ACKNOWLEDGEMENTS—**Alan V. Stevens**, Chief of the Employment Branch, directed the preparation of this report under the general supervision of **Vance Kane**, Assistant Chief for Programs. **Bern M. Bonifant, Meredith L. DeHart, Betty P. Stark**, and **Steve E. Young**, reviewed data for this report. **Joan K. Mims, Nancy L. Proctor**, and **Eddie H. Willner** provided assistance in a variety of survey operations.

Current Projects Branch staff in the Data Preparation Division, **Don L. Adams**, Chief, were responsible for the initial assembly and review of respondent government data.

John Burroughs performed computer operations under the supervision of **Judith H. Jennings**, Chief of the Computer Utilization Branch. Also, **Geneva Hines** and **John Beall** provided assistance for computer operations.

Corrine Davis supervised preparation of publication copy, assisted by **Esther Fogwell** and **Ruth Samuels.**

State and local government officials throughout the country provided information for this phase of the 1982 Census of Governments. Their cooperation is gratefully acknowledged.

For information regarding data in this report, contact **Alan V. Stevens**, Governments Division, Bureau of the Census, Washington, D.C. 20233 (301/763-5086).

A Census of Governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 1982 Census, similar to those taken since 1957, covers four major subject fields--governmental organization, taxable property values, public employment, and governmental finances.

Volume 3, Number 2, Compendium of Public Employment, is the second of three reports from the public employment phase of the 1982 Census of Governments. This report provides summary data on government employment and payrolls for all levels of government, by function and by type of government.

ORGANIZATION OF THIS REPORT

This introduction provides a summary of "findings" from the 1982 Census of Governments, Survey of Government Employment, which includes data by type of government and by governmental function, the average pay of full-time employees, and ratios of public employees to population. Definitions of terms used in this publication, a description of how data were obtained and their limitations, the availability of additional data concerning government employment and payrolls, and the meaning of symbols used in the statistical tables of this report are also presented in the introduction.

Measures of employment and payroll are presented for the Federal and State governments. Local government data are presented by type of government and by population-size groups for counties, municipalities, and townships; enrollment-size groups for school systems; and employment-size groups for special districts. Aggregated measures of employment, payrolls, and average earnings of full-time employees of local governments in individual county areas are presented in table 14.

FINDINGS

Civilian government employment in the United States totaled 15.8 million persons as of October 1982. This figure includes all persons employed on a full-time or part-time basis by State and local governments (counties, municipalities, townships, school districts, and special districts) as well as the civilian employees of the Federal Government. This level of employment represents an increase of 2.5 percent from October 1977 to October 1982. Total Federal civilian employment is the same in October 1982 as in October 1977, State government employment increased by 253,000 (7.8 percent), and local government employment increased by 129,000 (1.4 percent). The employment of local governments accounts for 58 percent of all civilian public employees, State government employment accounts for 24 percent, and Federal civilian employment accounts for 18 percent.

The October 1982 payrolls for all civilian government employees totaled $23.2 billion, an increase of 51 percent or $7,835 million, over the October 1977 payrolls. The average annual increase in October 1982 payrolls over October 1977 payrolls was 9.5 percent for State governments, 8.1 percent for local governments, and 8.7 percent for the Federal Government.

Of the 15.8 million civilian public employees in October 1982, more than 3 million were part-time employees; nearly two-thirds of these part-time employees worked for local governments. When the number of part-time employees of State and local governments is discounted by applying average full-time earnings rates, the

calculated full-time equivalent employment of these governments totaled 10.9 million. This figure represents an increase of 271,000 full-time equivalent employees, or 2.6 percent, since October 1977. Full-time equivalent employment is not available for the Federal Government on the same basis as for the State and local governments. Table A provides a summary of government employment and payrolls, by level of government, over the past 25 years.

DATA BY TYPE OF GOVERNMENT

Information is provided throughout this report on the October 1982 employment, payrolls, and average earnings of full-time employees in each of the various types of governments. Highlights of the findings presented in this report are summarized below.

