year to date, current and preceding year. Includes a summary—dollar shipments for all industries; cuttings of specified garments: dresses sold at a unit price; suits, untrimmed coats, fur-trimmed coats, dresses sold at a dozen price; blouses and waists; and skirts, current quarter and same quarter preceding year with percent of change, and cumulative totals, current and preceding years.

M68A Shoes and Slippers²

4 p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Monthly: November, December 1952; January 1953.

Production (summary) by kind of footwear, current and preceding month, same month preceding year, percent of change, current month compared with preceding month and same month preceding year, and percent of production by type of outsole, current month. Production (quantity) and shipments (quantity and value) by geographic division and States, current and preceding month, same month preceding year, cumulative totals for two years and percent of change in value of shipments, current month compared with preceding month and same month preceding year. Production by kind of footwear, by type of upper and outsole, current month. Published since 1921.

M75A Steel Shipping Barrels, Drums and Pails²

2 p., table, charts. Monthly and annual summary. Monthly 5 cents. Annual 15 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.

Shipments, end-of-month stocks and unfilled orders for sale and own use; heavy type steel shipping barrels for sale only; light type for sale and own use. Shipments, current and preceding month, same month preceding year and cumulative totals for two years; end-of-month stocks, current month; end-of-month unfilled orders, current and preceding month and same month preceding year. Types of products defined. Published since 1924.

M75C Commercial and Home Canning Closures²

3p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Monthly: December 1952; January 1953.

Shipments and production of commercial closures, crowns, and home canning closures, current and preceding month, same month preceding year and cumulative totals for two years. Raw materials consumed in the production of commercial and home canning closures, including tin mill products, molding compounds used for plastic caps, aluminum, and rubber, current and preceding month. Published since 1941.

M75D Metal Cans²

2 p., tables, chart. Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.

Shipments for sale and own use by type of product packed (nine food cans and four nonfood cans), current and preceding month, same month preceding year and cumulative totals for two years. Shipments for sale and own use by type of product packed, for the United States and Hawaii, by geographic divisions, current and preceding quarter and same quarter a year ago in the March, June, September and December reports. Data are in terms of short tons of steel consumed in the manufacture of cans. Published since 1943.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

M77C Glass Containers²

2 p., tables, charts. *Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Monthly: November, December 1952; January 1953.*

Quantity of shipments (direct exports and domestic), production, and stocks, domestic by type of container; shipments for current and preceding month and same month preceding year; production and end-of-month stocks for current and preceding month. Published since 1945.

MPAF-1-1 Consumption and Inventories of Steel, Copper, and Aluminum in Metalworking Industries: First quarter 1951—Second quarter 1952²

13 p., tables. *March 25, 1953. Special report. 15 cents.*

Estimates are shown on total consumption (including purchases, interplant transfers, and produced and consumed in the same establishment) and inventory of carbon steel, alloy steel, stainless steel, copper, and aluminum by shape and form for each quarter January 1951—June 1952; and on consumption of carbon steel, alloy and stainless steel combined, copper, and aluminum, by selected industries and industry groups, for each quarter, 1951.

Estimates cover the major metal consuming industries in the four broad industrial groups: Fabricated metal products; Machinery (except electrical); Electrical machinery; and Transportation equipment; also includes the consumption and inventory of steel in the Iron and Steel Forgings Industry.

Data tabulated from surveys conducted by the Bureau of the Census for the National Production Authority. Surveys included approximately 8,000 of the larger establishments in the metalworking industries and a representative sample of the smaller plants.

5-3. ANNUAL SURVEYS OF MANUFACTURES

Statistics on manufacturing are collected in detail in the Census of Manufactures (now taken every five years with the next to cover the year 1953). During the intercensal period, the Annual Surveys provide up-to-date basic statistics on the key measures of manufacturing activity for industry groups, important individual industries, and for geographic divisions and States. The annual survey covers approximately 45,000 plants out of a total of more than 250,000. Included are all large plants, accounting for approximately two-thirds of the total manufacturing employment in the United States, and a sample of the much more numerous small plants.

The Annual Survey program is designed to provide estimates of general statistics (employment, payrolls, man-hours, value added by manufacture, etc.), for industry groups and selected industries; general statistics for geographic divisions and States, cross-classified by major industry group; value of shipments for classes of products; data on selected metals consumed, by selected industries; expenditures for new plant and equipment, for industry groups and for States; value of manufacturers' inventories, for industry groups and selected industries; and selected general statistics for industries, cross-classified by size of establishment.

The Annual Surveys of Manufactures employment data have been coordinated with the Bureau of Old Age and Survivors Insurance employment figures for consistency in classification, coverage, and statistical accuracy.

**MAS-50-9 Fuels Consumed and Electric Energy Purchased: 1950 and 1947.²
Advance report**

20 p., tables, appendix. January 1953. 25 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1950 and 1947 (revised 1950 figures) by geographic divisions and States. Tables include comparable 1947 statistics, previously published in the 1947 Census of Manufactures release MC203, *Fuels and Electric Energy Consumed*. Replaces preliminary report MAS-50-5, *Cost of Fuels Consumed and Purchased Electric Energy for Industry Groups: 1950 and 1947*, issued in 1951 and incorporated in the report *Annual Survey of Manufactures, 1949 and 1950*.

MAS-51-3 Value of Shipments of Selected Classes of Products: 1951, 1950, and 1947.² Advance report

8 p., tables. February 6, 1953. 20 cents.

Estimates of value of shipments during 1951 and 1950 for more than 600 classes of manufactured products with comparable data from the 1947 Census of Manufactures. These estimates are based on the latest Annual Survey of Manufactures. The values presented for 1951 are based on manufacturers' reports received in the 1951 Annual Survey of Manufactures conducted by the Bureau of the Census in cooperation with the National Production Authority.

MAS-51-4 General Statistics for Industry Groups and Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

31 p., tables. March 11, 1953. 30 cents.

This report provides data on employment, man-hours of production workers, payrolls, cost of materials, value of products shipped and value added by manufacture. Also shown are data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

MAS-51-5 Metals Consumed by Manufacturers of Metal Products for Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

11 p., tables. March 11, 1953. 15 cents.

Includes a summary of consumption and cost of carbon steel, alloy and stainless steel, aluminum, and copper and copper-base alloys, 1951, 1950, 1949, and 1947 by manufacturers of metal products. Estimated quantity and cost figures for the major metal producing industries within four broad industrial groupings: (1) Fabricated metal products, (2) Machinery (except electrical), (3) Electrical machinery, and (4) Transportation equipment. Data on the consumption and cost of such metal mill shapes and castings by metal fabricating establishments for 1951 are based on estimates prepared from the survey "Reported Plant Operations" (NPAF-1 and NPAF-103); the estimates for 1950 and 1949 are comparable figures tabulated from the 1950 and 1949 Annual Survey of Manufactures. Corresponding figures shown for 1947 were compiled from the 1947 Census of Manufactures. The 1951 estimates include quantities produced and consumed in the same establishments, as well as purchases and interplant transfers. Data for prior years exclude quantities produced and consumed in the same establishments.

MAS-51-6 General Statistics for the United States, by Geographic Divisions and States: 1951, 1950, 1949, and 1947.² Advance report

7 p., table, map. March 12, 1953. 15 cents.

This report shows measures of manufacturing activity—employment, payrolls, man-hours of production workers, and value added by manufacture for 1951 distributed by geographic divisions and States. Includes data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

MAS-51-6 General Statistics by Major Industry Groups: 1951, 1950, 1949, and 1947.² Advance reports

p. 5-7, tables, map. March 12, 1953. Each report 15 cents.

Preliminary estimates of the general statistics relating to manufacturing activity during 1951, 1950, 1949, and 1947. Estimates of employment, payrolls, man-hours of production workers, and value added by manufacture are also shown by selected major industry groups, for each geographic division and State in the following separately numbered reports:

MAS-51-7 Cost of Fuels Consumed and Quantity and Cost of Electric Energy Purchased by Major Industry Group: 1951, 1950 and 1947.² Advance report

3 p., table. March 12, 1953. 10 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1951, 1950, and 1947.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

6. POPULATION AND HOUSING DIVISION

A Census of Population has been taken every 10 years since 1790 and a Census of Housing has been taken along with the Census of Population since 1940. These censuses were last taken as of April 1, 1950, and the results are still being published in a program which will continue into 1953.

The Current Population Survey is conducted monthly. Through enumeration of a scientifically selected sample of the population, information is obtained currently on employment, unemployment, hours of work, occupation, and other subjects. Also available are estimates of the personal and family characteristics of the population, mobility of the population, income, housing conditions, etc.

Estimates of population for postcensal and intercensal dates are prepared, and special censuses of local areas are taken at the request and expense of the local governments involved.

6-11. 1950 CENSUS OF POPULATION

Results of the 1950 Census of Population were made available in published form as rapidly as data were tabulated and assembled. Preliminary figures and advance releases of final statistics were issued in unbound multilithed form identified as Series PC reports. Detailed final data are being presented in bound volumes. The material presented in these volumes will be available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume II, *Characteristics of the Population*, in 54 parts, presents statistics on the number of inhabitants and the characteristics of the population for States and their standard metropolitan areas, urban places, and other constituent areas. The volume includes Series P-A, P-B, and P-C bulletins and a separately-bound part for each State, the District of Columbia, and a United States summary. Parts 51-54, for the Territories and possessions, will be bound together.

Vol. II. Characteristics of the Population ¹

v. p., tables, map.

Population totals for the State, urban and rural, and for cities of 10,000 or more from earliest census to 1950; in groups of places according to size, 1900-50; population and area of counties, urban and rural, 1930-50; counties by minor civil divisions, 1930-50; all incorporated places, and unincorporated places of 1,000 or more, 1950 and 1940; incorporated places of 5,000 or more, by wards; and urbanized areas, 1950.

Characteristics of the population for the State, for each county, for the rural-non-farm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, each urbanized area and standard metropolitan area; with limited data presented for incorporated and unincorporated places of 1,000 to 2,500. Subjects include the age and sex of the population, race, nativity, citizenship, school enrollment,

years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. Separate statistics are presented for the nonwhite population for areas in the southern States.

The report also includes: detailed characteristics of the population for large areas; the State, urban and rural; cities and standard metropolitan areas of 100,000 or more; distribution of the population by sex and single years of age; and cross-classifications of sex and age by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income; and data on occupation, industry, and income, cross-classified with each other and race, class of worker, etc. Separate cross-classifications are shown for the non-white population in areas with 50,000 non-white inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

Part 28. Nevada. 104 p. \$1.75.

FINAL BULLETINS

Series P-B Bulletins, *General Characteristics*, are preprints of Chapter B, Volume II, *Characteristics of the Population*, for each State, the District of Columbia, the Territories and possessions, and the United States. The bulletins present statistics on the general characteristics of the population of the State, its counties, standard metropolitan areas, urban places, and other constituent areas. The data in these bulletins supersede figures shown in Series PC-12 reports and, in part, figures shown in Series PC-5, PC-6, and PC-7 reports. The price for a complete set of 54 P-B bulletins is \$28.30.¹

P-B General Characteristics (State)¹

v. p., tables, map. (Preprints of Chapter B of Volume II)

Characteristics of the population for the State, for each county, for the rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, for each urbanized area and standard metropolitan area; limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Subjects include age and sex, race, nativity, citizenship, school enrollment, years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. Separate data are presented for the nonwhite population in the southern States.

Series P-C Bulletins, *Detailed Characteristics*, are preprints of Chapter C of the corresponding part of Volume II, *Characteristics of the Population*. This series includes separate bulletins for each State, the District of Columbia, Alaska, Hawaii, and Puerto Rico, and a United States summary bulletin. The bulletins contain detailed statistics on the characteristics of the population for: States; the urban, rural-nonfarm, and rural-farm parts of States; cities and standard metropolitan areas of 100,000 inhabitants or more, with some data for cities of 50,000 to 100,000 inhabitants. Statistics in these bulletins supersede figures shown in Series PC-5, PC-6 and PC-7 reports. The 53 bulletins are priced at \$35.15 a set.¹

P-C Detailed Characteristics (various areas)¹

v. p., tables. (Preprints of Chapter C of Volume II.)

Distributions of the population by sex and single years of age, and cross-classification of sex and age; by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income. Also data on occupation, industry, and income cross-classified with each other and with race, class of worker, and other population characteristics. Selected separate cross-classifications are shown for the nonwhite population for each area with 50,000 nonwhite inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

Series P-D bulletins, *Census Tract Statistics*, which will not be bound into a single publication, comprise Volume III of the 1950 Census of Population. The 64 bulletins cover tracted cities and their adjacent tracted areas, where the latter exist. Each bulletin presents by census tracts, information from the Censuses of Population and Housing. Statistics presented in this series supersede those shown in Series PC-10. The price for a complete set of 64 bulletins is \$21.70.¹

P-D Census Tract Statistics (specified city)¹

v. p., tables, maps.

Basic population and housing characteristics for tracted areas from the 1950 Censuses of Population and of Housing. Population items include: age, sex, race and nativity, marital status, years of school completed, country of birth, married couples and households, residence in 1949, employment status, occupation, class of worker, and family income in 1949. Housing data include: occupancy and tenure, type of structure, condition and plumbing facilities, year built, persons per room, heating fuel, refrigeration equipment, television, contract monthly rent, and value of one-dwelling-unit structures.

Separate data are presented for nonwhites and the dwelling units which they occupy, for each tract having 250 nonwhites or more within tracted areas containing 10,000 nonwhites or more. Limited data are presented for tracted areas containing 10,000 or more white persons with Spanish surnames in California, Colorado, and Texas, for each tract having 250 or more white persons with Spanish surnames. Maps defining the boundaries of the tracts are in each bulletin.

No. 1. Costa Rica; by Rose I. Glubin, Statistician, and F. Webster McBryde, Geographer-Consultant, Office of the Coordinator, International Statistics, Bureau of the Census.²

5 p., tables, map. 5 cents.

This release in the Business Information Service series, Department of Commerce, was prepared by the Bureau of the Census, and presents statistics on the total and urban population of Costa Rica by sex, for provincias, cantones, and distritos having 2,500 urban inhabitants or more. For international comparability, definition of terms used is given. It is the first report of a series presenting data collected by the various countries as part of the 1950 Census of the Americas.

Publications on Foreign Countries: An annotated accessions list prepared for official use by Rose Glubin.

p. 41-48. Quarterly. Third quarter, Fourth quarter 1952.

A bibliography of foreign statistical publications received as a result of publication exchange arrangements of the Bureau of the Census with foreign statistical agencies. Published since 1947.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

INDEXES

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

January–March 1953

The following indexes show by geographic areas and by subject, data contained in Census publications during January through March 1953, and included in the catalog part of this publication. There are separate indexes for Census Divisions (nine groupings of States), Census Regions (combinations of Divisions into three or four groupings), Cities, Counties, Standard Metropolitan Areas, States, Territories and possessions, and Urban and/or Rural Areas.

Each index entry (except cross references) is followed by a group classification number to facilitate reference to the specific publication. Group classification numbers shown in the upper outside corner of each page of the catalog section indicate the order of listing. The table of contents indicates the order of listing, also. The group classification system is an order of numbers assigned according to the alphabetical arrangement of six of the administrative divisions of the Bureau of the Census. There is a seventh classification, Miscellaneous, for other Bureau publications.

INTRODUCTION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is issued on a current basis each quarter and cumulated to the annual volume. A MONTHLY SUPPLEMENT to this CATALOG, which does not include regular monthly and quarterly publications, enables users to be informed more currently on publications as they appear. Each subscription to the quarterly CATALOG (\$1.50 a year) will include a combination of 4 quarterly issues of the CATALOG and 12 copies of the MONTHLY SUPPLEMENT.

The record of the Bureau of the Census publications since the first Census in 1790 through the year 1945 is available in the "Catalog of United States Census Publications 1790-1945" (Government Printing Office, \$1.50). This catalog was prepared by the Census Library Project sponsored by the Library of Congress and the Bureau of the Census. Publications issued after 1945 are shown in the annual issues of CENSUS PUBLICATIONS CATALOG AND SUBJECT GUIDE for 1946 and subsequent years, through 1951.

The BUSINESS SERVICE CHECK LIST of the Department of Commerce, issued weekly at a subscription cost of \$1.50 a year, includes a list of Census publications. Subscriptions can be placed with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or with the field offices of the Department of Commerce listed on the back cover of this publication.

HOW TO USE THIS PUBLICATION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is designed to give users of published Census statistics a direct method of locating needed information. The catalog contains detailed descriptions of the contents of the published reports and is followed by two indexes, an index to reports by geographic areas, and an index to reports by subject.

The entries in the two indexes are directly keyed to the reports listed in the catalog by the use of a reference numbering system. All publications are arranged in the catalog by general subject field, following the organization pattern of the Bureau, namely: 1. Agriculture; 2. Business; 3. Foreign Trade; 4. Governments; 5. Industry; 6. Population and Housing; and 7. Miscellaneous. The first digit of

INTRODUCTION

the reference number designates the major subject within which the report is listed. Thus, all Agriculture Division reports have reference numbers beginning with 1; reference numbers for all Business Division reports have 2 as the first digit, etc. The second part of the reference number further classifies the reports by broad categories. For example, Business Division reports on Retail Trade are classified under 2-21; Wholesale Trade, 2-22; Trade Studies, 2-23; etc. Reports carrying a series number are further identified by the series number shown in parentheses following the group reference number, where it is feasible to include such numbers in the indexes.

The user of the CATALOG may first consult either the index by geographic areas or the index by subject and secure the reference number or numbers shown for the item on which he is looking for information. The reference number is then used as a key in locating the desired reports in the catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page in the catalog section. In order to avoid the indexing of large lists of commodities, general references are made in those instances where coverage is all inclusive; reports are indexed under specific commodities only when the reports are limited to the specific item.

HOW TO OBTAIN BUREAU OF THE CENSUS PUBLICATIONS

Priced publications, except as otherwise noted in this catalog, may be purchased from the Superintendent of Documents, Washington 25, D. C., or from the U. S. Department of Commerce Field Offices which are listed on the back cover. Other publications, which are not published by the Government Printing Office, may be ordered from the Bureau of the Census, Washington 25, D. C. For these publications, checks or money orders must be made out to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment. Remittances are required in advance of any shipment.

Unpriced publications may be obtained from the Bureau of the Census, Washington 25, D. C. When requesting publications, please be as specific as possible.

Supplies of publications are limited. Priority in meeting requests will be given to government agencies, large public libraries, school officials, and certain other groups when the reports are needed for official use or will be made available to large numbers of users of data.

AVAILABILITY OF UNPUBLISHED DATA

Detailed information in the files of the Bureau that has been tabulated but not published, can be made available, upon request, for the cost of transcribing or reproducing the data. Requests for statistics, addressed to the Director, Bureau of the Census, Washington 25, D. C., will be studied for availability of material. If unpublished data are available, an estimate of the cost of preparing and furnishing the data will be made.

A recent statement of the policy governing special work, including the making available of the special tabulations, and a list of some of the work performed, was included in the appendix to the 1952 issue of the CATALOG OF UNITED STATES CENSUS PUBLICATIONS.

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

JANUARY-JUNE 1953

The following list of Census publications includes those issued from January through June 1953. The publications are listed by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population and Housing, and, for Bureau-wide materials, Miscellaneous. Group numbers are assigned to each section and are shown on the upper outside corner for the first entry on each page. These group numbers are assigned to all index entries to facilitate reference from the subject guide to the specific reports listed in the Catalog.

Each report is described and the date of issue is given for all reports except regular monthly or quarterly series.

1. AGRICULTURE DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the Census of Population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925; thus, there has been a Federal Census of Agriculture every fifth year since 1920.

Each year the Bureau collects statistics and issues periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on dates prescribed by Congress. Five of these reports are issued jointly with the Department of Agriculture as the "Consolidated Cotton Report."

1-10. 1950 CENSUS OF AGRICULTURE

FINAL REPORTS

Five principal final volumes present the results of the 1950 Census of Agriculture: Volume I.—*Counties and State Economic Areas*, published in 34 parts for specified States and the Territories and possessions; Volume II.—*General Report, Statistics by Subjects*; Volume III.—*Irrigation of Agricultural Lands*; Volume IV.—*Drainage of Agricultural Lands*; and Volume V.—*Special Reports*. The chapters or parts of Volumes II and III are being issued as separate bulletins. The ten special reports of Volume V will be issued as separate pamphlets.

Volume I, *Counties and State Economic Areas*, in 34 separate parts, is arranged by census geographic divisions for the continental United States. These bulletins supersede the reports in the preliminary Series AC50-1-5. All reports, except that for Puerto Rico and the combined reports on the Territories and possessions, were issued in 1952.

Volume I. Counties and State Economic Areas ¹

v. p., tables, map, appendix.

Pt. 34. Territories and possessions; Alaska, American Samoa, Guam, Hawaii, Puerto Rico, and Virgin Islands of the United States. 265 p. \$1.25.

Number of farms, farm characteristics, acreage in farms; value of farm land and buildings, cropland, other uses of land; farm facilities and equipment; number of various kinds of livestock; acres and production of various crops; value of farms; and data by size of farm, by tenure of operator, by type, and by economic class for the 1950 Census of Agriculture; together with comparative data from earlier Censuses.

The questionnaire used for each Territory or possession in the 1950 Census of Agriculture forms the appendix for each report combined in Part 34 of Volume I.

Pt. 34.5. Territories and possessions; Puerto Rico.

115 p. *Preprint bulletin*. 60 cents.

This bulletin has been incorporated in the final report, Pt. 34, listed above. The introduction to this report is in Spanish and English, while the questionnaire which appears in the appendix is in Spanish only.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Volume II, General Report, Statistics by subjects of the 1950 Census of Agriculture is issued in two ways: (1) a final volume which contains 13 chapters, each of which covers a different agricultural subject; (2) the same chapters issued as 13 separate reports. All preprint chapters have now been released.

Volume II. General Report; Farms, Farm Characteristics, Livestock and Products; Crops, Fruits and Values¹

1404 p., tables, charts, maps, appendix. \$7.50.

The introduction describes the basis for the 1950 Census of Agriculture and its scope; discusses the history of the Census of Agriculture, date of the enumeration; preparation of the questionnaires used for the Census of Agriculture and measures taken for insuring completeness of enumeration; types of questionnaires used in connection with the 1950 Census of Agriculture; the enumeration; office processing of questionnaires: receiving and packaging, editing and coding, punching, mechanical editing, tabulation and review of tabulation, processing of data for the sample of farms used (the sample consisted of all large farms and one-fifth of all remaining farms); the reliability of estimates based on the sample of farms; the sample for the 1945 Census, and publication of data. Includes definitions of terms used, and the classification of farms by: size, tenure of operator, race or color of operator, economic class, part-time farm, residential farm, abnormal farm, type of farm, class of work power, large farm, effect of change in definition of farm on data for the 1950 Census; completeness of coverage of the census; and availability of data for geographic areas. The introduction and the appendix are included in each preprint chapter.

The report presents summary statistics by subjects relating to the number, acreage, and value of farms; uses of land in farms, farm equipment and facilities; livestock, livestock products; crops; value of farm products sold; and the characteristics of farms and farm operators classified by size of farm, tenure of farm operator, type and economic class of farm. Data are presented for the United States, the geographic regions and divisions and for all States.

Data in the 13 chapters of Volume II are described in the paragraphs accompanying the preprint chapters listed below.

Vol. II. General Reports; Statistics by Subjects¹

v. p., tables, charts, maps, appendix. (13 preprint chapters of Volume II)

Ch. I. Farms and Land in Farms. 133 p. 65 cents.

The report presents data for the United States on: number of farms, all land in farms, value of farms, 1850-1950; land used for agriculture and forestry, 1880-1950; farm operators with grazing permits, for specified States, 1950; all land in farms and specified uses of land, Censuses of 1850-1950; farms reporting—cropland harvested, by number of acres, 1949 and 1944; woodland pastured and not pastured, by number of acres, 1949; cultivated summer fallow, by number of acres, for specified States, 1949. Total, rural, and farm population, 1850-1950, average number of persons per farm, with per capita data for land in farms, cropland harvested and value of farm products sold, Censuses of 1850-1950.

Data for geographic regions and States show: number and value of farms, all land in farms, 1950, 1945 and 1940; percent distribution of farms, land in farms, and the several classes of land according to use, Census of 1950; all land in farms, 1950, 1945 and 1940, classified according to use in 1949, 1944 and 1939; average acreage per farm, and average acreage of the several classes of land according to use based on all farms, Censuses of 1950, 1945 and 1940, and average acreage per farm reporting the several classes of land according to use, 1949, 1944 and 1939; number and value of farms, all land in farms, cropland harvested, Censuses of 1850-1950; farms by acres of cropland harvested, 1949 and 1944, and by acres of woodland pastured, and not pastured, 1949; number and acreage of irrigated farms, Censuses of 1950, 1945, and 1940; land in farms, land not in farms, classified according to use, and land used for agriculture and forestry, 1950 and 1945; farm population, 1950, 1945 and 1940.

Vol. II. General Reports—Continued

The introduction gives sources of data, presentation of statistics, other published data, history of census inquiries on farms and farm property, definitions and explanations of terms used, and a discussion of the changes in farms and land in farms. The introductory chapter and the appendix from Volume II are included in this preprint chapter.

Ch. II. Age, Residence, Years on Farm, Work Off Farm. 193 p. \$1.

Presents data for the United States for: farm operators reporting residence on or off farms, for specified counties, 1950 and 1940; years on farm as classified for each census, with number of operators reporting in each classification, 1910 to 1950; farm operators on present farm one year or less, by month of occupancy, 1950; residence of farm operators, 1950, 1945 and 1940; off-farm work by farm operators, 1929-1949; and other income, 1949; farm operators—in each tenure group by age (color and tenure for the South), 1890-1950; operators of commercial and other farms in each tenure, by age, for the United States, the North and the West (color and tenure for the South), 1950; residence of farm operators, by tenure (color and tenure for the South), 1950, 1945 and 1940; residence of operators of commercial and other farms by tenure, for the United States, the North and the West (color and tenure for the South), 1950; farm operators in each tenure group, by years on present farm, with percent distribution (color and tenure for the South), 1910-50; off-farm work by farm operators, 1929-49, by tenure (color and tenure for the South), 1934-49, and for commercial and other farms, 1949.

Data for the geographic regions, divisions and States present: farm operators, by age, 1950, 1945 and 1940; in each tenure group (color and tenure for the South), by age, 1950; residence of farm operators, 1950, 1945 and 1940, by tenure (color and tenure for the South), 1950; farm operator—by years on present farm, 1950, 1945 and 1940; by tenure (color and tenure for the South), 1950; by year of occupancy of present farm, and on present farm one year or less, by month of occupancy, Census of 1950; off-farm work by farm operators, 1929-49, and other income, 1949, and by tenure, 1949.

The introduction gives sources of data, presentation of statistics, other published data and definitions and explanations of terms used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. III. Farm Facilities, Roads, Trading Center, Equipment. 109 p. 55 cents.

Statistics in this chapter relate to specified facilities in the farm home, kind of road on which farm is located, distance to trading center visited most frequently, and specified items of farm equipment and machinery. Data on facilities include telephone, electricity, and some items of electrical equipment used in the home as well as in the farm business. Electric facilities and equipment include electric water pumps, electric hot water heaters, home freezers, electric washing machines, electric chick-brooders, and electric power feed grinders. Farm equipment and machinery include milking machines, grain combines, corn pickers, pick-up hay balers, silos (upright and pit or trench), motortrucks, tractors (wheel other than garden; garden and crawler), and automobiles.

Most of the available comparative data are shown for the United States. Historical data for regions, divisions, and States are shown only for selected Census years.

United States data show farms reporting: telephone and electricity, 1920-50, electricity, 1950, and specified electric facilities, 1950 and 1945; by distance to trading center and by kind of road, 1925-50; specified farm equipment, 1920-50; motortrucks, tractors and automobiles by age and by year of newest model, 1950, 1945 and 1940.

Data for geographic regions, divisions and States show: specified farm facilities, 1920-50; farms by amount of last monthly electric bill, Census of 1950; kind of road on which farm is located, 1950, 1940 and 1930; distance over dirt or unimproved roads, 1950, and distance to nearest all-weather road, 1945; specified farm equipment, 1950 and 1945; motortrucks on farms, 1920-50; percent distribution of farms reporting motortrucks by age of newest motortruck, 1950, 1945 and 1940, and by year of newest model, 1950; tractors on farms by kind, and farms by number of tractors, 1950 and 1945; percent distribution of farms reporting wheel tractors other

than garden, and automobiles, by age of newest tractor or automobile, 1950, 1945, and 1940, and by year of newest model, 1950.

The introduction gives sources of data, discusses presentation of statistics and other published data ; the history of census inquiries on farm facilities, roads, trading center and farm equipment. Definitions and explanations of terms used are also included. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IV. Farm Labor and Farm Expenditures. 133 p. 65 cents.

Information on farm labor relates to farm operators, unpaid members of their families doing farm work or chores, and hired workers. Data for hired workers show : number of regular and seasonal workers ; number of persons paid on a monthly, daily, hourly or piece-work basis ; wage rates, hours worked and perquisites furnished. Information on expenditures relates to amounts paid in the calendar year preceding the census for machine hire, hired labor, feed for livestock and poultry, purchase of livestock and poultry, seeds, bulbs, plants and trees, gasoline and other petroleum fuel and oil, tractor repairs and other farm machinery repairs. Statistics are presented as totals for the United States, for three major regions, the nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States include : workers on commercial and other farms, 1950 ; workers on farms during specified weeks, 1935-50 ; farm wage rates, also wage rates and perquisites furnished hired workers, by basis of payment cross classified by size of farm, by type, and by economic class of farm, and by tenure of operator, 1950 ; specified farm expenditures for commercial and other farms, 1949, specified farm expenditures, 1869-1949 ; farms by amount of cash expenditures for hired labor, 1949 and 1944.

Data for geographic regions, divisions, and States show : workers on farms, farms by kind of workers, by number of hired workers, week preceding the enumeration, 1950 ; workers on farms during specified weeks, 1935-50 ; hired workers by basis of payment, wage rates, and perquisites furnished for workers paid on a monthly, weekly, daily, hourly, and piece-work basis, 1950 ; wage rates by perquisites furnished, 1950 ; specified farm expenditures, 1949, 1944 and 1939 ; number of farms reporting specified amounts of expenditures for hired labor, and percent distribution of farms reporting cash expenditures for labor by amount expended, 1949 and 1944.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. V. Farm Taxes and Cash Rent. 113 p. 55 cents.

Data on taxes are shown only for property owned by owner-operators of farms, and data on cash rent are shown only for lands rented from others by farm operators renting land solely on a cash basis. The report is presented in two parts (1 report)—part 1 relating to farm taxes, and part 2 to cash rent. Statistics are presented as totals for the United States, for major geographic areas and for each of the States.

Part 1. Data for the United States present farm taxes paid by owner-operators, 1950, 1940 and 1930. Data for geographic regions, divisions and States present farm taxes paid by full owners, 1950 ; percent distribution of full owners renting land to others and not renting land to others by value of owned land and buildings, 1950 ; number, acreage, value, and amount of farm property taxes for farms operated by full owners not renting lands to others, 1950, 1940 and 1930 ; farm taxes paid by part owners, percent distribution of part owners renting land to others, and not renting land to others, by value of owned land and buildings, 1950, and number, acreage, value of farm property taxes for farms operated by part owners not renting land to others, 1950 and 1940.

Part 2. Data for the United States present cash rent paid for farm land and buildings, 1950, 1940 and 1930. Data for geographic regions, divisions and States present cash rent paid by part owners reporting both value of land and buildings and amount of cash rent, 1950 and 1940, and for commercial and other farms, 1950 ; percent distribution of part owners renting land on cash basis, by value of rented land and buildings, Census of 1950 ; cash rent paid by cash tenants reporting both value of land and buildings and amount of cash rent, Censuses of 1950, 1940 and

Vol. II. General Reports—Continued

1930; and for commercial and other farms, 1950; and percent distribution of cash tenants, by value of rented land and buildings, 1950.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VI. Livestock and Livestock Products. 209 p. \$1.

This report includes the quantity of livestock and poultry on farms as of April 1, 1950, amount and value of each important livestock and poultry product sold in 1949, with the number and value of each principal kind of livestock sold alive, and the number of principal kinds of livestock slaughtered on farms. The inventory of livestock and poultry includes data by age and sex groups for the more important kinds of livestock. Data are also presented on bees, and the value of sales of honey, bees, etc. Statistics are presented for the United States, the major geographic areas, and for individual States for most items with comparable data from 1945 and prior censuses.

Data for the United States include a brief description of the various classes of livestock, and an indication of the comparability of data for the Censuses of 1900-50; specified livestock on farms, by age and sex groups as published in the Censuses of 1840-1950; items for livestock and livestock products for which data were obtained, 1840-1950, and farms reporting quantity and value of specified livestock products of farms, 1839-1949.

Data for geographic regions, divisions, and States present value of specified classes of livestock, and percent distribution of total value of specified classes of livestock and percent of total value represented by the several classes, 1950, 1945 and 1940; value of inventories of specified classes of livestock, 1950, with corresponding value of sales of live animals in 1949; value of all livestock products and livestock products sold in 1949; number and value of horses and mules, 1950, 1945 and 1940; farms reporting horses and mules, 1900-50, and number of horses, 1840-1950, and mules, 1850-1950; farm work power (horses, mules, and tractors) with acres of cropland harvested, 1920-50; farms reporting, number, and value of cattle, 1950, 1945 and 1940; number of cattle on hand, 1950 and 1940; number of cows and other cattle, 1950, 1945 and 1940; cows and milk cows, by number reported, 1950; value of cattle by classes—cows, heifers, steers, and bulls, and calves, 1950, and cows and "all other cattle," 1945 and 1940; farms reporting cattle, 1900-50, and number, 1850-1950; number of cows, 1900-50; farms reporting milk cows, 1910-30; and number, 1850-1930; all cows, milk cows, and cows milked, relationship between items as enumerated in the various censuses, 1925-50; quantity and value of whole milk, cream, and other dairy products sold, 1949, 1944 and 1939; quantity of whole milk sold, 1869-1949, quantity of cream and butter sold, 1899-1929; classification by number of milk cows in herd—milk, cream and other dairy products sold, cows milked yesterday and butter churned last week, by States, 1950; number and value of hogs and pigs; and number of sows and gilts for spring farrowing, 1950, 1945 and 1940; all hogs and pigs, 1840-1950. Sows and gilts for spring farrowing, 1920-50; number, and value of all sheep and lambs, and of ewes and other sheep and lambs, 1950, 1945 and 1940; all sheep, 1840-1935, with distribution by age and sex, 1900-35; number of sheep and lambs shorn, quantity and value of wool shorn, 1949, 1944 and 1939; number of sheep and lambs shorn, wool, total sheep, and distribution by age and sex, classified by number of sheep shorn, by States, Census of 1950; sheep and lambs shorn, by number shorn, 1949, 1939 and 1929; number of sheep and lambs shorn, by number shorn and pounds of wool, 1859-1949; chickens on hand, 1910-50, number, 1880-1950, and value, 1950, 1945 and 1940; chickens sold, and number of chickens sold, 1919-49; chicken eggs sold and dozens sold, 1949, 1929 and 1919; chickens on hand, by number reported, 1930-50; classification by number of chickens on hand—farms reporting, and number on hand, chickens sold, eggs sold, and value of sales of poultry and poultry products, by States, 1950; farms reporting turkeys on hand, and number, 1890-1950; turkeys raised and sales of poultry and products other than chickens and chicken eggs—farms reporting, number and value of sales, 1929-49; classification by number of turkeys raised; number or value of turkeys raised—on hand, and sales of turkeys, ducks, geese, and their eggs, by States, 1950; number of ducks, geese and guineas, pigeons, pheasants and quail raised, 1929-49; livestock sales, 1949, 1944 and 1939, farm slaughter, 1909-49; farms reporting

specified kinds of animals butchered, by number reported, 1949; number and value of goats and kids, 1950, 1945 and 1940; goats, rabbits, and fur animals, April 1, 1950, or kept in 1949, specified fur animals on hand, April 1, 1950, and farms reporting, and value of sales in 1949; angora and other goats and kids, goats clipped and mohair, 1899-1949; and value of sales from goats, 1949, for specified States; goats and kids, 1900-50; number of beehives, and amount of honey produced, Censuses of 1890-1950. The introduction gives sources of data, other published data, comparability of statistics, and method of handling problems for the enumeration of livestock and livestock products. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VII. Field Crops and Vegetables. 247 p. \$1.25.

This chapter presents statistics for field crops and vegetables harvested in 1949. Figures for each individual field crop are totals for the entire crop, while those for vegetables in the main, are totals for the portions harvested for sale. Vegetables harvested for home use include only farms having home gardens. Individual crops include the number of farms on which the crop was produced, and the area harvested. For most crops, other than vegetable, data are given for the production and the value of the crop. Totals for many principal crops are presented for quantity and/or value of sales. Information is sometimes given for groups of similar crops such as small grains, hay, etc. Value-of-crop figures were not obtained by enumeration, but are computed values based on reports obtained by the Bureau of Agricultural Economics. Totals are shown for the United States, the major geographic areas, and for all States.

Data for the United States present: all crops, acreage and value, 1879-1949; specified field crops harvested, farms reporting acreage, production, and value, 1839-1949; specified vegetables, farms reporting and acres, 1909-49.

