****

VARIES - 1 Topcode levels and the number of cases varies by geography. Variable was topcoded at the lowest geography.

VARIES - 2 Topcode levels and the number of cases varies by geography. Variable was topcoded by the supplemental metropolitan areas and the remainder of the cases.

VARIES - 3 Component variables were topcoded before creating this variable. As each component variable was topcoded individually, the number of cases topcoded for each component variable and the level at which they were topcoded varies.

VARIES - 4 Variable is based on person-level data and the data were topcoded for each person. Levels of topcoding and topcode values may vary for people within households. The person-level variables were also topcoded by the supplemental metropolitan areas and the remainder of the cases.

***** The variable is changed in a number of rare situations to preserve confidentiality.
