or any of the Field Offices of the Department of Commerce—Price 3.50

# Preface

This report provides data on the public civilian employment phase of the 1962 Census of Governments. This Census is conducted in accordance with the Act of Congress, approved September 7, 1950, "to provide for the conduct of a periodic census of governments" (Title 13, Section 161, United States Code).

Plans and specifications for this census were developed by the Governments Division of the Bureau of the Census in consultation with other parts of the Bureau, other Federal Government agencies, and the standing Census Advisory Committee on State and Local Government Statistics.

Although much of the work for this phase of the 1962 Census of Governments was handled within the Governments Division, various other parts of the Bureau also played an important role. The Economic Operations Division carried out mail preparation and handling operations and screeded returns from the numerous small governments. Tabulations were developed by the Data Processing Systems Division in accordance with programs prepared under the supervision of Richard M. Havens of the Economic Operations Division. Copy preparation for publication, performed in the Administrative Service Division, was supervised by Gladys T. Ulrich. Charts appearing in the "Graphic Summary" of this report were prepared by the Jeffersonville (Indiana) Census Operations Office.

Within the Governments Division, numerous employees made an important contribution to the project. These included Sherman Landau, who assisted by Geneva Hines, administered arrangements for services from other parts of the Bureau; Lynden Mannen, who supervised assembly of Federal Government data; Dorothy A. Gottschall, who supervised the routing and control of survey returns within the Governments Division; Richard J. Neach, who supervised examination of survey returns; staff members of the Compilation Branch, who carried out field enumeration work to obtain figures needed for important nonrespondent governments; Robert Brown, who with other staff members of the Surveys Branch, carried out extensive technical correspondence; and Rebecca E. Dove, who reviewed both the preliminary and final tabulations. With valuable advice from Julia Moring of the Statistical Reports Division, Bernice D. Dowling, Helen Files, Johanna Barten, and Helen Maurice prepared publication copy in the Governments Division.

The helpfulness of the U. S. Civil Service Commission and other agencies in providing Federal Government data needed for this report is gratefully acknowledged. Above all, appreciation is due to more than 100,000 State and local government officials who provided information for this phase of the 1962 Census of Governments.

# Introduction

Civilian public employment in the United States totaled 9.4 million persons in October 1962. Civilian public payrolls for that month amounted to $4.0 billion. Excluded from these totals are the uniformed forces of the armed services. However, the statistics being reported here do comprise all civilian employees of the Federal Government (including those working outside the United States, and all persons employed by the 50 State governments and the more than 90,000 units of local government in the Nation--counties, municipalities, townships, school districts, and special districts.

The public employment total of 9.4 million persons includes 1.3 million part-time employees--most of them serving local governments. For many, or perhaps even for most of these individuals, their governmental connection represents a form of community service or a source of incidental earnings, rather than a principal employment or means of livelihood. When the number of part-time employees is discounted by applying full-time earning rates, the full-time equivalent of all part-time public employees is found to equal 344,000 persons. Thus, on a full-time equivalent basis, civilian public employment totaled 8.4 million persons in October 1962.

The fraction of gross numbers of employees represented by part-time personnel differs considerably among levels and types of government, and among various functions. For simplicity and comparability, therefore, where the following text states numbers or proportions of public employees, the reference is to full-time equivalent employment, unless otherwise indicated.

Local governments account for somewhat more than one-half of all civilian public employment, the Federal Government for about 29 percent, and the States for 17.5 percent. A ranking of the several individual types of government by size in terms of employment shows the Federal Government first, followed by school districts, municipalities, State governments, counties, special districts, and townships, in that order.

## DISTRIBUTION BY FUNCTION

Five major fields of governmental activity account for more than two-thirds of the national total of public employment, as shown in table 4. Two of these--education and national defense--together engage 46 percent of all public employees. Three other functional categories--health and hospitals, postal service, and highways--together involve 23 percent of all public employment. The remaining 31 percent of governmental employment is distributed among numerous functional categories.

Of the five leading functions of government in terms of public employment, only one--health and hospitals--involves a significant proportion of employees on all three levels of government, Federal, State, and local. Two of the five major functions--national defense and postal service--are exclusively Federal. The remaining two--education and highways--predominantly engage State and local government employees. Education alone accounts for nearly one-third of all public employment. As shown in table 5, the bulk of employees in this field are on the payrolls of local governments. Local governments also exceed the State governments, but only slightly, in volume of employment for highways.

Following is a summary percentage distribution, by kind of government and major function, of the nationwide total of public employment:

| Functions | All governments | Federal | State | Local |
|---|---|---|---|---|
| All functions..... | 100.0 | 29.3 | 17.5 | 53.2 |
| Education..... | 32.5 | 0.1 | 4.6 | 27.8 |
| National defense, international relations..... | 13.4 | 13.4 | ... | ... |
| Health and hospitals..... | 10.3 | 2.0 | 4.1 | 4.1 |
| Postal service..... | 6.6 | 6.6 | ... | ... |
| Highways..... | 6.3 | 0.1 | 3.1 | 3.1 |
| All other functions..... | 30.9 | 7.0 | 6.7 | 18.2 |

Note: Because of rounding, detail may not add to totals.

The general nature of many of the governmental functions for which figures are shown separately in this report will be evident from their names. The scope of certain categories is more fully indicated below.

Education

The leading function of government in terms of employment is education, which accounts for 32.5 percent of all public employment nationally and constitutes 52.2 percent of local government employment, 26.3 percent of State employment, and 0.4 percent of all Federal employment. This category is not limited to teachers or professional staff, but includes also administrative, clerical, maintenance, and auxiliary employees of educational agencies and institutions.

For local governments, the "education" category relates only to personnel of school systems, and thus does not include county school superintendents and their staffs where, as in most States, these offices are concerned with general supervision rather than actual operation of public schools. Such offices, which typically involve only a minor component of local government employment, are in the residual "all other" functional class.

School system amounts for local governments have been subclassified to provide data separately for college-grade operations, including those of composite high school-junior college systems, and the resulting figures are reported, along with data for State colleges and universities, under the heading "Institutions of higher education." The summary term "teachers" has been used here to refer to all personnel reported by school systems as "Instructional personnel," a category defined to include not only teachers but also principals, supervisors of instruction, school librarians, and guidance personnel, but not school superintendents or other administrative staff.

State employment in education is chiefly in institutions of higher education; however, employment in hospitals operated by State universities has been classified as hospital employment, while employment in agricultural experiment stations and extension services has been classified as involving natural resources. State education employment also includes employees of

State departments of education, State schools for the handicapped, the public school system of Hawaii (directly State-operated), and also certain State-operated local schools in Alaska and Maine.

The term "teachers," as used here with reference to State institutions of higher education, pertains to "Instructional staff--employees engaged in teaching and related academic (departmental) research. . . ."

Federal employment in education mainly comprises personnel of the U.S. Office of Education, the National Science Foundation, and Federal schools for Indians and others on Federal reservations.

### National defense and international relations

This functional category accounts for 13.4 percent of all public employment nationally and for nearly one-half of all Federal employment. It comprises all civilian employees (i.e., excluding uniformed military personnel) in activities classified in the U. S. Budget under two closely related headings--"National defense" and "International affairs and finance." A major part of this large component is accounted for by civilian personnel dealing with military functions of the Department of Defense, but the category also comprises the State Department, the atomic energy program, and some defense services of agencies other than the Defense Department.

### Postal service

The postal service, a distinctively Federal function, accounts for 6.6 percent of all public employment and for 22.6 percent of all Federal employees--far more than any other nondefense function of the national government.

### Highways

Employment in highways accounts for 6.3 percent of the national total of public employment; 5.9 percent of all local government employment is for highways, 17.6 percent of State employment, and 0.2 percent of Federal employment.