Data for geographic regions, divisions and States show: value of all crops sold, 1949; farms reporting corn, sorghum, wheat threshed, winter and spring wheat threshed by acres harvested and by quantity sold, 1949, durum or macaroni and other spring wheat threshed, acreage of oats for grain, acreage and production of oats threshed, oats cut for feeding unthreshed and oats threshed, barley or rye threshed, buckwheat threshed, also threshed emmer and spelt, flaxseed, mixed grain, rice, other grains, soybeans, cowpeas, peanuts, peanut vines or tops saved for hay or forage, peanuts harvested for picking or threshing, velvetbeans, dry field and seed beans harvested for beans, dry field and seed peas harvested for peas, all hay (excluding specified annual legume and sorghum hay), alfalfa cut for hay or dehydrating, clover or timothy (alone or mixed) and lespedeza and small grains cut for hay, other hay, wild hay, hay or grass silage and pasture receipts; alfalfa seed, lespedeza and sweetclover seed, red clover seed and timothy seed; miscellaneous clover, grass and other field seed crops; cotton, tobacco, popcorn, broomcorn, sugarcane or sorghum for sirup, sugar beets harvested for sugar, sugarcane for sugar and for seed, Irish potatoes and sweetpotatoes, root and grain crops hogged or grazed, root crops for feed, and pumpkins for feed, miscellaneous field crops, vegetables grown for home use, and vegetables harvested for sale, specified vegetables harvested for sale, and miscellaneous vegetables harvested for sale.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VIII. Fruits, Nuts, Horticultural Specialties, Forest Products. 141 p. 65 cents.

Presents statistics for berries and other small fruits; for tree fruits, nuts, and grapes; for horticultural specialties; and for forest products taken or cut on farms. Totals, for each crop or item, usually are presented for the United States, for three geographic regions, nine geographic divisions, and for each of the 48 States and the District of Columbia.

United States data are given for: farms reporting acreage and value of fruits and nuts and horticultural specialties, 1840-1950; farms reporting, acreage, quantity harvested, and value of berries and other small fruits, 1899-1949; quantity harvested and value of tree fruits, nuts and grapes, 1840-1950; area, and value of sales of

Vol. II. General Reports—Continued

horticultural specialties, 1899-1949 ; quantity and value of forest products of farms, 1849-1949.

Data for geographic regions, divisions and States present : value of fruits and nuts sold, 1950, 1945, and 1940 ; farms reporting, acreage and quantity of berries and other small fruits harvested ; land in fruit orchards, vineyards, and planted nut trees, farms reporting and acres ; farms reporting, apples, peaches, pears, cherries (sour and sweet), and plums and prunes, apricots, nectarines and quinces, figs, oranges, grapefruit, lemons and limes, number of trees. Peach and apple trees of bearing age, not of bearing age, and quantity harvested, classified by number of trees of bearing age ; farms reporting grapes, number of vines, and quantity harvested, and value. Also data for pecans ; almonds, filberts, walnuts ; tung nuts and miscellaneous orchard fruits and nuts ; farms reporting area and value of sales for horticultural specialties ; value of specified forest products cut or produced on farms, value of all forest products sold ; farms reporting and quantity of specified forest products cut ; farms reporting number of maple trees tapped and quantity of maple sirup and sugar. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IX. Value of Farm Products. 91 p. 50 cents.

This chapter presents data on the total value of farm products sold, classified by source of income. The statistics are presented as totals for the United States, three major regions, nine geographic divisions, and for all States.

Data show : farms reporting sales of farm products, and value of sales, by major sources ; value of : all crops sold, by major groups ; and all livestock and livestock products sold, by major groups. Censuses of 1950, 1945, and 1940 ; specified field crops and specified livestock and livestock products sold, 1949 ; number of farms by value of sales groups, 1950 and 1945.

The introduction and appendix from Volume II are included in this report.

Ch. X. Size of Farm. 205 p. \$1.

Presents statistics for farms classified by size as measured by the total land area in the farm. The data include such items as : number of farms, all land in farms, value of farm land and buildings (averages only), land use, specified characteristics of farm operators, specified farm facilities and equipment, farm labor, specified farm expenditures, principal classes of livestock, major crops, and sales of farm products.

Statistics are presented as totals for the United States, for three major regions, nine geographic divisions, and for each of the 48 States. Data in the chapter include comparative data from earlier censuses for number of farms, land in farms, land use and average value of land and buildings.

Data for the United States show : farms classified by acres of improved land, 1870 and 1860 ; number of farms—under 3 acres in size, percent of all farms, minimum value of products, and index numbers of prices received by farmers ; those under 10 acres in size with land in farms, and by size of farm, 1880-1950 ; all land in farms by size of farm, average value of farms (land and buildings), per farm, per acre, by size of farm, and specified classes of land in farms, according to use, by size of farm, 1900-50 ; farms and farm characteristics by size of farm, 1950.

Data for geographic regions, divisions and States present : average acreage per farm based on all land in farms, 1850-1950 ; number of farms, all land in farms, value of farms, 1950, 1945, and 1940, and specified classes of land according to use, 1949, 1944, and 1939 ; number of farms by size of farm, 1880-1950. Percent distribution of farms, all land in farms and average acreage per farm, by size of farm, average acreage of cropland harvested per farm reporting and percent distribution of total land pastured, by size of farm ; farms reporting other income of family exceeding value of agricultural products sold, with percent of farms reporting in each size of—farm group, operators reporting off farm work of 100 days or more, with percent of operators reporting in each size-of-farm group, 1950.

Similar data for 1950 are shown for farms reporting : telephones, electricity, milking machines, grain combines, corn pickers, pick-up hay balers, silos, motortrucks, automobiles, tractors, no tractor, horses or mules, tractor and no horses or mules, cattle and calves, all cows, hogs and pigs, chickens four months old and over, corn for all purposes, wheat threshed, land from which hay was cut, family workers, hired workers ; expenditures for machine hire and hired labor, feed for livestock and

Vol. II. General Reports—Continued

poultry, livestock and poultry purchased and gasoline and other petroleum fuel and oil; value of farm products sold and selected farm characteristics by farm size groups.

The introduction includes sources of data, presentation of statistics, other published data, classification of farms by size, history of classification of farms by size, and size of farm as a measure of enterprise.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XI. Color, Race, Tenure of Farm Operator. 269 p. \$1.25.

Presents statistics for farms by color, race, and tenure of the farm operator. Statistics are presented as totals for the continental United States, for three major regions, nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States show: tenure classes included in the reports for each census, with the number of farms in each class, 1880-1950; number, acreage and value of farms, by color and tenure of operator, 1950; average value of farms (land and buildings), by color and tenure of operator for the United States and the South, 1900-50; specified classes of land in farms according to use, by color and tenure of operator, 1900-50; commercial and other farms, by color and tenure of operator for the United States and the South, 1950; owned and rented lands, by tenure of operator, 1925-50; land rented from others and land rented to others, by class of tenant, 1950; part owners and tenants related to landlord, 1950 and 1930, and part owners and tenants with landlord living on a farm, by color and class of tenant, 1950; tenants related to landlord for the North and West, 1950, 1930 and 1925; full owners with grazing permit, for specified States, 1950; number of nonwhite farm operators and land in farms, by race, 1900-50; and by race and tenure, 1930-40.

Data for geographic regions, divisions and States show: number of farms, land in farms, and cropland harvested, 1950, 1945 and 1940, with specified classes of land according to use, and value of farms, 1950, by tenure of operator (color and tenure for the South); owned and rented lands by tenure of operator, 1950; farms and land in farms of negro operators, classified according to use; farms of nonwhite operators other than negroes—farms and land in farms classified according to use; average value of land and buildings per farm and per acre, by tenure of operator, 1950; farms reporting cropland, crops harvested and land pastured, average acreage by tenure of operator, 1950; commercial and other farms reporting other income of family exceeding value of agricultural products sold, and operators of commercial and other farms reporting off-farm work of 100 days or more, 1950. Commercial and other farms reporting specified farm facilities, equipment and products, family workers, hired workers, and selected expenditures; and value of farm products sold with average per farm reporting, by tenure of operator. Also includes selected characteristics of commercial farms operated by: full owners, part owners, managers, all tenants, cash tenants, share-cash tenants, crop-share tenants, livestock-share tenants, croppers, and percent distribution of commercial farms, by size of farm for each tenure group, 1950.

The introduction includes sources of data, presentation of statistics, a discussion of other published data, history of census classifications by color and tenure of farm operator, and definitions and explanations of terms used.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XII. Economic Class of Farm. 165 p. 75 cents.

Characteristics of farms and farm operators by economic class of farm. There are no comparative figures by economic class of farm for earlier census years. Statistics presented here are for the United States, three major regions, nine divisions and the 48 States.

Farms and farm characteristics by economic class are shown for the United States. For geographic regions, divisions and States, data by economic class are shown for: number of farms, average value of land and buildings, land in farms; farms reporting—cropland harvested, and acreage, land pastured and total acreage, other income of family exceeding value of agricultural products sold for operators of commercial and other farms, and off-farm work of 100 days or more with percent of operators reporting in each economic class group; and farm operators, 65 years old and over. Commercial and other farms reporting specified farm facilities and equipment; acreage on commercial and other farms of corn for all purposes, wheat threshed, and land from which hay

was cut; family workers, hired labor, expenditures for—gasoline and other petroleum fuel, machine hire, hired labor, feed for livestock and poultry, livestock and poultry purchased; value of all farm products sold with average per farm reporting, and percent distribution by economic class. Percent distribution of number of farms, by size of farm and by tenure of operator for each economic class group; selected characteristics for each economic class of farm and part-time, residential and abnormal farms; and number and percent distribution by tenure of operator for part-time, residential and abnormal farms.

The introduction gives sources of data, presentation of statistics, basis of classification and definitions and explanations used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XIII. Type of Farm. 185 p. \$1.

Data are presented for farms and farm characteristics by type of farm, for the United States. For the geographic regions, divisions and States data are shown for: number of farms by type; average value of land and buildings per farm and per acre, land in farms by type of farm; farms reporting cropland harvested, land pastured, and acreage by type of farm; operators of commercial and other farms reporting, other income of family exceeding value of agricultural products sold, work off farm 100 days or more, with percent of operators reporting in each type-of-farm group; commercial and other farms reporting specified farm facilities and equipment, with percent of farms reporting in each type of farm group; number and percent distribution by type of farm for cattle and calves, cows, and number of chickens 4 months old or over; acreage on commercial and other farms of corn for all purposes, wheat threshed and land from which hay was cut, with percent distribution by type of farm. Similar data are shown for: family workers, hired workers, expenditures—for gasoline and other petroleum fuel and oil; for machine hire, hired labor, feed for livestock and poultry, for livestock and poultry purchased; value of all farm products; also, percent distribution of number of farms by size of farm, by tenure of operator, and by economic class for each type-of-farm group; selected characteristics for each type of farm (cotton, field crop, vegetable, fruit and nut, dairy, poultry, livestock other than dairy and poultry, general, miscellaneous and part-time farms).

The introduction and appendix from Volume II are included in this preprint chapter.

Volume III, *Irrigation of Agricultural Lands*, comprises 18 separate State reports with statistics for counties and drainage basins, and a United States summary report. These reports are combined in a final volume. Volume III bulletins supersede reports in Series IR50-1.

Vol. III. Irrigation of Agricultural Lands (States)¹

v. p., tables, maps, charts.

Data cover: enterprises, irrigation works, farms and acreage irrigated, investment, water used, and cost. Includes an irrigation summary, 1890 to 1950 for: farms, number and acreage, number irrigated, irrigated acreage reported by farms and irrigation enterprises and total capital investment in irrigation enterprises. Characteristics of irrigation enterprises—number, type, total land irrigated, acreage irrigated by type of enterprise and by source of water, irrigation works, capital investment, total, and by type of enterprise. Data for 1949 on: enterprise characteristics; use of surface, ground, pumped and stored water; source of surface water; drainage of irrigated land; irrigation works (1950); season of irrigation; capital investment, 1950 and 1940 and indebtedness (1950); cost of water to farms and quantities of water reported, 1949. Complete system irrigation enterprises by surface, ground, gravity and pumped water; and by acreage irrigated.

Volume IV, *Drainage of Agricultural Lands*, supersedes Series DR50-1, and includes in the one book, the State reports with statistics for counties and a summary for the United States.

Vol. IV. Drainage of Agricultural Lands¹

326 p., tables, charts, maps, appendix. February 1953. \$1.50.

Data on land in enterprises, number and types of enterprises, cost of drainage, indebtedness, assessments and drainage works, for the 30 drainage-district States and the 10 county-drain States, and a summary chapter for the 40 States.

The introduction includes a history of the census of drainage, the legal basis for the 1950 Census of Drainage, the scope of the censuses of drainage and other related material. The appendix shows the drainage questionnaires used for the County-Drain States (D1) and the District-Drain States (D2); instructions for the D1 and D2 enumerators; a County List of Enterprises (Forms 702-11); and a letter to State auditors.

Volume V comprises 10 special reports by subject. Part 1 of Volume V, *Horticultural Specialties*, issued in 1952, replaced the preliminary Series HS50-1-4, and the United States summary, *Horticultural Specialties*, issued earlier.

Vol. V. Special Reports¹

v. p., tables, charts, maps, appendix.

Pt. 2. Multiple-unit Operations. 492 p. \$2.25.

The report presents statistics for specified counties and State economic areas in 13 southern States, and Missouri, on: multiple-unit operations compared with farms not in multiple units, for the multiple-unit area, and specified data for the multiple-unit area compared with State and United States totals; number of landlord-tenant and multiple-unit operations by States and economic areas; specified averages for all farms, multiple units and farms in or not in multiple units; percentage of all farms, multiple units, and farms not in multiple units reporting specified items; also percentage of all cropland harvested; multiple-unit operations by—size of unit, with percent of cropland harvested by specified crops; color and tenure of operator; type of farm; acres of cropland harvested; number of subunits; kind of tenant in landlord-tenant operations.

The introduction includes the history of census enumeration of multiple units; description of questionnaire used; enumeration of land in more than one enumeration district or county, and a description of office procedure in connection with the enumeration. Maps illustrated the use made of acreage in farm multiple-unit operations. The appendix shows a reduced facsimile of an agriculture questionnaire typical of those used in the multiple-unit areas (Georgia); a reduced facsimile of a 1950 Landlord-Tenant Operations Questionnaire, and the Instructions to Enumerators including a list of the States and counties in the multiple-unit area.

Vol. V. Special Reports—Continued**Pt. 3. Ranking Agricultural Counties. 69 p. 40 cents.**

Presents statistics for selected items of inventory and agricultural production for the leading counties in the United States. Gives for the 100 leading counties, in each instance, the quantity and value of leading classes of livestock on farms and of poultry and poultry products sold; field crops harvested; vegetables harvested for sale, excluding Irish and sweet potatoes; and of all fruits, nuts and horticultural specialties sold, Censuses of 1950 and 1945.

A summary table presents the quantity and value of specified items of livestock and livestock products, field crops harvested, vegetables harvested for sale and fruits, nuts and horticultural specialties: United States totals, total, and percent of United States total, for the 100 leading counties in 1950; the name of the county, the county total and the percent of the United States total. Maps show the distribution of most of the products for the Census of 1950.

Pt. 4. Land Utilization; A Graphic Summary. 64 p. (no tables) 45 cents.

Presents graphically, some significant facts regarding uses being made of agricultural lands both inside and outside farm boundaries. It provides a graphic summary of changes and developments in the use of agricultural lands during the past half century.

Uses of land in the United States; land use by farm production regions and States; factors affecting land use—physical conditions, population changes, and distribution; agricultural technology and other forces; public and nonfarm private land, farms and the farm area; farm land development; land used for agriculture—cropland and classes of crops; principal crops and specified classes of livestock, pasture and grazing land, and woodland and forest. The maps and charts are accompanied by explanatory text.

Land use in the Territories and possessions: Alaska and Hawaii—physical conditions and land use, and farms, farm land, principal crops and livestock. Puerto Rico—uses of land and specified crops harvested and their relative importance in acreage. Graphic material is not included for the possessions. This report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 5. Farm Tenure; A Graphic Summary. 95 p. 65 cents.

Presents graphically, significant facts for the various forms of tenure under which farms are held and operated and summarizes changes in farm tenure for the United States and its geographic regions since 1900. The report comprises three sections: (1) Quantity, value, and method of holding farm land; (2) Farm production—quantity and value of products (crops, livestock, and livestock products) sold; (3) Income, security and personal attributes of farm people. A guide to items on farm tenure is also included. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 6. Agriculture 1950; A Graphic Summary. 108 p. (no tables) 65 cents.

This report summarizes, in brief, statistics published for the 1950 Census of Agriculture, and describes farm resources—farms and farm land, characteristics of farm people, livestock, farm power, equipment and roads; farm production—crops, livestock production, all farm products sold; organization and use of agricultural resources—size of farm, color and tenure of operator, economic class of farm, and type of farm; changes in agriculture from 1900-50; number and size of farms, color and tenure of operator, land in farms, cropland harvested, pasture land, irrigated land, drained land, value of farm property, farm work power, farm transportation, mechanization of farm operations and farm electrification, farm population; migration from farms, agricultural workers, farm exports, use of cropland, crops, and livestock and dairy products. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Vol. V. Special Reports—Continued**Pt. 7. Irrigation 1950; A Graphic Summary. 35 p. 35 cents.**

Presents graphically, significant facts regarding agriculture in irrigated areas, and the characteristics of irrigation enterprises and irrigated farms as indicated by the 1950 Censuses of Agriculture and Irrigation.

Irrigated farms, irrigated land by drainage basins; irrigation and land use in the 17 Western States; irrigation enterprises—number, and acreage irrigated by type (single-farm and multi-farm, incorporated and unincorporated mutual, commercial, district, United States Bureau of Reclamation and U. S. Bureau of Indian Affairs); types of enterprise by States, interrelationship and size of irrigation enterprises, irrigation works and equipment, capital investment, and indebtedness and arrearage. Types and source of irrigation water; storage; measurement and cost of water to farms; and irrigation by sprinklers. Use of land in irrigated farms in 1949; size and value of irrigated farms; farms wholly irrigated, partly irrigated; and irrigated and nonirrigated crops. The maps and charts are accompanied by explanatory text.

Pt. 8. Farm-Mortgage Debt; A Cooperative Report. 40 p. 30 cents.

Presents farm-mortgage indebtedness for farms classified by tenure of farm operator, and continues a series of cooperative reports covering farm mortgage indebtedness for each census year from 1930, mortgage data for earlier censuses and the comparability of 1950 mortgage data with those for earlier census years. For farm-mortgage debt in the United States total debt is shown; also number of mortgaged farms, debt and equity per farm, acreage in mortgaged farms, value of mortgaged farms (land and buildings), debt held by principal lenders and interest rates.

Data are presented for the United States on the number, acreage, and value of farms free from mortgage, and mortgaged farms by tenure of operator, 1930-50; and total outstanding mortgage debt, also loans held by principal lenders, census years 1910-50; data for geographic regions, divisions and States show all mortgaged farms, mortgaged farms operated by full owners, by part owners, by tenants and managers, each for 1930-50; and total outstanding farm-mortgage debt, and loans held by principal lenders, January 1, 1950 and 1945. Data in this report were prepared jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 10. Farms and Farm Characteristics by Economic Subregions. 85 p. 50 cents.

Presents a summary for selected items from the 1950 Census of Agriculture by 119 economic subregions, and also statistics for economic class and type of farm for 19 economic areas located in the principal type-of-farming areas of the United States.

The report presents data on the number of farms classified by type, by economic class, and by size of farm, by tenure of operator, farm operators classified by age, and color or race, years on farm, and off-farm work, equipment on farms, and farm expenditures; selected crops harvested, number of livestock and value of farm products sold, by source.

The introduction includes a description of the sample for the 1950 Census, and the adjustment of the sample; the reliability of the sample; method of estimation; and large-farms. Describes the presentation of statistics for State economic areas and economic subregions.

2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1929, 1933, 1935, 1939, and 1948. Those for 1929 and 1939 were taken as part of the 1930 and 1940 Decennial Censuses; those for 1933 and 1935 were special projects.

Current reports are issued monthly showing national estimates of the dollar volume of retail sales and trends in retail sales and wholesale sales and inventories. An annual retail survey is taken from which will be produced national estimates of the dollar volume of inventories, the ratio of sales to inventories and the amount of charge and installment plan receivables as of the end of the year, by kinds of business in the United States. Other reports are issued on special topics, such as the *Canned Food Report* and the report on *Petroleum Products—Secondary Inventories and Storage Capacity*.

2-21. CURRENT RETAIL TRADE REPORT

Monthly Retail Trade Report; Retail Sales ¹

11 p., tables, charts. Monthly. Monthly 10 cents. Yearly subscription \$1. (Domestic), \$1.35 (foreign). Monthly: November, December 1952; January–April 1953.

The monthly report includes (1) estimated dollar sales of all retail stores and Group II retail stores (i. e., stores of organizations of 11 or more retail stores) United States by kind of business, current month, and each month of the previous 12-month period, including the comparative figure for the current month a year ago, sales for the year to date and for the corresponding period of the preceding year; (2) percentage change in sales for current month from the same month a year ago and from the preceding month, and year-to-date from the like period a year ago for all retail stores, the United States by kind of business; for "large" retail stores of organizations of 1 to 10 stores, the United States and 28 named Census Sample Areas, by kind of business; and for selected cities and Census Sample Areas for all kinds of business combined. The January 1953 issue includes the 12-month accumulated sales for 1952 and 1951, in total for all retail stores and for Group II stores by kind of business.

2-22. CURRENT WHOLESALE TRADE REPORT

Monthly Wholesale Trade Report; Sales and Inventories ²

4 p., table, chart. Monthly 10 cents. Yearly subscription \$1. November, December 1952; January–April 1953.

Sales and inventory trends and stock-sales ratios of merchant wholesalers are shown by kinds of business and geographic division. Number of firms reporting and their reported dollar sales and inventories for the current month are shown as a measure of coverage on which trend data are based. Percent change in sales and inventories, current month from preceding month, and from same month preceding year and sales for year to date from preceding year. Stock-sales ratios, current

Trends in gallonage sales and inventories of wines and distilled spirits wholesalers by State. Data shown for the District of Columbia and 28 States which do not have State control or monopoly distribution at the wholesale level. Percent change current month from preceding month and from same month preceding year and year to date from preceding year; also stock-sales ratios expressed as days of supply. Percent change in sales of large retail liquor stores (packaged goods) and eating and drinking places for selected areas, current month from preceding month and from same month preceding year, and year to date from preceding year. Imports for consumption of distilled spirits and wines, by type, and by quarters, current and two preceding years.

NOTE.—This series has been discontinued with the April 1953 issue.

2-24. OTHER CURRENT BUSINESS REPORTS**Canned Food Report ²**

4 p., tables, charts. January 1, April 1, 1953. Price, 50 cents for one season's reports.

Total stocks of wholesale distributors and warehouses of retail multi-unit organizations, of 33 specified canned foods (15 vegetables, 12 fruits, 6 fruit juices) on hand, current period. Data are shown, in total and by two can sizes (sizes smaller than No. 10 and sizes No. 10 or larger)—in actual cases, for the current period and preceding period, and as a percentage change, current period from same period preceding year. Data on canners' stocks supplied by canners associations are also included for these same dates if available. Also included—canners' carryover, pack and total supply from the beginning of season for the current season, and total supply for the two previous seasons.

Petroleum Products—Secondary Inventories and Storage Capacity

2 p., tables, map. Monthly. November 30, December 31, 1952; January 31–April 30, 1953.

Inventories and storage capacity of liquid fuels (gasoline, kerosene, distillate fuels and residual fuels) at the secondary level—total supplies of petroleum jobbers and secondary supplies of petroleum refiners, by Petroleum Administration for Defense Districts. Inventories, current month, and the same month a year ago are measured monthly. Storage capacity—covered in the January 31 report—is measured every third month.

3. FOREIGN TRADE DIVISION

Statistical data on United States exports and imports of merchandise and of gold and silver are collected from shippers' export declarations and import entries. These forms are filed by exporters and importers with Collectors of Customs and transmitted to the Bureau. The statistics compiled include information on the dollar value and net quantity (bales, square yards, gallons, etc.) of United States exports and imports by commodity, country of destination and origin, customs districts through which merchandise enters and leaves the United States; trade with United States Territories and possessions. The data also show the shipping weight and dollar value of vessel imports and exports, domestic to foreign port of routing, of shipments by vessel, the nationality of the carrier, for shipments by vessel, and the number and tonnage of vessels entering and clearing port in the foreign trade of the United States.

Monthly and quarterly figures are preliminary and subject to revision. Preliminary annual data are available in annual reports for most series of monthly reports. All data for the year are summarized in the final report, *Foreign Commerce and Navigation of the United States*, latest issue, 1946.

A *Catalog of Foreign Trade Statistical Publications* may be obtained free, on request.

3-10. FOREIGN TRADE AND SHIPPING STATISTICS REPORTS ON A COST BASIS

A number of reports containing information not shown in the regularly published foreign trade statistical reports are specially prepared for subscribers on a cost basis.

Recurring cost reports for which arrangements have been made for preparation in 1953 are listed below together with the annual cost of each. When there is more than one subscriber to a report, the total cost is divided among the subscribers. No refunds are made if new persons subscribe to a recurring monthly report during the period of the report. The cost to new subscribers is established at the beginning of the annual period.

In addition to recurring monthly reports, there are listed below new one-time reports covering specified periods with the total cost of the report indicated. These reports are usually typed, or in manuscript form, while a few are processed.

Persons interested in subscribing to any of these reports should write to the Foreign Trade Division, Bureau of the Census, Washington 25, D. C.

4. GOVERNMENTS DIVISION

The Governments Division collects data and prepares reports showing current and bench mark statistical data relating to the characteristics and functions of State and local governments and their administration in the United States. In current reporting, primary attention is given to public finance (revenue, expenditure, debt, and enterprise finances), and public employment (number of employees and amount of payroll). A two-page release entitled "*Census Bureau Publications on Governments, as Scheduled for the Fiscal Year 1953*" is available upon request.

During the past century, a Census of Governments has been taken at 10-year intervals—most recently for 1942—providing more complete and detailed information on State and local governments than is reported currently. Public Law 767 of the 81st Congress, approved September 7, 1950, requires that such a census be taken for the year 1952 and thereafter at 5-year (rather than 10-year) intervals. However, funds for taking the 1952 Census were not made available by the Congress.

4-1. STATE FINANCES

G-SF52 State Finances: 1952

No. 1. Summary of State Government Finances in 1952²

21 p., tables, charts. April 1953. Annual. 15 cents.

Summary financial data for the 48 States for the 1952 fiscal year. Tables provide the following, by State: summary financial aggregates; general revenue by source; total expenditure by character and object; general expenditure by function; capital outlay and intergovernmental expenditure; insurance trust revenue and expenditure; debt outstanding and long-term debt issued and redeemed; fiscal year, population, and income payments. Per capita amounts are also shown for selected general revenue, general expenditure, and debt items.

No. 2. Compendium of State Government Finances in 1952¹

65 p., tables, charts. June 1953. Annual. 35 cents.

Detailed State financial data are reported for the fiscal year 1952. Includes a National summary of State finances for 1950-52 and summarizes financial aggregates, by State.

Revenue items are shown for the following, by State: per capita amounts and percent distributions, by source; tax revenue, by type of tax; sales and gross receipts and license taxes in detail; intergovernmental revenue, by source and function; charges and miscellaneous general revenue and current charges, by source; insurance trust revenue, by type of system and source.

Expenditure items are shown for the following, by State: summary, by character and object, and by type and function; per capita amounts and percent distributions, by function; capital outlay, in total and for selected functions; intergovernmental expenditure, in total, for selected functions, and by type of receiving government; detail of amounts for public safety, public welfare, education, highways, health and hospitals, nonhighway transportation, natural resources, general control, and other functions.

Debt items are shown for the following, by State: debt outstanding, debt issued, and debt retired, by term and character; and long-term debt outstanding and original long-term debt issued, by function.

Also shown, by State are: cash and security holdings; income and expense statement and selected transactions of State alcoholic-beverage systems; finances of State-administered public-employee retirement systems, State unemployment-compensation funds, State administered workmen's compensation systems, and miscellaneous State-administered insurance trust systems; percent changes from 1951 to 1952 in revenue, expenditure, and debt; and States' fiscal years, populations, and income payments.

Text gives comparisons of data, definitions of terms, and discussion of sources and terminology.

17 p., tables, charts. March 1953. Preliminary. 15 cents.

Advance release of fiscal 1952 data for the first 26 States for which such figures were available. Tables provide the following, by State: summary financial aggregates, total expenditure by character and object, general revenue by source, general expenditure by function, capital outlay and intergovernmental expenditure, insurance trust revenue and expenditure, and fiscal year, population, and income payments. Per capita amounts are also shown for selected general revenue and general expenditure items.

4-2. CITY FINANCES**G-CF51 City Finances: 1951****No. 2. Compendium of City Government Finances in 1951¹**

126 p., tables, charts. January 1953. 50 cents.

Final report of detailed financial data for cities of 25,000 or more for the fiscal year 1951. Summary data, by population groups, with percent changes, 1950 to 1951, and per capita amounts. Individual-city data (481 cities) showing income and outgo aggregates; total expenditure by character and object; general revenue by source; general expenditure by function; debt outstanding, issued, and retired; finances of city-operated utilities; and finances of city employee-retirement systems. There are also tables showing per capita amounts of selected financial items, by city; financial data for selected urban towns and townships; and the fiscal years of the 481 cities.

4-4. GOVERNMENT EMPLOYMENT**G-GE52 Government Employment: 1952****Public Employment in (specified month)²**

4 p., tables, charts. Quarterly. No. 4. October 1952. 5 cents.

Total number of public employees (Federal, State, and local), school and nonschool, number of full-time employees, and amount of monthly payroll, by month for the current and preceding year, and yearly (showing figures for reported month only) back to 1940.

No. 6. City Employment in 1952²

32 p., tables, charts. May 1953. Annual. 25 cents.

Tables show city employment by population group: historically, for 1940-52; and by function for the month of October 1952. Number of employees and amount of payroll are shown for each city of more than 10,000 inhabitants for the month of October 1952. The text analyzes and explains the data for various city functions and describes procedures used for this report.

No. 7. State Distribution of Public Employment in 1952²

24 p., tables, charts. May 1953. Annual. 20 cents.

Tables show number of public employees and amount of payrolls: historically, in terms of national totals by type of government, for October 1940-52; and functionally, for each State as of October 1952, by level and type of government. Percent distribution figures are also shown, by function and by State, for State and local government payrolls in October 1952.

G-GE53 Government Employment: 1953**Public Employment in (specified month)²**

4 p., tables, charts. Quarterly. No. 1. January 1953. 5 cents.

5. INDUSTRY DIVISION

Current statistics on commodity production and shipments are issued in the *Facts for Industry* series. This series of releases makes available to manufacturers, trade groups, and other users of industrial data, current figures that are useful in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

Annual surveys of manufactures have been taken each year since 1949. They cover a sample of manufacturing establishments and bring up to date the statistics on employment, earnings, man-hours, value added, inventories, expenditures for new plant and equipment, and classes of products, which are shown in more detail in the quinquennial Census reports.

The Census of Manufactures, first taken in 1810 and now quinquennial (last taken for 1947) provides detailed data on manufacturing by geographic areas, by industries and by subjects.

5-2. FACTS FOR INDUSTRY

In the numbering of the Facts for Industry series, the letter "M" is used for Manufactures, the first two digits represent the group classification at the two-digit level of the Standard Commodity Classification, and the specific survey is shown by the letter following the group classification numbers.

Annual data are available in annual reports for most series of monthly or quarterly reports. In addition there are reports which are issued on an annual basis but are not a summary of the data appearing in any monthly, quarterly or semi-annual series.

M67D Gloves and Mittens: 1952²

2 p., tables. June 13, 1953. Annual. 10 cents.

Pairs of dress and work gloves and mittens produced in 1952, by material and type, total, men's and boys', and women's and misses'. Comparative figures for 1952 and 1951 (revised), and percent of change, 1952 from 1951.

M67H Women's, Misses' and Juniors' Outerwear²

8 p., tables, charts. Quarterly and annual summary. Quarterly 10 cents. Yearly subscription including annual summary, 50 cents. Quarterly: Third quarter, Fourth quarter 1952.

For each principal women's outerwear industry (coat and suit, unit-price dress, dozen-price dress, blouse, and skirt) shows value of shipments, total returns, and returns as percent of gross shipments, current quarter, preceding quarter, and same quarter preceding year, with percentage change, current quarter from same quarter preceding year. Production distribution by price line and by kind of fabric used in women's principal outerwear garments, year to date, current and preceding year. Includes a summary—dollar shipments for all industries; cuttings of specified garments: dresses sold at a unit price; suits, untrimmed coats, fur-trimmed coats, dresses sold at a dozen price; blouses and waists; and skirts, current quarter and same quarter preceding year with percent of change, and cumulative totals, current and preceding years.

M68A Shoes and Slippers²

4 p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Monthly: November, December 1952; January–March 1953.

Production (summary) by kind of footwear, current and preceding month, same month preceding year, percent of change, current month compared with preceding

month and same month preceding year, and percent of production by type of outsole, current month. Production (quantity) and shipments (quantity and value) by geographic division and States, current and preceding month, same month preceding year, cumulative totals for two years and percent of change in value of shipments, current month compared with preceding month and same month preceding year. Production by kind of footwear, by type of upper and outsole, current month. Published since 1921.

M75A Steel Shipping Barrels, Drums and Pails²

2 p., table, charts. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 9 p., tables. Monthly: November, December 1952; January–April 1953.*

Shipments, end-of-month stocks and unfilled orders for sale and own use; heavy type steel shipping barrels for sale only; light type for sale and own use. Shipments, current and preceding month, same month preceding year and cumulative totals for two years; end-of-month stocks, current month; end-of-month unfilled orders, current and preceding month and same month preceding year. Types of products defined.

Summary for 1952 presents revised figures for 1952 and 1951. Data show: shipments for sale and own use, by type of product, 1948–52; monthly shipments, stocks and unfilled orders of heavy-type steel shipping barrels and drums, 1952 and 1951; total monthly shipments and stocks, monthly shipments and stocks for sale and unfilled orders of light-type steel barrels and drums, 1952 and 1951; monthly shipments, stocks and unfilled orders of steel shipping packages, kegs and pails, 1952 and 1951. Published since 1924.

M75C Commercial and Home Canning Closures²

3 p., tables, charts. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 5 p., tables. Monthly: December 1952; January–April 1953.*

Shipments and production of commercial closures, crowns, and home canning closures, current and preceding month, same month preceding year and cumulative totals for two years. Raw materials consumed in the production of commercial and home canning closures, including tin mill products, molding compounds used for plastic caps, aluminum, and rubber, current and preceding month.

Summary for 1952 gives monthly shipments, production of commercial and home canning closures by type of product and monthly consumption of selected raw materials used, by type of material, 1952 and 1951. Published since 1941.

M75D Metal Cans²

p. 2–3, tables, chart. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 4 p., tables. Monthly: November, December 1952; January–April 1953.*

Shipments for sale and own use by type of product packed (nine food cans and four nonfood cans), current and preceding month, same month preceding year and cumulative totals for two years. Shipments for sale and own use by type of product packed, for the United States and Hawaii, by geographic divisions, current and preceding quarter and same quarter a year ago in the March, June, September and December reports. Data are in terms of short tons of steel consumed in the manufacture of cans.

Summary for 1952 presents monthly shipments, by type of product packed, 1952 and 1951, and quarterly shipments of food and nonfood cans by geographic regions, 1952 and 1951. Includes combined total figures for the United States and Hawaii. Data for Hawaii are also included in the figures for the Pacific region. Published since 1943.

M77C Glass Containers²

2 p., tables, chart. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary 1952, 6 p., tables, charts. Monthly: November, December 1952; January-April 1953.*

Quantity of shipments (direct exports and domestic), production, and stocks, domestic by type of container; shipments for current and preceding month and same month preceding year; production and end-of-month stocks for current and preceding month. Summary for 1952 gives shipments and production, 1948-52, shipments, production and end-of-month stocks, each by type of container, by months, 1952 and 1951. Published since 1945.

M77E Pressed and Blown Glassware (Except Glass Containers): 1952²

2 p., tables. *May 26, 1953. Annual. 10 cents.*

Value of shipments by class of product, 1948-52; and quantity and value of shipments, 1952 and 1951.

NPAF-1 Consumption and Inventories of Steel, Copper, and Aluminum in Metalworking Industries: First quarter 1951—Second quarter 1952²

13 p., tables. *March 25, 1953. Special report. 15 cents.*

Estimates are shown on total consumption (including purchases, interplant transfers, and produced and consumed in the same establishment) and inventory of carbon steel, alloy steel, stainless steel, copper, and aluminum by shape and form for each quarter January 1951-June 1952; and on consumption of carbon steel, alloy and stainless steel combined, copper, and aluminum, by selected industries and industry groups, for each quarter, 1951.

Estimates cover the major metal consuming industries in the four broad industrial groups: Fabricated metal products; Machinery (except electrical); Electrical machinery; and Transportation equipment; also includes the consumption and inventory of steel in the Iron and Steel Forgings Industry.

Data tabulated from surveys conducted by the Bureau of the Census for the National Production Authority. Surveys included approximately 8,000 of the larger establishments in the metalworking industries and a representative sample of the smaller plants.

5-3. ANNUAL SURVEYS OF MANUFACTURES

Statistics on manufacturing are collected in detail in the Census of Manufactures (now taken every five years with the next to cover the year 1953). During the intercensal period, the Annual Surveys provide up-to-date basic statistics on the key measures of manufacturing activity for industry groups, important individual industries, and for geographic divisions and States. The annual survey covers approximately 45,000 plants out of a total of more than 250,000. Included are all large plants, accounting for approximately two-thirds of the total manufacturing employment in the United States, and a sample of the much more numerous small plants.

