ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. William Lerner, Assistant Chief, was responsible for general supervision, planning of content, and review. Helen E. Teir was responsible for compilation, assisted by Juanita A. Wright for technical editorial work and Minerva K. Moreland for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 991–996) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions. The source notes to the tables affected include a copyright notice. Permission to use copyright material should be obtained directly from the copyright owner.

SUGGESTED CITATION

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources, the section on Publications of Recent Censuses, and the Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as “unpublished data.” More information on the subjects covered in tables so noted may generally be obtained from the contributing agency.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in the State tables whenever available and are supplemented by information in section 32. Statistics for cities or other relatively small geographic units appear only in a few instances. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract*. (See pages V and VI).

Changes in the 1966 edition.—This edition, the 87th annual issue, presents data for the most recent year or period available during the early part of 1966.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references. The text for section 3, Immigration and Naturalization, was substantially revised this year to take account of the new preference system for immigrants covered by the immigration act that became effective in December 1965. Likewise, the text for section 10, Social Insurance and Welfare Services, was revised to cover new legislation effective in July 1966 providing protection against costs of medical care in old age.

Newly released information contained in this edition includes data on employment, taxable payrolls, and reporting units under the Social Security Act, abstracted from *County Business Patterns, 1964* (tables 682–685); data from the 1963 Census of Commercial Fisheries (tables 1023 and 1024); and data from the 1963 Censuses of Business, Manufactures, and Transportation (tables 826, 834, 1206, and 1219) supplementing those presented in the 1965 edition. New tables on subjects of particular current interest include more data on the Negro population than were available previously (tables 23, 155, 324, and 476); data on museums and symphony orchestras (tables 299 and 300); and data on sports not previously covered (table 298). More data are also included on automobiles and on motor-vehicle accidents (tables 822, 823, and 828–830).

Altogether, there are 66 entirely new tables in this edition, scattered through 21 of its 33 sections. In addition to the tables specified above, significant inclusions in various sections are 5 new tables on crime and law enforcement in section 5; 2 on military forces in section 9; 11 new tables on social welfare in section 10; and 7 new tables on research and development in section 20.
Following is a list of some of the subjects covered by the new tables:

Population projections to 2015 (p. 8)
Population of 55 large SMSA's, 1964 (p. 17)

Forest land (p. 678)
Commercial fishing (pp. 690, 691)
Retail sales by merchandise lines (p. 813)
Merchant wholesalers (p. 828)

Of the tables included in the 1965 edition, 62 were omitted from this issue. The omissions, scattered through 22 sections, represent tables for which comparable details appear in the new or retained tables or for which no recent data are available.

Responsibility.—The contents of this volume were taken from a large number of sources (see "Source Agencies and Table Numbers"). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the Statistical Abstract and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C., 20233.