This function covers the provision and maintenance of highway facilities, not only regular roads, highways, and city streets, but also toll turnpikes, bridges, and tunnels. It does not include policing of highways, which is classified under "Police protection," nor street cleaning, classified under "Sanitation other than sewerage."

### Health

This function accounts for 1.3 percent of the national total of public employment. Health services engage 1.3 percent of Federal employees, comprising employment in the Public Health Service and Food and Drug Administration. State and local employment in health constitutes 1.3 percent of the total employment of these governments and includes public health administration, research, nursing, immunization, clinics, and other health activities, except for hospitals.

### Hospitals

Publicly operated hospitals account for 8.9 percent of all public employment. This function includes all nonmilitary Federal hospitals, and State and local hospitals generally. Hospital personnel constitutes 5.5 percent of all Federal employees, 21.6 percent of State employment, and 6.6 percent of local government employment.

### Natural resources

Conservation and development of natural resources--agricultural, forest, mineral, and the like--accounts for 3.6 percent of all public employment.

Activities under this heading include agricultural aids and research, multipurpose resource programs such as TVA, projects of the U. S. Bureau of Reclamation and the Army Corps of Engineers, and other activities in irrigation, drainage, reclamation, flood control, soil conservation, forestry and parks, and mineral resources. Employees concerned with city and other local park facilities, however, are classified under "Local parks and recreation," and the production and distribution of power by local government agencies is classified under "Local utilities" rather than "Natural resources."

Natural resource activities account for 7.4 percent of Federal employment, 6.6 percent of State employment, and 0.5 percent of local government employment.

### Police protection

Federal, State, and local police protection account for 4.0 percent of public employment. Local governments account for more than four-fifths of all police protection employees, and this category accounts for 6.3 percent of all local government employment. This function is not limited to uniformed police forces, but includes also clerical, administrative, and custodial personnel concerned with police protection activities.

Federal police employment is in the Federal Bureau of Investigation, the Immigration, and Naturalization Service, the Bureau of Narcotics, and the Secret Service. It accounts for 0.9 percent of Federal employment.

State employment for this function is principally in highway police activities and constitutes 2.4 percent of all State employment.

### General control

General control includes the activities of governmental chief executives and their staffs, legislative bodies, the administration of justice, and general administration, other than tax collection and other fiscal operations classed as "Financial administration."

### Other functions

"Social insurance administration" comprises, on the Federal level, the Bureau of Employment Security, the Bureau of Old Age and Survivors Insurance, the Railroad Retirement Board, and the insurance program of the Veterans' Administration. In table 4, this term also applies to State administration of unemployment compensation and public employment offices, and related services, which in other tables are recorded as "Employment security administration."

"Public welfare" covers the administration of public assistance for needy persons, including programs involving vendor payments for medical care and other services, and the operation of welfare institutions. However, health and hospital services provided directly by governments are classed under "Health" or "Hospitals" rather than here. On the Federal level, this activity includes the Welfare Administration (formerly included under the Social Security Administration), the Soldiers' Home, and operation of Veterans' Administration homes. State and local government employment under this heading mainly is for the administration of the categorical public assistance programs and general relief.

"Sanitation other than sewerage," as a functional category, pertains to refuse collection and disposal and street cleaning activities of local governments.

"Water transportation" includes on the Federal level the Coast Guard, Coast and Geodetic Survey, Maritime Administration, Panama Canal Company, and navigation activities of the Corps of Engineers; for State and local governments it includes employment on port and terminal facilities and canals.

"Correction" includes prison systems and probation and parole activities for convicted offenders; however, preconviction detention, such as in city jails, is included under "Police protection."

## RECENT TRENDS

Comparison of the 1962 data shown here with corresponding statistics from the 1957 Census of Governments throws light upon trends of the intervening 5½-year period, April 1957 to October 1962. Such trends have previously been indicated on a somewhat less detailed and precise basis by sample-survey reports issued annually under the title, State Distributions of Public Employment.[1]

### Governmental levels

Total public employment (on a full-time equivalent basis) rose by 1,295 thousand persons, or 18.2 percent, between April 1957 and October 1962. One-tenth of this change was accounted for by the Federal Government, which experienced a net increase of 130 thousand civilian employees in the 5½-year interval, or an average of about 1 percent annually.

Local governments accounted for two-thirds of the increase in public employment, with a growth of about one-fourth in their total number of employees (on a full-time equivalent basis), between April 1957 and October 1962. A similar trend appears for State governments, though involving fewer persons. For the State and local governments together, the annual rate of growth in public employment averaged 4 percent during this interval.

Monthly payrolls rose for all three levels of government, and at a considerably more rapid pace than numbers of employees. Total civilian public payrolls were 57 percent greater in October 1962 than in April 1957, with the Federal Government showing a rise of 47 percent, State governments, 70 percent, and local governments, 60 percent. These figures reflect a continuance of the upward trend which has been evident since World War II in earning rates of public employees. Between April 1957 and October 1962, the monthly average for full-time Federal civilian employees rose from $393 to $545, or 39 percent, and the average for full-time State and local government employees increased from $336 to $442, or 32 percent. These changes are influenced not only by revisions in public pay rates but also by trends in the functional composition of employment. For example, a part of the increase in average earnings for full-time State and local government employees has resulted from the growing proportion of such employees concerned with education.

### Governmental functions

Nearly half the net rise in public employment between April 1957 and October 1962 was accounted for by the function "education." Personnel for this function, on a full-time equivalent basis, rose by 639 thousand persons, or 30 percent. For all other public employment there was a net increase of 656 thousand persons, or 13 percent. The latter figure is the result of diverse trends for various particular functions, including a reduction of about 100 thousand in the number of Federal civilian employees for national defense.[2] Following is a summary of the indicated changes in public employment for all functions (on a full-time equivalent basis) between April 1957 and October 1962:

| Function | Increase or decrease (-) | | Percent of total change, 1957-1962 |
|---|---|---|---|
| | Number (000) | Percent | |
| All functions | 1,295 | 18 | 100.0 |
| Education | 639 | 30 | 49.3 |
| National defense | -100 | -9 | -7.8 |
| Health and hospitals | 149 | 21 | 11.5 |
| Postal service | 93 | 20 | 7.2 |
| Highways | 80 | 18 | 6.2 |
| Police protection | 50 | 17 | 3.9 |
| Natural resources | 45 | 17 | 3.5 |
| Financial administration and general control | 42 | 10 | 3.3 |
| Correction | 30 | 44 | 2.3 |
| Public welfare | 28 | 25 | 2.1 |
| Sewerage and other sanitation | 27 | 21 | 2.1 |
| Social insurance administration | 24 | 32 | 1.9 |
| Local fire protection | 21 | 16 | 1.6 |
| Air transportation | 19 | 56 | 1.5 |
| Local parks and recreation | 19 | 26 | 1.4 |
| Local utilities | 15 | 7 | 1.2 |
| Local libraries | 12 | 41 | 1.0 |
| Housing and urban renewal | 12 | 33 | 0.9 |
| Water transport and terminals | (1) | -1 | (2) |
| State liquor stores | (1) | -1 | (2) |
| All other functions | 89 | 29 | 6.9 |

[1] Less than 500 persons.
[2] Less than 0.05 percent.

[1] Related findings for 1957 (which were for the month of April rather than for October, as in the 1962 Census of Governments) were presented in three publications making up Volume II of the 1957 Census of Governments: No. 1, Summary of Public Employment; No. 2, Compendium of Public Employment; and No. 3, Local Government Employment in Standard Metropolitan Areas. Highly detailed comparisons of the two sets of data should take account of the intervening changes in coverage and classification which are indicated below under "Sources and Reliability of Data."