Federal Government

Federal Government employment, 2.8 million, has remained relatively unchanged since October 1977. The highest level of Federal civilian employment, 3.0 million, was recorded in October 1967. The October 1982 figure of 2,847,691 is 220 less than the 1977 count. Salaries and wages, however, have increased to $6.0 billion for the month of October 1982, reflecting an average annual rate of increase of 8.7 percent since 1977.

State Governments

Employment by State governments increased between October 1977 and October 1982 by 7.2 percent--a higher rate of increase than either the Federal Government or local governments. As of October 1982, State governments employed 3,744,000 persons and had payrolls for that month of over $5.0 billion. Full-time equivalent employment of State governments is nearly 3,080,000.

The average October 1982 earnings of full-time State employees is $1,626, representing an average annual increase of 8.2 percent since October 1977. The October 1982 average for instructional employees is $2,493 compared to $1,528 for all other State employees, representing average annual increases of 7.5 percent and 8.5 percent respectively since October 1977.

Local Governments

Local governments (counties, municipalities, townships, school districts, and special districts) account for the largest portion of public employment in October 1982 with nearly 9,249,000 full-time and part-time workers. This number represents an overall local government increase of slightly more than 129,000 employees, or 1.4 percent, since October 1977. This increase is not shared equally by all types of local governments. Total employment by municipalities declined by nearly 3 percent from 2,469,000 total employees to 2,397,000 during that period. Salaries and wages for local governments rose to $12.1 million for October 1982 from $8.2 million for October 1977.

Average earnings for the month of October 1982 are $1,575 for full-time local government employees ($1,789 for instructional employees and $1,446 for all other employees). This represents an increase of 46.2 percent since October 1977, or an average annual increase of 7.9 percent.

Table A. Public Employment and Payrolls by Level of Government: 1957-1982

(For meaning of symbols, see text)

Item	Employment (thousands)				Payrolls (millions of dollars)			
	Total	Federal	State	Local	Total	Federal	State	Local
October 1982	15,841	2,848	3,744	9,249	23,173	5,959	5,022	12,192
October 1977	15,459	2,848	3,491	9,120	15,338	3,918	3,195	8,225
October 1972	13,759	2,795	2,957	8,007	9,950	2,710	1,937	5,303
October 1967	11,867	2,993	2,335	6,539	6,056	1,842	1,106	3,108
October 1962	9,388	2,539	1,680	5,169	3,966	1,347	635	1,985
April 1957	8,047	2,439	1,300	4,307	2,533	919	373	1,242
Percent change, 1977 to 1982	2.5	(Z)	7.2	1.4	51.1	52.1	57.2	48.2
Average annual rate of change:								
1977 to 1982	0.5	(Z)	1.4	0.3	8.6	8.7	9.5	8.2
1972 to 1982	1.4	0.2	2.4	1.5	8.8	8.2	10.0	8.7
1957 to 1982	2.7	0.6	4.3	3.1	9.3	7.8	11.0	9.6

Table B provides a summary of employment, payrolls, and average earnings of full-time employees for the various types of local governments in October 1982 and October 1977.

DATA BY GOVERNMENTAL FUNCTION

Extensive data are also presented in this report on employment, payrolls, and average earnings of full-time employees by governmental function. A description of each functional category is included in the "Definition of Terms" section of this text. For each function, data are not limited solely to the personnel directly involved in providing the services mentioned in the title of the category, but also include support personnel who are indirectly providing services or who are providing maintenance and support services for activities included at that category.

At the Federal level, 59 percent of the employees are engaged in the categories of national defense, international relations, and postal service--functions which are the exclusive domain of the Federal Government. In State and local governments, 51 percent of all employees are engaged in the provision of elementary, secondary, and higher education.