The Annual Survey program is designed to provide estimates of general statistics (employment, payrolls, man-hours, value added by manufacture, etc.), for industry groups and selected industries; general statistics for geographic divisions and States, cross-classified by major industry group; value of shipments for classes of products; data on selected metals consumed, by selected industries; expenditures for new plant and equipment, for industry groups and

for States; value of manufacturers' inventories, for industry groups and selected industries; and selected general statistics for industries, cross-classified by size of establishment.

The Annual Surveys of Manufactures employment data have been coordinated with the Bureau of Old Age and Survivors Insurance employment figures for consistency in classification, coverage, and statistical accuracy.

Fuels Consumed and Electric Energy Purchased: 1950¹

23 p., tables, appendix. May 1953. 20 cents.

Report shows estimates for 1950 with comparable 1947 Census statistics on the cost of fuels consumed and the quantity and cost of electric energy purchased by manufacturing establishments. Includes figures for industries, United States totals, geographic divisions, States and groups of industries within State. Report contains a Technical Appendix, which discusses the estimating procedures used.

MAS-50-9 Fuels Consumed and Electric Energy Purchased: 1950 and 1947.² Advance report

20 p., tables, appendix. January 1953. 25 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1950 and 1947 (revised 1950 figures) by geographic divisions and States. Tables include comparable 1947 statistics, previously published in the 1947 Census of Manufactures release MC203, *Fuels and Electric Energy Consumed*. Replaces preliminary report MAS-50-5, *Cost of Fuels Consumed and Purchased Electric Energy for Industry Groups: 1950 and 1947*, issued in 1951 and incorporated in the report *Annual Survey of Manufactures, 1949 and 1950*.

MAS-51-3 Value of Shipments of Selected Classes of Products: 1951, 1950, and 1947.² Advance report

8 p., tables. February 6, 1953. 20 cents.

Estimates of value of shipments during 1951 and 1950 for more than 600 classes of manufactured products with comparable data from the 1947 Census of Manufactures. The values presented for 1951 and 1950 are based on manufacturers' reports received in the 1951 Annual Survey of Manufactures conducted by the Bureau of the Census in cooperation with the National Production Authority.

MAS-51-4 General Statistics for Industry Groups and Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

31 p., tables. March 11, 1953. 30 cents.

This report provides data on employment, man-hours of production workers, payrolls, cost of materials, value of products shipped and value added by manufacture. Also shown are data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

MAS-51-5 Metals Consumed by Manufacturers of Metal Products for Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

11 p., tables. March 11, 1953. 15 cents.

Includes a summary of consumption and cost of carbon steel, alloy and stainless steel, aluminum, and copper and copper-base alloys, 1951, 1950, 1949, and 1947 by manufacturers of metal products. Estimated quantity and cost figures for the major metal producing industries within four broad industrial groupings: (1) Fabricated metal products, (2) Machinery (except electrical), (3) Electrical machinery, and (4) Transportation equipment. Data on the consumption and cost of such metal mill shapes and castings by metal fabricating establishments for 1951 are based on estimates prepared from the survey "Reported Plant Operations" (NPAF-1 and NPAF-103); the estimates for 1950 and 1949 are comparable figures tabulated from the 1950

and 1949 Annual Survey of Manufactures. Corresponding figures shown for 1947 were compiled from the 1947 Census of Manufactures. The 1951 estimates include quantities produced and consumed in the same establishments, as well as purchases and interplant transfers. Data for prior years exclude quantities produced and consumed in the same establishments.

MAS-51-6 General Statistics for the United States, by Geographic Divisions and States: 1951, 1950, 1949, and 1947.² Advance report

7 p., table, map. March 12, 1953. 15 cents.

This report shows measures of manufacturing activity—employment, payrolls, man-hours of production workers, and value added by manufacture for 1951 distributed by geographic divisions and States. Includes data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

MAS-51-6 General Statistics by Major Industry Groups: 1951, 1950, 1949, and 1947.² Advance reports

p. 5-7, tables, map. March 12, 1953. Each report 15 cents.

Preliminary estimates of the general statistics relating to manufacturing activity during 1951, 1950, 1949, and 1947. Estimates of employment, payrolls, man-hours of production workers, and value added by manufacture are shown by selected major industry groups, for each geographic division and State in the following separately numbered reports:

6. POPULATION AND HOUSING DIVISION

A Census of Population has been taken every 10 years since 1790 and a Census of Housing has been taken along with the Census of Population since 1940. These censuses were last taken as of April 1, 1950, and the results are still being published in a program which will continue into 1953.

The Current Population Survey is conducted monthly. Through enumeration of a scientifically selected sample of the population, information is obtained currently on employment, unemployment, hours of work, occupation, and other subjects. Also available are estimates of the personal and family characteristics of the population, mobility of the population, income, housing conditions, etc.

Estimates of population for postcensal and intercensal dates are prepared, and special censuses of local areas are taken at the request and expense of the local governments involved.

6-11. 1950 CENSUS OF POPULATION

Results of the 1950 Census of Population were made available in published form as rapidly as data were tabulated and assembled. Preliminary figures and advance releases of final statistics were issued in unbound multilithed form identified as Series PC reports. Detailed final data are being presented in bound volumes. The material presented in these volumes will be available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume II, *Characteristics of the Population*, in 54 parts, presents statistics on the number of inhabitants and the characteristics of the population for States and their standard metropolitan areas, urban places, and other constituent areas. The volume includes Series P-A, P-B, and P-C bulletins and a separately-bound part for each State, the District of Columbia, and a United States summary. Parts 51-54, for the Territories and possessions, will be bound together.

Vol. II. Characteristics of the Population ¹

v. p., tables, map.

Population totals for the State, urban and rural, and for cities of 10,000 or more from earliest census to 1950; in groups of places according to size, 1900-50; population and area of counties, urban and rural, 1930-50; counties by minor civil divisions, 1930-50; all incorporated places, and unincorporated places of 1,000 or more, 1950 and 1940; incorporated places of 5,000 or more, by wards; and urbanized areas, 1950.

Characteristics of the population for the State, for each county, for the rural-non-farm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, each urbanized area and standard metropolitan area; with limited data presented for incorporated and unincorporated places of 1,000 to 2,500. Subjects include the age and sex of the population, race, nativity, citizenship, school enrollment,

years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. Separate statistics are presented for the nonwhite population for areas in the southern States.

The report also includes: detailed characteristics of the population for large areas; the State, urban and rural; cities and standard metropolitan areas of 100,000 or more; distribution of the population by sex and single years of age; and cross-classifications of sex and age by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income; and data on occupation, industry, and income, cross-classified with each other and race, class of worker, etc. Separate cross-classifications are shown for the non-white population in areas with 50,000 non-white inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

FINAL BULLETINS

Series P-B Bulletins, *General Characteristics*, are preprints of Chapter B, Volume II, *Characteristics of the Population*, for each State, the District of Columbia, the Territories and possessions, and the United States. The bulletins present statistics on the general characteristics of the population of the State, its counties, standard metropolitan areas, urban places, and other constituent areas. The data in these bulletins supersede figures shown in Series PC-12 reports and, in part, figures shown in Series PC-5, PC-6, and PC-7 reports. The price for a complete set of 54 P-B bulletins is \$28.30.¹

P-B General Characteristics (State)¹

v. p., tables, map. (Preprints of Chapter B of Volume II)

Characteristics of the population for the State, for each county, for the rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, for each urbanized area and standard metropolitan area; limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Subjects include age and sex, race, nativity, citizenship, school enrollment, years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. The bulletins contain detailed statistics on the characteristics of the population for: States; the urban, rural-nonfarm, and rural-farm parts of States; cities and standard metropolitan areas of 100,000 inhabitants or more, with some data for cities of 50,000 to 100,000 inhabitants. Statistics in these bulletins supersede figures shown in Series PC-5, PC-6 and PC-7 reports. The 53 bulletins are priced at \$35.15 a set.¹

P-C Detailed Characteristics (various areas)¹

v. p., tables. (Preprints of Chapter C of Volume II.)

Distributions of the population by sex and single years of age, and cross-classification of sex and age; by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income. Also data on occupation, industry, and income cross-classified with each other and with race, class of worker, and other population characteristics. Selected separate cross-classifications are shown for the nonwhite population for each area with 50,000 nonwhite inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

Series P-D bulletins, *Census Tract Statistics*, which will not be bound into a single publication, comprise Volume III of the 1950 Census of Population. The 64 bulletins cover tracted cities and their adjacent tracted areas, where the latter exist. Each bulletin presents by census tracts, information from the Censuses of Population and Housing. Statistics presented in this series supersede those shown in Series PC-10. The price for a complete set of 64 bulletins is \$21.70.¹

P-D Census Tract Statistics (specified city)¹

v. p., tables, maps.

Basic population and housing characteristics for tracted areas from the 1950 Censuses of Population and of Housing. Population items include: age, sex, race and nativity, marital status, years of school completed, country of birth, married couples and households, residence in 1949, employment status, occupation, class of worker, and family income in 1949. Housing data include: occupancy and tenure, type of structure, condition and plumbing facilities, year built, persons per room, heating fuel, refrigeration equipment, television, contract monthly rent, and value of one-dwelling-unit structures.

Separate data are presented for nonwhites and the dwelling units which they occupy, for each tract having 250 nonwhites or more within tracted areas containing

ADVANCE REPORTS

Series PC-14 comprises 21 reports which present final figures for particular population characteristics for the United States as a whole, or for various types of areas.

PC-14 Summary Reports of Population Characteristics (*various areas*)

No. 7. School and Kindergarten Enrollment by Age, for the United States, Urban and Rural, and for Regions, Divisions and States: 1950²

2 p., tables. 5 cents.

Statistics supersede corresponding preliminary sample data in Series PC-7, Nos. 1 and 3, issued in 1951, and are an advance release of information from the U. S. summary bulletin in Series P-B. School and kindergarten enrollment is shown by age groups from 5 to 29 years of age. Data on school and kindergarten enrollment for Alaska, Hawaii, and Puerto Rico are included in the report.

No. 8. Marital Status of Persons 14 Years Old and Over, for the United States, Urban and Rural, and for Regions, Divisions, and States: April 1, 1950²

2 p., tables. 5 cents.

Marital status by color and sex for the United States, urban and rural, 1950, for the United States, 1890-1940; and marital status by sex, by census regions, census divisions, and States, 1950. Data supersede corresponding preliminary sample data in Series PC-7, Nos. 1 and 3, issued in 1951, and are an advance release of information from the U. S. summary bulletin in Series P-B. Data for Alaska, Hawaii, and Puerto Rico are included in the report.

No. 9. Class of Worker and Major Occupation Group, for the United States, Urban and Rural, and for Regions, Divisions, and States: 1952²

4 p., tables. 5 cents

Class of worker of employed persons and major occupation group of the experienced civilian labor force, by sex, for the United States, urban and rural; class of worker of employed persons, by sex, by census regions, census divisions, and States; and major occupation group of employed persons, by census regions, census divisions, and States. Data supersede corresponding preliminary sample data in Series PC-7, No. 2, issued in 1951, and are an advance release of information from the U. S. summary bulletin in Series P-B. Data for Alaska, Hawaii, and Puerto Rico are included in the report.

6-12. 1950 CENSUS OF HOUSING

Results of the 1950 Census of Housing are made available as they are tabulated and assembled. Preliminary figures and advance releases of final statistics have been issued in unbound multilithed form identified as Series HC reports. Detailed data will be presented in a series of bound volumes. The materials presented in Volumes I and II are also being made available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume IV, *Residential Financing, Mortgaged Nonfarm Properties*, presents data relating to the characteristics of the financing of the residential nonfarm properties for the United States, for each of the four geographic regions and for each of 25 large standard metropolitan areas. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States.

Vol. IV. Residential Financing, Mortgaged Nonfarm Properties (2 parts)¹

Presents results of a sample survey of characteristics relating to the financing of residential nonfarm properties. Data are presented in terms of mortgaged properties, first and junior mortgages, and outstanding mortgage debt for both owner-occupied and rental properties. Includes type of mortgage holder, characteristics of first and junior mortgages, purpose of financing and refinancing, characteristics of the owner-occupant and his household, and the physical and financial characteristics of the property. Part 1 presents detailed characteristics of the United States and the four geographic regions. Part 2 presents data for 25 large standard metropolitan areas and comparable data for the United States. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

Pt. 2. Large Standard Metropolitan Areas and Comparable Data for the United States

850 p., tables, maps, appendix. 1952. \$5.25 (Buckram).

FINAL BULLETINS

Series H-A Bulletins are preprints of Volume I, *General Characteristics*, of the 1950 Census of Housing. There is a separate bulletin for each State, the District of Columbia, the Territories and possessions, and a summary report for the United States. The series present basic data on practically all subjects for which information was collected in the 1950 Census of Housing. Statistics in these bulletins supersede figures shown in Series HC-1 through HC-5, HC-7, and HC-8. The price for the 54 reports is \$27.65.

H-A General Characteristics of Housing (State)¹

v. p., tables, maps.

Data for the State, each county, rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, and each urbanized area and standard metropolitan area. Limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Included are statistics on dwelling units by occupancy and tenure, vacancy status, type of structure, color of occupants, condition and plumbing facilities, number of rooms, persons per room, year built, water supply, toilet and bathing facilities, electric lighting, heating equipment, heating and cooking fuels, kitchen sink, refrigeration equipment, radio, television, contract or gross monthly rent of rental unit, and value and mortgage status of owner-occupied nonfarm dwelling units. INDEXES

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

January–March 1953

The following indexes show by geographic areas and by subject, data contained in Census publications during January through March 1953, and included in the catalog part of this publication. There are separate indexes for Census Divisions (nine groupings of States), Census Regions (combinations of Divisions into three or four groupings), Cities, Counties, Standard Metropolitan Areas, States, Territories and possessions, and Urban and/or Rural Areas.

Each index entry (except cross references) is followed by a group classification number to facilitate reference to the specific publication. Group classification numbers shown in the upper outside corner of each page of the catalog section indicate the order of listing. The table of contents indicates the order of listing, also. The group classification system is an order of numbers assigned according to the alphabetical arrangement of six of the administrative divisions of the Bureau of the Census. There is a seventh classification, Miscellaneous, for other Bureau publications.

INTRODUCTION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is issued on a current basis each quarter and cumulated to the annual volume. A MONTHLY SUPPLEMENT to this CATALOG, which does not include regular monthly and quarterly publications, enables users to be informed more currently on publications as they appear. Each subscription to the quarterly CATALOG (\$1.50 a year) will include a combination of 4 quarterly issues of the CATALOG and 12 copies of the MONTHLY SUPPLEMENT.

The record of the Bureau of the Census publications since the first Census in 1790 through the year 1945 is available in the "Catalog of United States Census Publications 1790-1945" (Government Printing Office, \$1.50). This catalog was prepared by the Census Library Project sponsored by the Library of Congress and the Bureau of the Census. Publications issued after 1945 are shown in the annual issues of CENSUS PUBLICATIONS CATALOG AND SUBJECT GUIDE for 1946 and subsequent years, through 1951.

The BUSINESS SERVICE CHECK LIST of the Department of Commerce, issued weekly at a subscription cost of \$1.50 a year, includes a list of Census publications. Subscriptions can be placed with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or with the field offices of the Department of Commerce listed on the back cover of this publication.

HOW TO USE THIS PUBLICATION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is designed to give users of published Census statistics a direct method of locating needed information. The catalog contains detailed descriptions of the contents of the published reports and is followed by two indexes, an index to reports by geographic areas, and an index to reports by subject.

The entries in the two indexes are directly keyed to the reports listed in the catalog by the use of a reference numbering system. All publications are arranged in the catalog by general subject field, following the organization pattern of the Bureau, namely: 1. Agriculture; 2. Business; 3. Foreign Trade; 4. Governments; 5. Industry; 6. Population and Housing; and 7. Miscellaneous. The first digit of

INTRODUCTION

the reference number designates the major subject within which the report is listed. Thus, all Agriculture Division reports have reference numbers beginning with 1; reference numbers for all Business Division reports have 2 as the first digit, etc. The second part of the reference number further classifies the reports by broad categories. For example, Business Division reports on Retail Trade are classified under 2-21; Wholesale Trade, 2-22; Trade Studies, 2-23; etc. Reports carrying a series number are further identified by the series number shown in parentheses following the group reference number, where it is feasible to include such numbers in the indexes.

The user of the CATALOG may first consult either the index by geographic areas or the index by subject and secure the reference number or numbers shown for the item on which he is looking for information. The reference number is then used as a key in locating the desired reports in the catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page in the catalog section. In order to avoid the indexing of large lists of commodities, general references are made in those instances where coverage is all inclusive; reports are indexed under specific commodities only when the reports are limited to the specific item.

HOW TO OBTAIN BUREAU OF THE CENSUS PUBLICATIONS

Priced publications, except as otherwise noted in this catalog, may be purchased from the Superintendent of Documents, Washington 25, D. C., or from the U. S. Department of Commerce Field Offices which are listed on the back cover. Other publications, which are not published by the Government Printing Office, may be ordered from the Bureau of the Census, Washington 25, D. C. For these publications, checks or money orders must be made out to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment. Remittances are required in advance of any shipment.

Unpriced publications may be obtained from the Bureau of the Census, Washington 25, D. C. When requesting publications, please be as specific as possible.

Supplies of publications are limited. Priority in meeting requests will be given to government agencies, large public libraries, school officials, and certain other groups when the reports are needed for official use or will be made available to large numbers of users of data.

AVAILABILITY OF UNPUBLISHED DATA

Detailed information in the files of the Bureau that has been tabulated but not published, can be made available, upon request, for the cost of transcribing or reproducing the data. Requests for statistics, addressed to the Director, Bureau of the Census, Washington 25, D. C., will be studied for availability of material. If unpublished data are available, an estimate of the cost of preparing and furnishing the data will be made.

A recent statement of the policy governing special work, including the making available of the special tabulations, and a list of some of the work performed, was included in the appendix to the 1952 issue of the CATALOG OF UNITED STATES CENSUS PUBLICATIONS.

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

JANUARY-SEPTEMBER 1953

The following list of Census publications includes those issued from January through September 1953. The publications are listed by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Governments, Industry, Population and Housing, and, for Bureau-wide materials, Miscellaneous. Group numbers are assigned to each section and are shown on the upper outside corner for the first entry on each page. These group numbers are assigned to all index entries to facilitate reference from the subject guide to the specific reports listed in the Catalog.

Each report is described and the date of issue is given for all reports except regular monthly or quarterly series.

1. AGRICULTURE DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the Census of Population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925; thus, there has been a Federal Census of Agriculture every fifth year since 1920.

Each year the Bureau collects statistics and issues periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on dates prescribed by Congress. Five of these reports are issued jointly with the Department of Agriculture as the "Consolidated Cotton Report."

1-10. 1950 CENSUS OF AGRICULTURE

FINAL REPORTS

Five principal final volumes present the results of the 1950 Census of Agriculture: Volume I.—*Counties and State Economic Areas*, published in 34 parts for specified States and the Territories and possessions; Volume II.—*General Report, Statistics by Subjects*; Volume III.—*Irrigation of Agricultural Lands*; Volume IV.—*Drainage of Agricultural Lands*; and Volume V.—*Special Reports*. The chapters or parts of Volumes II and III are issued as separate bulletins. The ten special reports of Volume V are issued as separate pamphlets and will not be bound together. All reports of the 1950 Census of Agriculture have now been published.

Volume I, *Counties and State Economic Areas*, in 34 separate parts, is arranged by census geographic divisions for the continental United States. These bulletins supersede the reports in the preliminary Series AC50-1-5. All reports, except that for Puerto Rico and the combined reports on the Territories and possessions, were issued in 1952.

Vol. I. Counties and State Economic Areas¹

v. p., tables, map, appendix.

Pt. 34. Territories and possessions; Alaska, American Samoa, Guam, Hawaii, Puerto Rico, and Virgin Islands of the United States. 265 p. \$1.25.

Number of farms, farm characteristics, acreage in farms; value of farm land and buildings, cropland, other uses of land; farm facilities and equipment; number of various kinds of livestock; acres and production of various crops; value of farms; and data by size of farm, by tenure of operator, by type, and by economic class for the 1950 Census of Agriculture; together with comparative data from earlier Censuses.

The questionnaire used for each Territory or possession in the 1950 Census of Agriculture forms the appendix for each report combined in Part 34 of Volume I.

Pt. 34.5. Territories and possessions; Puerto Rico.

115 p. Preprint bulletin. 60 cents.

This bulletin has been incorporated in the final report, Pt. 34, listed above. The introduction to this report is in Spanish and English, while the questionnaire which appears in the appendix is in Spanish only.

Volume II, General Report, Statistics by subjects of the 1950 Census of Agriculture is issued in two ways: (1) a final volume which contains 13 chapters, each of which covers a different agricultural subject; (2) the same chapters issued as 13 separate reports.

Vol. II. General Report; Farms, Farm Characteristics, Livestock and Products; Crops, Fruits and Values¹

1404 p., tables, charts, maps, appendix. \$7.50.

The introduction describes the basis for the 1950 Census of Agriculture and its scope; discusses the history of the Census of Agriculture, date of the enumeration; preparation of the questionnaires used for the Census of Agriculture and measures taken for insuring completeness of enumeration; types of questionnaires used in connection with the 1950 Census of Agriculture; the enumeration; office processing of questionnaires: receiving and packaging, editing and coding, punching, mechanical editing, tabulation and review of tabulation, processing of data for the sample of farms used (the sample consisted of all large farms and one-fifth of all remaining farms); the reliability of estimates based on the sample of farms; the sample for the 1945 Census, and publication of data. Includes definitions of terms used, and the classification of farms by: size, tenure of operator, race or color of operator, economic class, part-time farm, residential farm, abnormal farm, type of farm, class of work power, large farm, effect of change in definition of farm on data for the 1950 Census; completeness of coverage of the census; and availability of data for geographic areas. The introduction and the appendix are included in each preprint chapter.

The report presents summary statistics by subjects relating to the number, acreage, and value of farms; uses of land in farms, farm equipment and facilities; livestock, livestock products; crops; value of farm products sold; and the characteristics of farms and farm operators classified by size of farm, tenure of farm operator, type and economic class of farm. Data are presented for the United States, the geographic regions and divisions and for all States.

Data in the 13 chapters of Volume II are described in the paragraphs accompanying the preprint chapters listed below.

Vol. II. General Report; Statistics by Subjects¹

v. p., tables, charts, maps, appendix. (13 preprint chapters of Volume II)

Ch. I. Farms and Land in Farms. 133 p. 65 cents.

The report presents data for the United States on: number of farms, all land in farms, value of farms, 1850-1950; land used for agriculture and forestry, 1880-1950; farm operators with grazing permits, for specified States, 1950; all land in farms and specified uses of land, Censuses of 1850-1950; farms reporting—cropland harvested, by number of acres, 1949 and 1944; woodland pastured and not pastured, by number of acres, 1949; cultivated summer fallow, by number of acres, for specified States, 1949. Total, rural, and farm population, 1850-1950, average number of persons per farm, with per capita data for land in farms, cropland harvested and value of farm products sold, Censuses of 1850-1950.

Data for geographic regions and States show: number and value of farms, all land in farms, 1950, 1945 and 1940; percent distribution of farms, land in farms, and the several classes of land according to use, Census of 1950; all land in farms, 1950, 1945 and 1940, classified according to use in 1949, 1944 and 1939; average acreage per farm, and average acreage of the several classes of land according to use based on all farms, Censuses of 1950, 1945 and 1940, and average acreage per farm reporting the several classes of land according to use, 1949, 1944 and 1939; number and value of farms, all land in farms, cropland harvested, Censuses of 1850-1950; farms by acres of cropland harvested, 1949 and 1944, and by acres of woodland pastured, and not pastured, 1949; number and acreage of irrigated farms, Censuses of 1950, 1945, and 1940; land in farms, land not in farms, classified according to use, and land used for agriculture and forestry, 1950 and 1945; farm population, 1950, 1945 and 1940.

Vol. II. General Report—Continued

The introduction gives sources of data, presentation of statistics, other published data, history of census inquiries on farms and farm property, definitions and explanations of terms used, and a discussion of the changes in farms and land in farms. The introductory chapter and the appendix from Volume II are included in this preprint chapter.

Ch. II. Age, Residence, Years on Farm, Work Off Farm. 193 p. \$1.

Presents data for the United States for: farm operators reporting residence on or off farms, for specified counties, 1950 and 1940; years on farm as classified for each census, with number of operators reporting in each classification, 1910 to 1950; farm operators on present farm one year or less, by month of occupancy, 1950; residence of farm operators, 1950, 1945 and 1940; off-farm work by farm operators, 1929-1949; and other income, 1949; farm operators—in each tenure group by age (color and tenure for the South), 1890-1950; operators of commercial and other farms in each tenure, by age, for the United States, the North and the West (color and tenure for the South), 1950; residence of farm operators, by tenure (color and tenure for the South), 1950, 1945 and 1940; residence of operators of commercial and other farms by tenure, for the United States, the North and the West (color and tenure for the South), 1950; farm operators in each tenure group, by years on present farm, with percent distribution (color and tenure for the South), 1910-50; off-farm work by farm operators, 1929-49, by tenure (color and tenure for the South), 1934-49, and for commercial and other farms, 1949.

Data for the geographic regions, divisions and States present: farm operators, by age, 1950, 1945 and 1940; in each tenure group (color and tenure for the South), by age, 1950; residence of farm operators, 1950, 1945 and 1940, by tenure (color and tenure for the South), 1950; farm operator—by years on present farm, 1950, 1945 and 1940; by tenure (color and tenure for the South), 1950; by year of occupancy of present farm, and on present farm one year or less, by month of occupancy, Census of 1950; off-farm work by farm operators, 1929-49, and other income, 1949, and by tenure, 1949.

The introduction gives sources of data, presentation of statistics, other published data and definitions and explanations of terms used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. III. Farm Facilities, Roads, Trading Center, Equipment. 109 p. 55 cents.

Statistics in this chapter relate to specified facilities in the farm home, kind of road on which farm is located, distance to trading center visited most frequently, and specified items of farm equipment and machinery. Data on facilities include telephone, electricity, and some items of electrical equipment used in the home as well as in the farm business. Electric facilities and equipment include electric water pumps, electric hot water heaters, home freezers, electric washing machines, electric chick-brooders, and electric power feed grinders. Farm equipment and machinery include milking machines, grain combines, corn pickers, pick-up hay balers, silos (upright and pit or trench), motortrucks, tractors (wheel other than garden; garden and crawler), and automobiles.

Most of the available comparative data are shown for the United States. Historical data for regions, divisions, and States are shown only for selected Census years.

United States data show farms reporting: telephone and electricity, 1920-50, electricity, 1950, and specified electric facilities, 1950 and 1945; by distance to trading center and by kind of road, 1925-50; specified farm equipment, 1920-50; motortrucks, tractors and automobiles by age and by year of newest model, 1950, 1945 and 1940.

Data for geographic regions, divisions and States show: specified farm facilities, 1920-50; farms by amount of last monthly electric bill, Census of 1950; kind of road on which farm is located, 1950, 1940 and 1930; distance over dirt or unimproved roads, 1950, and distance to nearest all-weather road, 1945; specified farm equipment, 1950 and 1945; motortrucks on farms, 1920-50; percent distribution of farms reporting motortrucks by age of newest motortruck, 1950, 1945 and 1940, and by year of newest model, 1950; tractors on farms by kind, and farms by number of tractors, 1950 and 1945; percent distribution of farms reporting wheel tractors other

Vol. II. General Report—Continued

than garden, and automobiles, by age of newest tractor or automobile, 1950, 1945, and 1940, and by year of newest model, 1950.

The introduction gives sources of data, discusses presentation of statistics and other published data; the history of census inquiries on farm facilities, roads, trading center and farm equipment. Definitions and explanations of terms used are also included. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IV. Farm Labor and Farm Expenditures. 133 p. 65 cents.

Information on farm labor relates to farm operators, unpaid members of their families doing farm work or chores, and hired workers. Data for hired workers show: number of regular and seasonal workers; number of persons paid on a monthly, daily, hourly or piece-work basis; wage rates, hours worked and perquisites furnished. Information on expenditures relates to amounts paid in the calendar year preceding the census for machine hire, hired labor, feed for livestock and poultry, purchase of livestock and poultry, seeds, bulbs, plants and trees, gasoline and other petroleum fuel and oil, tractor repairs and other farm machinery repairs. Statistics are presented as totals for the United States, for three major regions, the nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States include: workers on commercial and other farms, 1950; workers on farms during specified weeks, 1935-50; farm wage rates, also wage rates and perquisites furnished hired workers, by basis of payment cross classified by size of farm, by type, and by economic class of farm, and by tenure of operator, 1950; specified farm expenditures for commercial and other farms, 1949, specified farm expenditures, 1869-1949; farms by amount of cash expenditures for hired labor, 1949 and 1944.

Data for geographic regions, divisions, and States show: workers on farms, farms by kind of workers, by number of hired workers, week preceding the enumeration, 1950; workers on farms during specified weeks, 1935-50; hired workers by basis of payment, wage rates, and perquisites furnished for workers paid on a monthly, weekly, daily, hourly, and piece-work basis, 1950; wage rates by perquisites furnished, 1950; specified farm expenditures, 1949, 1944 and 1939; number of farms reporting specified amounts of expenditures for hired labor, and percent distribution of farms reporting cash expenditures for labor by amount expended, 1949 and 1944.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. V. Farm Taxes and Cash Rent. 113 p. 55 cents.

Data on taxes are shown only for property owned by owner-operators of farms, and data on cash rent are shown only for lands rented from others by farm operators renting land solely on a cash basis. The report is presented in two parts (1 report)—part 1 relating to farm taxes, and part 2 to cash rent. Statistics are presented as totals for the United States, for major geographic areas and for each of the States.

Part 1. Data for the United States present farm taxes paid by owner-operators, 1950, 1940 and 1930. Data for geographic regions, divisions and States present farm taxes paid by full owners, 1950; percent distribution of full owners renting land to others and not renting land to others by value of owned land and buildings, 1950; number, acreage, value, and amount of farm property taxes for farms operated by full owners not renting lands to others, 1950, 1940 and 1930; farm taxes paid by part owners, percent distribution of part owners renting land to others, and not renting land to others, by value of owned land and buildings, 1950, and number, acreage, value of farm property taxes for farms operated by part owners not renting land to others, 1950 and 1940.

Part 2. Data for the United States present cash rent paid for farm land and buildings, 1950, 1940 and 1930. Data for geographic regions, divisions and States present cash rent paid by part owners reporting both value of land and buildings and amount of cash rent, 1950 and 1940, and for commercial and other farms, 1950; percent distribution of part owners renting land on cash basis, by value of rented land and buildings, Census of 1950; cash rent paid by cash tenants reporting both value of land and buildings and amount of cash rent, Censuses of 1950, 1940 and

Vol. II. General Report—Continued

1930; and for commercial and other farms, 1950; and percent distribution of cash tenants, by value of rented land and buildings, 1950.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VI. Livestock and Livestock Products. 209 p. \$1.

This report includes the quantity of livestock and poultry on farms as of April 1, 1950, amount and value of each important livestock and poultry product sold in 1949, with the number and value of each principal kind of livestock sold alive, and the number of principal kinds of livestock slaughtered on farms. The inventory of livestock and poultry includes data by age and sex groups for the more important kinds of livestock. Data are also presented on bees, and the value of sales of honey, bees, etc. Statistics are presented for the United States, the major geographic areas, and for individual States for most items with comparable data from 1945 and prior censuses.

Data for the United States include a brief description of the various classes of livestock, and an indication of the comparability of data for the Censuses of 1900-50; specified livestock on farms, by age and sex groups as published in the Censuses of 1840-1950; items for livestock and livestock products for which data were obtained, 1840-1950, and farms reporting quantity and value of specified livestock products of farms, 1839-1949.

Data for geographic regions, divisions, and States present value of specified classes of livestock, and percent distribution of total value of specified classes of livestock and percent of total value represented by the several classes, 1950, 1945 and 1940; value of inventories of specified classes of livestock, 1950, with corresponding value of sales of live animals in 1949; value of all livestock products and livestock products sold in 1949; number and value of horses and mules, 1950, 1945 and 1940; farms reporting horses and mules, 1900-50, and number of horses, 1840-1950, and mules, 1850-1950; farm work power (horses, mules, and tractors) with acres of cropland harvested, 1920-50; farms reporting, number, and value of cattle, 1950, 1945 and 1940; number of cattle on hand, 1950 and 1940; number of cows and other cattle, 1950, 1945 and 1940; cows and milk cows, by number reported, 1950; value of cattle by classes—cows, heifers, steers, and bulls, and calves, 1950, and cows and "all other cattle," 1945 and 1940; farms reporting cattle, 1900-50, and number, 1850-1950; number of cows, 1900-50; farms reporting milk cows, 1910-30; and number, 1850-1930; all cows, milk cows, and cows milked, relationship between items as enumerated in the various censuses, 1925-50; quantity and value of whole milk, cream, and other dairy products sold, 1949, 1944 and 1939; quantity of whole milk sold, 1869-1949, quantity of cream and butter sold, 1890-1929; classification by number of milk cows in herd—milk, cream and other dairy products sold, cows milked yesterday and butter churned last week, by States, 1950; number and value of hogs and pigs; and number of sows and gilts for spring farrowing, 1950, 1945 and 1940; all hogs and pigs, 1840-1950. Sows and gilts for spring farrowing, 1920-50; number, and value of all sheep and lambs, and of ewes and other sheep and lambs, 1950, 1945 and 1940; all sheep, 1840-1935, with distribution by age and sex, 1900-35; number of sheep and lambs shorn, quantity and value of wool shorn, 1949, 1944 and 1939; number of sheep and lambs shorn, wool, total sheep, and distribution by age and sex, classified by number of sheep shorn, by States, Census of 1950; sheep and lambs shorn, by number shorn, 1949, 1939 and 1929; number of sheep and lambs shorn, by number shorn and pounds of wool, 1859-1949; chickens on hand, 1910-50, number, 1880-1950, and value, 1950, 1945 and 1940; chickens sold, and number of chickens sold, 1919-49; chicken eggs sold and dozens sold, 1949, 1929 and 1919; chickens on hand, by number reported, 1930-50; classification by number of chickens on hand—farms reporting, and number on hand, chickens sold, eggs sold, and value of sales of poultry and poultry products, by States, 1950; farms reporting turkeys on hand, and number, 1890-1950; turkeys raised and sales of poultry and products other than chickens and chicken eggs—farms reporting, number and value of sales, 1929-49; classification by number of turkeys raised; number or value of turkeys raised—on hand, and sales of turkeys, ducks, geese, and their eggs, by States, 1950; number of ducks, geese and guineas, pigeons, pheasants and quail raised, 1929-49; livestock sales, 1949, 1944 and 1939, farm slaughter, 1909-49; farms reporting

Vol. II. General Report—Continued

specified kinds of animals butchered, by number reported, 1949; number and value of goats and kids, 1950, 1945 and 1940; goats, rabbits, and fur animals, April 1, 1950, or kept in 1949, specified fur animals on hand, April 1, 1950, and farms reporting, and value of sales in 1949; angora and other goats and kids, goats clipped and mohair, 1899-1949; and value of sales from goats, 1949, for specified States; goats and kids, 1900-50; number of beehives, and amount of honey produced, Censuses of 1890-1950. The introduction gives sources of data, other published data, comparability of statistics, and method of handling problems for the enumeration of livestock and livestock products. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VII. Field Crops and Vegetables. 247 p. \$1.25.

This chapter presents statistics for field crops and vegetables harvested in 1949. Figures for each individual field crop are totals for the entire crop, while those for vegetables in the main, are totals for the portions harvested for sale. Vegetables harvested for home use include only farms having home gardens. Individual crops include the number of farms on which the crop was produced, and the area harvested. For most crops, other than vegetable, data are given for the production and the value of the crop. Totals for many principal crops are presented for quantity and/or value of sales. Information is sometimes given for groups of similar crops such as small grains, hay, etc. Value-of-crop figures were not obtained by enumeration, but are computed values based on reports obtained by the Bureau of Agricultural Economics. Totals are shown for the United States, the major geographic areas, and for all States.

Data for the United States present: all crops, acreage and value, 1879-1949; specified field crops harvested, farms reporting acreage, production, and value, 1839-1949; specified vegetables, farms reporting and acres, 1909-49.

Data for geographic regions, divisions and States show: value of all crops sold, 1949; farms reporting corn, sorghum, wheat threshed, winter and spring wheat threshed by acres harvested and by quantity sold, 1949, durum or macaroni and other spring wheat threshed, acreage of oats for grain, acreage and production of oats threshed, oats cut for feeding unthreshed and oats threshed, barley or rye threshed, buckwheat threshed, also threshed emmer and spelt, flaxseed, mixed grain, rice, other grains, soybeans, cowpeas, peanuts, peanut vines or tops saved for hay or forage, peanuts harvested for picking or threshing, velvetbeans, dry field and seed beans harvested for beans, dry field and seed peas harvested for peas, all hay (excluding specified annual legume and sorghum hay), alfalfa cut for hay or dehydrating, clover or timothy (alone or mixed) and lespedeza and small grains cut for hay, other hay, wild hay, hay or grass silage and pasture receipts; alfalfa seed, lespedeza and sweetclover seed, red clover seed and timothy seed; miscellaneous clover, grass and other field seed crops; cotton, tobacco, popcorn, broomcorn, sugarcane or sorghum for sirup, sugar beets harvested for sugar, sugarcane for sugar and for seed, Irish potatoes and sweetpotatoes, root and grain crops hogged or grazed, root crops for feed, and pumpkins for feed, miscellaneous field crops, vegetables grown for home use, and vegetables harvested for sale, specified vegetables harvested for sale, and miscellaneous vegetables harvested for sale.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VIII. Fruits, Nuts, Horticultural Specialties, Forest Products. 141 p. 65 cents.