[2] Table 4 of this report shows 1,133 thousand civilian Federal employees (full-time equivalent) concerned with "national defense and international relations." For comparison with the 1957 figure of 1,173 thousand employees then reported under "national defense," approximately 60 thousand persons need to be deducted from the 1962 aggregate, as employment for "international relations." On this basis, a net reduction of 100 thousand persons is indicated for "national defense."

## CHARACTERISTICS OF LOCAL GOVERNMENT EMPLOYMENT

The numbers of local governmental units by types as of January 1962 and the percentage of total public employment accounted for by each type in October 1962 were as follows:[3]

| | Number of units | Percent of public employment |
|---|---|---|
| All local governments | 91,186 | 53.2 |
| Counties | 3,043 | 9.3 |
| Municipalities | 18,000 | 17.6 |
| Townships | 17,142 | 1.7 |
| School districts | 34,678 | 22.6 |
| Special districts | 18,323 | 2.0 |

The percentages above are based on full-time equivalent numbers of employees, as are other employment figures mentioned below in this section. However, as noted earlier, part-time employment is more extensive for local governments than for States or the Federal Government. About one out of every five employees of local governments is a part-time employee. The proportion is less than this for counties, municipalities, and school districts; however, one out of every four persons employed by special districts is part-time, and nearly one-half of all township employees are so reported.

### Counties

Organized county governments are found in all the States except Alaska, Connecticut, and Rhode Island. Terminology is uniform with the exception of Louisiana, where the designation "parish" is applied. Nationally, two-thirds of county employment is accounted for by a few functions--education, hospitals, highways, public welfare, and police protection, in that order of magnitude.

### Municipalities

As used here, the term "municipalities" includes all governmentally active units officially designated as cities, boroughs, villages, or--except for New England, New York, and Wisconsin--designated as towns. Approximately two-thirds of the Nation's inhabitants live in areas with municipal government. Together, the functions of police protection, education, fire protection, sewerage and other sanitation, hospitals, and highways account for nearly two-thirds of all municipal government employment.

### Townships

Townships are found in 21 States, including "towns" in the six New England States and in New York and Wisconsin, and some "plantations" in Maine and "locations" in New Hampshire. Township governments serve areas that, in 1960, accounted for more than one-fifth of the Nation's population. In the North Central States, townships typically perform a very limited range of services for predominantly rural areas, but in the New England States, New Jersey, and Pennsylvania, and to some degree in Michigan, New York, and Wisconsin, these governments are vested with rather broad powers and, where they include urbanized areas, perform functions commonly associated with municipalities. However, on a national basis, nearly three-fourths of all township government employment is accounted for by only three functions--education, highways, and police protection, in that order of magnitude.

### School districts

Independent school districts are found in all but 4 States (where public schools are administered by other governments). Governments other than school districts also operate some public school systems in 23 additional States; 2,341 such "dependent" school systems were reported in January 1962 in addition to the 34,678 school districts. School districts account for 69.4 percent of all public employment in education and for 81 percent of all public employment directly concerned with "local schools," as shown in table 7.

### Special districts

Special districts are to be found in every State and the District of Columbia. With respect to employment, their leading functions and the percentage of special district employment contributed by each, as shown in table 6, are as follows:

| | |
|---|---|
| Hospitals | 26.1 |
| Transit | 14.6 |
| Housing and urban renewal | 11.9 |
| Natural resources | 7.3 |
| Water supply | 6.4 |
| Electric power | 5.7 |
| Sewerage | 5.2 |
| All other functions | 22.8 |
| Total | 100.0 |

## LOCAL GOVERNMENT EMPLOYMENT IN METROPOLITAN AREAS

In table 8, nationwide statistics on employment and payrolls are summarized separately for local governments located within standard metropolitan statistical areas and those outside such areas. This presentation relates to the 212 SMSA's in the United States proper (i.e., excluding Puerto Rico, for which 3 SMSA's were also defined) as delineated in connection with the 1960 Census of Population.[4] Table 15 also summarizes separately, State by State, the portion of local government data relating to units within SMSA's.[5]

Each standard metropolitan statistical area consists of a single county area or a group of contiguous counties, except that in New England such an area consists of a group of contiguous cities and towns. Each such area includes at least one "central city" of at least 50,000 inhabitants or, in a few instances, contiguous twin cities which together meet this population minimum.

[3] Detailed information on local government structure, by States, is presented in Volume I of the 1962 Census of Governments, Governmental Organization.

[4] A Bureau of the Budget publication, Standard Metropolitan Statistical Areas (1961) provides a convenient directory of individual SMSA's; gives a detailed statement of criteria for the definition of such areas; and describes geographic changes in SMSA's between 1950 and 1960.

[5] A report which is to appear as Volume V of the 1962 Census of Governments, Local Government in Metropolitan Areas, will present statistics on local government employment for individual SMSA's and their component counties, as well as for size-groups of SMSA's.

Local governments in standard metropolitan statistical areas accounted for nearly two-thirds of all local public employment in October 1962--i.e., for 2.9 million of the 4.5 million total (on a full-time equivalent basis) of local government personnel.

The statistics in table 8 reflect a number of significant differences between SMSA's and other areas in the pattern of local government employment. For example, there is a considerably smaller proportion of part-time employment in the SMSA's. Within such areas, less than one-seventh of all local government employees are engaged on a part-time basis, but elsewhere the fraction averages one-fourth. Also, monthly earnings are shown to be considerably greater for local government employees in metropolitan areas than elsewhere; for each of the numerous functions reported separately in table 8, a higher average appears for SMSA units than for local governments outside such areas. For example, full-time teachers in public school systems showed an October 1962 average of $589 within SMSA's, as against $461 elsewhere; the respective October averages for full-time fire protection employees were $509 and $376; and for water system employees, $440 within SMSA's and $333 elsewhere.

Table 8 especially reflects the differing relative scale of various local government functions inside and outside of SMSA's. In relation to their population, local governments within metropolitan areas engage considerably more public employees than local governments elsewhere for numerous functions, including police and fire protection, sewerage and other sanitation, parks, libraries, and various other mainly urban services. Nonetheless, there are some important offsetting tendencies, especially with regard to local government employment for "education." In October 1962, local government employment for this major function averaged only 119.5 persons per 10,000 population within SMSA's, as compared with 137.2 persons per 10,000 population outside such areas. A similar tendency is found for the "highways" function, which required only 11.3 persons per 10,000 in SMSA's, but 19.4 per 10,000 elsewhere, and also for such functions as natural resources, financial administration, and general control. As a net result of these divergent tendencies, the total of local government employment for all functions averaged only slightly higher within standard metropolitan statistical areas than elsewhere--i.e., on a full-time equivalent basis, 248.1 per 10,000 in SMSA's and 228.8 per 10,000 outside such areas.

## STATE DISTRIBUTION OF PUBLIC EMPLOYMENT

Of every 10,000 persons in the United States, 369 were engaged as State or local government employees in October 1962, and 128 as Federal Government employees. However, discounting those public employees engaged only on a part-time basis, in terms of full-time earning rates, the full-time equivalent of all State and local government employment is found to average 321 per 10,000 population. Data on these relationships, by State, appear in tables 12 and 14.

### Federal employment

Federal civilian employment ranges widely among the various States in relation to total population, depending primarily upon the location of large-scale Federal establishments, including regional and field headquarters offices. The proportion is shown as less than 65 Federal employees per 10,000 inhabitants in 6 States (Connecticut, Iowa, Michigan, North Carolina, West Virginia, and Wisconsin), ranging up to more than 200 per 10,000 in 4 States (Alaska, Hawaii, New Mexico, and Utah).