A summary of October 1982 government employment and payrolls in selected functions follows:

Air Transportation

Most of the 70,000 employees counted here are Federal Government employees. The number of Federal employees has dropped by 12,000 to 47,000 since October 1977. While State and local governments show an increase of 3,000 employees, 2,000 of these are State government employees which were counted in previous censuses of governments at the "All other and unallocable" category.

Correction

Employment in this function totaled 295,000 in October 1982, an increase of 62,000 (27 percent) since October 1977; payrolls during this period increased by 83 percent to $457.8 million. Nearly all employment and payrolls for this function are at the State and local government levels. The corrections function had the largest percent increase in employment of any function.

Electric Power

Local government employment at this category increased by 3,000 employees (4.3 percent) to 66,000. The local government full-time employee average October pay has increased from $1,269 to $2,032. The State government employees were counted at "All other and unallocable" in previous censuses of governments. In October 1982 there are 4,000 State government employees in electric power.

Elementary and Secondary Education

While the number of employees has increased by only 24,000 (0.5 percent) during the 5 years from October 1977 to October 1982, the full-time equivalent employment has increased 63,000 (1.7 percent). The average pay for full-time instructional employees has gone up at an average annual rate of 7.4 percent to $1,771 for the month of October 1982. In October 1977, average pay for full-time, local government instructional employees in elementary and secondary schools was 28 percent higher than the average for all full-time, local government noninstructional employees; in October 1982, their average pay was only 22 percent higher.

Table B. Local Government Employment and Payrolls by Type of Government: 1977-1982

(For meaning of symbols, see text)

Item	Employment (thousands)			Payrolls (millions of dollars)		
	October 1982	October 1977	Average annual rate of change, 1977-1982	October 1982	October 1977	Average annual rate of change, 1977-1982
Total local	9,249	9,120	0.3	12,192	8,225	8.2
Counties	1,824	1,761	0.7	2,287	1,489	9.0
Municipalities	2,397	2,469	-0.6	3,428	2,412	7.3
Townships	356	361	-0.3	370	250	8.1
Special districts	478	402	3.5	665	367	12.7
School districts	4,194	4,127	0.3	5,442	3,707	8.0

Financial Administration

The figure of 402,000 employees is virtually unchanged from October 1977. The 2,000 employee increase is only 0.4 percent. A decrease of 6,000 employees at the Federal Government level has been offset by an increase of 8,000 in local governments.

Fire Protection

The figure of 298,000 employees counted in October 1982 is a 10 percent increase since October 1977. The average October 1982 pay of full-time employees in fire protection ($1,949) is among the highest of any State and local government function, trailing only the instructors in higher education and employees of electric and transit utilities. Full-time firefighters are paid an average of $1,965.

Health

Employment by governments for public health activities totaled 323,000 in October 1982 as compared with 291,000 in October 1977; this 11 percent increase in employment was accompanied by a 65 percent increase in public health payrolls which totaled $520.0 million in October 1982.

Higher Education

There were 1,879,000 employees recorded in the higher education function in October 1982 as compared with 1,724,000 in October 1977, an increase of more than 9 percent. However, the full-time equivalent employment increased by only 62,000 (6 percent) to 1,158,000. Salaries and wages for this function increased by 51 percent during the 5-year interval to $2.1 billion. Nearly 647,000 employees in this category are instructional employees; while this is an increase of 33,000 over October 1977, the number of full-time instructional employees actually declined by 2,000.

Highways

Employment in this category decreased by 38,000, or almost 7 percent, between October 1977 and October 1982; payrolls, however, increased by 40 percent to $754.5 million.

Hospitals

Hospital employment and payrolls in October 1982 were 1,344,000 and $1.8 billion; these amounts reflect 5 percent and 60 percent increases, respectively, since October 1977.

Judicial and Legal

The judicial and legal function had a total of 258,000 employees and payrolls of $405 million in October 1982. Prior to the 1982 Census of Governments, employees and payrolls for this function were not separately identified but were included with "Other governmental administration" at a category of "General control."