Presents statistics for berries and other small fruits; for tree fruits, nuts, and grapes; for horticultural specialties; and for forest products taken or cut on farms. Totals, for each crop or item, usually are presented for the United States, for three geographic regions, nine geographic divisions, and for each of the 48 States and the District of Columbia.

United States data are given for: farms reporting acreage and value of fruits and nuts and horticultural specialties, 1840-1950; farms reporting, acreage, quantity harvested, and value of berries and other small fruits, 1899-1949; quantity harvested and value of tree fruits, nuts and grapes, 1840-1950; area, and value of sales of

Vol. II. General Report—Continued

horticultural specialties, 1899-1949; quantity and value of forest products of farms, 1849-1949.

Data for geographic regions, divisions and States present: value of fruits and nuts sold, 1950, 1945, and 1940; farms reporting, acreage and quantity of berries and other small fruits harvested; land in fruit orchards, vineyards, and planted nut trees, farms reporting and acres; farms reporting, apples, peaches, pears, cherries (sour and sweet), and plums and prunes, apricots, nectarines and quinces, figs, oranges, grapefruit, lemons and limes, number of trees. Peach and apple trees of bearing age, not of bearing age, and quantity harvested, classified by number of trees of bearing age; farms reporting grapes, number of vines, and quantity harvested, and value. Also data for pecans; almonds, filberts, walnuts; tung nuts and miscellaneous orchard fruits and nuts; farms reporting area and value of sales for horticultural specialties; value of specified forest products cut or produced on farms, value of all forest products sold; farms reporting and quantity of specified forest products cut; farms reporting number of maple trees tapped and quantity of maple sirup and sugar. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IX. Value of Farm Products. 91 p. 50 cents.

This chapter presents data on the total value of farm products sold, classified by source of income. The statistics are presented as totals for the United States, three major regions, nine geographic divisions, and for all States.

Data show: farms reporting sales of farm products, and value of sales, by major sources; value of: all crops sold, by major groups; and all livestock and livestock products sold, by major groups, Censuses of 1950, 1945, and 1940; specified field crops and specified livestock and livestock products sold, 1949; number of farms by value of sales groups, 1950 and 1945.

The introduction and appendix from Volume II are included in this report.

Ch. X. Size of Farm. 205 p. \$1.

Presents statistics for farms classified by size as measured by the total land area in the farm. The data include such items as: number of farms, all land in farms, value of farm land and buildings (averages only), land use, specified characteristics of farm operators, specified farm facilities and equipment, farm labor, specified farm expenditures, principal classes of livestock, major crops, and sales of farm products.

Statistics are presented as totals for the United States, for three major regions, nine geographic divisions, and for each of the 48 States. Data in the chapter include comparative data from earlier censuses for number of farms, land in farms, land use and average value of land and buildings.

Data for the United States show: farms classified by acres of improved land, 1870 and 1860; number of farms—under 3 acres in size, percent of all farms, minimum value of products, and index numbers of prices received by farmers; those under 10 acres in size with land in farms, and by size of farm, 1880-1950; all land in farms by size of farm, average value of farms (land and buildings), per farm, per acre, by size of farm, and specified classes of land in farms, according to use, by size of farm, 1900-50; farms and farm characteristics by size of farm, 1950.

Data for geographic regions, divisions and States present: average acreage per farm based on all land in farms, 1850-1950; number of farms, all land in farms, value of farms, 1950, 1945, and 1940, and specified classes of land according to use, 1949, 1944, and 1939; number of farms by size of farm, 1880-1950. Percent distribution of farms, all land in farms and average acreage per farm, by size of farm, average acreage of cropland harvested per farm reporting and percent distribution of total land pastured, by size of farm; farms reporting other income of family exceeding value of agricultural products sold, with percent of farms reporting in each size of—farm group, operators reporting off farm work of 100 days or more, with percent of operators reporting in each size-of-farm group, 1950.

Similar data for 1950 are shown for farms reporting: telephones, electricity, milking machines, grain combines, corn pickers, pick-up hay balers, silos, motortrucks, automobiles, tractors, no tractor, horses or mules, tractor and no horses or mules, cattle and calves, all cows, hogs and pigs, chickens four months old and over, corn for all purposes, wheat threshed, land from which hay was cut, family workers, hired workers; expenditures for machine hire and hired labor, feed for livestock and

Vol. II. General Report—Continued

poultry, livestock and poultry purchased and gasoline and other petroleum fuel and oil; value of farm products sold and selected farm characteristics by farm size groups.

The introduction includes sources of data, presentation of statistics, other published data, classification of farms by size, history of classification of farms by size, and size of farm as a measure of enterprise.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XI. Color, Race, Tenure of Farm Operator. 269 p. \$1.25.

Presents statistics for farms by color, race, and tenure of the farm operator. Statistics are presented as totals for the continental United States, for three major regions, nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States show: tenure classes included in the reports for each census, with the number of farms in each class, 1880-1950; number, acreage and value of farms, by color and tenure of operator, 1950; average value of farms (land and buildings), by color and tenure of operator for the United States and the South, 1900-50; specified classes of land in farms according to use, by color and tenure of operator, 1900-50; commercial and other farms, by color and tenure of operator for the United States and the South, 1950; owned and rented lands, by tenure of operator, 1925-50; land rented from others and land rented to others, by class of tenant, 1950; part owners and tenants related to landlord, 1950 and 1930, and part owners and tenants with landlord living on a farm, by color and class of tenant, 1950; tenants related to landlord for the North and West, 1950, 1930 and 1925; full owners with grazing permit, for specified States, 1950; number of nonwhite farm operators and land in farms, by race, 1900-50; and by race and tenure, 1930-40.

Data for geographic regions, divisions and States show: number of farms, land in farms, and cropland harvested, 1950, 1945 and 1940, with specified classes of land according to use, and value of farms, 1950, by tenure of operator (color and tenure for the South); owned and rented lands by tenure of operator, 1950; farms and land in farms of negro operators, classified according to use; farms of nonwhite operators other than negroes—farms and land in farms classified according to use; average value of land and buildings per farm and per acre, by tenure of operator, 1950; farms reporting cropland, crops harvested and land pastured, average acreage by tenure of operator, 1950; commercial and other farms reporting other income of family exceeding value of agricultural products sold, and operators of commercial and other farms reporting off-farm work of 100 days or more, 1950. Commercial and other farms reporting specified farm facilities, equipment and products, family workers, hired workers, and selected expenditures; and value of farm products sold with average per farm reporting, by tenure of operator. Also includes selected characteristics of commercial farms operated by: full owners, part owners, managers, all tenants, cash tenants, share-cash tenants, crop-share tenants, livestock-share tenants, croppers, and percent distribution of commercial farms, by size of farm for each tenure group, 1950.

The introduction includes sources of data, presentation of statistics, a discussion of other published data, history of census classifications by color and tenure of farm operator, and definitions and explanations of terms used.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XII. Economic Class of Farm. 165 p. 75 cents.

Characteristics of farms and farm operators by economic class of farm. There are no comparative figures by economic class of farm for earlier census years. Statistics presented here are for the United States, three major regions, nine divisions and the 48 States.

Farms and farm characteristics by economic class are shown for the United States. For geographic regions, divisions and States, data by economic class are shown for: number of farms, average value of land and buildings, land in farms; farms reporting—cropland harvested, and acreage, land pastured and total acreage, other income of family exceeding value of agricultural products sold for operators of commercial and other farms, and off-farm work of 100 days or more with percent of operators reporting in each economic class group; and farm operators, 65 years old and over. Commercial and other farms reporting specified farm facilities and equipment; acreage on commercial and other farms of corn for all purposes, wheat threshed, and land from which hay

was cut; family workers, hired labor, expenditures for—gasoline and other petroleum fuel, machine hire, hired labor, feed for livestock and poultry, livestock and poultry purchased; value of all farm products sold with average per farm reporting, and percent distribution by economic class. Percent distribution of number of farms, by size of farm and by tenure of operator for each economic class group; selected characteristics for each economic class of farm and part-time, residential and abnormal farms; and number and percent distribution by tenure of operator for part-time, residential and abnormal farms.

The introduction gives sources of data, presentation of statistics, basis of classification and definitions and explanations used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XIII. Type of Farm. 185 p. \$1.

Data are presented for farms and farm characteristics by type of farm, for the United States. For the geographic regions, divisions and States data are shown for: number of farms by type; average value of land and buildings per farm and per acre, land in farms by type of farm; farms reporting cropland harvested, land pastured, and acreage by type of farm; operators of commercial and other farms reporting, other income of family exceeding value of agricultural products sold, work off farm 100 days or more, with percent of operators reporting in each type-of-farm group; commercial and other farms reporting specified farm facilities and equipment, with percent of farms reporting in each type of farm group; number and percent distribution by type of farm for cattle and calves, cows, and number of chickens 4 months old or over; acreage on commercial and other farms of corn for all purposes, wheat threshed and land from which hay was cut, with percent distribution by type of farm. Similar data are shown for: family workers, hired workers, expenditures—for gasoline and other petroleum fuel and oil; for machine hire, hired labor, feed for livestock and poultry, for livestock and poultry purchased; value of all farm products; also, percent distribution of number of farms by size of farm, by tenure of operator, and by economic class for each type-of-farm group; selected characteristics for each type of farm (cotton, field crop, vegetable, fruit and nut, dairy, poultry, livestock other than dairy and poultry, general, miscellaneous and part-time farms).

The introduction and appendix from Volume II are included in this preprint chapter.

Volume III, *Irrigation of Agricultural Lands*, comprises 18 separate State reports with statistics for counties and drainage basins, and a United States summary report. These reports are combined in a final volume. Volume III bulletins supersede reports in Series IR50-1.

Vol. III. Irrigation of Agricultural Lands (States)¹

v. p., tables, maps, charts.

Data cover: enterprises, irrigation works, farms and acreage irrigated, investment, water used, and cost. Includes an irrigation summary, 1890 to 1950 for: farms, number and acreage, number irrigated, irrigated acreage reported by farms and irrigation enterprises and total capital investment in irrigation enterprises. Characteristics of irrigation enterprises—number, type, total land irrigated, acreage irrigated by type of enterprise and by source of water, irrigation works, capital investment, total, and by type of enterprise. Data for 1949 on: enterprise characteristics; use of surface, ground, pumped and stored water; source of surface water; drainage of irrigated land; irrigation works (1950); season of irrigation; capital investment, 1950 and 1940 and indebtedness (1950); cost of water to farms and quantities of water reported, 1949. Complete system irrigation enterprises by surface, ground, gravity and pumped water; and by acreage irrigated.

Volume IV, *Drainage of Agricultural Lands*, supersedes Series DR50-1, and includes in the one book, the State reports with statistics for counties and a summary for the United States.

Vol. IV. Drainage of Agricultural Lands¹

326 p., tables, charts, maps, appendix. February 1953. \$1.50.

Data on land in enterprises, number and types of enterprises, cost of drainage, indebtedness, assessments and drainage works, for the 30 drainage-district States and the 10 county-drain States, and a summary chapter for the 40 States.

The introduction includes a history of the census of drainage, the legal basis for the 1950 Census of Drainage, the scope of the censuses of drainage and other related material. The appendix shows the drainage questionnaires used for the County-Drain States (D1) and the District-Drain States (D2); instructions for the D1 and D2 enumerators; a County List of Enterprises (Forms 702-11); and a letter to State auditors.

Volume V comprises 10 special reports by subject. Part 1 of Volume V, *Horticultural Specialties*, issued in 1952, replaced the preliminary Series HS50-1-4, and the United States summary, *Horticultural Specialties*, issued earlier.

Vol. V. Special Reports¹

v. p., tables, charts, maps, appendix.

Pt. 2. Multiple-unit Operations. 492 p. \$2.25.

The report presents statistics for specified counties and State economic areas in 13 southern States, and Missouri, on: multiple-unit operations compared with farms not in multiple units, for the multiple-unit area, and specified data for the multiple-unit area compared with State and United States totals; number of landlord-tenant and multiple-unit operations by States and economic areas; specified averages for all farms, multiple units and farms in or not in multiple units; percentage of all farms, multiple units, and farms not in multiple units reporting specified items; also percentage of all cropland harvested; multiple-unit operations by—size of unit, with percent of cropland harvested by specified crops; color and tenure of operator; type of farm; acres of cropland harvested; number of subunits; kind of tenant in landlord-tenant operations.

The introduction includes the history of census enumeration of multiple units; description of questionnaire used; enumeration of land in more than one enumeration district or county, and a description of office procedure in connection with the enumeration. Maps illustrated the use made of acreage in farm multiple-unit operations. The appendix shows a reduced facsimile of an agriculture questionnaire typical of those used in the multiple-unit areas (Georgia); a reduced facsimile of a 1950 Landlord-Tenant Operations Questionnaire, and the Instructions to Enumerators including a list of the States and counties in the multiple-unit area.

Vol. V. Special Reports—Continued**Pt. 3. Ranking Agricultural Counties. 69 p. 40 cents.**

Presents statistics for selected items of inventory and agricultural production for the leading counties in the United States. Gives for the 100 leading counties, in each instance, the quantity and value of leading classes of livestock on farms and of poultry and poultry products sold; field crops harvested; vegetables harvested for sale, excluding Irish and sweet potatoes; and of all fruits, nuts and horticultural specialties sold, Censuses of 1950 and 1945.

A summary table presents the quantity and value of specified items of livestock and livestock products, field crops harvested, vegetables harvested for sale and fruits, nuts and horticultural specialties: United States totals, total, and percent of United States total, for the 100 leading counties in 1950; the name of the county, the county total and the percent of the United States total. Maps show the distribution of most of the products for the Census of 1950.

Pt. 4. Land Utilization; A Graphic Summary. 64 p. (no tables) 45 cents.

Presents graphically, some significant facts regarding uses being made of agricultural lands both inside and outside farm boundaries. It provides a graphic summary of changes and developments in the use of agricultural lands during the past half century.

Uses of land in the United States; land use by farm production regions and States; factors affecting land use—physical conditions, population changes, and distribution; agricultural technology and other forces; public and nonfarm private land, farms and the farm area; farm land development; land used for agriculture—cropland and classes of crops; principal crops and specified classes of livestock, pasture and grazing land, and woodland and forest. The maps and charts are accompanied by explanatory text.

Land use in the Territories and possessions: Alaska and Hawaii—physical conditions and land use, and farms, farm land, principal crops and livestock. Puerto Rico—uses of land and specified crops harvested and their relative importance in acreage. Graphic material is not included for the possessions. This report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 5. Farm Tenure; A Graphic Summary. 95 p. 65 cents.

Presents graphically, significant facts for the various forms of tenure under which farms are held and operated and summarizes changes in farm tenure for the United States and its geographic regions since 1900. The report comprises three sections: (1) Quantity, value, and method of holding farm land; (2) Farm production—quantity and value of products (crops, livestock, and livestock products) sold; (3) Income, security and personal attributes of farm people. A guide to items on farm tenure is also included. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 6. Agriculture 1950; A Graphic Summary. 108 p. (no tables) 65 cents.

This report summarizes, in brief, statistics published for the 1950 Census of Agriculture, and describes farm resources—farms and farm land, characteristics of farm people, livestock, farm power, equipment and roads; farm production—crops, livestock production, all farm products sold; organization and use of agricultural resources—size of farm, color and tenure of operator, economic class of farm, and type of farm; changes in agriculture from 1900-50; number and size of farms, color and tenure of operator, land in farms, cropland harvested, pasture land, irrigated land, drained land, value of farm property, farm work power, farm transportation, mechanization of farm operations and farm electrification, farm population; migration from farms, agricultural workers, farm exports, use of cropland, crops, and livestock and dairy products. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Vol. V. Special Reports—Continued**Pt. 7. Irrigation 1950; A Graphic Summary. 35 p. 35 cents.**

Presents graphically, significant facts regarding agriculture in irrigated areas, and the characteristics of irrigation enterprises and irrigated farms as indicated by the 1950 Censuses of Agriculture and Irrigation.

Irrigated farms, irrigated land by drainage basins; irrigation and land use in the 17 Western States; irrigation enterprises—number, and acreage irrigated by type (single-farm and multi-farm, incorporated and unincorporated mutual, commercial, district, United States Bureau of Reclamation and U. S. Bureau of Indian Affairs); types of enterprise by States, interrelationship and size of irrigation enterprises, irrigation works and equipment, capital investment, and indebtedness and arrearage. Types and source of irrigation water; storage; measurement and cost of water to farms; and irrigation by sprinklers. Use of land in irrigated farms in 1949; size and value of irrigated farms; farms wholly irrigated, partly irrigated; and irrigated and nonirrigated crops. The maps and charts are accompanied by explanatory text.

Pt. 8. Farm-Mortgage Debt; A Cooperative Report. 40 p. 30 cents.

Presents farm-mortgage indebtedness for farms classified by tenure of farm operator, and continues a series of cooperative reports covering farm mortgage indebtedness for each census year from 1930, mortgage data for earlier censuses and the comparability of 1950 mortgage data with those for earlier census years. For farm-mortgage debt in the United States total debt is shown; also number of mortgaged farms, debt and equity per farm, acreage in mortgaged farms, value of mortgaged farms (land and buildings), debt held by principal lenders and interest rates.

Data are presented for the United States on the number, acreage, and value of farms free from mortgage, and mortgaged farms by tenure of operator, 1930-50; and total outstanding mortgage debt, also loans held by principal lenders, census years 1910-50; data for geographic regions, divisions and States show all mortgaged farms, mortgaged farms operated by full owners, by part owners, by tenants and managers, each for 1930-50; and total outstanding farm-mortgage debt, and loans held by principal lenders, January 1, 1950 and 1945. Data in this report were prepared jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 9. Economic Class and Type of Farm; A Graphic Summary. 69 p. 40 cents.

Presents graphically some of the data showing the organization of agriculture, particularly by economic class of farm. For commercial farms, by economic class: percent distribution by size, by tenure of operator, and by type; percent distribution of total value of all farm products sold, of the number of farms, land in farms, number of cows, value of all farm products sold, and number of farm workers, and of the major uses of land. Also for commercial farms, by economic class: yield per acre of specified crops; specified expenditures per dollar of farm products sold; percent of farms reporting telephone, electricity, electric hot-water heater, home freezer, electric washing machine, and average of last monthly electric bill; and percent of farms reporting tractors, motortrucks, and automobiles, by age of newest model.

For all farms, by economic class: number reporting irrigation and acreage of land irrigated; age of operator (percent under 25 years of age and percent 65 years of age and over); percent of farm operators reporting that other income of family exceeded value of agricultural products sold; and off-farm work (percent of operators reporting specified number of days of off-farm work).

Also shown graphically are counties classified by major source of income, type-of-farming areas (based on type accounting for 50 percent or more of commercial farms), number of farms by type, multiple-unit operations, acreages of various crops harvested, and products sold. This report was prepared jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 10. Farms and Farm Characteristics by Economic Subregions. 85 p. 50 cents.

Presents a summary for selected items from the 1950 Census of Agriculture by 119 economic subregions, and also statistics for economic class and type of farm for 19 economic areas located in the principal type-of-farming areas of the United States.

The report presents data on the number of farms classified by type, by economic class, and by size of farm, by tenure of operator, farm operators classified by age, and color or

race, years on farm, and off-farm work, equipment on farms, and farm expenditures; selected crops harvested, number of livestock and value of farm products sold, by source.

The introduction includes a description of the sample for the 1950 Census, and the adjustment of the sample; the reliability of the sample; method of estimation; and large-farms. Describes the presentation of statistics for State economic areas and economic subregions.

1-10.1 1950 CENSUSES OF AGRICULTURE, POPULATION, AND HOUSING

SPECIAL STUDIES

Farms and Farm People ¹

103 p., tables, charts, maps. 50 cents.

A special cooperative study of population, income, and housing characteristics, by economic class of farm. Prepared by the Bureau of the Census, U. S. Department of Commerce, and the Bureau of Human Nutrition and Home Economics and the Bureau of Agricultural Economics, U. S. Department of Agriculture, for the purpose of bringing together data to show characteristics of the farm operator families, their housing, and other items, such as amounts and sources of family income by selected farm characteristics, including economic class of farm and net cash income of farm families.

Low production farms: by economic class of farm, age of operator, days of off-farm work and occupation, and tenure of operator; schooling of farm operator, kind of road on which farm located and distance to trading center, by number of days of off-farm work of operator.

Income of farm operator families in 1949: distribution of farm operator families, rural-farm families, and all families, by total money income in 1949; percentage of farm operator families reporting income from various sources, by economic class of farm; value of farm products sold, farm expenditures, and income of farm operator and other family members by source, by economic class of farm.

Population in farm operator households: by economic class of farm, age, sex, and color; marital status and median years of school completed of farm operator; dependency ratios and fertility ratios for farm-operator households, by economic class of farm.

Housing facilities and equipment, and home food-production practices of farm operator families: family and housing characteristics and equipment for commercial and other farms, by family income, by tenure of operator; home food-production practices and family and farm characteristics of commercial and other farm operators, by presence of home gardens (with by race in the South).

Consolidated Cotton Report

1 p., table. 5 monthly reports, each year, August-December. August 10, September 8, 1953.

Statistics on ginning (running bales), indicated total production (bales, 500 pounds gross), condition (percent of normal), indicated acres left for harvest, and indicated yield of lint cotton (pounds per acre for harvest), for first of each month in which report is released. Issued jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Cotton Ginned From the Crop of 1952. Press release

1 p., table. May 6, 1953. Annual.

Cotton ginnings from the 1952 crops, with comparative figures for 1951 and 1950. Quantities shown in running bales and equivalent 500-pound bales, for 18 named States and the United States totals. Linters are not included.

Cotton Ginned Prior to (specified date) in (specified State): Crops of 1952 and 1951

11 reports, p. 1-2, table. January 30, March 24, September 15, 1953.

Reports are released pertaining to five specified dates during each cotton-ginning season, with an additional end-of-season report. They contain preliminary figures by counties for cotton, ginned from the year's crop prior to the specified dates, with comparative figures for the previous year's crop. Ten States are covered by separate reports, with an additional report for "Specified States" (all other cotton-growing States, see below). Quantities are in running bales, not including linters.

Cotton Production and Distribution; year ending July 31, 1952 (Bulletin 189)¹

75 p., tables, charts. June 1953. Annual. 25 cents.

Summary of available cotton statistics for the year ending July 31, 1952 and previous years. Figures show for the United States: supply and distribution of cotton and linters; cotton production; consumption and stocks of cotton and linters and active cotton spindles; United States exports by country of destination, and imports by country of origin of cotton and linters; cottonseed and cottonseed products, crushings, production, shipments, average yield, exports and imports of cottonseed oil, cake and meal, and world production, consumption and stocks of cotton, by country. Figures since 1870 are in running bales, previous to then in 500-pound gross bales. Foreign cotton is shown in equivalent 500-pound gross bales.

Figures in this report are taken from the Facts for Industry reports, M15-1, M15-3, M17-1, M17-2 (see section 5-2), the Foreign Trade Division reports FT 110 and FT 410 (see section 3-4 and 3-5), and the Agriculture Division reports on cotton ginning.

Cotton Production in the United States: Crop of 1952¹

36 p., tables. July 1953. Annual. 15 cents.

Comparative summary of United States production of cotton and linters, crops of 1899-1952; State data on production and ginnings of cotton, with percentages and rank, production of linters, and cotton ginned prior to specified dates during the season, 1949-52; and on percent of total cotton ginned prior to specified dates, average gross weight of the several kinds of bales, and number and gross weight of upland

2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1929, 1933, 1935, 1939, and 1948. Those for 1929 and 1939 were taken as part of the 1930 and 1940 Decennial Censuses; those for 1933 and 1935 were special projects.

Current reports are issued monthly showing national estimates of the dollar volume of retail sales and trends in retail sales and wholesale sales and inventories. An annual retail survey is taken from which will be produced national estimates of the dollar volume of inventories, the ratio of sales to inventories and the amount of charge and installment plan receivables as of the end of the year, by kinds of business in the United States. Other reports are issued on special topics, such as the *Canned Food Report* and the report on *Petroleum Products—Secondary Inventories and Storage Capacity*.

2-21. CURRENT RETAIL TRADE REPORT

Monthly Retail Trade Report; Retail Sales¹

11 p., tables, charts. Monthly. Monthly 10 cents. Yearly subscription \$1. (Domestic), \$1.35 (foreign). Monthly: November, December 1952; January–July 1953.

The monthly report includes (1) estimated dollar sales of all retail stores and Group II retail stores (i. e., stores of organizations of 11 or more retail stores), United States by kind of business, current month, and each month of the previous 12-month period, including the comparative figure for the current month a year ago, sales for the year to date and for the corresponding period of the preceding year; (2) percentage change in sales for current month from the same month a year ago and from the preceding month, and year-to-date from the like period a year ago for all retail stores, the United States by kind of business; for "large" retail stores of organizations of 1 to 10 stores, the United States and 28 named Census Sample Areas, by kind of business; and for selected cities and Census Sample Areas for all kinds of business combined. The January 1953 issue includes the 12-month accumulated sales for 1952 and 1951, in total for all retail stores and for Group II stores by kind of business.

Annual Retail Trade Report: 1952¹

4 p., tables. September 2, 1953. 10 cents.

Estimated dollar volume of merchandise inventories and receivables for December 31, 1952, percentage changes in inventories, sales-inventory ratios. This is the first annual report in this series to provide data on retail store receivables, charge account and installment, by kind of business for the United States.

their reported dollar sales and inventories for the current month are shown as a measure of coverage on which trend data are based. Percent change in sales and inventories, current month from preceding month, and from same month preceding year and sales for year to date from preceding year. Stock-sales ratios, current month, preceding month, and same month preceding year. Data are for about 36 kinds of business. Chart shows trends in sales and inventories of merchant wholesalers. Price effective with February 1953 issue.

2-23. CURRENT TRADE STUDIES

Trends in the Wines and Spirits Trade

4 p., tables, charts. November, December 1952; January–April 1953

Trends in gallonage sales and inventories of wines and distilled spirits wholesalers by State. Data shown for the District of Columbia and 28 States which do not have State control or monopoly distribution at the wholesale level. Percent change current month from preceding month and from same month preceding year and year to date from preceding year; also stock-sales ratios expressed as days of supply. Percent change in sales of large retail liquor stores (packaged goods) and eating and drinking places for selected areas, current month from preceding month and from same month preceding year, and year to date from preceding year. Imports for consumption of distilled spirits and wines, by type, and by quarters, current and two preceding years.

NOTE.—This series has been discontinued with the April 1953 issue.

2-24. OTHER CURRENT BUSINESS REPORTS

Canned Food Report ²

4 p., tables, charts. January 1–July 1, 1953. 10 cents per single copy; 50 cents for one season's reports.

Total stocks of wholesale distributors and warehouses of retail multi-unit organizations, of 33 specified canned foods (15 vegetables, 12 fruits, 6 fruit juices) on hand, current period. Data are shown, in total and by two can sizes (sizes smaller than No. 10 and sizes No. 10 or larger)—in actual cases, for the current period and preceding period, and as a percentage change, current period from same period preceding year. Data on canners' stocks supplied by canners associations are also included for these same dates if available. Also included—canners' carryover, pack and total supply from the beginning of season for the current season, and total supply for the two previous seasons.

3. FOREIGN TRADE DIVISION

Statistical data on United States exports and imports of merchandise and of gold and silver are collected from shippers' export declarations and import entries. These forms are filed by exporters and importers with Collectors of Customs and transmitted to the Bureau. The statistics compiled include information on the dollar value and net quantity (bales, square yards, gallons, etc.) of United States exports and imports by commodity, country of destination and origin, customs districts through which merchandise enters and leaves the United States; trade with United States Territories and possessions. The data also show the shipping weight and dollar value of vessel imports and exports, domestic to foreign port of routing, of shipments by vessel, the nationality of the carrier, for shipments by vessel, and the number and tonnage of vessels entering and clearing port in the foreign trade of the United States.

Monthly and quarterly figures are preliminary and subject to revision. Preliminary annual data are available in annual reports for most series of monthly reports. All data for the year are summarized in the final report, *Foreign Commerce and Navigation of the United States*, latest issue, 1946.

4. GOVERNMENTS DIVISION

The Governments Division collects data and prepares reports showing current and bench mark statistical data relating to the characteristics and functions of State and local governments and their administration in the United States. In current reporting, primary attention is given to public finance (revenue, expenditure, debt, and enterprise finances), and public employment (number of employees and amount of payroll). A two-page release entitled "*Census Bureau Publications on Governments, as Scheduled for the Fiscal Year 1954*" is available upon request.

During the past century, a Census of Governments has been taken at 10-year intervals—most recently for 1942—providing more complete and detailed information on State and local governments than is reported currently. Public Law 767 of the 81st Congress, approved September 7, 1950, requires that such a census be taken for the year 1952 and thereafter at 5-year (rather than 10-year) intervals. However, funds for taking the 1952 Census were not made available by the Congress.

4-1. STATE FINANCES

G-SF52 State Finances: 1952

No. 1. Summary of State Government Finances in 1952¹

21 p., tables, charts. April 1953. Annual. 15 cents.

Summary financial data for the 48 States for the 1952 fiscal year. Tables provide the following, by State: summary financial aggregates; general revenue by source; total expenditure by character and object; general expenditure by function; capital outlay and intergovernmental expenditure; insurance trust revenue and expenditure; debt outstanding and long-term debt issued and redeemed; fiscal year, population, and income payments. Per capita amounts are also shown for selected general revenue, general expenditure, and debt items.

No. 2. Compendium of State Government Finances in 1952¹

65 p., tables, charts. June 1953. Annual. 35 cents.

Detailed State financial data are reported for the fiscal year 1952. Includes a National summary of State finances for 1950-52 and summarizes financial aggregates, by State.

Revenue items are shown for the following, by State: per capita amounts and percent distributions, by source; tax revenue, by type of tax; sales and gross receipts and license taxes in detail; intergovernmental revenue, by source and function; charges and miscellaneous general revenue and current charges, by source; insurance trust revenue, by type of system and source.

Expenditure items are shown for the following, by State: summary, by character and object, and by type and function; per capita amounts and percent distributions, by function; capital outlay, in total and for selected functions; intergovernmental expenditure, in total, for selected functions, and by type of receiving government; detail of amounts for public safety, public welfare, education, highways, health and hospitals, nonhighway transportation, natural resources, general control, and other functions.

No. 2. Compendium of State Government Finances in 1952—Continued

Debt items are shown for the following, by State: debt outstanding, debt issued, and debt retired, by term and character; and long-term debt outstanding and original long-term debt issued, by function.

Also shown, by State are: cash and security holdings; income and expense statement and selected transactions of State alcoholic-beverage systems; finances of State-administered public-employee retirement systems, State unemployment-compensation funds, State administered workmen's compensation systems, and miscellaneous State-administered insurance trust systems; percent changes from 1951 to 1952 in revenue, expenditure, and debt; and States' fiscal years, populations, and income payments.

Text gives comparisons of data, definitions of terms, and discussion of sources and terminology.

No. 3. Revenue and Expenditure of Selected States in 1952²

17 p., tables, charts. March 1953. Preliminary. 15 cents.

Advance release of fiscal 1952 data for the first 26 States for which such figures were available. Tables provide the following, by State: summary financial aggregates, total expenditure by character and object, general revenue by source, general expenditure by function, capital outlay and intergovernmental expenditure, insurance trust revenue and expenditure, and fiscal year, population, and income payments. Per capita amounts are also shown for selected general revenue and general expenditure items.

G-SF53 State Finances: 1953**No. 4. State Tax Collections in 1953²**

10 p., tables, chart. August 1953. Annual. 10 cents.

Summary tables show State tax collections by type of tax for 1942-53 and total tax amounts for each State (1942 and 1950-53) with percent changes (1952 to 1953 and 1942 to 1953) 1953 per capita amounts, and 1953 collections as percent of 1952 income payments. Tables also show, for 1953, the major tax sources, with a breakdown of sales and gross receipts and licenses, by State. In addition, this report shows the fiscal years, population, and income payments for each State and definitions of taxes as classified for this report.

4-2. CITY FINANCES**G-CF51 City Finances: 1951****No. 2. Compendium of City Government Finances in 1951¹**

No. 31. Governments in the United States in 1952¹

49 p., tables, charts. May 1953. Annual. 30 cents.

Tables show, for each State, the total number of governmental units by type; number and population of municipalities, counties, and townships, by population size group; number and pupil enrollment of school districts, by enrollment size group; and number of special districts, by function. The number of governmental units is also shown by county area.

The text describes criteria used in classifying governmental units and the procedure used in preparing this report.

No. 32. Revised Summary of State Government Finances, 1942-1950¹

71 p., tables, chart, appendix. 35 cents.

The classification structure applied in Census Bureau reporting on governmental finances was recently revised extensively, effective with reports of fiscal 1951 data. The new structure provides some financial information not available from the former framework of Census reporting and takes account of certain relatively recent changes in functional responsibilities of State and local governments. However, until release of the present report, the shift has resulted in noncomparability of Census statistics on State finances for 1951 and later years with data published for earlier years. This publication, therefore, is intended to meet widespread demands for historically consistent financial data on State governments.

Tables show, for alternate even-numbered fiscal years 1942-1950, national totals of State government finances, with per capita figures (1942, 1950, and 1952) and percent change (1942 to 1952) in the major items of State finance. The amounts are also presented, State by State, for the same items and for the same fiscal years.

Revenue items are shown by total, general revenue, liquor stores revenue (where applicable), and insurance trust revenue. General revenue from taxes is shown by type of sales and gross receipts tax, type of license tax, individual income, corporation net income, property, death and gift, severance, and other; intergovernmental revenue is shown by source, and separate figures are given for charges and miscellaneous general revenue. Insurance trust revenue is shown by employee retirement, unemployment compensation, and other.

Debt outstanding at end of fiscal year is shown by total, long-term (full faith and credit; nonguaranteed), short-term, and net long-term by total and by full faith and credit only.

Expenditure figures are shown by total and by character and object, with separate figures for general expenditure by function.

¹ For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

5. INDUSTRY DIVISION

Current statistics on commodity production and shipments are issued in the *Facts for Industry* series. This series of releases makes available to manufacturers, trade groups, and other users of industrial data, current figures that are useful in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

Annual surveys of manufactures have been taken each year since 1949. They cover a sample of manufacturing establishments and bring up to date the statistics on employment, earnings, man-hours, value added, inventories, expenditures for new plant and equipment, and classes of products, which are shown in more detail in the quinquennial Census reports.

The Census of Manufactures, first taken in 1810 and now quinquennial (last taken for 1947) provides detailed data on manufacturing by geographic areas, by industries and by subjects.

5-2. FACTS FOR INDUSTRY

In the numbering of the Facts for Industry series, the letter "M" is used for Manufactures, the first two digits represent the group classification at the two-digit level of the Standard Commodity Classification, and the specific survey is shown by the letter following the group classification numbers.

Annual data are available in annual reports for most series of monthly or quarterly reports. In addition there are reports which are issued on an annual basis but are not a summary of the data appearing in any monthly, quarterly or semi-annual series.

M13A Hardwood Veneer and Plywood²

5 p., tables, appendix. Quarterly and annual summary. Quarterly and annual, 10 cents. Yearly subscription including annual summaries (separate summaries for veneer and plywood published for 1952), 50 cents. Hardwood Veneer summary 1952, 4 p., tables; Hardwood Plywood summary 1952, 5 p., tables, appendix. Quarterly: Third quarter, Fourth quarter, 1952; First quarter, Second quarter, 1953.

Hardwood plywood production by type of core and by geographic region, by type of core and by face species; consumption of veneer and core lumber in the fabrication of hardwood plywood, by origin of material; consumption and stocks of glue at hardwood plywood mills by type of glue, data for current quarter, preceding quarter and same quarter preceding year. Production of hardwood plywood (except package and container) by plant class, and by type of core, current quarter.

Summary for 1952 gives production of hardwood plywood by type, by core, by geographic region; hardwood plywood (except container and packaging type) by type, by core and by face species; production by type of core of non-wood-face plywood, each for 1951 and 1952. Consumption of core lumber in the manufacture of hardwood plywood, July-December 1951, and 1952; consumption of glue, 1951, and 1952; and stocks (at hardwood plywood plants) of glue, by type, March 31 and December 31, 1951, and December 1952.

NOTE.—Data for hardwood veneer production were discontinued on a quarterly basis after the second quarter 1952. They will be issued on an annual basis beginning with the annual report for the calendar year 1952.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment.

M67H Women's, Misses' and Juniors' Outerwear²

8 p., tables, charts. Quarterly and annual summary. Quarterly 10 cents. Yearly subscription including annual summary, 50 cents. Quarterly: Third quarter, Fourth quarter 1952; First quarter 1953.

For each principal women's outerwear industry (coat and suit, unit-price dress, dozen-price dress, blouse, and skirt) shows value of shipments, total returns, and returns as percent of gross shipments, current quarter, preceding quarter, and same quarter preceding year, with percentage change, current quarter from same quarter preceding year. Production distribution by price line and by kind of fabric used in women's principal outerwear garments, year to date, current and preceding year. Includes a summary—dollar shipments for all industries; cuttings of specified garments: dresses sold at a unit price; suits, untrimmed coats, fur-trimmed coats, dresses sold at a dozen price; blouses and waists; and skirts, current quarter and same quarter preceding year with percent of change, and cumulative totals, current and preceding years.

M68A Shoes and Slippers²

4 p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 5 p., tables. Monthly: November–July 1953.

Production (summary) by kind of footwear, current and preceding month, same month preceding year, percent of change, current month compared with preceding month and same month preceding year, and percent of production by type of outsole, current month. Production (quantity) and shipments (quantity and value) by geographic division and States, current and preceding month, same month preceding year, cumulative totals for two years and percent of change in value of shipments, current month compared with preceding month and same month preceding year. Production by kind of footwear, by type of upper and outsole, current month. Published since 1921.