### State-local totals

Employment of State and local governments bears a more uniform relationship to population in the various State areas, especially when measured in terms of full-time equivalent numbers. On that basis, the range in October 1962 was from 265 per 10,000 inhabitants in Kentucky up to 446 per 10,000 in Wyoming. Half of the States fell in the range of 300 to 349 employees per 10,000 inhabitants. Following is a distribution of the 50 States and the District of Columbia in terms of the full-time equivalent number of State and local government employees per 10,000 inhabitants:

| | |
|---|---|
| Less than 275 | 4 |
| 275 to 299 | 10 |
| 300 to 324 | 12 |
| 325 to 349 | 14 |
| 350 to 374 | 8 |
| 375 or more | 3 |
| Total | 51 |

Relative to population, the number of State and local government employees is typically less in the Northeast and South than elsewhere, while the Western States commonly run above the nationwide average. This is evident from the following regional grouping of State areas:

| State and local government employees per 10,000 inhabitants | Number of States* | | | | |
|---|---|---|---|---|---|
| | U. S. total | Northeast | South | West | North Central |
| Total | 51 | 9 | 17 | 13 | 12 |
| Less than 300 | 14 | 5 | 7 | ... | 2 |
| 300 to 324 | 12 | 2 | 6 | ... | 4 |
| 325 to 349 | 14 | 1 | 3 | 6 | 4 |
| 350 or more | 11 | 1 | 1 | 7 | 2 |

*In this grouping the Northeast includes the 6 New England States and New York, New Jersey, and Pennsylvania; the South includes the District of Columbia and the 16 States from Delaware to Texas; the West comprises the Mountain and Pacific Coast States, and Alaska and Hawaii; and the North Central Region includes the other 12 States running from Ohio to Kansas and Minnesota.

### Education employment

Much of the range in State and local government employment, relative to population, results from diversity in the volume of employment for education. In every State this function--comprising public colleges and universities as well as local schools--engages more State and local government personnel than any other function. However, the range is from only 96 persons per 10,000 in the District of Columbia and 118 per 10,000 in Massachusetts up to 206 public education employees per 10,000 population in Wyoming.

For local schools alone, the range is from 94 up to 172 employees per 10,000, but for half the States, this ratio falls between 100 and 130 public school employees per 10,000 inhabitants. On a regional basis, public school employment in the predominantly urban Northeast contrasts with that in the West. Only 2 of the 9

Northeastern States have as many as 120 public school employees per 10,000 inhabitants, while 12 of the 13 Western States show a higher ratio than this.

The wide variation in public school employment in relation to population no doubt results from numerous factors, including, for example, interstate differences in age distribution of population; in the proportion of all school pupils enrolled in public as against parochial or private schools; in the size of public school classes; and in the extent to which pupil transportation or other supplementary services are provided. In general, each of these factors tends to limit the volume of public school employment in the primarily urban States of the Northeast and to expand such employment, relative to total population, in Western and North Central States.

Public institutions of higher education engage fewer than 15 persons per 10,000 population in the District of Columbia and 6 States, including 5 of the 9 Northeastern States. On the other hand, 30 or more persons per 10,000 inhabitants are so engaged in 12 States, all but 1 of them located in the North Central or Western region. The other 32 States fall between these extremes in public employment for higher education. For the country as a whole, the average relationship is 20.8 persons per 10,000 population.

Other functions

There is a considerable interstate range also in the volume of employment for public services other than education. This is evident from the following figures, based on table 14, showing the full-time equivalent number of State and local government employees per 10,000 population for selected functional categories:

| Function | U. S. average | Highest State | Lowest State |
|---|---|---|---|
| Hospitals | 33.0 | 60.8 | 2.0 |
| Highways | 28.2 | 57.8 | 17.3 |
| Police protection | 17.1 | 38.7 | 9.1 |
| Local utilities | 12.6 | 36.4 | 3.5 |
| Fire protection | 8.3 | 20.2 | 2.9 |
| Natural resources | 6.6 | 23.8 | ... |
| Financial administration | 9.7 | 15.8 | 6.0 |
| General control | 8.9 | 17.1 | 5.1 |

Public hospital employment ranges between 20 and 35 persons per 10,000 population in 32 States and the District of Columbia. No clear regional pattern appears for this function. Of the 6 States with more than 40 public hospital employees per 10,000 population, 2 are in the Northeast, 2 in the South, and 2 in the West. Of the 6 States having fewer than 20 public hospital employees per 10,000 inhabitants, 1 is in the Northeast, 2 are in the North Central region, and the other 3 are in the West.

State and local government employment for highways averages nationally 28.2 per 10,000 population. However, the ratio is over 35 per 10,000 in 16 States--each having a relatively large area in relation to its population.

Police protection engages from 12 to 18 persons per 10,000 population in more than half the States. All except 1 of the 11 States with a higher ratio than this are predominantly urban. At the other extreme, employment for the police function is less than 12 per 10,000 in 12 States, all but 1 of them located in the South or West of the Mississippi River.

In relation to population, employment for publicly operated local utilities--water, electric, gas, and transit systems--also shows a considerable range. However, in more than half of the States there are between 5 and 10 persons per 10,000 population so engaged. In the 7 States that have 18 or more governmental utility employees per 10,000 inhabitants, the high proportion partly reflects either public operation of major urban transit systems (in California, Illinois, Massachusetts, and New York) or of numerous electric power systems (in Nebraska, Tennessee, and Washington State).

As would be expected, statewide averages of public employment for local fire protection also run highest in relatively urban States. A similar tendency appears for such governmental activities as sewerage, other sanitation services, local parks and recreation, local libraries, and public housing and urban renewal.

Natural resources is another function involving a considerable range in volume of State and local government employment in relation to population, but typically with a higher ratio in relatively rural States. Such employment commonly runs highest in the Western States, which have extensive activities in irrigation, reclamation, and forestry. In one-third of the 50 States, including 9 of the 13 States in the West, State and local governments engage for natural resource activities 10 or more persons per 10,000 inhabitants. At the other extreme, less than 5 persons per 10,000 are so engaged in 10 other States.

The two closely related functions of financial administration and general control together engage some 18.6 State-local employees per 10,000 population in the Nation as a whole. In a number of States--typically Western States with sparse population--these functions run considerably higher. On the other hand, fewer than 16 persons per 10,000 are engaged for these functions in the District of Columbia and in 13 States, including 10 of the 16 States in the Southern region.

## COMPENSATION OF PUBLIC EMPLOYEES

Two kinds of data are provided here that pertain to the earning rates of public employees: (1) Averages for the month of October 1962, relating the number of full-time employees in that month to payrolls for full-time personnel engaged in various functions; and (2) distributions of full-time employees in terms of annual rates of pay, with related median rates by type of government.

Computed October earnings

On the average, full-time Federal Government employees were paid $545 for the month of October 1962. The corresponding overall average for full-time employees of State and local governments was $442. As

indicated by table 13, this composite figure was associated with national averages for various major components as follows:

| | |
|---|---|
| State governments-- | |
| Teachers | $ 750 |
| Other | 399 |
| Local governments-- | |
| Teachers | 537 |
| Other | 388 |

Because a considerable number of teachers and other educational employees are paid on a 9- or 10-month school term basis, average earnings of these groups for a single month, such as October, cannot be used directly to compare annual earnings of educational personnel with annual earnings of other public employees.