Libraries

Public libraries operated by local governments had an increase or 7,000 employees (8 percent) from October 1977 to October 1982. Most of this was at part-time as the number of full-time employees had only increased by 3,000. The average October 1982 pay of full-time library workers ($1,230) is lower than the average pay for any other governmental function except noninstructional employees in elementary and secondary schools.

National Defense and International Relations

Employment in this function is found exclusively at the Federal Government level. From October 1977 to October 1982 civilian employment in this category increased from 989,000 to 1,024,000, an increase of 3.5 percent and a reversal of the general decline at this category between 1967 and 1977. Civilian payrolls in this function, $2.0 billion in October 1982, increased by over 53 percent since October 1977.

Natural Resources

There are 442,000 employees with payrolls of $807 million at the natural resources function in October 1982. This is not directly comparable to the 1977 figures since employees at National and State parks are now counted at "Parks and recreation" instead of "Natural resources."

Other Governmental Administration

There are 325,000 employees with total payrolls of $389 million at this category in October 1982. Prior to the 1982 Census of Governments, this category was combined with judicial and legal activities in the single function titled "General control."

Parks and Recreation

The parks and recreation function had 258,000 employees and payrolls of $263 million in October 1982. Employees of the Federal and State governments are being counted at this category for 1982 while in previous censuses of governments they were counted at "Natural resources" and "All other and unallocable." At the local government level, which is comparable to the 1977 data, the October 1982 figure of 211,000 employees represents a decline of 6,000 employees, or almost 3 percent.

Police Protection

October 1982 employment in this function totaled 732,000, an increase of 54,000, or slightly more than 8 percent, from October 1977; payrolls during the 5-year period climbed 55 percent to more than $1.2 billion for the month of October 1982.

Postal Service

Employment for this Federal activity increased nearly 2 percent between October 1977 and October 1982 while payrolls increased by almost 57 percent. The October 1982 employment and payrolls stood at 664,000 and $1.4 billion, respectively.

Public Welfare

Government employees engaged in public welfare activities as of October 1982 totaled 411,000 as compared with 381,000 in October 1977--an 8 percent increase in the 5-year period. October 1982 payrolls for welfare employees were $534.7 million, $190 million (or 55 percent) higher than for the same month in 1977.

Social Insurance Administration

This activity accounted for 202,000 government employees and $329.0 million in salary and wage costs in October 1982, an employment decrease of almost 1 percent and a payroll increase of 58 percent from the levels recorded in October 1977.

Space Research and Technology

Employment for this Federal function declined from over 24,000 in October 1977 to less than 23,000 in October 1982. Payrolls increased 32 percent from $54.5 million in October 1977 to $71.7 million in October 1982.

Transit

The number of local government transit workers in October 1982 (160,000) is up 33,000 (26 percent) over the comparable figure for October 1977. State government employees in transit were counted in previous censuses of governments at "All other and unallocable." Full-time transit workers of State and local governments had the highest average October 1982 pay of any function--$2,047.

FULL-TIME EMPLOYEE AVERAGE EARNINGS

Full-time State and local government employees had average earnings of $1,589 in October 1982 as compared with $1,082 in October 1977. The average earnings of full-time instructional employees ($1,856) increased by 43 percent over the comparable amount for October 1977; the average for all other full-time employees ($1,475) reflected a somewhat larger increase of 50 percent during the 5-year interval. These represent average annual rates of increase of 7.4 percent and 8.4 percent, respectively.

By type of government, the average October 1982 earnings of full-time employees were as follows: $1,626 for State government employees, $1,420 for county employees, $1,649 for municipal employees, $1,550 for township employees, $1,599 for school district employees, and $1,620 for special district employees.

Table C provides a summary of average October 1982 earnings of full-time State and local government employees by function. There is considerable variation in the average earnings of full-time employees in the different governmental functions. Two factors contributing to this variation are the proportion of employees in high paying occupations and the proportion of employees working in urbanized areas that generally have higher costs of living than do rural areas.