Summary for 1952 presents production (quantity), civilian and military, 1950, 1951 and 1952 with percent of change, 1952 compared with 1951 and percent of production by type of outsole, 1952; shipments of shoes and slippers, by geographic divisions and States, 1950–52; monthly production by kind of footwear (military and civilian), by geographic divisions and States, 1952 and 1951; and production (military and civilian) by kind of footwear, by type of upper and type of outsole, 1952.

M75A Steel Shipping Barrels, Drums and Pails²

2 p., table, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 9 p., tables. Monthly: November, December 1952; January–July 1953.

Shipments, end-of-month stocks and unfilled orders for sale and own use; heavy type steel shipping barrels for sale only; light type for sale and own use. Shipments, current and preceding month, same month preceding year and cumulative totals for two years; end-of-month stocks, current month; end-of-month unfilled orders, current and preceding month and same month preceding year. Types of products defined.

Summary for 1952 presents revised figures for 1952 and 1951. Data show: shipments for sale and own use, by type of product, 1948–52; monthly shipments, stocks and unfilled orders of heavy-type steel shipping barrels and drums, 1952 and 1951; total monthly shipments and stocks, monthly shipments and stocks for sale and unfilled orders of light-type steel barrels and drums, 1952 and 1951; monthly shipments, stocks and unfilled orders of steel shipping packages, kegs and pails, 1952 and 1951. Published since 1924.

M75C Commercial and Home Canning Closures²

3 p., tables, charts. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 5 p., tables. Monthly: December 1952; January-July 1953.*

Shipments and production of commercial closures, crowns, and home canning closures, current and preceding month, same month preceding year and cumulative totals for two years. Raw materials consumed in the production of commercial and home canning closures, including tin mill products, molding compounds used for plastic caps, aluminum, and rubber, current and preceding month.

Summary for 1952 gives monthly shipments, production of commercial and home canning closures by type of product and monthly consumption of selected raw materials used, by type of material, 1952 and 1951. Published since 1941.

M75D Metal Cans²

p. 2-3, tables, chart. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 4 p., tables. Monthly: November, December 1952; January-July 1953.*

Shipments for sale and own use by type of product packed (nine food cans and four nonfood cans), current and preceding month, same month preceding year and cumulative totals for two years. Shipments for sale and own use by type of product packed, for the United States and Hawaii, by geographic divisions, current and preceding quarter and same quarter a year ago in the March, June, September and December reports. Data are in terms of short tons of steel consumed in the manufacture of cans.

Summary for 1952 presents monthly shipments, by type of product packed, 1952 and 1951, and quarterly shipments of food and nonfood cans by geographic regions, 1952 and 1951. Includes combined total figures for the United States and Hawaii. Data for Hawaii are also included in the figures for the Pacific region. Published since 1943.

M77C Glass Containers²

2 p., tables, chart. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary 1952, 6 p., tables, charts. Monthly: November, December 1952; January-July 1953.*

Quantity of shipments (direct exports and domestic), production, and stocks, domestic by type of container; shipments for current and preceding month and same month preceding year; production and end-of-month stocks for current and preceding month. Summary for 1952 gives shipments and production, 1948-52, shipments, production and end-of-month stocks, each by type of container, by months, 1952 and 1951. Published since 1945.

M77E Pressed and Blown Glassware (Except Glass Containers): 1952²

Value of shipments by class of product, 1948-52; and quantity and value of shipments, 1952 and 1951.

NPAF-1 Consumption and Inventories of Steel, Copper, and Aluminum in Metalworking Industries: First quarter 1951—Second quarter 1952²

13 p., tables. *March 25, 1953. Special report. 15 cents.*

Estimates are shown on total consumption (including purchases, interplant transfers, and produced and consumed in the same establishment) and inventory of carbon steel, alloy steel, stainless steel, copper, and aluminum by shape and form for each quarter January 1951-June 1952; and on consumption of carbon steel, alloy and stainless steel combined, copper, and aluminum, by selected industries and industry groups, for each quarter, 1951.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment.

NPAF-1 Consumption and Inventories of Steel, etc.—Continued

Estimates cover the major metal consuming industries in the four broad industrial groups: Fabricated metal products; Machinery (except electrical); Electrical machinery; and Transportation equipment; also includes the consumption and inventory of steel in the Iron and Steel Forgings Industry.

Data tabulated from surveys conducted by the Bureau of the Census for the National Production Authority. Surveys included approximately 8,000 of the larger establishments in the metalworking industries and a representative sample of the smaller plants.

5-3. ANNUAL SURVEYS OF MANUFACTURES

Statistics on manufacturing are collected in detail in the Census of Manufactures. During the intercensal period, the Annual Surveys provide up-to-date basic statistics on the key measures of manufacturing activity for industry groups, important individual industries, and for geographic divisions and States. The annual survey covers approximately 45,000 plants out of a total of more than 250,000. Included are all large plants, accounting for approximately two-thirds of the total manufacturing employment in the United States, and a sample of the much more numerous small plants.

The Annual Survey program is designed to provide estimates of general statistics (employment, payrolls, man-hours, value added by manufacture, etc.), for industry groups and selected industries; general statistics for geographic divisions and States, cross-classified by major industry group; value of shipments for classes of products; data on selected metals consumed, by selected industries; expenditures for new plant and equipment, for industry groups and for States; value of manufacturers' inventories, for industry groups and selected industries; and selected general statistics for industries, cross-classified by size of establishment.

The Annual Surveys of Manufactures employment data have been coordinated with the Bureau of Old-Age and Survivors Insurance employment figures for consistency in classification, coverage, and statistical accuracy.

Fuels Consumed and Electric Energy Purchased: 1950¹

23 p., tables, appendix. May 1953. 20 cents.

Report shows estimates for 1950 with comparable 1947 Census statistics on the cost of fuels consumed and the quantity and cost of electric energy purchased by manufacturing establishments. Includes figures for industries, United States totals, geographic divisions, States and groups of industries within State. Report contains a Technical Appendix, which discusses the estimating procedures used.

**MAS-50-9 Fuels Consumed and Electric Energy Purchased: 1950 and 1947.²
Advance report**

20 p., tables, appendix. January 1953. 25 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1950 and 1947 (revised 1950 figures) by geographic divisions and States. Tables include comparable 1947 statistics, previously published in the 1947 Census of Manufactures release MC203, *Fuels and Electric Energy Consumed*. Replaces preliminary report MAS-50-5, *Cost of Fuels Consumed and Purchased Electric Energy for Industry Groups: 1950 and 1947*, issued in 1951 and incorporated in the report *Annual Survey of Manufactures, 1949 and 1950*.

Annual Survey of Manufactures: 1951¹

253 p., tables, appendices, map. \$2.25 (Buckram).

This report is a compilation of the 1951 Annual Survey of Manufactures releases MAS-51-1 through MAS-51-8 with two additional summary historical tables; general explanations text and technical appendices; as well as a "Product Statistics" chapter (containing a recapitulation of the data available in the individual commodity "Facts for Industry" series).

MAS-51-3 Value of Shipments of Selected Classes of Products: 1951, 1950, and 1947.² Advance report

8 p., tables. February 6, 1953. 20 cents.

Estimates of value of shipments during 1951 and 1950 for more than 600 classes of manufactured products with comparable data from the 1947 Census of Manufactures. The values presented for 1951 and 1950 are based on manufacturers' reports received in the 1951 Annual Survey of Manufactures conducted by the Bureau of the Census in cooperation with the National Production Authority.

MAS-51-4 General Statistics for Industry Groups and Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

31 p., tables. March 11, 1953. 30 cents.

This report provides data on employment, man-hours of production workers, payrolls, cost of materials, value of products shipped and value added by manufacture. Also shown are data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

MAS-51-5 Metals Consumed by Manufacturers of Metal Products for Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

11 p., tables. March 11, 1953. 15 cents.

Includes a summary of consumption and cost of carbon steel, alloy and stainless steel, aluminum, and copper and copper-base alloys, 1951, 1950, 1949, and 1947 by manufacturers of metal products. Estimated quantity and cost figures for the major metal producing industries within four broad industrial groupings: (1) Fabricated metal products, (2) Machinery (except electrical), (3) Electrical machinery, and (4) Transportation equipment. Data on the consumption and cost of such metal mill shapes and castings by metal fabricating establishments for 1951 are based on estimates prepared from the survey "Reported Plant Operations" (NPAF-1 and NPAF-103); the estimates for 1950 and 1949 are comparable figures tabulated from the 1950 and 1949 Annual Survey of Manufactures. Corresponding figures shown for 1947 were compiled from the 1947 Census of Manufactures. The 1951 estimates include quantities produced and consumed in the same establishments, as well as purchases and interplant transfers. Data for prior years exclude quantities produced and consumed in the same establishments.

MAS-51-6 General Statistics for the United States, by Geographic Divisions and States: 1951, 1950, 1949, and 1947.² Advance report

7 p., table, map. March 12, 1953. 15 cents.

This report shows measures of manufacturing activity—employment, payrolls, man-hours of production workers, and value added by manufacture for 1951 distributed by geographic divisions and States. Includes data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1951, 1950, and 1947.

MAS-51-8 Selected General Statistics by Employment Size of Establishment, for Major Industry Groups and Selected Industries: 1951 and 1950.² Advance report

51 p., table. March 26, 1953. 35 cents.

Estimates of the number of establishments, employment, and value added by manufacture, distributed by employment size class of establishments, are shown for selected industries and major industry groups for 1951 and 1950.

MAS-52-1 Value of Shipments of Selected Classes of Products, for the United States: 1952, 1951, 1950, and 1947.² Advance report

25 p., table. August 27, 1953. 20 cents.

Estimates of value of shipments during 1952, 1951, and 1950 for more than 600 classes of manufactured products, with comparable data from the 1947 Census of Manufactures. The values presented for 1952, 1951, and 1950 are based on manufacturers' reports received in the 1952 Annual Survey of Manufactures.

6. POPULATION AND HOUSING DIVISION

A Census of Population has been taken every 10 years since 1790 and a Census of Housing has been taken along with the Census of Population since 1940. These censuses were last taken as of April 1, 1950.

The Current Population Survey is conducted monthly. Through enumeration of a scientifically selected sample of the population, information is obtained currently on employment, unemployment, hours of work, occupation, and other subjects. Also available are estimates of the personal and family characteristics of the population, mobility of the population, income, housing conditions, etc.

Estimates of population for postcensal and intercensal dates are prepared, and special censuses of local areas are taken at the request and expense of the local governments involved.

6-11. 1950 CENSUS OF POPULATION

Results of the 1950 Census of Population were made available in published form as rapidly as data were tabulated and assembled. Preliminary figures and advance releases of final statistics were issued in unbound multilithed form identified as Series PC reports. Detailed final data are being presented in bound volumes. The material presented in these volumes are available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume II, *Characteristics of the Population*, in 54 parts, presents statistics on the number of inhabitants and the characteristics of the population for States and their standard metropolitan areas, urban places, and other constituent areas. The volume includes Series P-A, P-B, and P-C bulletins and comprises a separately-bound part for each State, the District of Columbia, and a United States summary. Parts 51-54, for the Territories and possessions, will be bound together.

Vol. II. Characteristics of the Population ¹

v. p., tables, map.

Population totals for the State, urban and rural, and for cities of 10,000 or more from earliest census to 1950; in groups of places according to size, 1900-50; population and area of counties, urban and rural, 1930-50; counties by minor civil divisions, 1930-50; all incorporated places, and unincorporated places of 1,000 or more, 1950 and 1940; incorporated places of 5,000 or more, by wards; and urbanized areas, 1950.

Characteristics of the population for the State, for each county, for the rural-non-farm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, each urbanized area and standard metropolitan area; with limited data presented for incorporated and unincorporated places of 1,000 to 2,500. Subjects include the age and sex of the population, race, nativity, citizenship, school enrollment,

years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. Separate statistics are presented for the nonwhite population for areas in the southern States.

The report also includes: detailed characteristics of the population for large areas; the State, urban and rural; cities and standard metropolitan areas of 100,000 or more; distribution of the population by sex and single years of age; and cross-classifications of sex and age by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income; and data on occupation, industry, and income, cross-classified with each other and race, class of worker, etc. Separate cross-classifications are shown for the non-white population in areas with 50,000 non-white inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

FINAL BULLETINS

Series P-B Bulletins, *General Characteristics*, are preprints of Chapter B, Volume II, *Characteristics of the Population*, for each State, the District of Columbia, the Territories and possessions, and the United States. The bulletins present statistics on the general characteristics of the population of the State, its counties, standard metropolitan areas, urban places, and other constituent areas. The data in these bulletins supersede figures shown in Series PC-12 reports and, in part, figures shown in Series PC-5, PC-6, and PC-7 reports. The price for a complete set of 54 P-B bulletins is \$28.30.¹

P-B General Characteristics (State)¹

Series P-D bulletins, *Census Tract Statistics*, which will not be bound into a single publication, comprise Volume III of the 1950 Census of Population. The 64 bulletins cover tracted cities and their adjacent tracted areas, where the latter exist. Each bulletin presents by census tracts, information from the Censuses of Population and Housing. Statistics presented in this series supersede those shown in Series PC-10. The price for a complete set of 64 bulletins is \$21.70.¹

P-D Census Tract Statistics (*specified city*)¹

v. p., tables, maps.

Basic population and housing characteristics for tracted areas from the 1950 Censuses of Population and of Housing. Population items include: age, sex, race and nativity, marital status, years of school completed, country of birth, married couples and households, residence in 1949, employment status, occupation, class of worker, and family income in 1949. Housing data include: occupancy and tenure, type of structure, condition and plumbing facilities, year built, persons per room, heating fuel, refrigeration equipment, television, contract monthly rent, and value of one-dwelling-unit structures.

Separate data are presented for nonwhites and the dwelling units which they occupy, for each tract having 250 nonwhites or more within tracted areas containing 10,000 nonwhites or more. Limited data are presented for tracted areas containing 10,000 or more white persons with Spanish surnames in California, Colorado, and Texas, for each tract having 250 or more white persons with Spanish surnames. Maps defining the boundaries of the tracts are in each bulletin.

This series is complete.

Series P-E Bulletins, *Special Reports*, are preprints of the chapters of Volume IV, 1950 Census of Population. The reports treat in detail various characteristics of the population and special segments of the population, as indicated below. Other planned reports in the series will cover occupational and industrial characteristics, characteristics of families, nativity and parentage, mobility of the population, and fertility.

P-E Special Reports¹

v. p., tables. (Preprints of Chapters of Population Volume IV.)

No. 1A Employment and Personal Characteristics

149 p., tables, charts. 70 cents.

Detailed statistics on employment status of the population in relation to various personal characteristics, such as age, race, nativity, marital status, household relationship, school enrollment, and size of place. Hours worked during census week for employed persons by personal characteristics; weeks worked in 1949 by labor force status and by employment status, each by personal characteristics; and weeks worked in 1949 by labor force status for married women, with husband present, by age and color. Data are for the country as a whole, urban and rural, 1950. Comparative data for the United States, 1940, on single years of age by labor force status. Charts show labor force status of persons 14 to 74 years old, by single years of age and sex, 1950, and labor force participation rates by age group and sex, 1950 and 1940, each for the United States.

P-E Special Reports—Continued**No. 2C Institutional Population**

215 p., tables. \$1.

Total population and total institutional population, by color and sex, by regions, divisions, and States, 1950, and same classifications for persons 14 years old and over, 1950 and 1940. Age of persons in institutions, by type of control of institution, color, and sex, United States, regions, and States, 1950, for: correctional institutions, mental hospitals, tuberculosis hospitals, homes for the aged and dependent, homes and schools for the mentally handicapped and for the physically handicapped, homes for neglected and dependent children, and public training schools for juvenile delinquents. Statistics for all institutions combined, United States, 1950, by age and sex, on: total inside and outside standard metropolitan areas, urban and rural nonfarm; race, nativity, and citizenship; school enrollment of persons 5 to 24 years old; years of school completed by those 25 years old and over; marital status of those 14 years old and over, by color; mobility status and farm residence in 1949 of those 1 year old and over; and income received in 1949; and characteristics of institutional population, by type of institution and type of control, by age and sex, United States, 1950. Total institutional population by age, color, and sex, for selected counties and urban places, 1950.

No. 2D Marital Status

68 p., tables, chart. 40 cents.

Detailed family status of persons 14 years old and over, by marital status, age, and sex, and single years of age of these persons, by marital status and sex, United States and rural-farm areas, with separate data for nonwhite for the country as a whole and for rural-farm areas. Income received in 1949, for the noninstitutional population 14 years old and over reporting on income, by marital status, family status, age, and sex, United States and rural-farm areas, with separate data for nonwhite for the country as a whole. Characteristics of children: single persons under 18 years old by family status, age, color, and sex, for the United States, total and rural-farm. All data relate to 1950.

No. 3B Nonwhite Population by Race

92 p., tables, map. 50 cents.

Statistics for each of the nonwhite races—Negro, Indian, Japanese, Chinese, Filipinos, and other nonwhite races—on age, sex, marital status, years of school completed, employment status, major occupation group, and income are presented for regions and their urban, rural-nonfarm, and rural-farm parts by age and for those selected States, urban, rural-nonfarm, and rural-farm parts of States, and standard metropolitan areas in which there are appreciable concentrations of any of the minor races. For Indians, the data are shown for Indian agency areas rather than standard metropolitan areas. Citizenship, country of birth, and age of the foreign-born nonwhite population, by race, same areas. All data relate to 1950.

No. 3C Persons of Spanish Surname

74 p., tables. 45 cents.

Statistics on the characteristics of persons of Spanish-American and Mexican descent in five southwestern States (Texas, Colorado, New Mexico, Arizona, and California) which are identified, for purposes of this report, as persons having Spanish surnames. Characteristics for which statistics are presented include age, sex, nativity and parentage, marital status, employment status, years of school completed, major occupation group, and income. Statistics are presented for the State and its urban, rural-nonfarm, and rural-farm parts, selected standard metropolitan areas, urbanized areas, and urban places. Statistics on nativity, citizenship, and country of birth are given for all counties in the five States and all places of 10,000 or more. Housing data for the States, urban and rural, include water supply, toilet facilities, condition and plumbing facilities, number of persons, persons per room, contract and gross monthly rent, and value of one-dwelling-unit structures.

P-E Special Reports—Continued**No. 3D Puerto Ricans in Continental United States**

22 p., tables. 20 cents.

Persons of Puerto Rican birth, by color and sex, for selected areas (Northeast: New York State, New York City, remainder of State, remainder of region; North Central; South; West), 1950 and 1940. Persons of Puerto Rican birth and of Puerto Rican parentage, by age, color, and sex, for the United States and New York City, 1950. Characteristics of persons 14 years old and over of Puerto Rican birth and of Puerto Rican parentage, by age and color, for the United States and New York City, 1950. Characteristics include age, color, sex, marital status, years of school completed, employment status, major occupation group, and income.

No. 4A State of Birth

112 p., tables, map. 55 cents.

Statistics for the total native population, by color and sex, on State of residence, 1950, by State of birth. (State of birth includes Alaska, Hawaii, Puerto Rico, other possessions, etc., and born abroad of American parents.) Statistics on State of residence, 1950, by geographic division of birth and State of birth by division of residence, 1950, are presented by age, color, and sex. Data are presented for the United States, regions, divisions, and States. Also shown are the net gain or loss through interregional, interdivisional, and interstate movement.

No. 5A Characteristics by Size of Place

68 p., tables, map, chart. 40 cents.

Statistics on the age, sex, nativity, race, and, by color and age, on the mobility status, years of school completed, marital and family status, employment status, major occupation group, and income of the population, by size of place. For the population living in urbanized areas, the classification is made by the size of the urbanized area rather than by the size of the incorporated place within the urbanized area; and separate figures are presented for the population in central cities and in the urban fringe of the urbanized areas. Statistics are given for the United States as a whole, with selected data (age, race, nativity, mobility, and major occupation group, by the size of place and sex) for regions. Chart shows children under 5 years per 1,000 women 20 to 44 years old, by size of place, for the United States. All figures relate to 1950.

No. 5B Education

133 p., tables, map, chart. 60 cents.

Statistics on years of school completed, by age, sex, and other characteristics, such as race and nativity, mobility status, marital status, employment status, major occupation group, and income, for the United States, the South, and the North and West combined, with data on ethnic characteristics and residence in 1949 of children 5 to 13 years old enrolled in school, by year of school in which enrolled and age. Urban-rural residence of children 5 to 13 years old enrolled in school, by year of school in which enrolled, age, and color, for the United States, by regions, with urbanized areas and other urban areas by size of place. All data relate to 1950.

ADVANCE REPORTS

Series PC-14 comprises 21 reports which present final figures for particular population characteristics for the United States as a whole, or for various types of areas.

PC-14 Summary Reports of Population Characteristics (various areas)²**No. 7. School and Kindergarten Enrollment by Age, for the United States, Urban and Rural, and for Regions, Divisions and States: 1950**

2 p., tables. 5 cents.

Statistics supersede corresponding preliminary sample data in Series PC-7, Nos. 1 and 3, issued in 1951, and are an advance release of information from the U. S. summary bulletin in Series P-B. Data for families and households are shown by number, population in family or household, and population per family or household. Figures for quasi households are shown by population in quasi households, institutional population, and other population. The tables are preprinted from the Series P-B United States Summary bulletin, *General Characteristics of the Population*, and supersede, in part, preliminary sample data published in Series PC-7, Nos. 1 and 3.

NOTE.—A special study, *Farms and Farm People*, based on data from the 1950 Censuses of Agriculture, Population, and Housing, is described in section 1-10.1

6-12. 1950 CENSUS OF HOUSING

Results of the 1950 Census of Housing are made available as they are tabulated and assembled. Preliminary figures and advance releases of final statistics have been issued in unbound multilithed form identified as Series HC reports. Detailed data will be presented in a series of bound volumes. The materials presented in Volumes I and II are also being made available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume III, *Farm Housing Characteristics*, presents in a single book (bound form only) analytical data for occupied dwelling units in the rural-farm segment of the dwelling unit inventory, for the United States and for each of the 119 economic subregions.

Vol. III, Farm Housing Characteristics; United States and Economic Subregions¹

311 p., tables, map. 1952. \$2.50 (Buckram).

Presents analytical data for occupied dwelling units in the rural-farm segment of the dwelling unit inventory. Shows interrelationships of number of rooms and condition and plumbing facilities with selected housing and household characteristics.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Vol. III, Farm Housing Characteristics—Continued

The statistics are provided for the United States and for each of the 119 economic subregions. Subregions usually are combinations of two or more counties having relatively homogenous agricultural conditions.

Includes a summary of findings: inventory-farm and nonfarm distribution, regional distribution, relation of number of farm dwelling units to number of farms; size of farm house in relation to year built, condition and plumbing facilities, kitchen sink, cooking and heating fuels, persons per room, and age of head of household; condition and plumbing facilities in relation to year built, electric lighting, heating equipment, type of household, and income.

Detailed tables for the United States and economic subregions show number of rooms in owner-, renter-, and rent-free-occupied dwelling units, 1950, with same data for nonwhite-occupied dwelling units for the United States and for each of the 36 economic subregions having 15,000 nonwhite inhabitants or more. Economic subregions are identified by number. A map showing the location of the economic subregions of the United States, 1950, and a list of counties in the economic subregions accompanies the text.

Volume IV, *Residential Financing, Mortgaged Nonfarm Properties*, presents data relating to the characteristics of the financing of the residential nonfarm properties for the United States, for each of the four geographic regions and for each of 25 large standard metropolitan areas. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

Vol. IV. Residential Financing, Mortgaged Nonfarm Properties (2 parts)¹

Presents results of a sample survey of characteristics relating to the financing of residential nonfarm properties. Data are presented in terms of mortgaged properties, first and junior mortgages, and outstanding mortgage debt for both owner-occupied and rental properties. Includes type of mortgage holder, characteristics of first and junior mortgages, purpose of financing and refinancing, characteristics of the owner-occupant and his household, and the physical and financial characteristics of the property. Part 1 presents detailed characteristics of the United States and the four geographic regions. Part 2 presents data for 25 large standard metropolitan areas and comparable data for the United States. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

v. p., tables, maps, appendix.

Pt. 1. The United States.

684 p. \$4.25 (*Buckram*).

Pt. 2. Large Standard Metropolitan Areas and Comparable Data for the United States

850 p. \$5.25 (*Buckram*).

FINAL BULLETINS

Series H-A Bulletins are preprints of Volume I, *General Characteristics*, of the 1950 Census of Housing. There is a separate bulletin for each State, the District of Columbia, the Territories and possessions, and a summary report for the United States. The series present basic data on practically all subjects for which information was collected in the 1950 Census of Housing. Statistics in these bulletins supersede figures shown in Series HC-1 through HC-5, HC-7, and HC-8. The price for the 54 reports is \$27.65.

¹ For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

H-A General Characteristics of Housing (State)¹

v. p., tables, maps.

Data for the State, each county, rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, and each urbanized area and standard metropolitan area. Limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Included are statistics on dwelling units by occupancy and tenure, vacancy status, type of structure, color of occupants, condition and plumbing facilities, number of rooms, persons per room, year built, water supply, toilet and bathing facilities, electric lighting, heating equipment, heating and cooking fuels, kitchen sink, refrigeration equipment, radio, television, contract or gross monthly rent of rental unit, and value and mortgage status of owner-occupied nonfarm dwelling units. Separate figures are presented for dwelling units occupied by nonwhite households for areas in the Southern States and for those occupied by Spanish surname households in the States of Arizona, California, Colorado, New Mexico, and Texas.

This series is complete.

Series H-B Bulletins are preprints of Volume II, *Nonfarm Housing Characteristics*, of the 1950 Census of Housing. The series consists of 162 separate bulletins, one for each of the 152 standard metropolitan areas of 100,000 inhabitants or more, one for each of the nine geographic divisions, and one for the United States. Each bulletin presents various housing characteristics cross-classified by monthly rent, value, number of rooms, type of structure, condition, type of household, family income, etc. Data for cities of 100,000 inhabitants or more are included in the bulletin for the standard metropolitan areas containing those cities. The price for a complete set of the 162 bulletins is \$31.20.¹

Census—BAE Farm Population

No. 16. Revised Estimates of the Farm Population of the United States: 1910 to 1950²

9 p., tables, appendix. March 9, 1953. 10 cents.

This report supersedes Series Census—BAE, No. 16A, preliminary, issued July 18, 1951. Total population of the United States, including armed forces overseas, and farm population (revised estimates), 1910 to 1950; summary of adjustments in farm population estimates, for the United States, 1910 to 1950. Appendix discusses methods used in revising the annual farm population estimates. Issued jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

No. 18. Estimates of the Farm Population of the United States: April 1950 to April 1952²

4 p., tables, chart. March 9, 1953. 5 cents.

Figures in this report supersede those for these years in Census—BAE, No. 17, issued October 26, 1951. Total population of the United States, including armed forces overseas, and farm population, 1950 to 1952. Estimated civilian population living on farms, by age and sex; and by employment status, industry (agricultural and non-agricultural industries), and sex: 1950 to 1952. Issued jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

No. 19. Economic Subregions of the United States; by Donald J. Bogue, Scripps Foundation, Miami University, and Calvin L. Beale, Population and Housing Division, Bureau of the Census¹

47 p., tables, map. July 27, 1953. 30 cents.

The report includes a description of the procedure of delimiting economic subregions and the uses of economic subregions. Selected nonagricultural and agricultural characteristics of the economic subregions are presented. Included among the nonagricultural characteristics are the total, rural, and urban population of the economic subregions, with rates of change for census years 1900-40; percentage distribution of workers by industry of employment in 1940; selected data on manufacturing, retail trade, and services from the most recent censuses of these activities; selected demographic and social data, such as birth rates, levels of living, etc.; selected housing data from the 1940 and 1950 Censuses of Housing. Included among the agricultural statistics are such items as number of farms, acreage in farms, size of farms, farm operators by color; value of farm equipment and crops; farms by type. Also included

Data on number of reporting units, mid-March 1951 employment, and January-March 1951 taxable wages covered under the Old-Age and Survivors Insurance program. The bulletins include four types of tables, as follows: (1) United States total data, including data for the 48 States, the District of Columbia, and Alaska and Hawaii; classified by industry group and size of reporting unit based on March 1951 employment; (1A) United States total data, as above, with Alaska and Hawaii excluded; (2) State data (each State, the District of Columbia, and Alaska and Hawaii) classified by industry group and size of reporting unit; (3) Data for 426 selected larger counties classified by industry group and size of reporting unit; and (4) Data for the remaining counties, classified by ten broad industry divisions and size of reporting unit. Part 1 includes data for the United States and all States. Parts 2 through 10 include the county statistics in addition to the United States and State totals.

This series was published by the Bureau of the Census, Department of Commerce, in cooperation with the Bureau of Old-Age and Survivors Insurance, Department of Health, Education, and Welfare, the data being obtained as a byproduct of employers' reports under the Federal Insurance Contributions Act.

INDEXES

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

January–September 1953

The following indexes show by geographic areas and by subject, data contained in Census publications during January through September 1953, and included in the catalog part of this publication. There are separate indexes for Census Divisions (nine groupings of States), Census Regions (combinations of Divisions into three or four groupings), Cities, Counties, Standard Metropolitan Areas, States, Territories and possessions, and Urban and/or Rural Areas.

Each index entry (except cross references) is followed by a group classification number to facilitate reference to the specific publication. Group classification numbers shown in the upper outside corner of each page of the catalog section indicate the order of listing. The table of contents indicates the order of listing, also. The group classification system is an order of numbers assigned according to the alphabetical arrangement of six of the administrative divisions of the Bureau of the Census. There is a seventh classification, Miscellaneous, for other Bureau publications.

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

1953

INTRODUCTION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is issued on a current basis each quarter and cumulated to the annual volume. A MONTHLY SUPPLEMENT to this CATALOG, which does not include regular monthly and quarterly publications, enables users to be informed more currently on publications as they appear. Each subscription to the quarterly CATALOG (\$1.50 a year) will include a combination of 4 quarterly issues of the CATALOG and 12 copies of the MONTHLY SUPPLEMENT.

The record of the Bureau of the Census publications since the first Census in 1790 through the year 1945 is available in the "Catalog of United States Census Publications 1790-1945" (Government Printing Office, \$1.50). This catalog was prepared by the Census Library Project sponsored by the Library of Congress and the Bureau of the Census. Publications issued after 1945 are shown in the annual issues of CENSUS PUBLICATIONS CATALOG AND SUBJECT GUIDE for 1946 and subsequent years, through 1951.

The BUSINESS SERVICE CHECK LIST of the Department of Commerce, issued weekly at a subscription cost of \$1.50 a year, includes a list of Census publications. Subscriptions can be placed with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or with the field offices of the Department of Commerce listed on the back cover of this publication.

HOW TO USE THIS PUBLICATION

The CATALOG OF UNITED STATES CENSUS PUBLICATIONS is designed to give users of published Census statistics a direct method of locating needed information. The catalog contains detailed descriptions of the contents of the published reports and is followed by two indexes, an index to reports by geographic areas, and an index to reports by subject.

The entries in the two indexes are directly keyed to the reports listed in the catalog by the use of a reference numbering system. All publications are arranged in the catalog by general subject field, following the organization pattern of the Bureau, namely: 1. Agriculture; 2. Business; 3. Foreign Trade; 4. Governments; 5. Industry; 6. Population and Housing; and 7. Miscellaneous. The first digit of the reference number designates the major subject within which the report is listed. Thus, all Agriculture Division reports have reference numbers beginning with 1; reference numbers for all Business Division reports have 2 as the first digit, etc. The second part of the reference number further classifies the reports by broad categories. For example, Business Division reports on Retail Trade are classified under 2-21; Wholesale Trade, 2-22; Trade Studies, 2-23; etc. Reports carrying a series number are further identified by the series number shown in parentheses following the group reference number, where it is feasible to include such numbers in the indexes.

INTRODUCTION

The user of the CATALOG may first consult either the index by geographic areas or the index by subject and secure the reference number or numbers shown for the item on which he is looking for information. The reference number is then used as a key in locating the desired reports in the catalog section. For convenience, the reference number for the first entry on each page is shown on the upper outside corner of each page in the catalog section. In order to avoid the indexing of large lists of commodities, general references are made in those instances where coverage is all inclusive; reports are indexed under specific commodities only when the reports are limited to the specific item.

HOW TO OBTAIN BUREAU OF THE CENSUS PUBLICATIONS

Priced publications, except as otherwise noted in this catalog, may be purchased from the Superintendent of Documents, Washington 25, D. C., or from the U. S. Department of Commerce Field Offices which are listed on the back cover. Other publications, which are not published by the Government Printing Office, may be ordered from the Bureau of the Census, Washington 25, D. C. For these publications, checks or money orders must be made out to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment. Remittances are required in advance of any shipment.

Unpriced publications may be obtained from the Bureau of the Census, Washington 25, D. C. When requesting publications, please be as specific as possible.

Supplies of publications are limited. Priority in meeting requests will be given to government agencies, large public libraries, school officials, and certain other groups when the reports are needed for official use or will be made available to large numbers of users of data.

AVAILABILITY OF UNPUBLISHED DATA

Detailed information in the files of the Bureau that has been tabulated but not published, can be made available, upon request, for the cost of transcribing or reproducing the data. Requests for statistics, addressed to the Director, Bureau of the Census, Washington 25, D. C., will be studied for availability of material. If unpublished data are available, an estimate of the cost of preparing and furnishing the data will be made.

A recent statement of the policy governing special work, including the making available of the special tabulations, and a list of some of the work performed, is included in the appendix to this volume.

DEPOSITORY LIBRARIES

The Congress has established the system of Government Depository Libraries, in order to make Government publications available to the public. Libraries designated within this system can elect to receive, from the Superintendent of Documents, Government Printing Office, those classes of Government publications which they deem appropriate to the type of service they render. Of the 544 libraries in this system, almost all have elected to receive one or more of the 30 classes which include Census publications. Of the total, 532 receive the Statistical Abstract publications and close to 500 receive the final volumes of the various major censuses as published.

To supplement this system, and to insure that a collection of Census reports is available for reference and research at points relatively convenient to everyone, the Bureau of the Census has been furnishing copies of its reports to an

INTRODUCTION

additional 160 libraries, designated as Census libraries. Along with the Government Depository Libraries, this makes a collection of Census reports available within 200 miles of every person in the United States, with special collections at major research centers.

The Bureau is at present reviewing the principles underlying the selection of Census libraries and may find it necessary during the coming year to make adjustments in the list of Census libraries. The Bureau of the Census would like to have collections of its publications available so that persons having correspondence with the Bureau can be referred to places where these reports are publicly available. Thus, in return for supplying the publications, the Bureau expects the library to be large enough to provide necessary service and to make all, or at least a substantial collection of Census reports available to the general public.

ORGANIZATION OF THE CATALOG

The following list of Census publications includes those issued during calendar year 1953. The publications are listed by subject division, following the organization pattern of the Bureau, namely: Agriculture, Business, Foreign Trade, Government, Industry, Population and Housing, and, for Bureau-wide materials, Miscellaneous. Group numbers are assigned to each section and are shown on the upper outside corner for the first entry on each page. These group numbers are assigned to all index entries to facilitate reference from the subject guide to the specific reports listed in the Catalog.

Each report is described and the date of issue is given for all reports except regular monthly or quarterly series.

This publication was prepared in the Statistical Reports Section of the Office of the Assistant Director for Statistical Standards. Many persons on the staff of the Bureau of the Census furnished valuable information for inclusion in this publication.

Any suggestions, comments or inquiries from librarians, their staffs, or other users of this CATALOG OF THE UNITED STATES CENSUS PUBLICATIONS, will be appreciated by the Bureau. Letters should be addressed to the Director, Bureau of the Census, Washington 25, D. C.

1. AGRICULTURE DIVISION

The first National Census of Agriculture was taken in 1840, and since then a census of agriculture has been taken in conjunction with the Census of Population in each decennial enumeration. A mid-decennial agriculture census was initiated January 1, 1925; thus, there has been a Federal Census of Agriculture every fifth year since 1920.

Each year the Bureau collects statistics and issues periodic reports on cotton ginnings and production. Twelve reports on cotton ginned prior to specific dates are prepared and issued each year on dates prescribed by Congress. Five of these reports are issued jointly with the Department of Agriculture as the "Consolidated Cotton Report."

1-10. 1950 CENSUS OF AGRICULTURE

FINAL REPORTS

Five principal final volumes present the results of the 1950 Census of Agriculture: Volume I.—*Counties and State Economic Areas*, published in 34 parts for specified States and the Territories and possessions; Volume II.—*General Report, Statistics by Subjects*; Volume III.—*Irrigation of Agricultural Lands*; Volume IV.—*Drainage of Agricultural Lands*; and Volume V.—*Special Reports*. The chapters or parts of Volumes II and III are issued as separate bulletins. The ten special reports of Volume V are issued as separate pamphlets and will not be bound together. All reports of the 1950 Census of Agriculture have now been published.

Volume I, *Counties and State Economic Areas*, in 34 separate parts, is arranged by census geographic divisions for the continental United States. These bulletins supersede the reports in the preliminary Series AC50-1-5. All reports, except that for Puerto Rico and the combined reports on the Territories and possessions, were issued in 1952.

Vol. I. Counties and State Economic Areas¹

v. p., tables, map, appendix.

Pt. 34. Territories and Possessions: Alaska, American Samoa, Guam, Hawaii, Puerto Rico, and Virgin Islands of the United States. 265 p. \$1.25.

Number of farms, farm characteristics, acreage in farms; value of farm land and buildings, cropland, other uses of land; farm facilities and equipment; number of various kinds of livestock; acres and production of various crops; value of farms; and data by size of farm, by tenure of operator, by type, and by economic class for the 1950 Census of Agriculture; together with comparative data from earlier Censuses.