For all functions other than education, taken together, earnings of full-time State and local government personnel averaged $402 for the month of October 1962. There was a marked range in monthly earning rates for various functions, as indicated by the following figures calculated from tables 5 and 6:

| Function | Average October 1962 earnings of full-time employees | | |
|---|---|---|---|
| | State and local governments | States | Local governments |
| Water transport and terminals | 510 | 475 | 546 |
| Local fire protection | 487 | ... | 487 |
| Local airports | 473 | ... | 473 |
| Local utilities, total | 469 | ... | 469 |
| Police protection | 465 | 474 | 464 |
| Health | 434 | 454 | 421 |
| General control | 432 | 565 | 410 |
| Employment security administration | 429 | 429 | ... |
| Correction | 428 | 424 | 437 |
| Housing and urban renewal | 421 | ... | 421 |
| Sewerage | 419 | ... | 419 |
| Natural resources | 418 | 432 | 366 |
| Financial administration | 397 | 412 | 385 |
| Highways | 394 | 409 | 379 |
| State liquor stores | 385 | 385 | ... |
| Local parks and recreation | 378 | ... | 378 |
| Sanitation other than sewerage | 370 | ... | 370 |
| Public welfare | 369 | 376 | 364 |
| Local libraries | 340 | ... | 340 |
| Hospitals | 317 | 330 | 302 |

The relatively low averages shown for hospital employees result at least in part from a characteristic which applies to all these figures but has particular significance for this function--namely, that the compensation amounts reported represent cash payments only, and do not include the value of quarters, meals, or other "payments-in-kind."

The relatively high averages shown for "local utilities" and for certain other predominantly urban functions are influenced by the familiar tendency for wage scales to be higher in urban than in rural areas. Further background on this tendency is available from the comparative averages shown separately, in table 8, by function, for local governments located within and outside of standard metropolitan statistical areas.

Monthly earnings of full-time employees other than those engaged in education averaged as follows for various types of governments in October 1962:

| | |
|---|---|
| Municipalities | $ 425 |
| Special districts | 416 |
| States | 398 |
| Townships | 370 |
| Counties | 362 |

These figures seem to reflect the effect of urban-associated functions and the functional composition of employment by particular kinds of governments. Special districts, as previously noted, have a considerable part of their employment in urban-type services. The relatively low earnings average shown for State governments partly reflects their extensive employment of hospital personnel, with which a less-than-average rate of cash compensation is generally associated. The relatively low county government average reflects a geographic factor; this is a particularly important class of government in the South, which has generally lower pay rates than other parts of the country.

Annual rates of pay

Distributions of public employment by annual rate of pay appear in table 9 on a nationwide basis and in table 16 for State and local government employees in each State. Such data are available by type of government but not separately for various functions nor, except for the distinction between teachers and other full-time employees, by type of position.

In October 1962, one-half of all full-time public employees were employed at an annual rate of $5,246 or less; and only 6 percent of all full-time public employees were being paid $9,000 per year or more.

Following are median annual rates indicated by table 9 for various components of full-time employment:

| | |
|---|---|
| Federal Government | $ 5,390 |
| State governments: | |
| Teachers | 7,971 |
| Other than teachers | 4,824 |
| Local governments: | |
| Teachers | 5,680 |
| Other than teachers: | |
| Counties | 4,062 |
| Municipalities | 4,824 |
| Townships | 4,154 |
| School districts | 3,680 |
| Special districts | 4,675 |

The marked regional differences that exist in public pay rates are evident from the data shown by State in table 16. Following is a distribution of the 50 States

and the District of Columbia in terms of median annual pay rates for local government employees other than teachers:

| Median annual pay rate | Number of States* | | | | |
|---|---|---|---|---|---|
| | U. S. total | North-east | South | West | North Central |
| Total..... | 51 | 9 | 17 | 13 | 12 |
| Less than $3,300..... | 9 | ... | 9 | ... | ... |
| $3,300 to $3,599..... | 6 | 1 | 4 | 1 | ... |
| $3,600 to $3,899..... | 11 | 2 | 1 | 1 | 7 |
| $3,900 to $4,199..... | 7 | 2 | 2 | 3 | ... |
| $4,200 to $4,799..... | 11 | 3 | ... | 4 | 4 |
| $4,800 or more..... | 7 | 1 | 1 | 4 | 1 |

*As to geographic pattern, see footnote of similar tabulation on page 5.

Following is a similar distribution pertaining to median annual pay rates for locally employed teachers in the various State areas:

| Median annual pay rate | Number of States* | | | | |
|---|---|---|---|---|---|
| | U. S. total | North-east | South | West | North Central |
| Total..... | 51 | 9 | 17 | 13 | 12 |
| Less than $4,500..... | 8 | ... | 7 | ... | 1 |
| $4,500 to $5,099..... | 10 | 3 | 3 | 1 | 3 |
| $5,100 to $5,699..... | 13 | 1 | 4 | 4 | 4 |
| $5,700 to $6,299..... | 12 | 1 | 1 | [1]6 | 4 |
| $6,300 or more..... | 8 | 4 | 2 | 2 | ... |

*As to geographic pattern, see footnote of similar tabulation on page 5.

[1]Including State-operated public school system of Hawaii.

## RETIREMENT AND INSURANCE COVERAGE OF FULL-TIME PUBLIC EMPLOYEES

Substantially all full-time employees at each level of government have some kind of retirement protection in connection with their public employment. As indicated by table 10, of the nationwide total of 8,084 thousand persons holding full-time governmental jobs in October 1962, all except 151 thousand, or 1.9 percent, were reported as participants in some type of contributory arrangement for retirement coverage; and undoubtedly some of the group shown as "without retirement coverage" were recently employed persons whose participation in a retirement program was only temporarily pending.

Coverage by the Federal program of Old Age, Survivors, and Disability Insurance extended in October 1962 to nearly one-half of all full-time public employees--some 152 thousand Federal civilian employees, and some 3.6 million, or nearly two-thirds, of all full-time employees of State and local governments. For most of the State-local participants, OASDI coverage was supplemented by, or represented a supplement to, coverage under a State or locally administered retirement system. However, for nearly one-seventh of all full-time employees of State and local governments, the OASDI system was the sole means of retirement coverage.

The following figures, drawn from tables 10 and 11, summarize percentages of retirement coverage for full-time State and local personnel:

| Item | State employees | Local government employees | | |
|---|---|---|---|---|
| | | Total | Teachers | Other |
| All full-time employees..... | 100.0 | 100.0 | 100.0 | 100.0 |
| Without retirement coverage | 2.4 | 1.9 | 0.4 | 2.9 |
| With retirement coverage... | 97.6 | 98.1 | 99.6 | 97.1 |
| Under OASDI..... | 72.2 | 61.6 | 55.4 | 65.6 |
| As sole coverage..... | 9.0 | 14.4 | 2.2 | 22.3 |
| Under State retirement system..... | 86.8 | 57.1 | 88.5 | 36.8 |
| Under locally administered retirement system | ... | 25.1 | 8.8 | 35.6 |
| By insurance contract... | 2.1 | 1.7 | 0.5 | 2.5 |

Table 17 presents State-by-State figures on retirement coverage of full-time State and local government employees. In general, the pattern resembles that indicated by the national aggregates--for example, with State retirement systems predominating in coverage of local teachers, but with other means of coverage relatively more significant for nonteaching employees of local governments. In every State, at least 95 percent of the combined total of full-time employees of State and local governments are shown to have retirement coverage. In a few instances, however, the coverage percentage falls short of this for some major groups of employees--for example, for State government employees as a whole in Colorado, Georgia, Illinois, Maine, Massachusetts, Tennessee, and Vermont; and for nonteacher employees of local governments in Alaska, Georgia, Idaho, Louisiana, Nevada, and Tennessee.

Tables 10, 11, and 17 also show the numbers and percentages of full-time employees who were covered, in October 1962, by arrangements for contributory health or hospital insurance or for contributory life insurance. The reference to "contributory" in these instances, is intended to restrict the data to arrangements financed in part by contributions from the employing governments or agencies.

