

## Household and Family Tables

The Census 2000 Supplementary Survey and American Community Survey household and family tables were reweighted using the housing unit weight instead of the person weight of the householder used in the previous release. Because of this change, the number of households will equal the number of occupied housing units but will not equal the number of householders, which was not previously the case. The following tables, as well as the tabular and narrative profiles, and the Median Household Income rank table were updated as of November 7, 2002; only the corrected versions of these tables are available.