The questionnaire used for each Territory or possession in the 1950 Census of Agriculture forms the appendix for each report combined in Part 34 of Volume I.

Pt. 34.5. Territories and Possessions: Puerto Rico. 115 p. Preprint bulletin. 60 cents.

This bulletin has been incorporated in the final report, Pt. 34, listed above. The introduction to this report is in Spanish and English, while the questionnaire which appears in the appendix is in Spanish only.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Volume II, General Report, Statistics by subjects of the 1950 Census of Agriculture is issued in two ways: (1) a final volume which contains 13 chapters, each of which covers a different agricultural subject; (2) the same chapters issued as 13 separate reports.

Vol. II. General Report; Farms, Farm Characteristics, Livestock and Products; Crops, Fruits and Values¹

140½ p., tables, charts, maps, appendix. \$7.50.

The introduction describes the basis for the 1950 Census of Agriculture and its scope; discusses the history of the Census of Agriculture, date of the enumeration; preparation of the questionnaires used for the Census of Agriculture and measures taken for insuring completeness of enumeration; types of questionnaires used in connection with the 1950 Census of Agriculture; the enumeration; office processing of questionnaires: receiving and packaging, editing and coding, punching, mechanical editing, tabulation and review of tabulation, processing of data for the sample of farms used (the sample consisted of all large farms and one-fifth of all remaining farms); the reliability of estimates based on the sample of farms; the sample for the 1945 Census, and publication of data. Includes definitions of terms used, and the classification of farms by: size, tenure of operator, race or color of operator, economic class, part-time farm, residential farm, abnormal farm, type of farm, class of work power, large farm, effect of change in definition of farm on data for the 1950 Census; completeness of coverage of the census; and availability of data for geographic areas. The introduction and the appendix are included in each preprint chapter.

The report presents summary statistics by subjects relating to the number, acreage, and value of farms; uses of land in farms, farm equipment and facilities; livestock, livestock products; crops; value of farm products sold; and the characteristics of farms and farm operators classified by size of farm, tenure of farm operator, type and economic class of farm. Data are presented for the United States, the geographic regions and divisions and for all States.

Data in the 13 chapters of Volume II are described in the paragraphs accompanying the preprint chapters listed below.

Vol. II. General Report; Statistics by Subjects¹

v. p., tables, charts, maps, appendix. (13 preprint chapters of Volume II)

Ch. I. Farms and Land in Farms. 133 p. 65 cents.

The report presents data for the United States on: number of farms, all land in farms, value of farms, 1850-1950; land used for agriculture and forestry, 1880-1950; farm operators with grazing permits, for specified States, 1950; all land in farms and specified uses of land, Censuses of 1850-1950; farms reporting—cropland harvested, by number of acres, 1949 and 1944; woodland pastured and not pastured, by number of acres, 1949; cultivated summer fallow, by number of acres, for specified States, 1949. Total, rural, and farm population, 1850-1950, average number of persons per farm, with per capita data for land in farms, cropland harvested and value of farm products sold, Censuses of 1850-1950.

Data for geographic regions and States show: number and value of farms, all land in farms, 1950, 1945 and 1940; percent distribution of farms, land in farms, and the several classes of land according to use, Census of 1950; all land in farms, 1950, 1945 and 1940, classified according to use in 1949, 1944 and 1939; average acreage per farm, and average acreage of the several classes of land according to use based on all farms, Censuses of 1950, 1945 and 1940, and average acreage per farm reporting the several classes of land according to use, 1949, 1944 and 1939; number and value of farms, all land in farms, cropland harvested, Censuses of 1850-1950; farms by acres of cropland harvested, 1949 and 1944, and by acres of woodland pastured, and not pastured, 1949; number and acreage of irrigated farms, Censuses of 1950, 1945, and 1940; land in farms, land not in farms, classified according to use, and land used for agriculture and forestry, 1950 and 1945; farm population, 1950, 1945 and 1940.

¹For sale by the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C. Remittance should be sent to that office with order.

Vol. II. General Report—Continued

The introduction gives sources of data, presentation of statistics, other published data, history of census inquiries on farms and farm property, definitions and explanations of terms used, and a discussion of the changes in farms and land in farms. The introductory chapter and the appendix from Volume II are included in this preprint chapter.

Ch. II. Age, Residence, Years on Farm, Work Off Farm. 193 p. \$1.

Presents data for the United States for: farm operators reporting residence on or off farms, for specified counties, 1950 and 1940; years on farm as classified for each census, with number of operators reporting in each classification, 1910 to 1950; farm operators on present farm one year or less, by month of occupancy, 1950; residence of farm operators, 1950, 1945 and 1940; off-farm work by farm operators, 1929-1949; and other income, 1949; farm operators—in each tenure group by age (color and tenure for the South), 1890-1950; operators of commercial and other farms in each tenure, by age, for the United States, the North and the West (color and tenure for the South), 1950; residence of farm operators, by tenure (color and tenure for the South), 1950, 1945 and 1940; residence of operators of commercial and other farms by tenure, for the United States, the North and the West (color and tenure for the South), 1950; farm operators in each tenure group, by years on present farm, with percent distribution (color and tenure for the South), 1910-50; off-farm work by farm operators, 1929-49, by tenure (color and tenure for the South), 1934-49, and for commercial and other farms, 1949.

Data for the geographic regions, divisions and States present: farm operators, by age, 1950, 1945 and 1940; in each tenure group (color and tenure for the South), by age, 1950; residence of farm operators, 1950, 1945 and 1940, by tenure (color and tenure for the South), 1950; farm operator—by years on present farm, 1950, 1945 and 1940; by tenure (color and tenure for the South), 1950; by year of occupancy of present farm, and on present farm one year or less, by month of occupancy, Census of 1950; off-farm work by farm operators, 1929-49, and other income, 1949, and by tenure, 1949.

The introduction gives sources of data, presentation of statistics, other published data and definitions and explanations of terms used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. III. Farm Facilities, Roads, Trading Center, Equipment. 109 p. 55 cents.

Statistics in this chapter relate to specified facilities in the farm home, kind of road on which farm is located, distance to trading center visited most frequently, and specified items of farm equipment and machinery. Data on facilities include telephone, electricity, and some items of electrical equipment used in the home as well as in the farm business. Electric facilities and equipment include electric water pumps, electric hot water heaters, home freezers, electric washing machines, electric chick-brooders, and electric power feed grinders. Farm equipment and machinery include milking machines, grain combines, corn pickers, pick-up hay balers, silos (upright and pit or trench), motortrucks, tractors (wheel other than garden; garden and crawler), and automobiles.

Most of the available comparative data are shown for the United States. Historical data for regions, divisions, and States are shown only for selected Census years.

United States data show farms reporting: telephone and electricity, 1920-50, electricity, 1950, and specified electric facilities, 1950 and 1945; by distance to trading center and by kind of road, 1925-50; specified farm equipment, 1920-50; motortrucks, tractors and automobiles by age and by year of newest model, 1950, 1945 and 1940.

Data for geographic regions, divisions and States show: specified farm facilities, 1920-50; farms by amount of last monthly electric bill, Census of 1950; kind of road on which farm is located, 1950, 1940 and 1930; distance over dirt or unimproved roads, 1950, and distance to nearest all-weather road, 1945; specified farm equipment, 1950 and 1945; motortrucks on farms, 1920-50; percent distribution of farms reporting motortrucks by age of newest motortruck, 1950, 1945 and 1940, and by year of newest model, 1950; tractors on farms by kind, and farms by number of tractors, 1950 and 1945; percent distribution of farms reporting wheel tractors other

Vol. II. General Report—Continued

than garden, and automobiles, by age of newest tractor or automobile, 1950, 1945, and 1940, and by year of newest model, 1950.

The introduction gives sources of data, discusses presentation of statistics and other published data; the history of census inquiries on farm facilities, roads, trading center and farm equipment. Definitions and explanations of terms used are also included. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IV. Farm Labor and Farm Expenditures. 153 p. 65 cents.

Information on farm labor relates to farm operators, unpaid members of their families doing farm work or chores, and hired workers. Data for hired workers show: number of regular and seasonal workers; number of persons paid on a monthly, daily, hourly or piece-work basis; wage rates, hours worked and perquisites furnished. Information on expenditures relates to amounts paid in the calendar year preceding the census for machine hire, hired labor, feed for livestock and poultry, purchase of livestock and poultry, seeds, bulbs, plants and trees, gasoline and other petroleum fuel and oil, tractor repairs and other farm machinery repairs. Statistics are presented as totals for the United States, for three major regions, the nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States include: workers on commercial and other farms, 1950; workers on farms during specified weeks, 1935-50; farm wage rates, also wage rates and perquisites furnished hired workers, by basis of payment cross classified by size of farm, by type, and by economic class of farm, and by tenure of operator, 1950; specified farm expenditures for commercial and other farms, 1949, specified farm expenditures, 1869-1949; farms by amount of cash expenditures for hired labor, 1949 and 1944.

Data for geographic regions, divisions, and States show: workers on farms, farms by kind of workers, by number of hired workers, week preceding the enumeration, 1950; workers on farms during specified weeks, 1935-50; hired workers by basis of payment, wage rates, and perquisites furnished for workers paid on a monthly, weekly, daily, hourly, and piece-work basis, 1950; wage rates by perquisites furnished, 1950; specified farm expenditures, 1949, 1944 and 1939; number of farms reporting specified amounts of expenditures for hired labor, and percent distribution of farms reporting cash expenditures for labor by amount expended, 1949 and 1944.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. V. Farm Taxes and Cash Rent. 113 p. 55 cents.

Data on taxes are shown only for property owned by owner-operators of farms, and data on cash rent are shown only for lands rented from others by farm operators renting land solely on a cash basis. The report is presented in two parts (1 report)—part 1 relating to farm taxes, and part 2 to cash rent. Statistics are presented as totals for the United States, for major geographic areas and for each of the States.

Part 1. Data for the United States present farm taxes paid by owner-operators, 1950, 1940 and 1930. Data for geographic regions, divisions and States present farm taxes paid by full owners, 1950; percent distribution of full owners renting land to others and not renting land to others by value of owned land and buildings, 1950; number, acreage, value, and amount of farm property taxes for farms operated by full owners not renting lands to others, 1950, 1940 and 1930; farm taxes paid by part owners, percent distribution of part owners renting land to others, and not renting land to others, by value of owned land and buildings, 1950, and number, acreage, value of farm property taxes for farms operated by part owners not renting land to others, 1950 and 1940.

Part 2. Data for the United States present cash rent paid for farm land and buildings, 1950, 1940 and 1930. Data for geographic regions, divisions and States present cash rent paid by part owners reporting both value of land and buildings and amount of cash rent, 1950 and 1940, and for commercial and other farms, 1950; percent distribution of part owners renting land on cash basis, by value of rented land and buildings, Census of 1950; cash rent paid by cash tenants reporting both value of land and buildings and amount of cash rent, Censuses of 1950, 1940 and

Vol. II. General Report—Continued

1930; and for commercial and other farms, 1950; and percent distribution of cash tenants, by value of rented land and buildings, 1950.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VI. Livestock and Livestock Products. 209 p. \$1.

This report includes the quantity of livestock and poultry on farms as of April 1, 1950, amount and value of each important livestock and poultry product sold in 1949, with the number and value of each principal kind of livestock sold alive, and the number of principal kinds of livestock slaughtered on farms. The inventory of livestock and poultry includes data by age and sex groups for the more important kinds of livestock. Data are also presented on bees, and the value of sales of honey, bees, etc. Statistics are presented for the United States, the major geographic areas, and for individual States for most items with comparable data from 1945 and prior censuses.

Data for the United States include a brief description of the various classes of livestock, and an indication of the comparability of data for the Censuses of 1900-50; specified livestock on farms, by age and sex groups as published in the Censuses of 1840-1950; items for livestock and livestock products for which data were obtained, 1840-1950, and farms reporting quantity and value of specified livestock products of farms, 1839-1949.

Data for geographic regions, divisions, and States present value of specified classes of livestock, and percent distribution of total value of specified classes of livestock and percent of total value represented by the several classes, 1950, 1945 and 1940; value of inventories of specified classes of livestock, 1950, with corresponding value of sales of live animals in 1949; value of all livestock products and livestock products sold in 1949; number and value of horses and mules, 1950, 1945 and 1940; farms reporting horses and mules, 1900-50, and number of horses, 1840-1950, and mules, 1850-1950; farm work power (horses, mules, and tractors) with acres of cropland harvested, 1920-50; farms reporting, number, and value of cattle, 1950, 1945 and 1940; number of cattle on hand, 1950 and 1940; number of cows and other cattle, 1950, 1945 and 1940; cows and milk cows, by number reported, 1950; value of cattle by classes—cows, helpers, steers, and bulls, and calves, 1950, and cows and "all other cattle," 1945 and 1940; farms reporting cattle, 1900-50, and number, 1850-1950; number of cows, 1900-50; farms reporting milk cows, 1910-30; and number, 1850-1930; all cows, milk cows, and cows milked, relationship between items as enumerated in the various censuses, 1925-50; quantity and value of whole milk, cream, and other dairy products sold, 1949, 1944 and 1939; quantity of whole milk sold, 1869-1949, quantity of cream and butter sold, 1899-1929; classification by number of milk cows in herd—milk, cream and other dairy products sold, cows milked yesterday and butter churned last week, by States, 1950; number and value of hogs and pigs; and number of sows and gilts for spring farrowing, 1950, 1945 and 1940; all hogs and pigs, 1840-1950. Sows and gilts for spring farrowing, 1920-50; number, and value of all sheep and lambs, and of ewes and other sheep and lambs, 1950, 1945 and 1940; all sheep, 1840-1935, with distribution by age and sex, 1900-35; number of sheep and lambs shorn, quantity and value of wool shorn, 1949, 1944 and 1939; number of sheep and lambs shorn, wool, total sheep, and distribution by age and sex, classified by number of sheep shorn, by States, Census of 1950; sheep and lambs shorn, by number shorn, 1949, 1939 and 1929; number of sheep and lambs shorn, by number shorn and pounds of wool, 1859-1949; chickens on hand, 1910-50, number, 1880-1950, and value, 1950, 1945 and 1940; chickens sold, and number of chickens sold, 1919-49; chicken eggs sold and dozens sold, 1949, 1929 and 1919; chickens on hand, by number reported, 1930-50; classification by number of chickens on hand—farms reporting, and number on hand, chickens sold, eggs sold, and value of sales of poultry and poultry products, by States, 1950; farms reporting turkeys on hand, and number, 1890-1950; turkeys raised and sales of poultry and products other than chickens and chicken eggs—farms reporting, number and value of sales, 1929-49; classification by number of turkeys raised; number or value of turkeys raised—on hand, and sales of turkeys, ducks, geese, and their eggs, by States, 1950; number of ducks, geese and guineas, pigeons, pheasants and quail raised, 1929-49; livestock sales, 1949, 1944 and 1939, farm slaughter, 1909-49; farms reporting

specified kinds of animals butchered, by number reported, 1949; number and value of goats and kids, 1950, 1945 and 1940; goats, rabbits, and fur animals, April 1, 1950, or kept in 1949, specified fur animals on hand, April 1, 1950, and farms reporting, and value of sales in 1949; angora and other goats and kids, goats clipped and mohair, 1899-1949; and value of sales from goats, 1949, for specified States; goats and kids, 1900-50; number of beehives, and amount of honey produced, Censuses of 1890-1950. The introduction gives sources of data, other published data, comparability of statistics, and method of handling problems for the enumeration of livestock and livestock products. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VII. Field Crops and Vegetables. 247 p. \$1.25.

This chapter presents statistics for field crops and vegetables harvested in 1949. Figures for each individual field crop are totals for the entire crop, while those for vegetables in the main, are totals for the portions harvested for sale. Vegetables harvested for home use include only farms having home gardens. Individual crops include the number of farms on which the crop was produced, and the area harvested. For most crops, other than vegetable, data are given for the production and the value of the crop. Totals for many principal crops are presented for quantity and/or value of sales. Information is sometimes given for groups of similar crops such as small grains, hay, etc. Value-of-crop figures were not obtained by enumeration, but are computed values based on reports obtained by the Bureau of Agricultural Economics. Totals are shown for the United States, the major geographic areas, and for all States.

Data for the United States present: all crops, acreage and value, 1879-1949; specified field crops harvested, farms reporting acreage, production, and value, 1839-1949; specified vegetables, farms reporting and acres, 1909-49.

Data for geographic regions, divisions and States show: value of all crops sold, 1949; farms reporting corn, sorghum, wheat threshed, winter and spring wheat threshed by acres harvested and by quantity sold, 1949, durum or macaroni and other spring wheat threshed, acreage of oats for grain, acreage and production of oats threshed, oats cut for feeding unthreshed and oats threshed, barley or rye threshed, buckwheat threshed, also threshed emmer and spelt, flaxseed, mixed grain, rice, other grains, soybeans, cowpeas, peanuts, peanut vines or tops saved for hay or forage, peanuts harvested for picking or threshing, velvetbeans, dry field and seed beans harvested for beans, dry field and seed peas harvested for peas, all hay (excluding specified annual legume and sorghum hay), alfalfa cut for hay or dehydrating, clover or timothy (alone or mixed) and lespedeza and small grains cut for hay, other hay, wild hay, hay or grass silage and pasture receipts; alfalfa seed, lespedeza and sweetclover seed, red clover seed and timothy seed; miscellaneous clover, grass and other field seed crops; cotton, tobacco, popcorn, broomcorn, sugarcane or sorghum for sirup, sugar beets harvested for sugar, sugarcane for sugar and for seed, Irish potatoes and sweetpotatoes, root and grain crops hogged or grazed, root crops for feed, and pumpkins for feed, miscellaneous field crops, vegetables grown for home use, and vegetables harvested for sale, specified vegetables harvested for sale, and miscellaneous vegetables harvested for sale.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. VIII. Fruits, Nuts, Horticultural Specialties, Forest Products. 141 p. 65 cents.

Presents statistics for berries and other small fruits; for tree fruits, nuts, and grapes; for horticultural specialties; and for forest products taken or cut on farms. Totals, for each crop or item, usually are presented for the United States, for three geographic regions, nine geographic divisions, and for each of the 48 States and the District of Columbia.

United States data are given for: farms reporting acreage and value of fruits and nuts and horticultural specialties, 1840-1950; farms reporting, acreage, quantity harvested, and value of berries and other small fruits, 1899-1949; quantity harvested and value of tree fruits, nuts and grapes, 1840-1950; area, and value of sales of

Vol. II. General Report—Continued

horticultural specialties, 1899-1949; quantity and value of forest products of farms, 1849-1949.

Data for geographic regions, divisions and States present: value of fruits and nuts sold, 1950, 1945, and 1940; farms reporting, acreage and quantity of berries and other small fruits harvested; land in fruit orchards, vineyards, and planted nut trees, farms reporting and acres; farms reporting, apples, peaches, pears, cherries (sour and sweet), and plums and prunes, apricots, nectarines and quinces, figs, oranges, grapefruit, lemons and limes, number of trees. Peach and apple trees of bearing age, not of bearing age, and quantity harvested, classified by number of trees of bearing age; farms reporting grapes, number of vines, and quantity harvested, and value. Also data for pecans; almonds, filberts, walnuts; tung nuts and miscellaneous orchard fruits and nuts; farms reporting area and value of sales for horticultural specialties; value of specified forest products cut or produced on farms, value of all forest products sold; farms reporting and quantity of specified forest products cut; farms reporting number of maple trees tapped and quantity of maple sirup and sugar. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. IX. Value of Farm Products. 91 p. 50 cents.

This chapter presents data on the total value of farm products sold, classified by source of income. The statistics are presented as totals for the United States, three major regions, nine geographic divisions, and for all States.

Data show: farms reporting sales of farm products, and value of sales, by major sources; value of: all crops sold, by major groups; and all livestock and livestock products sold, by major groups, Censuses of 1950, 1945, and 1940; specified field crops and specified livestock and livestock products sold, 1949; number of farms by value of sales groups, 1950 and 1945.

The introduction and appendix from Volume II are included in this report.

Ch. X. Size of Farm. 205 p. \$1

Presents statistics for farms classified by size as measured by the total land area in the farm. The data include such items as: number of farms, all land in farms, value of farm land and buildings (averages only), land use, specified characteristics of farm operators, specified farm facilities and equipment, farm labor, specified farm expenditures, principal classes of livestock, major crops, and sales of farm products.

Statistics are presented as totals for the United States, for three major regions, nine geographic divisions, and for each of the 48 States. Data in the chapter include comparative data from earlier censuses for number of farms, land in farms, land use and average value of land and buildings.

Data for the United States show: farms classified by acres of improved land, 1870 and 1860; number of farms—under 3 acres in size, percent of all farms, minimum value of products, and index numbers of prices received by farmers; those under 10 acres in size with land in farms, and by size of farm, 1880-1950; all land in farms by size of farm, average value of farms (land and buildings), per farm, per acre, by size of farm, and specified classes of land in farms, according to use, by size of farm, 1900-50; farms and farm characteristics by size of farm, 1950.

Data for geographic regions, divisions and States present: average acreage per farm based on all land in farms, 1850-1950; number of farms, all land in farms, value of farms, 1950, 1945, and 1940, and specified classes of land according to use, 1949, 1944, and 1939; number of farms by size of farm, 1880-1950. Percent distribution of farms, all land in farms and average acreage per farm, by size of farm, average acreage of cropland harvested per farm reporting and percent distribution of total land pastured, by size of farm; farms reporting other income of family exceeding value of agricultural products sold, with percent of farms reporting in each size of—farm group, operators reporting off farm work of 100 days or more, with percent of operators reporting in each size-of-farm group, 1950.

Similar data for 1950 are shown for farms reporting: telephones, electricity, milking machines, grain combines, corn pickers, pick-up hay balers, silos, motortrucks, automobiles, tractors, no tractor, horses or mules, tractor and no horses or mules, cattle and calves, all cows, hogs and pigs, chickens four months old and over, corn for all purposes, wheat threshed, land from which hay was cut, family workers, hired workers; expenditures for machine hire and hired labor, feed for livestock and

Vol. II. General Report—Continued

poultry, livestock and poultry purchased and gasoline and other petroleum fuel and oil; value of farm products sold and selected farm characteristics by farm size groups.

The introduction includes sources of data, presentation of statistics, other published data, classification of farms by size, history of classification of farms by size, and size of farm as a measure of enterprise.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XI. Color, Race, Tenure of Farm Operator. 269 p. \$1.25.

Presents statistics for farms by color, race, and tenure of the farm operator. Statistics are presented as totals for the continental United States, for three major regions, nine geographic divisions and for each of the 48 States and the District of Columbia.

Data for the United States show: tenure classes included in the reports for each census, with the number of farms in each class, 1880-1950; number, acreage and value of farms, by color and tenure of operator, 1950; average value of farms (land and buildings), by color and tenure of operator for the United States and the South, 1900-50; specified classes of land in farms according to use, by color and tenure of operator, 1900-50; commercial and other farms, by color and tenure of operator for the United States and the South, 1950; owned and rented lands, by tenure of operator, 1925-50; land rented from others and land rented to others, by class of tenant, 1950; part owners and tenants related to landlord, 1950 and 1930, and part owners and tenants with landlord living on a farm, by color and class of tenant, 1950; tenants related to landlord for the North and West, 1950, 1930 and 1925; full owners with grazing permit, for specified States, 1950; number of nonwhite farm operators and land in farms, by race, 1900-50; and by race and tenure, 1930-40.

Data for geographic regions, divisions and States show: number of farms, land in farms, and cropland harvested, 1950, 1945 and 1940, with specified classes of land according to use, and value of farms, 1950, by tenure of operator (color and tenure for the South); owned and rented lands by tenure of operator, 1950; farms and land in farms of negro operators, classified according to use; farms of nonwhite operators other than negroes—farms and land in farms classified according to use; average value of land and buildings per farm and per acre, by tenure of operator, 1950; farms reporting cropland, crops harvested and land pastured, average acreage by tenure of operator, 1950; commercial and other farms reporting other income of family exceeding value of agricultural products sold, and operators of commercial and other farms reporting off-farm work of 100 days or more, 1950. Commercial and other farms reporting specified farm facilities, equipment and products, family workers, hired workers, and selected expenditures; and value of farm products sold with average per farm reporting, by tenure of operator. Also includes selected characteristics of commercial farms operated by: full owners, part owners, managers, all tenants, cash tenants, share-cash tenants, crop-share tenants, livestock-share tenants, croppers, and percent distribution of commercial farms, by size of farm for each tenure group, 1950.

The introduction includes sources of data, presentation of statistics, a discussion of other published data, history of census classifications by color and tenure of farm operator, and definitions and explanations of terms used.

The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XII. Economic Class of Farm. 165 p. 75 cents.

Characteristics of farms and farm operators by economic class of farm. There are no comparative figures by economic class of farm for earlier census years. Statistics presented here are for the United States, three major regions, nine divisions and the 48 States.

Farms and farm characteristics by economic class are shown for the United States. For geographic regions, divisions and States, data by economic class are shown for: number of farms, average value of land and buildings, land in farms; farms reporting—cropland harvested, and acreage, land pastured and total acreage, other income of family exceeding value of agricultural products sold for operators of commercial and other farms, and off-farm work of 100 days or more with percent of operators reporting in each economic class group; and farm operators, 65 years old and over. Commercial and other farms reporting specified farm facilities and equipment; acreage on commercial and other farms of corn for all purposes, wheat threshed, and land from which hay

was cut; family workers, hired labor, expenditures for—gasoline and other petroleum fuel, machine hire, hired labor, feed for livestock and poultry, livestock and poultry purchased; value of all farm products sold with average per farm reporting, and percent distribution by economic class. Percent distribution of number of farms, by size of farm and by tenure of operator for each economic class group; selected characteristics for each economic class of farm and part-time, residential and abnormal farms; and number and percent distribution by tenure of operator for part-time, residential and abnormal farms.

The introduction gives sources of data, presentation of statistics, basis of classification and definitions and explanations used. The introduction and appendix from Volume II are included in this preprint chapter.

Ch. XIII. Type of Farm. 185 p. \$1.

Data are presented far farms and farm characteristics by type of farm, for the United States. For the geographic regions, divisions and States data are shown for: number of farms by type; average value of land and buildings per farm and per acre, land in farms by type of farm; farms reporting cropland harvested, land pastured, and acreage by type of farm; operators of commercial and other farms reporting, other income of family exceeding value of agricultural products sold, work off farm 100 days or more, with percent of operators reporting in each type-of-farm group; commercial and other farms reporting specified farm facilities and equipment, with percent of farms reporting in each type of farm group; number and percent distribution by type of farm for cattle and calves, cows, and number of chickens 4 months old or over; acreage on commercial and other farms of corn for all purposes, wheat threshed and land from which hay was cut, with percent distribution by type of farm. Similar data are shown for: family workers, hired workers, expenditures—for gasoline and other petroleum fuel and oil; for machine hire, hired labor, feed for livestock and poultry, for livestock and poultry purchased; value of all farm products; also, percent distribution of number of farms by size of farm, by tenure of operator, and by economic class for each type-of-farm group; selected characteristics for each type of farm (cotton, field crop, vegetable, fruit and nut, dairy, poultry, livestock other than dairy and poultry, general, miscellaneous and part-time farms).

The introduction and appendix from Volume II are included in this preprint chapter.

Volume III, *Irrigation of Agricultural Lands*, comprises 18 separate State reports with statistics for counties and drainage basins, and a United States summary report. These reports are combined in a final volume. Volume III bulletins supersede reports in Series IR50-1.

Vol. III. Irrigation of Agricultural Lands (*States*)¹

v. p., tables, maps, charts.

Data cover: enterprises, irrigation works, farms and acreage irrigated, investment, water used, and cost. Includes an irrigation summary, 1890 to 1950 for: farms, number and acreage, number irrigated, irrigated acreage reported by farms and irrigation enterprises and total capital investment in irrigation enterprises. Characteristics of irrigation enterprises—number, type, total land irrigated, acreage irrigated by type of enterprise and by source of water, irrigation works, capital investment, total, and by type of enterprise. Data for 1949 on: enterprise characteristics; use of surface, ground, pumped and stored water; source of surface water; drainage of irrigated land; irrigation works (1950); season of irrigation; capital investment, 1950 and 1940 and indebtedness (1950); cost of water to farms and quantities of water reported, 1949. Complete system irrigation enterprises by surface, ground, gravity and pumped water; and by acreage irrigated.

Volume IV, *Drainage of Agricultural Lands*, supersedes Series DR50-1, and includes in the one book, the State reports with statistics for counties and a summary for the United States.

Vol. IV. Drainage of Agricultural Lands¹

326 p., tables, charts, maps, appendix. February 1953. \$1.50.

Data on land in enterprises, number and types of enterprises, cost of drainage, indebtedness, assessments and drainage works, for the 30 drainage-district States and the 10 county-drain States, and a summary chapter for the 40 States.

The introduction includes a history of the census of drainage, the legal basis for the 1950 Census of Drainage, the scope of the censuses of drainage and other related material. The appendix shows the drainage questionnaires used for the County-Drain States (D1) and the District-Drain States (D2); instructions for the D1 and D2 enumerators; a County List of Enterprises (Forms 702-11); and a letter to State auditors.

Volume V comprises 10 special reports by subject. Part 1 of Volume V, *Horticultural Specialties*, issued in 1952, replaced the preliminary Series HS50-1-4, and the United States summary, *Horticultural Specialties*, issued earlier.

Vol. V. Special Reports¹

v. p., tables, charts, maps, appendix.

Pt. 2. Multiple-unit Operations. 492 p. \$2.25.

The report presents statistics for specified counties and State economic areas in 13 southern States, and Missouri, on: multiple-unit operations compared with farms not in multiple units, for the multiple-unit area, and specified data for the multiple-unit area compared with State and United States totals; number of landlord-tenant and multiple-unit operations by States and economic areas; specified averages for all farms, multiple units and farms in or not in multiple units; percentage of all farms, multiple units, and farms not in multiple units reporting specified items; also percentage of all cropland harvested; multiple-unit operations by—size of unit, with percent of cropland harvested by specified crops; color and tenure of operator; type of farm; acres of cropland harvested; number of subunits; kind of tenant in landlord-tenant operations.

The introduction includes the history of census enumeration of multiple units; description of questionnaire used; enumeration of land in more than one enumeration district or county, and a description of office procedure in connection with the enumeration. Maps illustrated the use made of acreage in farm multiple-unit operations. The appendix shows a reduced facsimile of an agriculture questionnaire typical of those used in the multiple-unit areas (Georgia); a reduced facsimile of a 1950 Landlord-Tenant Operations Questionnaire, and the Instructions to Enumerators including a list of the States and counties in the multiple-unit area.

Vol. V. Special Reports—Continued

Pt. 3. Ranking Agricultural Counties. 69 p. 40 cents.

Presents statistics for selected items of inventory and agricultural production for the leading counties in the United States. Gives for the 100 leading counties, in each instance, the quantity and value of leading classes of livestock on farms and of poultry and poultry products sold; field crops harvested; vegetables harvested for sale, excluding Irish and sweet potatoes; and of all fruits, nuts and horticultural specialties sold, Censuses of 1950 and 1945.

A summary table presents the quantity and value of specified items of livestock and livestock products, field crops harvested, vegetables harvested for sale and fruits, nuts and horticultural specialties: United States totals, total, and percent of United States total, for the 100 leading counties in 1950; the name of the county, the county total and the percent of the United States total. Maps show the distribution of most of the products for the Census of 1950.

Pt. 4. Land Utilization; A Graphic Summary. 64 p. (no tables) 45 cents.

Presents graphically, some significant facts regarding uses being made of agricultural lands both inside and outside farm boundaries. It provides a graphic summary of changes and developments in the use of agricultural lands during the past half century.

Uses of land in the United States; land use by farm production regions and States; factors affecting land use—physical conditions, population changes, and distribution; agricultural technology and other forces; public and nonfarm private land, farms and the farm area; farm land development; land used for agriculture—cropland and classes of crops; principal crops and specified classes of livestock, pasture and grazing land, and woodland and forest. The maps and charts are accompanied by explanatory text.

Land use in the Territories and possessions: Alaska and Hawaii—physical conditions and land use, and farms, farm land, principal crops and livestock. Puerto Rico—uses of land and specified crops harvested and their relative importance in acreage. Graphic material is not included for the possessions. This report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 5. Farm Tenure; A Graphic Summary. 95 p. 65 cents.

Presents graphically, significant facts for the various forms of tenure under which farms are held and operated and summarizes changes in farm tenure for the United States and its geographic regions since 1900. The report comprises three sections: (1) Quantity, value, and method of holding farm land; (2) Farm production—quantity and value of products (crops, livestock, and livestock products) sold; (3) Income, security and personal attributes of farm people. A guide to items on farm tenure is also included. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 6. Agriculture 1950; A Graphic Summary. 108 p. (no tables) 65 cents.

This report summarizes, in brief, statistics published for the 1950 Census of Agriculture, and describes farm resources—farms and farm land, characteristics of farm people, livestock, farm power, equipment and roads; farm production—crops, livestock production, all farm products sold; organization and use of agricultural resources—size of farm, color and tenure of operator, economic class of farm, and type of farm; changes in agriculture from 1900–50; number and size of farms, color and tenure of operator, land in farms, cropland harvested, pasture land, irrigated land, drained land, value of farm property, farm work power, farm transportation, mechanization of farm operations and farm electrification, farm population; migration from farms, agricultural workers, farm exports, use of cropland, crops, and livestock and dairy products. The maps and charts are accompanied by explanatory text. The report is a cooperative study by the Bureau of the Census and the Bureau of Agricultural Economics.

Vol. V. Special Reports—Continued**Pt. 7. Irrigation 1950; A Graphic Summary. 35 p. 35 cents.**

Presents graphically, significant facts regarding agriculture in irrigated areas, and the characteristics of irrigation enterprises and irrigated farms as indicated by the 1950 Censuses of Agriculture and Irrigation.

Irrigated farms, irrigated land by drainage basins; irrigation and land use in the 17 Western States; irrigation enterprises—number, and acreage irrigated by type (single-farm and multi-farm, incorporated and unincorporated mutual, commercial, district, United States Bureau of Reclamation and U. S. Bureau of Indian Affairs); types of enterprise by States, interrelationship and size of irrigation enterprises, irrigation works and equipment, capital investment, and indebtedness and arrearage. Types and source of irrigation water; storage; measurement and cost of water to farms; and irrigation by sprinklers. Use of land in irrigated farms in 1949; size and value of irrigated farms; farms wholly irrigated, partly irrigated; and irrigated and nonirrigated crops. The maps and charts are accompanied by explanatory text.

Pt. 8. Farm-Mortgage Debt; A Cooperative Report. 40 p. 30 cents.

Presents farm-mortgage indebtedness for farms classified by tenure of farm operator, and continues a series of cooperative reports covering farm mortgage indebtedness for each census year from 1930, mortgage data for earlier censuses and the comparability of 1950 mortgage data with those for earlier census years. For farm-mortgage debt in the United States total debt is shown; also number of mortgaged farms, debt and equity per farm, acreage in mortgaged farms, value of mortgaged farms (land and buildings), debt held by principal lenders and interest rates.

Data are presented for the United States on the number, acreage, and value of farms free from mortgage, and mortgaged farms by tenure of operator, 1930-50; and total outstanding mortgage debt, also loans held by principal lenders, census years 1910-50; data for geographic regions, divisions and States show all mortgaged farms, mortgaged farms operated by full owners, by part owners, by tenants and managers, each for 1930-50; and total outstanding farm-mortgage debt, and loans held by principal lenders, January 1, 1950 and 1945. Data in this report were prepared jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 9. Economic Class and Type of Farm; A Graphic Summary. 69 p. 40 cents.

Presents graphically some of the data showing the organization of agriculture, particularly by economic class of farm. For commercial farms, by economic class: percent distribution by size, by tenure of operator, and by type; percent distribution of total value of all farm products sold, of the number of farms, land in farms, number of cows, value of all farm products sold, and number of farm workers, and of the major uses of land. Also for commercial farms, by economic class: yield per acre of specified crops; specified expenditures per dollar of farm products sold; percent of farms reporting telephone, electricity, electric hot-water heater, home freezer, electric washing machine, and average of last monthly electric bill; and percent of farms reporting tractors, motortrucks, and automobiles, by age of newest model.

For all farms, by economic class: number reporting irrigation and acreage of land irrigated; age of operator (percent under 25 years of age and percent 65 years of age and over); percent of farm operators reporting that other income of family exceeded value of agricultural products sold; and off-farm work (percent of operators reporting specified number of days of off-farm work).

Also shown graphically are counties classified by major source of income, type-of-farming areas (based on type accounting for 50 percent or more of commercial farms), number of farms by type, multiple-unit operations, acreages of various crops harvested, and products sold. This report was prepared jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Pt. 10. Farms and Farm Characteristics by Economic Subregions. 85 p. 50 cents.

Presents a summary for selected items from the 1950 Census of Agriculture by 119 economic subregions, and also statistics for economic class and type of farm for 19 economic areas located in the principal type-of-farming areas of the United States.

The report presents data on the number of farms classified by type, by economic class, and by size of farm, by tenure of operator, farm operators classified by age, and color or

race, years on farm, and off-farm work, equipment on farms, and farm expenditures ; selected crops harvested, number of livestock and value of farm products sold, by source.

The introduction includes a description of the sample for the 1950 Census, and the adjustment of the sample ; the reliability of the sample ; method of estimation ; and large-farms. Describes the presentation of statistics for State economic areas and economic subregions.

1-10.1. 1950 CENSUSES OF AGRICULTURE, POPULATION, AND HOUSING**SPECIAL STUDIES****Farms and Farm People¹**

103 p., tables, charts, maps. 50 cents.