Such insurance arrangements apply to a far higher proportion of Federal than of State and local government employees. As shown by table 10, contributory life insurance arrangements, in October 1962, extended to 91 percent of all full-time Federal personnel, but to only 18.5 percent of full-time employees of the States and local governments. For contributory health or hospital insurance, the proportion for Federal Government employees was nearly 79 percent, as compared with 32.5 percent for State and local government employees. From the more detailed data in tables 11 and 17, it appears that such insurance arrangements extend less commonly to local teachers than to nonteaching employees of local governments.

In 26 States, as indicated by table 17, contributory health or hospital coverage applied in October 1962 to less than 20 percent of all full-time State and local government employees. In 17 States, this overall fraction was between 20 and 50 percent; and in 7 States (Connecticut, Hawaii, Massachusetts, New York, Rhode Island, Utah, and Wisconsin) as well as the District of Columbia, contributory health or hospital coverage applied to a major fraction of all full-time personnel.

Contributory arrangements for life insurance protection were somewhat less widespread--applying to less than 20 percent of all full-time personnel in 31 States, to between 20 and 50 percent in 17 States, and to a majority of all full-time employees in only the District of Columbia and two States, Connecticut and Massachusetts.

## DATA FOR COUNTY AREAS AND FOR TYPES OF LOCAL GOVERNMENTS

The foregoing discussion has referred to the statistics presented on a nationwide basis in tables 1 through 11 and on a State-by-State basis in tables 12 through 18. Further detail appears in subsequent tables of this report as follows: Statistics comprising the employment and payrolls of all types of local governments, for population-size groups of county areas in table 19 and for individual county areas in table 20; employment statistics for county governments, as such, in tables 21 and 22; data for municipalities and township governments in tables 23 through 26; and statistics for school districts in tables 27 and 28. Some additional data concerning public employment in standard metropolitan statistical areas will also appear in the prospective Volume V report of the 1962 Census of Governments, Local Government in Metropolitan Areas.

## SOURCES AND DERIVATION OF DATA

### State and local governments

The statistics reported here for State and local governments are based mainly on information received in response to a mail canvass covering all such governmental units.

Altogether, approximately 100 thousand public establishments were canvassed; a number that somewhat exceeds the total count of governmental units because inquiries went separately to each of the more than 2,300 school systems that are adjuncts of other governments, to some 3,000 individual agencies of the State governments, and also to several hundred individual agencies of local governments for which comprehensive employment figures were not available from any central source.

A number of different questionnaires, tailored to the kinds and sizes of the governments involved, were used for this mail survey. The forms included explicit definitions and instructions to aid officials in providing the kinds of data needed. In every instance, at least 4 items of information were requested: Number of full-time employees and number of part-time employees as of the middle of October 1962, and salaries and wages paid for the month of October to full-time and to part-time employees. Except for single-purpose agencies and special districts, such figures were requested separately for various functional categories--police protection, fire protection, highways, etc. --or, in the case of school systems and institutions of higher education, separately for teachers and other categories of employment.

In addition, all State government agencies and a panel of approximately 11,000 local governments, making up a size-stratified sample of each type of local units in each State, were asked to provide information on the retirement and other insurance coverage of their full-time employees, and on the annual rates of pay for such full-time employees as of October 1962.

Reports were received by mail from a high percentage of the governmental establishments canvassed. Incoming questionnaires were examined for evidence of completeness, internal consistency, and, as to units covered by recent annual sample surveys of public employment, a reasonable relation to figures reported for earlier periods. Followup correspondence was used extensively to obtain additional facts or a confirmation or correction of figures initially reported. Census Bureau enumerators visited about 1,200 governments, to obtain figures needed for important nonrespondent units or to obtain necessary additional or corrective information. These efforts provided usable basic data for more than 86,000 units, together accounting for more than 99 percent of all State-local employment and payrolls. For the remaining local governments--most of them small or marginally operative municipalities, townships, or special districts--amounts were estimated for each individual unit, by reference to reported data for other units of similar type and size in each State.

The figures which were thus assembled as to full-time and part-time employment and payrolls of individual governments provided a basis for the calculation of full-time equivalent numbers of employees, and average October earning rates for full-time employees, by function. The full-time equivalent calculation was carried out by function at the individual-government level. This involved multiplying the number of full-time employees reported for each particular function by the relation of total October payrolls for that function (i.e., full-time plus part-time) to the full-time payroll amount. In the case of any small local government which had for any particular function only part-time and no full-time amounts, the full-time equivalent was calculated by reference to the average monthly earnings rate for local employees in the State concerned.

The results of the foregoing operations were accumulated and otherwise processed by computer to derive aggregates, averages, and distributions for various types of governments and geographic areas.

Another set of operations was needed to derive the figures concerning retirement coverage and annual pay rates of full-time employees which appear in tables 10, 11, 16, and 17. The State government amounts in these tables represent a direct summation of information reported in detail by State government agencies. The local government distributions, however, are estimates based upon figures reported by a sample, as described above. The distributions indicated by the sample survey

were applied to the totals of full-time employment which had been determined for each type of government by the full-scale enumeration described above, to arrive at the local government detail shown in tables 10, 11, 16, and 17.

### Federal Government data

For this report, basic figures on full-time and part-time employment and on total payrolls, by agency, were obtained from the October 1962 reports filed by individual Federal agencies with the Civil Service Commission. Additional activity detail was obtained directly from particular agencies that are involved in more than one function. Data on full-time equivalent of part-time employment also were obtained from the various Federal agencies. Basic data on the State-by-State distribution of Federal employment as of September 1962 were provided by the Civil Service Commission.

Classification of Federal employees and payrolls by function was made by the Bureau of the Census in accordance with the Bureau's reporting framework for governmental finances and public employment. This involves exclusion of data for the Board of Governors of the Federal Reserve System, and for the District of Columbia and other minor agencies classed as local government agencies. On the other hand, Federal data herein include figures as to certain agencies or groups of public employees not included in basic reports of the Civil Service Commission--e.g., civilian technicians of the Air National Guard and Army National Guard, who are paid directly from the Federal Treasury and are omitted from employment and financial records of State governments; statistics of certain United States Courts; and data as to Gallaudet College and Howard University.

Statistics included here (in table 10) as to coverage of full-time Federal employees under the Civil Service Retirement System and under the Federal programs for Life Insurance and Health and Hospital benefits are based mainly on tabulations of data as of December 31, 1962, obtained from the Civil Service Commission. Data on coverage of Federal employees under other authorized contributory retirement programs and under Old Age, Survivors, and Disability Insurance were obtained from the Federal administrative agencies.

The distribution of Federal full-time employees by rates of pay which appears in table 9 is based mainly on the Civil Service Commission's detailed annual "Wage and Salary Survey" as of June 30, 1962. These figures do not reflect, accordingly, the effect of pay adjustments resulting from enactment of the "Federal Salary Reform Act of 1962," approved October 9, 1962.

## RELIABILITY AND LIMITATIONS OF DATA

### Errors of response and data handling

As noted above, the mail questionnaires for this phase of the 1962 Census of Governments included detailed definitions and reporting instructions, and considerable effort was applied to the examination of incoming returns and the correction of apparently incomplete or erroneous reporting. These efforts to insure accurate findings were aided by the fact that much of the information being collected was similar to that which is sought by mail surveys for the month of October each year, reaching all the State governments and an extensive sample of local governments, including all the largest ones.

On the other hand, because of the great diversity in structure, functions, and personnel arrangements of local and State governments, and because of the large number of public establishments canvassed, there were undoubtedly some mistakes or inconsistencies of official reporting which escaped detection, and probably also some errors in Census Bureau interpretation or handling of reported amounts. Revised information concerning a few reported items, determined after most of the basic tabulations for this publication had been completed, is summarized on page 536.

