#### APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

ITEM	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilo-grams	Pounds	Kilo-grams

## GUIDE TO SOURCES OF STATISTICS

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for several years or new types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 989-991) and in reports for particular commodities, industries, or similar segments of our economic and social structure. Because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where both current reports and a summary volume are cited, the section reference often appears opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. It should not be assumed that all of the subjects from the original source are summarized in the *Abstract*.

Publications listed under each subject are divided into two main groups: "United States Government" and "Other." The location of the publisher of each report is given except for Federal governmental agencies located in Washington.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. Specific volume numbers and subtitles of the major census publications are listed at the end of the guide.

Note.—In April 1961, the economic research and statistical reporting functions of the Department of Agriculture were reorganized, affecting the Agricultural Marketing Service, the Agricultural Research Service, and the Foreign Agricultural Service. Some of the work formerly conducted in parts of these three services has been brought together in two agencies, the Economic Research Service and the Statistical Reporting Service. Many of the current reports shown below as issued by AMS, ARS, and FAS are now issued by the two new agencies.

  - No. 4. Historical Statistics on Governmental Finances and Employment.
  - No. 5. Graphic Summary of the 1962 Census of Governments.
- Vol. VII. State Reports (scheduled to be issued in 1964). 51 reports; one for each State plus one for the District of Columbia and the Commonwealth of Puerto Rico. Data on governmental structure, employment, and finances.

## 1960 CENSUS OF POPULATION

- Vol. I. Characteristics of the Population. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, and Canal Zone. First issued in four separate, paperbound chapters, designated as A, B, C, and D, for each area. The four chapters for each area will then be assembled and issued in buckram as numbered parts of Vol. I. In addition, all of the 57 chapters A have been assembled and issued in buckram as Part A, of Vol. I.

## 1960 CENSUS OF POPULATION—Continued

- Chapter A. Number of Inhabitants. Final population counts for States and counties and their urban and rural parts, and for standard metropolitan statistical areas, urbanized areas, all incorporated places, unincorporated places of 1,000 or more inhabitants, and minor civil divisions.
- Chapter B. General Population Characteristics. Sex, age, marital status, color or race, and relationship to head of household.
- Chapter C. General Social and Economic Characteristics. Statistics on nativity and parentage, State of birth, mobility, education, families and their composition, employment status, occupation, income, and other subjects.
- Chapter D. Detailed Characteristics. These reports present most of the subjects covered in chapter C, above, cross-classified by age, color, and other characteristics, with additional information on families, single years of age, occupation, and industry.
- Vol. II. Subject Reports. 37 reports planned, devoted essentially to detailed cross-relationships for the United States and regions and, in some cases, standard metropolitan statistical areas, for such subjects as national origin and race, fertility, families, marital status, migration, education, employment, unemployment, occupation, industry, and income.
- Vol. III. Selected Area Reports. Five reports showing selected characteristics of the population (1) for State economic areas, (2) according to size of place, (3) for Americans overseas, (4) for standard metropolitan statistical areas, and (5) according to metropolitan status and size of place.
- Vol. IV. Summary and Analytical Report. (Publication date not yet determined.) A review of the results of the 1960 Census for each major subject field.
- Census Tract Reports. One report for each of 180 tracted areas in the United States and Puerto Rico. Information on population and housing subjects.

## 1960 CENSUS OF HOUSING

- Vol. I. States and Small Areas. (States issued December 1961–May 1962. U.S. Summary scheduled to be issued August 1963.) Separate reports for the United States, each State, the District of Columbia, Puerto Rico, Guam, and Virgin Islands. Information on tenure, color, vacancy status, population per occupied housing unit, number of persons per room, number of rooms, type of structure, condition and plumbing facilities, equipment and facilities, financial characteristics and other subjects, for the State, counties, urbanized areas, standard metropolitan statistical areas, and places of 1,000 inhabitants or more.
- Vol. II. Metropolitan Housing.