A special cooperative study of population, income, and housing characteristics, by economic class of farm. Prepared by the Bureau of the Census, U. S. Department of Commerce, and the Bureau of Human Nutrition and Home Economics and the Bureau of Agricultural Economics, U. S. Department of Agriculture, for the purpose of bringing together data to show characteristics of the farm operator families, their housing, and other items, such as amounts and sources of family income by selected farm characteristics, including economic class of farm and net cash income of farm families.

Low production farms : by economic class of farm, age of operator, days of off-farm work and occupation, and tenure of operator ; schooling of farm operator, kind of road on which farm located and distance to trading center, by number of days of off-farm work of operator.

Income of farm operator families in 1949 : distribution of farm operator families, rural-farm families, and all families, by total money income in 1949 ; percentage of farm operator families reporting income from various sources, by economic class of farm ; value of farm products sold, farm expenditures, and income of farm operator and other family members by source, by economic class of farm.

Population in farm operator households : by economic class of farm, age, sex, and color ; marital status and median years of school completed of farm operator ; dependency ratios and fertility ratios for farm-operator households, by economic class of farm.

Housing facilities and equipment, and home food-production practices of farm operator families : family and housing characteristics and equipment for commercial and other farms, by family income, by tenure of operator ; home food-production practices and family and farm characteristics of commercial and other farm operators, by presence of home gardens (with by race in the South).

See descriptive text for Report on Cotton Ginning (below).

A/C-O-ICG Report on Cotton Ginning. Preliminary

Eleven releases during season with an additional end-of-season report (see above) issued in March of the following year. Each report 1 p., table. January 16, August 16–December 13, 1953.

Number of bales of cotton ginned from the season's growth prior to specified date, comparative statistics, corresponding date for two preceding years for 18 named cotton-growing States ; United States summary figures on consumption, stocks, imports, and exports of cotton also given. Quantity shown in running bales.

NOTE.—A post card duplicate of this report is available about a week later than the mimeographed release upon application to the Bureau of the Census.

Consolidated Cotton Report

1 p., table. 5 monthly reports, each year, August-December. August 10, September 8-December 8, 1953.

Statistics on ginning (running bales), indicated total production (bales, 500 pounds gross), condition (percent of normal), indicated acres left for harvest, and indicated yield of lint cotton (pounds per acre for harvest), for first of each month in which report is released. Issued jointly by the Bureau of the Census and the Bureau of Agricultural Economics.

Cotton Ginned From the Crop of 1952. Press release

1 p., table. May 6, 1953. Annual.

Cotton ginnings from the 1952 crops, with comparative figures for 1951 and 1950. Quantities shown in running bales and equivalent 500-pound bales, for 18 named States and the United States totals. Linters are not included.

Cotton Ginned Prior to (specified date) in (specified State): Crops of 1952 and 1951; Crops of 1953 and 1952

Eleven releases during season. p. 1-2, table. January 30, March 24, 1953 (Crops of 1952, 1951); September 15-December 1, 1953 (Crops of 1953, 1952).

Reports are released pertaining to five specified dates during each cotton-ginning season, with an additional end-of-season report. They contain preliminary figures by counties for cotton, ginned from the year's crop prior to the specified dates, with comparative figures for the previous year's crop. Ten States are covered by separate reports, with an additional report for "Specified States" (all other cotton-growing States, see below). Quantities are in running bales, not including linters.

Cotton Production and Distribution; year ending July 31, 1952 (Bulletin 189)¹

75 p., tables, charts. June 1953. Annual. 25 cents.

Summary of available cotton statistics for the year ending July 31, 1952 and previous years. Figures show for the United States: supply and distribution of cotton and linters; cotton production; consumption and stocks of cotton and linters and active cotton spindles; United States exports by country of destination, and imports by country of origin of cotton and linters; cottonseed and cottonseed products, crushings, production, shipments, average yield, exports and imports of cottonseed oil, cake and meal, and world production, consumption and stocks of cotton, by country. Figures since 1870 are in running bales, previous to then in 500-pound gross bales. Foreign cotton is shown in equivalent 500-pound gross bales.

Figures in this report are taken from the Facts for Industry reports, M15-1, M15-3, M17-1, M17-2 (see section 5-2), the Foreign Trade Division reports FT 110 and FT 410 (see section 3-4 and 3-5), and the Agriculture Division reports on cotton ginning.

Cotton Production in the United States: Crop of 1952¹

36 p., tables. July 1953. Annual. 15 cents.

Comparative summary of United States production of cotton and linters, crops of 1899-1952; State data on production and ginnings of cotton, with percentages and rank, production of linters, and cotton ginned prior to specified dates during the season, 1949-52; and on percent of total cotton ginned prior to specified dates, average gross weight of the several kinds of bales, and number and gross weight of upland

2. BUSINESS DIVISION

Complete Censuses of Business were taken for the years 1929, 1933, 1935, 1939, and 1948. Those for 1929 and 1939 were taken as part of the 1930 and 1940 Decennial Censuses; those for 1933 and 1935 were special projects.

Current reports are issued monthly showing national estimates of the dollar volume of retail sales and trends in retail sales and wholesale sales and inventories. An annual retail survey is taken from which will be produced national estimates of the dollar volume of inventories, the ratio of sales to inventories and the amount of charge and installment plan receivables as of the end of the year, by kinds of business in the United States. Other reports are issued on special topics, such as the *Canned Food Report* and the report on *Petroleum Products—Secondary Inventories and Storage Capacity*.

2-21. CURRENT RETAIL TRADE REPORT

Advance Report on Retail Trade

2 p., tables. Monthly: November, December 1953.

Issued by the Office of the Secretary of Commerce on the tenth of the month following that covered by the data. Presents advance monthly data on retail sales for major trade groups and for all trades combined, collected from a subsample of the Census Bureau's retail trade reporting panel. Data are shown both unadjusted and adjusted seasonally and for trading day differences.

Monthly Retail Trade Report; Retail Sales¹

11 p., tables, charts. Monthly. Monthly 10 cents. Yearly subscription \$1. (Domestic), \$1.35 (foreign). Monthly: November, December 1952; January–October 1953.

The monthly report includes (1) estimated dollar sales of all retail stores and Group II retail stores (i. e., stores of organizations of 11 or more retail stores), United States by kind of business, current month, and each month of the previous 12-month period, including the comparative figure for the current month a year ago, sales for the year to date and for the corresponding period of the preceding year; (2) percentage change in sales for current month from the same month a year ago and from the preceding month, and year-to-date from the like period a year ago for all retail stores, the United States by kind of business; for "large" retail stores of organizations of 1 to 10 stores, the United States and 28 named Census Sample Areas, by kind of business; and for selected cities and Census Sample Areas for all kinds of business combined. The January 1953 issue includes the 12-month accumulated sales for 1952 and 1951, in total for all retail stores and for Group II stores by kind of business.

3. FOREIGN TRADE DIVISION

Statistical data on United States exports and imports of merchandise and of gold and silver are collected from shippers' export declarations and import entries. These forms are filed by exporters and importers with Collectors of Customs and transmitted to the Bureau. The statistics compiled include information on the dollar value and net quantity (bales, square yards, gallons, etc.) of United States exports and imports by commodity, country of destination and origin, customs districts through which merchandise enters and leaves the United States; trade with United States Territories and possessions. The data also show the shipping weight and dollar value of vessel imports and exports, domestic to foreign port of routing, of shipments by vessel, the nationality of the carrier, for shipments by vessel, and the number and tonnage of vessels entering and clearing port in the foreign trade of the United States.

Monthly and quarterly figures are preliminary and subject to revision. Preliminary annual data are available in annual reports for most series of monthly reports. All data for the year are summarized in the final report, *Foreign Commerce and Navigation of the United States*, latest issue, 1946.

Effective with the statistics for July 1953, export shipments individually valued from \$100 to \$499 (about 4 to 6 percent of total export value) and import shipments individually valued at under \$100 reported on "formal entries" (about 0.1 of 1 percent of total import value) are estimated by sampling. These sampling procedures were instituted in order to achieve economies in the compilation of United States foreign trade statistics, and to free resources for the inclusion of importations made on informal entries in the import statistics. A more detailed discussion of the sampling procedures used in the export and import statistics is given in reports presenting detailed statistics and in the September 1953 issue of *Foreign Trade Statistics Notes*. The data presented in Reports FT 800, FT 810, FT 2401, and FT 2402 have not been subjected to sampling procedures.

3-10. FOREIGN TRADE AND SHIPPING STATISTICS REPORTS ON A COST BASIS

A number of reports containing information not shown in the regularly published foreign trade statistical reports are specially prepared for subscribers on a cost basis.

Recurring cost reports for which arrangements have been made for preparation in 1953 are listed below together with the annual cost of each. When there is more than one subscriber to a report, the total cost is divided among the subscribers. No refunds are made if new persons subscribe to a recurring monthly report during the period of the report. The cost to new subscribers is established at the beginning of the annual period.

In addition to recurring monthly reports, there are listed below new one-time reports covering specified periods with the total cost of the report indicated. These reports are usually typed, or in manuscript form, while a few are processed.

Persons interested in subscribing to any of these reports should write to the Foreign Trade Division, Bureau of the Census, Washington 25, D. C.

4. GOVERNMENTS DIVISION

The Governments Division collects data and prepares reports showing current and bench mark statistical data relating to the characteristics and functions of State and local governments and their administration in the United States. In current reporting, primary attention is given to public finance (revenue, expenditure, debt, and enterprise finances), and public employment (number of employees and amount of payroll). A two-page release entitled "*Census Bureau Publications on Governments, as Scheduled for the Fiscal Year 1954*" is available upon request.

During the past century, a Census of Governments has been taken at 10-year intervals—most recently for 1942—providing more complete and detailed information on State and local governments than is reported currently. Public Law 767 of the 81st Congress, approved September 7, 1950, requires that such a census be taken for the year 1952 and thereafter at 5-year (rather than 10-year) intervals. However, funds for taking the 1952 Census were not made available by the Congress.

4-1. STATE FINANCES

G-SF52 State Finances: 1952

No. 1. Summary of State Government Finances in 1952¹

21 p., tables, charts. April 1953. Annual. 15 cents.

4-5. GOVERNMENTAL FINANCES

G-GF52 Governmental Finances in the United States: 1952
Summary of Governmental Finances in 1952¹*34 p., tables, charts. November 1953. 20 cents.*

This report replaces previous separate annual Census reports on *Governmental Revenue and Governmental Debt* and also presents expenditure data, supplying national totals on governmental finances as follows: (a) Statistics for the fiscal year 1952 for Federal, State, and local governments, with local amounts by type of government (county, city, township, school district, and special district), as to revenue by source, expenditure by character and object and by type and function, and debt outstanding by term and character of liability; (b) by level of government (Federal, State, and local), statistics as to tax revenue by type of tax for 1942 and each year 1945 to 1951, outstanding debt for selected years since 1902, percent distributions and per capita amounts of revenue, expenditure, and outstanding debt in fiscal 1952, and intergovernmental expenditure by function in fiscal 1952; (c) statistics for State and local governments for fiscal 1952 as to cash and security holdings by type and by purpose of holding (with detail by type of government), issuance and retirement of debt, and expenditure for personal services and for construction by function.

Text includes supplementary statistical detail for some tabular data, definitions of terms, discussion of concepts, sources, and derivation of data, and reference to other Census statistics on governmental finances and their relationship to figures given in this report.

4-6. SPECIAL REPORTS

G-SS State and Local Government Special Studies**No. 30. Retirement Coverage of State and Local Government Employees²***12 p., tables, chart. March 1953. 10 cents.*

Special study of number of State and local government employees covered by retirement plans. Tables provide number and percent of employees covered by State or local retirement plan, Federal old-age and survivors insurance plan, and with no retirement coverage. Figures are shown for education and nonschool employees, by State, showing both State and local government numbers.

This report is based upon a survey conducted by the Bureau of the Census for the Bureau of Old-Age and Survivors Insurance of the Social Security Administration, Department of Health, Education, and Welfare.

No. 31. Governments in the United States in 1952¹*49 p., tables, charts. May 1953. Annual. 30 cents.*

Tables show, for each State, the total number of governmental units by type; number and population of municipalities, counties, and townships, by population size group; number and pupil enrollment of school districts, by enrollment size group; and number of special districts, by function. The number of governmental units is also shown by county area.

The text describes criteria used in classifying governmental units and the procedure used in preparing this report.

No. 32. Revised Summary of State Government Finances, 1942-1950¹*71 p., tables, chart, appendix. 35 cents.*

The classification structure applied in Census Bureau reporting on governmental finances was recently revised extensively, effective with reports of fiscal 1951 data. The new structure provides some financial information not available from the former framework of Census reporting and takes account of certain relatively recent changes in functional responsibilities of State and local governments. However, until release

No. 32. Revised Summary of State Government Finances, 1942-50—Continued

of the present report, the shift has resulted in noncomparability of Census statistics on State finances for 1951 and later years with data published for earlier years. This publication, therefore, is intended to meet widespread demands for historically consistent financial data on State governments.

Tables show, for alternate even-numbered fiscal years 1942-1950, national totals of State government finances, with per capita figures (1942, 1950, and 1952) and percent change (1942 to 1952) in the major items of State finance. The amounts are also presented, State by State, for the same items and for the same fiscal years.

Revenue items are shown by total, general revenue, liquor stores revenue (where applicable), and insurance trust revenue. General revenue from taxes is shown by type of sales and gross receipts tax, type of license tax, individual income, corporation net income, property, death and gift, severance, and other; intergovernmental revenue is shown by source, and separate figures are given for charges and miscellaneous general revenue. Insurance trust revenue is shown by employee retirement, unemployment compensation, and other.

Debt outstanding at end of fiscal year is shown by total, long-term (full faith and credit; nonguaranteed), short-term, and net long-term by total and by full faith and credit only.

Expenditure figures are shown by total and by character and object, with separate figures for general expenditure by function.

5. INDUSTRY DIVISION

Current statistics on commodity production and shipments are issued in the *Facts for Industry* series. This series of releases makes available to manufacturers, trade groups, and other users of industrial data, current figures that are useful in their day-to-day operations and forward planning. The current reports also present an accurate picture of industrial trends over a period of time.

Annual surveys of manufactures have been taken each year since 1949. They cover a sample of manufacturing establishments and bring up to date the statistics on employment, earnings, man-hours, value added, inventories, expenditures for new plant and equipment, and classes of products, which are shown in more detail in the quinquennial Census reports.

The Census of Manufactures, first taken in 1810 and now quinquennial (last taken for 1947) provides detailed data on manufacturing by geographic areas, by industries and by subjects.

5-2. FACTS FOR INDUSTRY

In the numbering of the Facts for Industry series, the letter "M" is used for Manufactures, the first two digits represent the group classification at the two-digit level of the Standard Commodity Classification, and the specific survey is shown by the letter following the group classification numbers.

Annual data are available in annual reports for most series of monthly or quarterly reports. In addition there are reports which are issued on an annual basis but are not a summary of the data appearing in any monthly, quarterly or semi-annual series.

M13A Hardwood Plywood²

5 p., tables, appendix. Quarterly and annual summary. Quarterly and annual, 10 cents. Yearly subscription including annual summaries (separate summaries for veneer and plywood published for 1952), 50 cents. Hardwood Veneer summary 1952, 4 p., tables; Hardwood Plywood summary 1952, 5 p., tables, appendix. Quarterly: Third quarter, Fourth quarter, 1952; First quarter, Second quarter, 1953.

Hardwood plywood production by type of core and by geographic region, by type of core and by face species; consumption of veneer and core lumber in the fabrication of hardwood plywood, by origin of material; consumption and stocks of glue at hardwood plywood mills by type of glue, data for current quarter, preceding quarter and same quarter preceding year. Production of hardwood plywood (except package and container) by plant class, and by type of core, current quarter.

Summary for 1952 gives production of hardwood plywood by type, by core, by geographic region; hardwood plywood (except container and packaging type) by type, by core and by face species; production by type of core of non-wood-face plywood, each for 1951 and 1952. Consumption of core lumber in the manufacture of hardwood plywood, July-December 1951, and 1952; consumption of glue, 1951, and 1952; and stocks (at hardwood plywood plants) of glue, by type, March 31 and December 31, 1951, and December 1952.

NOTE.—Data for hardwood veneer production were discontinued on a quarterly basis after the second quarter 1952. They will be issued on an annual basis beginning with the annual report for the calendar year 1952.

M13B Softwood Plywood²

2 p., tables. *Monthly and annual. Monthly or annual, 10 cents. Yearly subscription including annual summary, 50 cents. Summary, 1952, 5 p., tables. Monthly: November, December 1952; January–August 1953.*

Production, shipments and consumption, and stocks of softwood plywood; consumption and stocks of logs, current and preceding month and same month preceding year; consumption and stocks of glue, current and preceding month. Summary for 1952 presents data by months, 1952 and 1951, by years, 1947–50; production and end-of-year stocks of softwood plywood and consumption and stocks of logs for California, Oregon, and Washington, 1952 and 1951. Published since 1941.

M13C Red Cedar Shingles²

1 p., tables. *Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 2 p., tables. Monthly: November, December 1952; January–October 1953.*

Production, shipments, and mill operations, red cedar shingles and shakes, current and preceding month, same month preceding year. Summary for 1952 gives data by years, 1949–52, and by months for 1952. Published since 1936.

M13G Lumber Production and Mill Stocks: 1951²

12 p., tables, appendix. *May 27, 1953. Annual. 10 cents.*

Lumber production, softwood and hardwood, by geographic region, 1951, 1950, 1949 and 1947; lumber production, softwood and hardwood, by geographic region, by quarters, 1951; lumber production, softwood and hardwood, by geographic region and selected States, 1951; end-of-year sawmill stocks of lumber, softwood and hardwood, by geographic region, 1951, 1950 and 1949; lumber production, softwood and hardwood, by lumber industry region, by quarters, 1951; end-of-year sawmill stocks, of lumber, softwood and hardwood, by lumber industry region, 1951 and 1950; and lumber production by species, 1951, 1950 and 1949, and by region, 1951.

— Lumber Production and Mill Stocks for the Western States: 1952²

6 p., tables, appendix. *December 28, 1953. Annual. 10 cents.*

Total production of lumber by geographic region and selected States, and total sawmill stocks by geographic region, for the western States, 1947 through 1952 except 1948. Production and sawmill stocks for the Douglas fir, Western Pine, and California Redwood lumber industry regions, 1951 and 1952. Production by species, by geographic region, 1952. Appendix discusses coverage, sample design and estimating procedure. Explanatory notes describe the geographic and lumber industry regions used in the report and discuss the standard error of the estimate.

tially, and nonintegrated paper and board mills; receipts, consumption and end-of-month inventories of wood pulp by grade in other than paper and board manufacture, current month. Production of pulp, paper and board; consumption of pulpwood, wood pulp, and other fibrous materials, each by mill classes, current month. Production of paper and board by grades, current and preceding month, same month preceding year. Summary for 1952 gives production of wood pulp and consumption of wood pulp, pulpwood and other fibrous materials used in the manufacture of paper and board by kinds; paper and board production in the United States current year (preliminary) and two preceding years. Published since 1943.

M14D Wood Pulp, Paper and Board: 1951²

14 p., tables. March 24, 1953. Annual. 15 cents. (Included in yearly subscription price of \$1 to M14A, above.)

Receipts, consumption and inventories of fibrous materials in pulp and paper manufacture by kind of materials; of pulpwood by pulpwood regions, 1951 and 1950; base and actual production by major grades of wood pulp, paper and board, 1951 and 1950; wood pulp production, consumption and inventories by grades, 1951 and 1950; wood pulp supply, 1951: production, transfer, shipments (domestic and export) and producers inventories, by grades, paper and board mill receipts, consumption and inventories by grades; receipts at paper and board mills (domestic and imported) by grades; consumption and inventories at integrated, partially integrated and nonintegrated paper and board mills, by grades.

Consumption by mill classes of pulpwood, wood pulp and other fibrous materials, 1951; production of wood pulp by geographic divisions and States, 1951 and 1950 and by grades, 1951; production of paper, paperboard, wet machine board, construction paper and board by geographic division and State, 1951 and 1950; production of paper and board by grades, 1951, 1950 and 1949. Data in this report continue an annual series established by the Bureau of the Census in 1930.

Wood Pulp, Paper and Board: 1952²

12 p., tables. August 28, 1953. Annual. 15 cents. (Included in yearly subscription price of \$1 to M14A, above.)

Data similar to those appearing in the report for 1951, described above, are carried forward one year, except that the tables showing production by grades, by division and State, of paper and paperboard and construction paper and board are omitted. An added table presents figures on receipts, consumption, and inventories of wood pulp in other than paper and board manufacture (1952).

M15-1 Cotton and Linters; Consumption, Stocks, Imports and Exports, and Active Cotton Spindles.² Preliminary

4 p., tables. Monthly, 10 cents. Yearly subscription, including supplement, below, \$1. Monthly: December 1952; January–November 1953.

Cotton (exclusive of linters): average consumed per working day, consumed during current month and same month preceding year and aggregate for both years; on hand (1) in consuming establishments and (2) in public storage and at compresses; and active cotton-consuming spindles; end of current month and of same month preceding year; and totals for each of 18 named States, the New England States, and other cotton-growing States combined. Exports, imports, world supply and distribution.

Linters: consumed by bleachers of linters and by all other consumers, and on hand in consuming establishments, in public storage, at compresses and oil mills. Same period data. Exports and imports. Published since 1912.

Supplement: Supply and Distribution of Domestic and Foreign Cotton in the United States: Season of 1952–1953. Preliminary

1 p., table. August 21, 1953.

Stocks, net imports of foreign cotton, ginnings, city crop, and aggregate supply; net exports of domestic cotton, consumption, adjusted to calendar year, stocks, and aggregate distribution; and excess of reported supply over distribution.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment.

M15-3 Cotton System Spinning Activity.² Preliminary

1 p., table. Monthly 5 cents. Yearly subscription 50 cents. December 1952; January–November 1953.

Cotton system spinning spindles: in place end of current month; consuming 100 percent cotton and consuming other than cotton—active last working day and spindle hours during period; spindle hours operated on all fibers—total hours and average per working day; for each of 13 named States, the New England States, and other cotton-growing States combined. Published since 1912.

M15A Cotton Broad Woven Goods²

p. 9-10, tables, charts. Quarterly and annual summary. Quarterly 10 cents. Yearly subscription including annual summary, 50 cents. Summary 1952, 8 p., tables. Quarterly: Fourth quarter 1952; First quarter–Third quarter 1953.

Includes a comparative summary of production data for broad woven fabrics and for tire cord and fabric by type of fabric, current quarter, preceding quarter, same quarter a year ago and percent change current quarter from preceding quarter and same quarter a year ago. Production of: broad woven fabrics (cotton, rayon and acetate, woolen and worsted except felt, and other fiber) by type of loom on which produced, current quarter; cotton broad woven goods by type of goods and looms operating; cotton, rayon and nylon tire cord and fabric by type of fabric and looms operating; current quarter, preceding quarter, and same quarter a year ago; machinery in place and active by shift and aggregate spindle and loom hours, current quarter and preceding quarter.

M15C Synthetic Broad Woven Goods²

5 p., tables. Quarterly and annual summary. Quarterly or annual 10 cents. Yearly subscription including annual summary, 50 cents. Summary 1952, 6 p., tables. Quarterly: Fourth quarter 1952; First quarter–Third quarter 1953.

Summary of production by class of fabric; rayon and acetate broad woven fabrics, by types; nylon broad woven fabrics; and other synthetic and silk fabrics; current quarter, preceding quarter, and same quarter preceding year, and percent change current quarter from preceding quarter and same quarter a year ago; production of cotton, rayon and/or acetate, woolen and worsted (except felt), and other fibers by type of loom on which produced, current quarter; quarterly production of synthetic broad woven fabrics by type of fabric, and number of looms operating, end of current quarter; machinery in place and active, end of current quarter, and aggregate spindle and loom hours, current quarter and preceding quarter; yarn consumed in the production of the fabrics, and stocks of filament rayon yarn on hand owned by reporting plants; consumption and stocks of synthetic staple fibers, all for current quarter, preceding quarter, same quarter preceding year. Published since July 1943.

M15D Carded Cotton Sale Yarn: 1952²

2 p., tables. May 21, 1953. Annual. 10 cents.

Carded cotton yarn produced for sale by type of yarn, 1951, and by quarters, 1952 with percent change 1952 from 1951. Carding machines, spinning spindles, and twisting spindles in place and active (used in the production of carded cotton yarns) end of quarter, by quarters, 1952. (Final issue in this series.)

M15E Burlap: United States Stocks, December 31, 1951 and 1952²

1 p., table. May 21, 1953. Special report. 10 cents.

Stocks of burlap, spot and afloat, by type of firm and type of burlap (width and weight), December 31, 1951 and 1952.

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment.

M15G Cotton and Synthetic Woven Goods, Finished: 1952²

5 p., tables. August 15, 1953. Annual. 10 cents.

Cotton, silk, and synthetic broad woven goods: summary by type of fabric and finish, 1947 and 1949-52; by type of fabric and type of finish, 1951, and 1952 (preliminary); bleached, dyed, or printed, and finished, by State and type of finish, 1951, and 1952 (preliminary), and by type of fabric and end-use, 1951 and 1952.

M15H Wool Manufactures²

p. 4-8, tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 8 p., tables. Monthly: November, December 1952; January-September 1953.

Woolen and worsted machinery by type of loom or spindle, and by worsted combs: number in place end of current month, and in operation during month, and weekly average hours operated; consumption of shorn and pulled wool of the sheep on woolen or worsted systems; scoured or greasy basis: fibers consumed, by type of yarn, and tops and noils combed, and yarns spun on woolen or worsted systems; weekly average, current and preceding month and same month preceding year and cumulative totals for two years. Much of the data have been published since 1934.

The summary for 1952 presents 1952 and 1951 data on: machinery activity; raw wool consumption; fibers consumed for spinning on woolen and worsted systems; production of tops and noils; yarns spun on wool and worsted systems; and production of woolen and worsted woven fabrics. Production of broad woven goods is given for selected years from 1921-52.

M15K Knit Cloth for Sale: 1952²

2 p., tables. June 24, 1953. Annual. 10 cents.

Shipments of knit cloth for sale, by type of fabric; yarns consumed in the production of knit cloth for sale, by type of yarn, 1952 and 1951; and percent of change, 1952 from 1951.

M15S Tufted Textile Products and Woven and Knitted Cotton Rugs: 1951¹

3 p., tables. March 3, 1953. Special report. 10 cents.

Sales and dollar value of tufted textile products, including tufted robes and bedspreads, and woven and knitted cotton rugs and carpeting; production in pounds and square yards of tufted rugs and carpeting and woven and knitted cotton rugs and carpeting; and consumption of yarns and fabrics used in the manufacture of tufted products and woven and knitted cotton rugs and carpeting by type of fabric. Most of the data are shown for January 1-December 31, 1951 and January 1-June 30, 1952.

M16A Flour Milling Products²

2 p., tables. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary 1952, 4 p., tables. Monthly: November, December 1952; January-October 1953.

Wheat flour production; offal production; wheat ground; daily 24-hour capacity in wheat flour; wheat flour production as percent of capacity and flour extraction rate (percent); current and specified prior months.

Wheat flour production, by 19 named States, other States combined, current and preceding month, and monthly averages for previous years. Rye ground; rye flour produced; and offal produced; current and specified prior months with monthly averages for previous years. Quarterly data on wheat and rye flour stocks held by mills for current and preceding quarters are shown in March, June, September and December reports. Summary for 1952 presents summary data on commercial wheat milling production, 1940-52; by months, by States, and by capacity groups, 1952 and 1951; commercial rye milling production by months 1952 and 1951; and production and mill stocks of wheat flour by quarters, 1947-52. Published since 1923.

M16C Confectionery (Including chocolate products)²

2 p., tables, charts. *Monthly and annual summary. Monthly 5 cents. Annual 10 cents. Yearly subscription including annual summary, 50 cents. Summary, 1952, 4 p., tables. Monthly: November, December 1952; January-October 1953.*

Estimated dollar sales of confectionery and competitive chocolate products by kind of business, by geographic division and specified State; for current and preceding month and same month preceding year, with percent changes; and year to date figures with percent change. Poundage and dollar sales of selected manufacturers—wholesalers and chocolate manufacturers by type of confectionery (package, bar, bulk, and 5¢ and 10¢ specialties), current month, same month preceding year; and cumulative total for two years, with percent changes.

The summary for 1952 presents the poundage and dollar figures mentioned above, by months, 1952.

M17-1 Fats and Oils² Preliminary

p. 5-6, table. *Monthly and annual summary. Monthly 10 cents. Yearly subscription including annual summary, \$2 (includes subscription to the preliminary report M17-2 Fats and Oils; Consumption by Uses, and the summary M17-1.a Fatty Acids). Monthly November, December 1952; January-November 1953.*

Receipts, crushings, end-of-month stocks of raw materials at oil mills; production, shipments and transfers, end-of-month stocks, of primary products, except crude oil at crude oil mill locations, current and preceding month. Factory production, consumption, factory and warehouse end-of-month stocks of primary materials (vegetable oil; animal fats; fish and marine mammal oils; foats, raw and acidulated soap stock), and of secondary products by type, current and preceding month. Receipts, crushings, stocks of cottonseed, and of soybeans at oil mills; production and stocks of cottonseed products, and of soybean products at oil mill locations for 12 to 14 named States, others combined. Published since 1919.

Animal and Vegetable Fats and Oils: 1952¹

89 p., tables. *November 1953. Annual. 40 cents.*

Data for each year, 1952-49, and by months for 1952 (except for exports which are shown by months for 1952 and total for year only) on: (1) receipts, crushings, stocks, and imports of raw materials used in producing vegetable oils, (2) factory production, factory consumption, factory and warehouse stocks, imports, and exports of animal and vegetable fats and oils, and (3) production, shipments, and stocks of oil mill products (other than crude oils) at crude oil mill locations. Additional table shows the distribution of 1952 fatty acid production totals by the old and new fatty acid categories. The new fatty acid classifications were initiated with January 1953 reports.

M17-1.a Fatty Acids: 1952²

2 p., table. *July 21, 1953. 10 cents. (Included in annual subscription to the preliminaries M17-1 and M17-2.)*

Distribution of 1952 fatty acid production data by old and new classifications. Will enable users of the data for fatty acids published in the Facts for Industry, Series M17-1, "Fats and Oils," to develop measures of comparability between the statistical series for fatty acids released prior to January 1953 and those issued monthly since that date.

M17-2 Fats and Oils; Consumption by Uses.² Preliminary

6 p., table. *Monthly 10 cents. Yearly subscription included in the subscription to the preliminary report M17-1 Fats and Oils, which also includes the summary M17-1.a Fatty Acids. Price \$2. Monthly: November, December 1952; January-October 1953.*

Total factory consumption of animal and vegetable fats and oils, by uses in: refining, processes other than refining (fat splitting, hydrogenation, sulphonation, winterizing, pressing, deodorizing, and other processing); production of edible products (shortening, oleomargarine, etc.); and inedible products (soap, chemicals, paint and varnish, lubricants and greases, linoleum and oilcloth, etc.); primary materials (vegetable oils, animal fats, fish and marine mammal oils, foats, raw and acidulated soap stock); and for secondary products. Published since 1919.

M17J Margarine.² (Formerly Oleomargarine. Title changed effective with June 1953 report.)

1 p., table. *Monthly and annual summary. Monthly 10 cents. Annual 5 cents. Yearly subscription including annual summary \$1. Summary, 1952, 1 p., table. Monthly: November, December 1952; January-November 1953.*

For colored and uncolored margarine: Production and producers' shipments, beginning and end-of-month stocks, and production by type of package, current month and preceding month; production totals to date, current and preceding year, and annual production for three years. Data showing margarine production and quantities of fats and oils consumed in the manufacture of this product for earlier years appear in Facts for Industry, Series M17-1, *Animal and Vegetable Fats and Oils*. Summary for 1952 gives production of margarine and consumption of fats, oils (by kind of fat or oil), and other selected ingredients in the manufacture of oleomargarine for 1952, 1951, and 1950. Published since July 1950.

M19A Inorganic Chemicals; United States Production²

p. 3-4, table, charts. *Monthly 10 cents. Yearly subscription \$1. Summary 1952 (see below), 30 p., tables, 20 cents. Monthly: October-December 1952; January-October 1953.*

Primary production of specified inorganic chemicals and basis, including quantities produced for further processing in the same plant, for intracompany transfer, and for sale, current month, preceding month and same month preceding year. Data for chlorine and alkalies also include shipments, producing plant consumption and plant stocks for current and preceding month. Published since 1941.

— Inorganic Chemicals and Gases: 1952²

30 p., tables, index. *October 9, 1953. Annual. 20 cents.*

Shipments and production, 1952, 1951, and 1950, of chlorine and alkalies, compressed and liquefied gases, and inorganic chemicals not elsewhere classified, each by product, and of specified inorganic color pigments. Total shipments including interplant transfers of sulfuric acid, by divisions and States, 1952 and 1951, and production of new acid by divisions and States, 1952, 1951, and 1950. Primary production of specified inorganic chemicals and gases, by months, 1952, and 1951.

Text tables show value of shipments and interplant transfers of inorganic chemicals, by product classes, 1950-52, and quantity and value of specified chemicals and gases, by divisions and States, 1952 and 1951. A discussion of the scope of the survey is included.

M19D Superphosphate²

M67J Women's and Children's Woven Fabric Underwear and Nightwear: 1952²

3 p., tables. October 20, 1953. Annual. 10 cents.

Summary of shipments and cuttings of women's and children's woven fabric underwear and nightwear, 1952 and 1951, and percent of change 1952 compared with 1951. Cuttings of women's and children's woven fabric underwear and nightwear, by fabric and price group, 1952, 1951 (revised), and percent of change, 1952 compared with 1951. The table on sales of women's and children's woven fabric underwear and nightwear by area, which appeared in the release for earlier years, has been omitted.

M67K Girls', Children's, and Infants' Outerwear: 1952²

5 p., tables. November 13, 1953. Annual. 10 cents.

For the girls', children's, and infants' outerwear industries, summary of net shipments, cuttings of selected garments, and value of net shipments and returns by industry: 1952, 1951, and percent of change 1952 compared with 1951. Cuttings of girls', children's, and infants' outerwear, by garment and by fabric, 1952 (preliminary) and 1951 (revised).

NOTE.—The title of the report in this series for 1951 was *Children's and Infants' Outerwear: 1951*.

M68A Shoes and Slippers²

4 p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 5 p., tables. Monthly: November, December 1952; January–October 1953.

Production (summary) by kind of footwear, current and preceding month, same month preceding year, percent of change, current month compared with preceding month and same month preceding year, and percent of production by type of outsole, current month. Production (quantity) and shipments (quantity and value) by geographic division and States, current and preceding month, same month preceding year, cumulative totals for two years and percent of change in value of shipments, current month compared with preceding month and same month preceding year. Production by kind of footwear, by type of upper and outsole, current month. Published since 1921.

Summary for 1952 presents production (quantity), civilian and military, 1950, 1951 and 1952 with percent of change, 1952 compared with 1951 and percent of production by type of outsole, 1952; shipments of shoes and slippers, by geographic divisions and States, 1950–52; monthly production by kind of footwear (military and civilian), by geographic divisions and States, 1952 and 1951; and production (military and civilian) by kind of footwear, by type of upper and type of outsole, 1952.

M75A Steel Shipping Barrels, Drums and Pails²

2 p., table, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 9 p., tables. Monthly: November, December 1952; January–October 1953.

Shipments, end-of-month stocks and unfilled orders for sale and own use; heavy type steel shipping barrels for sale only; light type for sale and own use. Shipments, current and preceding month, same month preceding year and cumulative totals for two years; end-of-month stocks, current month; end-of-month unfilled orders, current and preceding month and same month preceding year. Types of products defined.

Summary for 1952 presents revised figures for 1952 and 1951. Data show: shipments for sale and own use, by type of product, 1948–52; monthly shipments, stocks and unfilled orders of heavy-type steel shipping barrels and drums, 1952 and 1951;

² Order should be addressed to the Director, Bureau of the Census, Washington 25, D. C., with check payable to the Treasurer of the United States. Coupons issued by the Superintendent of Documents will also be accepted in payment.

M75A Steel Shipping Barrels, Drums and Pails—Continued

total monthly shipments and stocks, monthly shipments and stocks for sale and unfilled orders of light-type steel barrels and drums, 1952 and 1951; monthly shipments, stocks and unfilled orders of steel shipping packages, kegs and pails, 1952 and 1951. Published since 1924.

M75C Commercial and Home Canning Closures²

3 p., tables, charts. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 5 p., tables. Monthly: December 1952; January–October 1953.

Shipments and production of commercial closures, crowns, and home canning closures, current and preceding month, same month preceding year and cumulative totals for two years. Raw materials consumed in the production of commercial and home canning closures, including tin mill products, molding compounds used for plastic caps, aluminum, and rubber, current and preceding month.

Summary for 1952 gives monthly shipments, production of commercial and home canning closures by type of product and monthly consumption of selected raw materials used, by type of material, 1952 and 1951. Published since 1941.

M75D Metal Cans²

p. 2-3, tables, chart. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary, 1952, 4 p., tables. Monthly: November, December 1952; January–October 1953.

Shipments for sale and own use by type of product packed (nine food cans and four nonfood cans), current and preceding month, same month preceding year and cumulative totals for two years. Shipments for sale and own use by type of product packed, for the United States and Hawaii, by geographic divisions, current and preceding quarter and same quarter a year ago in the March, June, September and December reports. Data are in terms of short tons of steel consumed in the manufacture of cans.