### Sampling variability

As already mentioned, the detailed data presented here concerning pay rates and insurance coverage of local government employees are estimates subject to sampling variation. The resulting nationwide figures in tables 9, 10, and 11 resemble very closely the results of a complete coverage enumeration, but the distributions for individual States in tables 16 and 17 are probably subject to somewhat greater variation. Where figures appear for a type-of-government category that involves only a very small proportion of all full-time local employees, the detail should be interpreted with particular caution.

### Interarea comparisons

Efforts to utilize the reported data for intensive interstate or intergovernmental comparisons may need to take account of the diversity in placement of responsibility for various functions as among particular types of governments. Table 15 throws some light upon interstate variations of this kind, in providing detail on employment for various functions by type of government. Even within individual States, one may observe marked diversity in the scope of functions performed by individual units of a particular type. For example, one or a few large county governments may provide services that more commonly are handled by municipalities; and some individual governments reported here as "municipalities" operate in effect as composite city-county units. At the other extreme are certain sizable "contract cities" in California, which operate mainly through county agencies rather than by direct employment of personnel for the entire range of common city functions. Similarly, certain potential limitations need to be recognized as to direct interarea comparisons based upon the local government aggregates which appear for individual county areas in table 20. These data represent a summation of amounts for all local governments located entirely or mainly within each particular county, except for a few instances where amounts for certain relatively very large intercounty units have been prorated for this presentation, as indicated by footnotes. There are probably other instances where the data shown have been significantly influenced by the unallocated placement of all amounts for intercounty units.

Beyond this, it may be noted that the residents of a particular governmental jurisdiction or even an entire county are not the only beneficiaries of local government operations in the area. One may find, for example--and especially among sparsely populated States--that a scattered minority of individual counties exhibit a relatively high volume of employment for "health and hospitals," owing to arrangements by which public hospitals in such counties actually serve groups of county areas.

Thus, while the various tables of this report which deal with individual local areas and jurisdictions include figures on population, as well as statistics on local government employment and payrolls, appropriate care needs to be exercised in associating the two sets of data.

### Historical comparisons

Direct comparison of amounts shown here with public employment findings of the 1957 Census of Governments calls for recognition of certain intervening changes in coverage, classification, or terminology.

National totals here of State and local government data include amounts for Alaska and Hawaii, which acquired statehood in 1959. In the 1957 Census of Governments, employment data for the territorial and local governments of those areas were presented separately, but not included in the "United States" totals.

Certain changes have been made since 1957 in Census Bureau classification of governmental entities, as more fully described in the Volume I report of the 1962 Census of Governments, Governmental Organization. From the standpoint of employment data, the most significant of these changes concerns the recording of school systems in North Carolina as dependent agencies of county governments. Prior to 1961, public school personnel there were classed as State government employees. A somewhat similar shift has been made with regard to certain school systems in Delaware, formerly classed as State-operated but now recognized as independent local school districts. Also, certain types of local entities (mainly in Indiana, Pennsylvania, and New Jersey) which formerly were classed as dependent parts of other local governments are now reported as special district governments.

Historical figures herein back through 1952 have been revised in accordance with the current classification patterns for reporting on local school employment in North Carolina and Delaware. Such adjustments have not been made as to the other minor changes in Census classification of governmental units, which involve relatively few public employees.

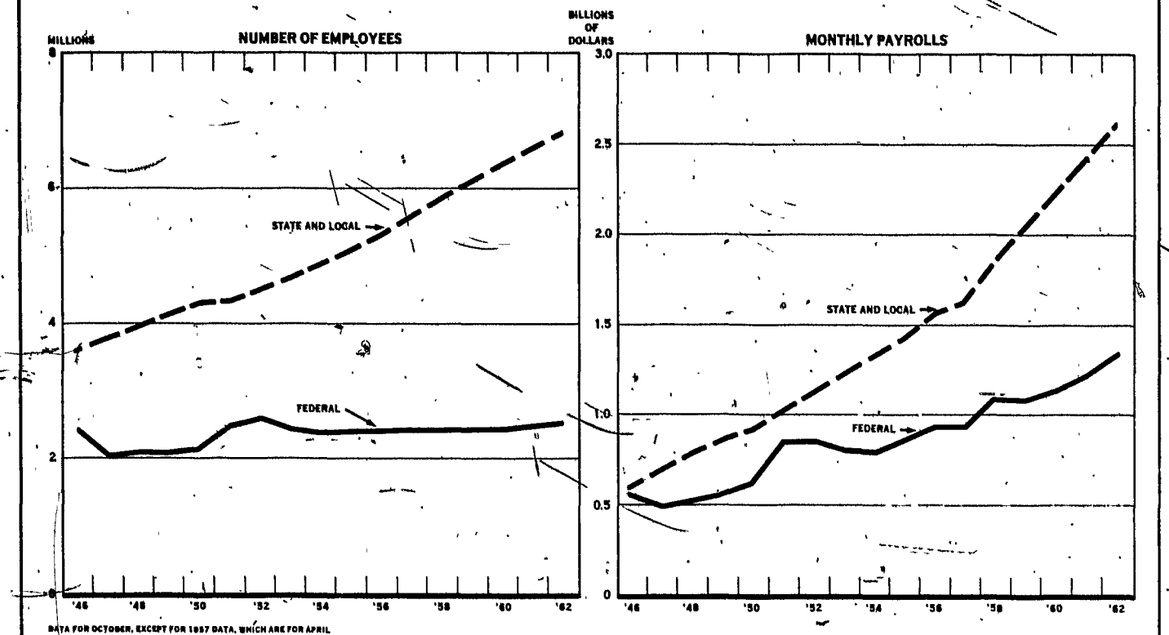

The reporting of employment data for "education" has been modified to provide here a more complete recognition and separate reporting of local government amounts for "institutions of higher education" than was accomplished for 1957. Conversely, the earlier effort to show data separately for county school supervision as "other education" has been dropped. The functional class shown in 1957 as "general control" has since been subdivided to recognize "financial administration" separately. Some minor changes in functional terminology have also been made, but these are not likely to hamper historical comparisons.

The employment data summarized here for local governments in standard metropolitan statistical areas pertain to the 212 SMSA's delineated in connection with the 1960 Census of Population, while metropolitan-area data from the 1957 Census of Governments related to the 175 standard metropolitan statistical areas then recognized in the continental United States. Similarly, the size-groupings here of county, municipal, and township governments are in terms of their populations as of 1960, while such distributions in the 1957 Census of Governments mainly reflected local populations as of 1950.

### Data presentation

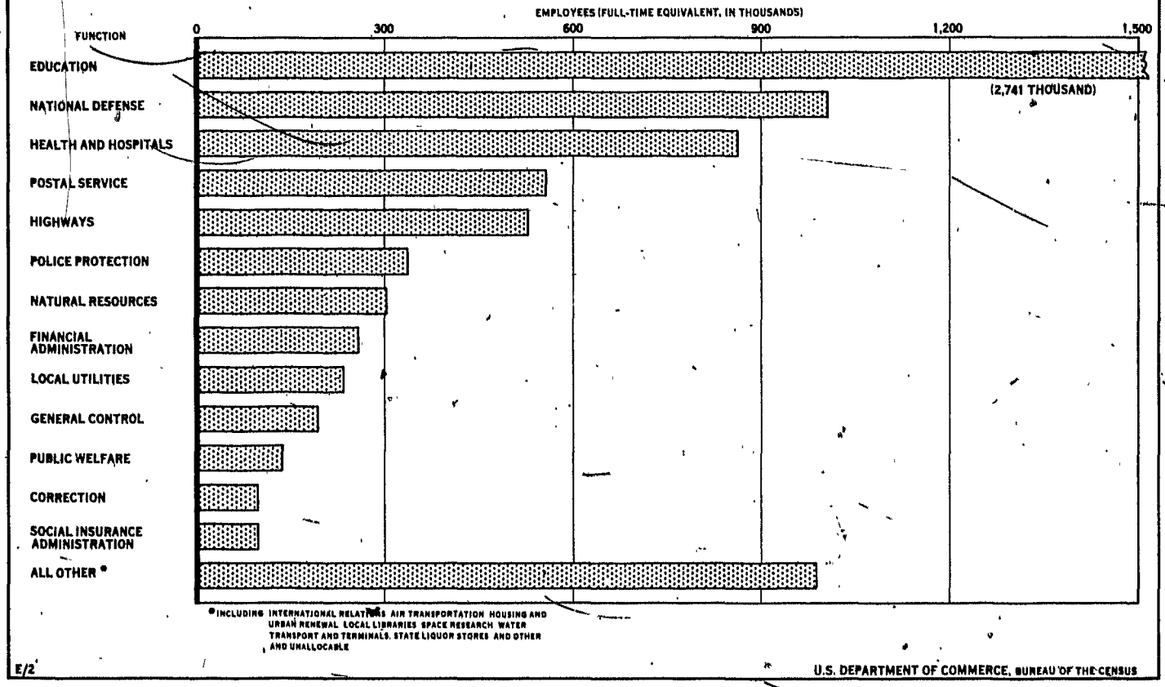

The symbol "...," as used in various tables of this report, may generally be interpreted as signifying either (1) a zero amount; (2) inapplicability of the item called for; or (3) a trace amount below the level of presentation--for example, less than $500 of payrolls, or less than 0.05 percent. However, it is possible that this entry also appears in some instances where more detailed or intensive methods of data collection might have uncovered minor amounts for separate reporting.

Note: Because of rounding, detail may not add to totals.
[1]Calculation based on the estimated resident population of the United States as of July 1, 1962 (185,822,000), and its distribution at that date between the 212 areas recognized as SMSA's for the 1960 Census of Population and the balance of the country. [2]The population of the combined SMSA's was estimated on the basis of data collected in the Current Population Survey of the Bureau of the Census.
[2]Less than 0.05 employees per 10,000 population.

Note: Because of rounding, detail may not add to totals. See page 536 as to minor adjustments of Connecticut data not applied to totals.
[1]Federal civilian employees within the United States as of September 1962. Total accordingly differs from Federal data shown in tables 1, 2, and 4, which pertain to October 1962 and include civilian employees working outside the United States.
[2]Data for Federal employment in the District of Columbia are for the Washington, D.C. Metropolitan Area, and include a substantial number of Federal employees working in suburban locations in Maryland and Virginia.
[3]Not computed; see footnote 2.

## Table 13.—STATE AND LOCAL GOVERNMENT PAYROLLS, BY LEVEL OF GOVERNMENT AND BY STATES: OCTOBER 1962

| State | October payroll (thousands of dollars) | | | | | | | State government percent of State-local total | Average October earnings of full-time employees | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

Note: Data reported for the United States total of independent school districts in this table differ from data presented in table 6 because Pennsylvania joint school systems are classified as "dependent" systems herein but are included as independent districts in table 6.

[1] The data shown pertain entirely to independent school districts, except where otherwise indicated, either by the detail of the tabular presentation or by footnote.

[2] Including data for one or a few "dependent" school systems. (Arizona, California, Delaware, Indiana, Kentucky, Louisiana, North Dakota, Ohio, South Carolina, Texas).

[3] Data pertain entirely to "dependent" school systems, rather than independent school districts (D.C., Hawaii, Maryland, North Carolina, Virginia).

[4] Data pertain mainly to "dependent" school systems, but include some amounts for independent school districts (Connecticut, Rhode Island, Tennessee, Vermont).

[5] Each of the 24 Maryland systems enrolls more than 3,000 pupils.

Intercounty Local Governments

As indicated by the introductory text, and annotations in table 20 to particular county areas, statistics of certain governmental units located in two (or more) county areas, as shown below, were prorated in table 20 to the county areas involved. In each instance, the primary county area is indicated by an asterisk (*).

| Governmental Units | County Areas |
|---|---|
| Aurora City<br>Aurora School District 28J | *Arapahoe and Adams Counties, Colorado |
| Atlanta City<br>Atlanta Independent School District | *Fulton and DeKalb Counties, Georgia |
| Fulton-DeKalb Hospital Authority | *DeKalb and Fulton Counties, Georgia |
| College Park City | *Fulton and Clayton Counties, Georgia |
| Walker Dade Catoosa Counties Hospital Authority | *Catoosa, Dade and Walker Counties, Georgia |
| Interstate 35 Community School District | *Warren and Madison Counties, Iowa |
| Riceville Community School District | *Howard and Mitchell Counties, Iowa |
| St. Ansgar-Grafton School District | *Mitchell and Worth Counties, Iowa |
| Washington Suburban Sanitary Commission | *Prince Georges and Montgomery Counties, Md. |
| Clare City School District 8 | *Clare and Isabella Counties, Michigan |
| St. Cloud City | *Sterns, Benton, and Sherburne Counties, Minn. |
| Hayfield 203 Independent School District | *Dodge and Mower Counties, Minnesota |
| Sharkey-Issaquena School District | *Sharkey and Issaquena Counties, Mississippi |
| Kansas City | *Jackson and Clay Counties, Missouri |
| Monroe City School District | *Monroe and Marion Counties, Missouri |
| Omaha City School District 1 | *Douglas and Sarpy Counties, Nebraska |
| Rocky Mount City<br>Rocky Mount, North Carolina School System | *Nash and Edgecombe Counties, N. C. |
| Salem School District 24J | *Marion and Polk Counties, Oregon |
| Wallenpaupack Joint Schools | *Wayne and Pike Counties, Pa. |
| Douglas School District 3 | *Pennington and Meade Counties, S. Dak. |
| Amarillo City<br>Amarillo Independent School District<br>Amarillo Hospital District | *Potter and Randall Counties, Texas |
| Gloucester County Schools | *Gloucester and Mathews Counties, Va. |
| Berlin City Joint School District 1 | *Green Lake and Waushara Counties, Wis. |
| Elroy-Kendall-Wilton Public Schools | *Juneau and Monroe Counties, Wis. |

Data corrections

As indicated in the introductory text under "Errors of response and data handling," additional or revised information concerning a few items was determined after basic tabulations had been completed. Below is a description of errors thus ascertained and related handling in the tables as presented.

In Connecticut, New Haven County, statistics of dependent town school systems as initially developed improperly included the following items:

| Item | Number | October payroll |
|---|---|---|
| Full-time teachers | 584 | $357,237 |
| Part-time teachers | 57 | 5,062 |
| Full-time nonteachers | 151 | 49,520 |
| Part-time nonteachers | 36 | 6,144 |
| Full-time equivalent teachers | 592.3 | |
| Full-time equivalent nonteachers | 169.7 | |

Corrections were made for all applicable items in the presentation of amounts for Connecticut, but have not been made in United States totals.

In Indiana, amounts shown below for special districts in three counties were initially duplicated. As indicated by annotations to these counties in table 20, adjustments have been made in the county area totals; however, no further adjustments were carried forward.

| Item | Fayette County | Lake County | Vanderburgh County |
|---|---|---|---|
| "All other functions" | | | |
| Total employees | 274 | 571 | 684 |
| Full-time employees | 247 | 533 | 629 |
| Full-time equivalent employees | 249 | 539 | 639 |
| Total monthly payroll | $121,201 | $330,397 | $177,482 |
| Full-time monthly payroll | 120,023 | 326,948 | 174,742 |