Summary for 1952 presents monthly shipments, by type of product packed, 1952 and 1951, and quarterly shipments of food and nonfood cans by geographic regions, 1952 and 1951. Includes combined total figures for the United States and Hawaii. Data for Hawaii are also included in the figures for the Pacific region. Published since 1943.

M77C Glass Containers²

2 p., tables, chart. Monthly and annual summary. Monthly or annual 10 cents. Yearly subscription including annual summary, \$1. Summary 1952, 6 p., tables, charts. Monthly: November, December 1952; January–October 1953.

Quantity of shipments (direct exports and domestic), production, and stocks, domestic by type of container; shipments for current and preceding month and same month preceding year; production and end-of-month stocks for current and preceding month. Summary for 1952 gives shipments and production, 1948–52, shipments, production and end-of-month stocks, each by type of container, by months, 1952 and 1951. Published since 1945.

M77E Pressed and Blown Glassware (Except Glass Containers): 1952²

2 p., tables. May 26, 1953. Annual. 10 cents.

Value of shipments by class of product, 1948–52; and quantity and value of shipments, 1952 and 1951.

NPAF-1 Consumption and Inventories of Steel, Copper, and Aluminum in Metalworking Industries: First quarter 1951—Second quarter 1952²

13 p., tables. March 25, 1953. Special report. 15 cents.

Estimates are shown on total consumption (including purchases, interplant transfers, and produced and consumed in the same establishment) and inventory of carbon steel, alloy steel, stainless steel, copper, and aluminum by shape and form for each quarter January 1951–June 1952; and on consumption of carbon steel, alloy and stainless steel combined, copper, and aluminum, by selected industries and industry groups, for each quarter, 1951.

Estimates cover the major metal consuming industries in the four broad industrial groups: Fabricated metal products; Machinery (except electrical); Electrical machinery; and Transportation equipment; also includes the consumption and inventory of steel in the Iron and Steel Forgings Industry.

Data tabulated from surveys conducted by the Bureau of the Census for the National Production Authority. Surveys included approximately 8,000 of the larger establishments in the metalworking industries and a representative sample of the smaller plants.

5-3. ANNUAL SURVEYS OF MANUFACTURES

Statistics on manufacturing are collected in detail in the Census of Manufactures. During the intercensal period, the Annual Surveys provide up-to-date basic statistics on the key measures of manufacturing activity for industry groups, important individual industries, and for geographic divisions and States. The annual survey covers approximately 45,000 plants out of a total of more than 250,000. Included are all large plants, accounting for approximately two-thirds of the total manufacturing employment in the United States, and a sample of the much more numerous small plants.

The Annual Survey program is designed to provide estimates of general statistics (employment, payrolls, man-hours, value added by manufacture, etc.), for industry groups and selected industries; general statistics for geographic divisions and States, cross-classified by major industry group; value of shipments for classes of products; data on selected metals consumed, by selected industries; expenditures for new plant and equipment, for industry group and for States; value of manufacturers' inventories, for industry groups and selected industries; and selected general statistics for industries, cross-classified by size of establishment.

The Annual Surveys of Manufactures employment data have been coordinated with the Bureau of Old-Age and Survivors Insurance employment figures for consistency in classification, coverage, and statistical accuracy.

Fuels Consumed and Electric Energy Purchased: 1950¹

23 p., tables, appendix. May 1953. 20 cents.

Report shows estimates for 1950 with comparable 1947 Census statistics on the cost of fuels consumed and the quantity and cost of electric energy purchased by manufacturing establishments. Includes figures for industries, United States totals, geographic divisions, States and groups of industries within State. Report contains a Technical Appendix, which discusses the estimating procedures used.

**MAS-50-9 Fuels Consumed and Electric Energy Purchased: 1950 and 1947.¹
Advance report**

20 p., tables, appendix. January 1953. 25 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1950 and 1947 (revised 1950 figures) by geographic divisions and States. Tables include comparable 1947 statistics, previously published in the 1947 Census of Manufactures release MC203, *Fuels and Electric Energy Consumed*. Replaces preliminary report MAS-50-5, *Cost of Fuels Consumed and Purchased Electric Energy for Industry Groups: 1950 and 1947*, issued in 1951 and incorporated in the report *Annual Survey of Manufactures, 1949 and 1950*.

Annual Survey of Manufactures: 1951¹

253 p., tables, appendices, map. \$2.25 (Buckram).

This report is a compilation of the 1951 Annual Survey of Manufactures releases MAS-51-1 through MAS-51-8 with two additional summary historical tables; general explanations text and technical appendices; as well as a "Product Statistics" chapter (containing a recapitulation of the data available in the individual commodity "Facts for Industry" series).

MAS-51-3 Value of Shipments of Selected Classes of Products: 1951, 1950, and 1947.² Advance report

8 p., tables. February 6, 1953. 20 cents.

Estimates of value of shipments during 1951 and 1950 for more than 600 classes of manufactured products with comparable data from the 1947 Census of Manufactures. The values presented for 1951 and 1950 are based on manufacturers' reports received in the 1951 Annual Survey of Manufactures conducted by the Bureau of the Census in cooperation with the National Production Authority.

MAS-51-4 General Statistics for Industry Groups and Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

31 p., tables. March 11, 1953. 30 cents.

This report provides data on employment, man-hours of production workers, pay-rolls, cost of materials, value of products shipped and value added by manufacture. Also shown are data tabulated in prior annual surveys and corresponding figures compiled in the 1947 Census of Manufactures.

MAS-51-5 Metals Consumed by Manufacturers of Metal Products for Selected Industries: 1951, 1950, 1949, and 1947.² Advance report

11 p., tables. March 11, 1953. 15 cents.

Includes a summary of consumption and cost of carbon steel, alloy and stainless steel, aluminum, and copper and copper-base alloys, 1951, 1950, 1949, and 1947 by manufacturers of metal products. Estimated quantity and cost figures for the major metal producing industries within four broad industrial groupings: (1) Fabricated metal products, (2) Machinery (except electrical), (3) Electrical machinery, and (4) Transportation equipment. Data on the consumption and cost of such metal mill shapes and castings by metal fabricating establishments for 1951 are based on estimates prepared from the survey "Reported Plant Operations" (NPAF-1 and NPAF-103); the estimates for 1950 and 1949 are comparable figures tabulated from the 1950 and 1949 Annual Survey of Manufactures. Corresponding figures shown for 1947 were compiled from the 1947 Census of Manufactures. The 1951 estimates include quantities produced and consumed in the same establishments, as well as purchases and interplant transfers. Data for prior years exclude quantities produced and consumed in the same establishments.

MAS-51-7 Cost of Fuels Consumed and Quantity and Cost of Electric Energy Purchased by Major Industry Group: 1951, 1950 and 1947.² Advance report

3 p., table. March 12, 1953. 10 cents.

Total cost of fuels and electric energy purchased for use in manufacturing plants, by industry group, 1951, 1950, and 1947.

MAS-51-8 Selected General Statistics by Employment Size of Establishment, for Major Industry Groups and Selected Industries: 1951 and 1950.² Advance report

51 p., table. March 26, 1953. 35 cents.

Estimates of the number of establishments, employment, and value added by manufacture, distributed by employment size class of establishments, are shown for selected industries and major industry groups for 1951 and 1950.

MAS-52-1 Value of Shipments of Selected Classes of Products, for the United States: 1952, 1951, 1950, and 1947.² Advance report

25 p., table. August 27, 1953. 20 cents.

Estimates of value of shipments during 1952, 1951, and 1950 for more than 600 classes of manufactured products, with comparable data from the 1947 Census of Manufactures. The values presented for 1952, 1951, and 1950 are based on manufacturers' reports received in the 1952 Annual Survey of Manufactures.

MAS-52-2 Value of Manufacturers' Inventories for Industry Groups and Selected Industries, End of Year: 1952, 1951, and 1947.² Advance report

12 p., tables. October 1, 1953. 10 cents.

Value of inventories at end of year, of finished products, of materials, supplies, and work in process, and total, 1952, 1951, and 1947 (census). Standard error of estimate (percent) is shown for 1952 and 1951. Summary figures on value of manufacturers' inventories are given for 1947 and each year 1949-52.

6. POPULATION AND HOUSING DIVISION

A Census of Population has been taken every 10 years since 1790 and a Census of Housing has been taken along with the Census of Population since 1940. These censuses were last taken as of April 1, 1950.

The Current Population Survey is conducted monthly. Through enumeration of a scientifically selected sample of the population, information is obtained currently on employment, unemployment, hours of work, occupation, and other subjects. Also available are estimates of the personal and family characteristics of the population, mobility of the population, income, housing conditions, etc.

Estimates of population for postcensal and intercensal dates are prepared, and special censuses of local areas are taken at the request and expense of the local governments involved.

6-11. 1950 CENSUS OF POPULATION

Results of the 1950 Census of Population were made available in published form as rapidly as data were tabulated and assembled. Preliminary figures and advance releases of final statistics were issued in unbound multilithed form identified as Series PC reports. Detailed final data are being presented in bound volumes. The material presented in these volumes are available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume II, *Characteristics of the Population*, in 54 parts, presents statistics on the number of inhabitants and the characteristics of the population for States and their standard metropolitan areas, urban places, and other constituent areas. The volume includes Series P-A, P-B, and P-C bulletins and comprises a separately-bound part for each State, the District of Columbia, and a United States summary. Parts 51-54, for the Territories and possessions, will be bound together.

Vol. II. Characteristics of the Population ¹

v. p., tables, map.

Population totals for the State, urban and rural, and for cities of 10,000 or more from earliest census to 1950; in groups of places according to size, 1900-50; population and area of counties, urban and rural, 1930-50; counties by minor civil divisions, 1930-50; all incorporated places, and unincorporated places of 1,000 or more, 1950 and 1940; incorporated places of 5,000 or more, by wards; and urbanized areas, 1950.

Characteristics of the population for the State, for each county, for the rural-non-farm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, each urbanized area and standard metropolitan area; with limited data presented for incorporated and unincorporated places of 1,000 to 2,500. Subjects include the age and sex of the population, race, nativity, citizenship, school enrollment,

years of school completed, marital status, changes in residence between 1949 and 1950, number of married couples, families and households, country of birth of the foreign-born white, employment status, major occupation and major industry groups, and income of families and unrelated individuals. Separate statistics are presented for the nonwhite population for areas in the southern States.

The report also includes: detailed characteristics of the population for large areas; the State, urban and rural; cities and standard metropolitan areas of 100,000 or more; distribution of the population by sex and single years of age; and cross-classifications of sex and age by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income; and data on occupation, industry, and income, cross-classified with each other and race, class of worker, etc. Separate cross-classifications are shown for the non-white population in areas with 50,000 non-white inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

Series P-C Bulletins, *Detailed Characteristics*, are preprints of Chapter C of the corresponding part of Volume II, *Characteristics of the Population*. This series includes separate bulletins for each State, the District of Columbia, Alaska, Hawaii, and Puerto Rico, and a United States summary bulletin. The bulletins contain detailed statistics on the characteristics of the population for: States; the urban, rural-nonfarm, and rural-farm parts of States; cities and standard metropolitan areas of 100,000 inhabitants or more, with some data for cities of 50,000 to 100,000 inhabitants. Statistics in these bulletins supersede figures shown in Series PC-5, PC-6 and PC-7 reports. The 53 bulletins are priced at \$35.15 a set.¹

P-C Detailed Characteristics (various areas)¹

v. p., tables. (Preprints of Chapters C of Volume II.)

Distributions of the population by sex and single years of age, and cross-classification of sex and age; by race, nativity, citizenship, marital status, relationship to head of household, school enrollment, educational attainment, employment status, occupation, industry, and individual income. Also data on occupation, industry, and income cross-classified with each other and with race, class of worker, and other population characteristics. Selected separate cross-classifications are shown for the nonwhite population for each area with 50,000 nonwhite inhabitants or more. Occupation and industry statistics are presented also for cities of 50,000 to 100,000.

Series P-D bulletins, *Census Tract Statistics*, which will not be bound into a single publication, comprise Volume III of the 1950 Census of Population. The 64 bulletins cover tracted cities and their adjacent tracted areas, where the latter exist. Each bulletin presents by census tracts, information from the Censuses of Population and Housing. Statistics presented in this series supersede those shown in Series PC-10. The price for a complete set of 64 bulletins is \$21.70.¹

P-D Census Tract Statistics (*specified city*)¹

v. p., tables, maps.

Basic population and housing characteristics for tracted areas from the 1950 Censuses of Population and of Housing. Population items include: age, sex, race and nativity, marital status, years of school completed, country of birth, married couples and households, residence in 1949, employment status, occupation, class of worker, and family income in 1949. Housing data include: occupancy and tenure, type of structure, condition and plumbing facilities, year built, persons per room, heating fuel, refrigeration equipment, television, contract monthly rent, and value of one-dwelling-unit structures.

Separate data are presented for nonwhites and the dwelling units which they occupy, for each tract having 250 nonwhites or more within tracted areas containing 10,000 nonwhites or more. Limited data are presented for tracted areas containing 10,000 or more white persons with Spanish surnames in California, Colorado, and Texas, for each tract having 250 or more white persons with Spanish surnames. Maps defining the boundaries of the tracts are in each bulletin.

color. Data are for the country as a whole, urban and rural, 1950. Comparative data for the United States, 1940, on single years of age by labor force status. Charts show labor force status of persons 14 to 74 years old, by single years of age and sex, 1950, and labor force participation rates by age group and sex, 1950 and 1940, each for the United States.

No. 2C Institutional Population

215 p., tables. \$1.

Total population and total institutional population, by color and sex, by regions, divisions, and States, 1950, and same classifications for persons 14 years old and over, 1950 and 1940. Age of persons in institutions, by type of control of institution, color, and sex, United States, regions, and States, 1950, for: correctional institutions, mental hospitals, tuberculosis hospitals, homes for the aged and dependent, homes and schools for the mentally handicapped and for the physically handicapped, homes for neglected and dependent children, and public training schools for juvenile delinquents. Statistics for all institutions combined, United States, 1950, by age and sex, on: total inside and outside standard metropolitan areas, urban and rural nonfarm; race, nativity, and citizenship; school enrollment of persons 5 to 24 years old; years of school completed by those 25 years old and over; marital status of those 14 years old and over, by color; mobility status and farm residence in 1949 of those 1 year old and over; and income received in 1949; and characteristics of institutional population, by type of institution and type of control, by age and sex, United States, 1950. Total institutional population by age, color, and sex, for selected counties and urban places, 1950.

No. 2D Marital Status

68 p., tables, chart. 40 cents.

Detailed family status of persons 14 years old and over, by marital status, age, and sex, and single years of age of these persons, by marital status and sex, United States and rural-farm areas, with separate data for nonwhite for the country as a whole and for rural-farm areas. Income received in 1949, for the noninstitutional population 14 years old and over reporting on income, by marital status, family status, age, and sex, United States and rural-farm areas, with separate data for nonwhite for the country as a whole. Characteristics of children: single persons under 18 years old by family status, age, color, and sex, for the United States, total and rural-farm. All data relate to 1950.

No. 3B Nonwhite Population by Race

92 p., tables, map. 50 cents.

Statistics for each of the nonwhite races—Negro, Indian, Japanese, Chinese, Filipinos, and other nonwhite races—on age, sex, marital status, years of school completed, employment status, major occupation group, and income are presented for regions and their urban, rural-nonfarm, and rural-farm parts by age and for those selected States, urban, rural-nonfarm, and rural-farm parts of States, and standard metropolitan areas in which there are appreciable concentrations of any of the minor races. For Indians, the data are shown for Indian agency areas rather than standard metropolitan areas. Citizenship, country of birth, and age of the foreign-born nonwhite population, by race, same areas. All data relate to 1950.

No. 3C Persons of Spanish Surname

74 p., tables. 45 cents.

Statistics on the characteristics of persons of Spanish-American and Mexican descent in five southwestern States (Texas, Colorado, New Mexico, Arizona, and California) which are identified, for purposes of this report, as persons having Spanish surnames. Characteristics for which statistics are presented include age, sex, nativity and parentage, marital status, employment status, years of school completed, major occupation group, and income. Statistics are presented for the State and its urban, rural-nonfarm, and rural-farm parts, selected standard metropolitan areas, urbanized areas, and urban places. Statistics on nativity, citizenship, and country of birth are given for all counties in the five States and all places of 10,000 or more. Housing

P-E Special Reports—Continued

data for the States, urban and rural, include water supply, toilet facilities, condition and plumbing facilities, number of persons, persons per room, contract and gross monthly rent, and value of one-dwelling-unit structures.

No. 3D Puerto Ricans in Continental United States

22 p., tables. 20 cents.

Persons of Puerto Rican birth, by color and sex, for selected areas (Northeast: New York State, New York City, remainder of State, remainder of region; North Central; South; West), 1950 and 1940. Persons of Puerto Rican birth and of Puerto Rican parentage, by age, color, and sex, for the United States and New York City, 1950. Characteristics of persons 14 years old and over of Puerto Rican birth and of Puerto Rican parentage, by age and color, for the United States and New York City, 1950. Characteristics include age, color, sex, marital status, years of school completed, employment status, major occupation group, and income.

No. 4A State of Birth

112 p., tables, map. 55 cents.

Statistics for the total native population, by color and sex, on State of residence, 1950, by State of birth. (State of birth includes Alaska, Hawaii, Puerto Rico, other possessions, etc., and born abroad of American parents.) Statistics on State of residence, 1950, by geographic division of birth and State of birth by division of residence, 1950, are presented by age, color, and sex. Data are presented for the United States, regions, divisions, and States. Also shown are the net gain or loss through interregional, interdivisional, and interstate movement.

No. 5A Characteristics by Size of Place

68 p., tables, map, chart. 40 cents.

Statistics on the age, sex, nativity, race, and, by color and age, on the mobility status, years of school completed, marital and family status, employment status, major occupation group, and income of the population, by size of place. For the population living in urbanized areas, the classification is made by the size of the urbanized area rather than by the size of the incorporated place within the urbanized area; and separate figures are presented for the population in central cities and in the urban fringe of the urbanized areas. Statistics are given for the United States as a whole, with selected data (age, race, nativity, mobility, and major occupation group, by the size of place and sex) for regions. Chart shows children under 5 years per 1,000 women 20 to 44 years old, by size of place, for the United States. All figures relate to 1950.

No. 5B Education

133 p., tables, map, chart. 60 cents.

Statistics on years of school completed, by age, sex, and other characteristics, such as race and nativity, mobility status, marital status, employment status, major occupation group, and income, for the United States, the South, and the North and West combined, with data on ethnic characteristics and residence in 1949 of children 5 to 13 years old enrolled in school, by year of school in which enrolled and age. Urban-rural residence of children 5 to 13 years old enrolled in school, by year of school in which enrolled, age, and color, for the United States, by regions, with urbanized areas and other urban areas by size of place. All data relate to 1950.

Figures for married couples are classified as "With own household," or "Without own household." Data for families and households are shown by number, population in family or household, and population per family or household. Figures for quasi households are shown by population in quasi households, institutional population, and other population. The tables are reprinted from the Series P-B United States Summary bulletin, General Characteristics of the Population, and supersede, in part, preliminary sample data published in Series PC-7, Nos. 1 and 3.

NOTE.—A special study, *Farms and Farm People*, based on data from the 1950 Censuses of Agriculture, Population, and Housing, is described in section 1-10.1.

A special report, *Infant Enumeration Study: 1950* (Procedural Studies of the 1950 Censuses, No. 1), is described in section 7-3.

6-12. 1950 CENSUS OF HOUSING

Results of the 1950 Census of Housing are made available as they are tabulated and assembled. Preliminary figures and advance releases of final statistics have been issued in unbound multilithed form identified as Series HC reports. Detailed data will be presented in a series of bound volumes. The materials presented in Volumes I and II are also being made available as paper-covered preprints (bulletins) of the various chapters.

Requests for announcements of reports should be addressed to the Bureau of the Census, Washington 25, D. C.

FINAL REPORTS

Volume I, *General Characteristics*, consists of 7 separately bound books: 1 for the United States; 5 for States and the District of Columbia in groups by alphabetical order; and 1 for Alaska, Hawaii, Puerto Rico, and the Virgin Islands of the United States. The volume comprises the Series H-A bulletins.

Vol. I. General Characteristics (State or area)¹

v. p., tables, maps. (Buckram)

Data for the United States, each State, each county, the rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, and each urbanized area and each standard metropolitan area. Limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Included are statistics on dwelling units by occupancy and tenure, vacancy status, type of structure, color of occupants, condition and plumbing facilities, number of rooms, persons per room, year built, water supply, toilet and bathing facilities, electric lighting, heating equipment, heating and cooking fuels, kitchen sink, refrigeration equipment, radio, television, contract or gross monthly rent of rental unit, and value and mortgage status of owner-occupied nonfarm dwelling units. Sepa-

Pt. 3. Detroit-Memphis. 762 p--	\$4.75		
Pt. 4. Miami-Salt Lake City. 686 p-----	\$4.75		

Volume III, *Farm Housing Characteristics*, presents in a single book (bound form only) analytical data for occupied dwelling units in the rural-farm segment of the dwelling unit inventory, for the United States and for each of the 119 economic subregions.

Vol. III. Farm Housing Characteristics; United States and Economic Subregions¹

311 p., tables, map. 1952. \$2.50 (Buckram).

Presents analytical data for occupied dwelling units in the rural-farm segment of the dwelling unit inventory. Shows interrelationships of number of rooms and condition and plumbing facilities with selected housing and household characteristics. The statistics are provided for the United States and for each of the 119 economic subregions. Subregions usually are combinations of two or more counties having relatively homogenous agricultural conditions.

Includes a summary of findings: inventory-farm and nonfarm distribution, regional distribution, relation of number of farm dwelling units to number of farms; size of farm house in relation to year built, condition and plumbing facilities, kitchen sink, cooking and heating fuels, persons per room, and age of head of household; condition and plumbing facilities in relation to year built, electric lighting, heating equipment, type of household, and income.

Detailed tables for the United States and economic subregions show number of rooms in owner-, renter-, and rent-free-occupied dwelling units, 1950, with same data for nonwhite-occupied dwelling units for the United States and for each of the 36 economic subregions having 15,000 nonwhite inhabitants or more. Economic subregions are identified by number. A map showing the location of the economic subregions of the United States, 1950, and a list of counties in the economic subregions accompanies the text.

Volume IV, *Residential Financing, Mortgaged Nonfarm Properties*, presents data relating to the characteristics of the financing of the residential nonfarm properties for the United States, for each of the four geographic regions and for each of 25 large standard metropolitan areas. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

Vol. IV. Residential Financing, Mortgaged Nonfarm Properties (2 parts)¹

v. p., tables, maps, appendix.

Presents results of a sample survey of characteristics relating to the financing of residential nonfarm properties. Data are presented in terms of mortgaged properties, first and junior mortgages, and outstanding mortgage debt for both owner-occupied and rental properties. Includes type of mortgage holder, characteristics of first and junior mortgages, purpose of financing and refinancing, characteristics of the owner-occupant and his household, and the physical and financial characteristics of the property. Part 1 presents detailed characteristics of the United States and the four geographic regions. Part 2 presents data for 25 large standard metropolitan areas and comparable data for the United States. The data are based on tabulations from the Residential Financing Survey which was part of the 1950 Census of Housing, taken as of April 1, 1950.

Pt. 1. The United States

684 p. \$4.25 (*Buckram*).

Pt. 2. Large Standard Metropolitan Areas and Comparable Data for the United States

850 p. \$5.25 (*Buckram*).

FINAL BULLETINS

Series H-A Bulletins are preprints of Volume I, *General Characteristics*, of the 1950 Census of Housing. There is a separate bulletin for each State, the District of Columbia, the Territories and possessions, and a summary report for the United States. The series present basic data on practically all subjects for which information was collected in the 1950 Census of Housing. Statistics in these bulletins supersede figures shown in Series HC-1 through HC-5, HC-7, and HC-8. The price for the 54 reports is \$27.65.

H-A General Characteristics of Housing (State)¹

v. p., tables, maps.

Data for the State, each county, rural-nonfarm and rural-farm parts of each county, for each urban place of 2,500 inhabitants or more, and each urbanized area and standard metropolitan area. Limited data are presented for incorporated and unincorporated places of 1,000 to 2,500 inhabitants. Included are statistics on dwelling units by occupancy and tenure, vacancy status, type of structure, color of occupants, condition and plumbing facilities, number of rooms, persons per room, year built, water supply, toilet and bathing facilities, electric lighting, heating equipment, heating and cooking fuels, kitchen sink, refrigeration equipment, radio, television, contract or gross monthly rent of rental unit, and value and mortgage status of owner-occupied nonfarm dwelling units. Separate figures are presented for dwelling units occupied by nonwhite households for areas in the Southern States and for those occupied by Spanish surname households in the States of Arizona, California, Colorado, New Mexico, and Texas.

No. 19. Economic Subregions of the United States; by Donald J. Bogue, Scripps Foundation, Miami University, and Calvin L. Beale, Population and Housing Division, Bureau of the Census¹

47 p., tables, map. July 27, 1953. 30 cents.

The report includes a description of the procedure of delimiting economic subregions and the uses of economic subregions. Selected nonagricultural and agricultural characteristics of the economic subregions are presented. Included among the nonagricultural characteristics are the total, rural, and urban population of the economic subregions, with rates of change for census years 1900-40; percentage distribution of workers by industry of employment in 1940; selected data on manufacturing, retail trade, and services from the most recent censuses of these activities; selected demographic and social data, such as birth rates, levels of living, etc.; selected housing data from the 1940 and 1950 Censuses of Housing. Included among the agricultural statistics are such items as number of farms, acreage in farms, size of farms, farm operators by color; value of farm equipment and crops; farms by type. Also included is a listing of the economic subregions showing the component State economic areas and counties within each State economic area. Data similar to those appearing in the State Economic Area Bulletin are given for the groupings of State economic areas which were revised in the delimitation of the economic subregions. Finally, the bulletin lists errata found subsequent to the printing of the State Economic Area Bulletin.

This is a cooperative report issued jointly by the Bureau of the Census and the Bureau of Agricultural Economics. The statistical research upon which the report is based was performed cooperatively by the Bureau of the Census and the Scripps Foundation for Research in Population Problems, Miami University, Oxford, Ohio.

1,041 p., 1,109 tables, 45 charts and maps, appendices, bibliography of sources, index. *December 1953. \$3.50 (Buckram).*

This one-volume basic reference source has been issued annually since 1878 and is the standard summary of statistics on the industrial, social, political, and economic organization of the United States. It includes a broad selection of data from most of the important statistical publications, both governmental and private, and an extensive bibliography of statistical sources. The 1953 issue contains compact summations and highlights from the final reports of the 1950 Censuses of Agriculture, Population, and Housing. Another feature is the more convenient assembling and expansion of the material on United States Territories and possessions into an entirely separate section.

County and City Data Book: 1952; A Statistical Abstract Supplement¹

638 p., tables, maps, appendices. *May 1953. \$4.25 (Buckram)*

This new supplement is the Decennial Census edition and is issued as part of the publications program of the 1950 Censuses of Population, Housing, and Agriculture. It brings together 128 items of information for the United States as a whole by regions and geographic divisions, for each State, county, and standard metropolitan area; and 133 items of information for each of 484 cities with 25,000 or more inhabitants in 1950. The statistics for 1950 include agriculture, area and population, banking, city government finances and employment, construction, education, family income, housing, labor force, vital statistics, and other subjects; for 1947 and 1950, manufactures; for 1948, trade and services; and climate. Also includes a map section, with a map for each State delineating counties and standard metropolitan areas and showing all cities of 25,000 or more population based on the 1950 Census.

Appendixes: A. Lists of urban places, 1950: A-1.—Cities having 25,000 inhabitants or more in 1950, in rank order, with 1950 population; A-2.—Urban places in 1950, alphabetically by county, with 1950 population; A-3.—Urban places in 1950, alpha-

Portfolio of United States Census Maps: 1950¹

Size of portfolio: 11¼ x 14¼ in.; 42 p. \$4 (Buckram).

A selection of statistical maps and graphs used in the publications of the 1950 Censuses of Population and Agriculture. Pockets inside covers contain two separate maps: (1) United States, population distribution, urban and rural, 1950, 40 x 62 in.; and (2) United States county outline map, 1950, 26 x 40 in.

United States Population Distribution, Urban and Rural: 1950¹

40 x 62 in. Approx. 50 mi.=1 in. or 1: 3,168,000; Projection: Albers equal-area. February 1953. 35 cents.

Shows for the urban population: urbanized areas (showing extent of each area); places of 25,000 or more, places of 10,000 to 25,000, and places of 2,500 to 10,000. Shows for the rural population: places of 1,000 to 2,500, and 500 persons outside of places of 1,000 or more.

7-3. SPECIAL SERIES**Bureau of the Census—Technical Papers¹****No. 1. The Sample Survey of Retail Stores: A Report on Methodology**

52 p., tables. 20 cents.

This report is the first in a series which will include studies of the development and the application of statistical methods within the Bureau, and on the precision and accuracy of Census and survey results. This particular report deals with methodology of a sample survey in the field of retail stores. It describes the methods of the sample selection of counties, and of places within these counties, the method of conducting the survey, the methods of making estimates and determining their sampling reliability from the survey results. The causes of error or variability in the estimates for reasons other than sampling are also examined.

Procedural Studies of the 1950 Censuses¹**No. 1. Infant Enumeration Study: 1950**

70 p., tables, map, appendix. 40 cents.

This report is the first in a series which will make available special information on how the 1950 Censuses were taken, and on the quality of the results. It presents statistics on the extent to which infants born in the first three months of 1950 were enumerated in the Seventeenth Decennial Census of the population of the United States, conducted as of April 1, 1950, and on reasons for the missing of infants, by characteristics of the infant and its parents. The study was undertaken with the cooperation of the National Office of Vital Statistics, U. S. Public Health Service, and of the State Registrars of vital statistics.

Detailed tables show data on completeness of enumeration of infants born the first 3 months of 1950 by race, sex, month of birth, order of live birth, age of mother, years of school completed by mother, and major occupation group of father; data on reasons for underenumeration of infants, by age of mother, years of school completed by mother, and major occupation group of father; and relationship to head of household by enumeration status of infants for whom replies were received from mail inquiry, and errors in enumeration of infants, by color.

Appendix illustrates forms used in the infant enumeration study and instructions to enumerators for filling infant cards.

INDEXES

CATALOG OF UNITED STATES CENSUS PUBLICATIONS

1953

The following indexes show by geographic areas and by subject, data contained in Census publications issued during calendar year 1953, and included in the catalog part of this publication. There are separate indexes for Census Divisions (nine groupings of States), Census Regions (combinations of Divisions into three or four groupings), Cities, Counties, Standard Metropolitan Areas, States, Territories and possessions, and Urban and/or Rural Areas.

Each index entry (except cross references) is followed by a group classification number to facilitate reference to the specific publication. Group classification numbers shown in the upper outside corner of each page of the catalog section indicate the order of listing. The table of contents indicates the order of listing, also. The group classification system is an order of numbers assigned according to the alphabetical arrangement of six of the administrative divisions of the Bureau of the Census. There is a seventh classification, Miscellaneous, for other Bureau publications.

APPENDIX

Policy Governing Special Work and Services

It is the policy of the Department of Commerce (Dept. Order 71) to relieve the general public from bearing the costs of publication and services of special use and benefit to private groups and individuals. This is accomplished by appropriate charges to the groups and individuals so benefited. It is also part of the program of the Bureau to furnish specialized service to other governmental agencies at cost.

Congress appropriates funds to the Bureau of the Census to carry out certain projects. Since funds are limited, the Bureau cannot prepare or publish all the useful tabulations of the information collected. Administrative decisions must be made with regard to what information will serve the largest number of needs and how much of the information of general interest can be made available within the limits of the funds available. The use of the filled-in questionnaires and schedules is restricted by law to employees of the Bureau of the Census. The use of specific sets of punch cards is restricted in accordance with the information shown on the card.

The work sheets and tabulation sheets, which show more detail than is found in published reports, can be made available through some method of duplication, such as photostating or transcription. Basic source material, such as schedules or punched cards, contain information that can be tabulated and used to furnish additional needed information. Arrangements can be made, in some instances, to furnish information in advance of publication. Such arrangements entail additional cost, which has to be recovered.

Furthermore, there are available in the Bureau a variety of skills, equipment and records which are maintained for meeting the regular commitments of the Bureau. These facilities can serve the needs of other government agencies and other groups. The skills, equipment and other resources can be made available for statistical operations such as survey design, mailing, field collection, machine tabulation, population estimates and forecasts, and similar tasks. To some extent members of the staff can be made available for consultation and planning.

Services as indicated above are furnished at cost by the Bureau under the conditions described below. Cost is interpreted to mean the actual cost to the Census Bureau, including the cost of planning the special work, plus appropriate overhead charges. The undertaking of such work is subject to approval by the Secretary of Commerce under provision of Department Order No. 59.

A. *Special transcriptions and tabulations of Census data.*—Special transcriptions and tabulations of data in the files of the Bureau of the Census will be undertaken on a cost basis as requested, provided there is no serious interruption of the regular work program of the Bureau. Those requesting special tabulations should have a clear understanding that the data are based on surveys paid for by public funds and are, therefore, public property. The purposes for which such

tabulations are obtained must not be contrary to the public interest nor must they be used to give unfair commercial or other advantage to any person or group.

In making such special tabulations available, the Bureau may, in its discretion, specify either that the material is for the information of the purchaser only and may not be published, or that any proposed publication of such material must be cleared with the Bureau before publication. Such restrictions will provide a basis for protection against possible misquotation of Census data, and also against the implication that data of low reliability and not published by the Census have, in effect, a guarantee by the Census as to their accuracy. All Census data, furnished through special tabulations, will be accompanied, so far as feasible, by appropriate statements relative to the limitations of the data and the recipient should be requested to use these statements and to give appropriate credit to the Bureau for the information published.

Special tabulations paid for by nongovernmental groups will be undertaken only with the specific understanding that:

- a The material may be published by the Bureau and made generally available either without charge or at cost of publication if the Bureau regards the material to be of general interest.
- b If not published, it may be made available to other Government agencies or to appropriate non-profit research groups without charge or at cost of duplication.
- c If not already published by the Bureau, a second request by other than a government agency for the same information will generally be handled in the following manner:
 - 1 If prior to completion of the job, arrangements should be made with the party making the original request so that costs will be appropriately divided and results will be furnished to both parties or published.
 - 2 If job has already been completed and delivered, the second request should be referred to the party who received the special tabulation, provided specific permission has been received for such referral. If, for any reason, the person making the second request cannot reach a satisfactory agreement with the original purchaser, the Bureau shall make the data available to him at a cost not exceeding the sum paid by the original purchaser.
 - 3 If, for any reason, the Bureau feels that the purchaser of a special tabulation is making unfair use of the information furnished, it may make the data publicly available either through its own resources or through the payment of cost of publication by appropriate persons who request the information, or it may take other steps to remedy the situation.

In order to keep the public informed of special tabulations which have been furnished, the Bureau will list special tabulations, except for small projects, in the Catalog of U. S. Census Publications.

B. Special surveys for original data.—The Bureau will undertake projects that involve original collection of data on a reimbursable basis when the following conditions are present:

- a Surveys will be undertaken only when there is a public interest in the survey results. Projects carried on for nongovernmental groups must

meet tests similar to those that would be applied in carrying out a survey with public funds. The Census enumerator must be in a position to explain his presence and the pertinence of each inquiry in terms of public interest. Where a project is not covered by Bureau appropriations, the specific requirements of other government agencies may be accepted as an adequate indication of public interest. In the case of nongovernmental groups, the following conditions must be met to determine the public interest in field survey results:

- 1 The Bureau will undertake to satisfy itself that the survey is in the public interest. It may arrange to discuss the proposed survey with interested private and public groups to determine whether the general interest is sufficient to justify the taking of the survey and publication of results by the Census Bureau.
 - 2 Before being undertaken by the Census Bureau, the survey must, of course, receive the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.
 - 3 Except as indicated below there must be agreement that the results will be published by the Census Bureau and that the publication will not be subject to review or control by the sponsor. The sponsor's contribution will be acknowledged. However, the Bureau may collaborate on projects designed primarily to develop and improve methods, without necessarily requiring publication of the data collected.
- b* The individual returns from such surveys must remain Census property. Special tabulations may be made available to public or private groups from such returns under the same conditions as from regular Census records. The data collected will be subject to the same confidential treatment with respect to individual returns as is true in the case of similar Bureau surveys; that is, no information will be released which might disclose the activities, or the identity of any persons or organizations without their specific written approval. The only exception to this condition is when the Census Bureau serves as a collecting agent for another governmental agency (Federal, State, or local) in which event the confidential character of the data is determined by the conditions under which they are collected.
- c* Projects will not be undertaken for publication by the Bureau unless the sponsor is willing to furnish sufficient funds to provide data of accuracy suitable for publication by the Bureau.
- d* Regardless of other considerations, the Bureau will not undertake to carry out a project which might impair its ability to obtain from respondents information needed for its regular programs or for work being done for other Federal agencies.

C. Use of other special facilities.—The Bureau may undertake to act as consultant to or agent for other groups on special statistical problems. The same conditions which are outlined above for *Special Surveys for Original Data* will govern where applicable.

D. Priority of work.—Within the frame of reference outlined in this statement, priority in accepting special work will be given to work for other Federal agencies in accordance with priorities established in the light of current problems. Other work will be given priority in the order in which it is accepted. In instances of

conflict in the latter category, however, priority will be given to work for other governmental units (State and local).

In establishing priorities, the Bureau must have latitude and take responsibility for adjusting the priorities of various projects. For example, a project which will contribute to the Bureau's knowledge and enable it to carry out its regular functions more efficiently may be given special consideration, and in any event, projects of urgency to National policy will have highest priority. It may be necessary because of the pressures of higher priority work to reject projects that would otherwise be acceptable.