RATIO OF PUBLIC EMPLOYMENT TO POPULATION

On a per capita basis, there were 574 State and local government employees and 121 Federal civilian employees for every 10,000 persons in the United States as of October 1982. In terms of full-time equivalent employment the State and local ratio was over 479 per 10,000 population.

Federal Employment

Federal civilian employment varies widely from State to State, depending

primarily upon the location of Federal installations, such as regional and field offices. Excluding the District of Columbia, the ratio of Federal civilian employees per 10,000 population in October 1982 ranged from 55 in Wisconsin to 343 in Alaska. Six States and the District of Columbia had more than 200 Federal civilian employees per 10,000 population, whereas seven States had less than 75.

State and Local Employment

State and local government full-time equivalent employment per 10,000 population ranged from 381 in Pennsylvania to 891 in Alaska in October 1982. The ratio of State and local government employment is somewhat inversely related to population density but can be affected by the type of governmental functions performed (e.g., a State in which a large number of hospitals are operated by local governments may have a higher ratio of government employment than a State with similar population characteristics but no local government hospitals).

The ratio also varies greatly from State to State for individual governmental functions. However, the elementary and secondary education function consistently has the highest ratio of full-time equivalent employment to population. Table D summarizes by function the ratio of State and local government full-time equivalent employment per 10,000 population in the United States.

Table C. Average October 1982 Earnings of Full-time State and Local Government Employees by Function

(For meaning of symbols, see text)

Function	Average earnings, October 1982 (dollars)
Higher education	1,822
Elementary and secondary education	1,595
Other education	1,605
Libraries	1,230

DEFINITIONS OF TERMS

A discussion of the terms and classifications used in this report is presented below. These terms are grouped in the following categories: Governmental Units

and Types of Governments, Area Statistics, Subject Matter Concepts, and Governmental Functions.

Governmental Units and Types of Governments

Governmental Units--A government is an organized entity whose governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other governmental unit.[1]

Federal Government--The term Federal, as used in this report, encompasses all civilian employees and payrolls of the U.S. Government, but excludes the uniformed employees and payrolls of the armed forces. District of Columbia data are excluded from this category and included with data for municipalities.

State Governments--This category refers to the governments of the 50 States which constitute the United States.

Local Governments--The Bureau of the Census classifies local governments by five major types--county, municipal, township, school district, and special district. A description of each of the five types of local governments is given below.

County--Organized county governments are found throughout the Nation except in Connecticut, the District of Columbia, Rhode Island, and limited portions of a few other States. There were 3,041 county governments as of October 1982. These governments are legally designated as "boroughs" in Alaska and "parishes" in Louisiana. Excluded from county government statistics and included with municipalities or townships are certain local governments that combine area and governmental characteristics of both counties and municipalities or townships.

Municipal--A municipality is a political subdivision within which a municipal corporation has been established to provide general local government services for a specific population concentration in a defined area. A municipality may be legally termed a city, village, borough (except in Alaska), or town (except in the New England States, Minnesota, New York, and Wisconsin). Included in this category are certain cities that are completely or substantially consolidated with their county governments, operate outside the geographic limits of any county, or for other reasons have no organized county government operations within their boundaries. Comprising this group are the following: Anaconda, Anchorage, Baltimore, Baton Rouge, Boston, Butte, Carson City, Columbus (Ga.), Denver, Honolulu, Indianapolis, Jacksonville, Juneau, Lexington (Ky.), Nashville, New Orleans, New York, Philadelphia, St. Louis, Sitka, San Francisco, and Washington, D.C., as well as the "independent cities" in Virginia. Nantucket, Mass. is included with townships.

Township--Township governments, as distinguished from municipalities, are created to serve inhabitants of areas defined without regard to population concentration. This classification is applied to local governments in 20 States, including governmental units officially designated as "towns" in the six New England States, New York, and Wisconsin, and some "plantations" in Maine and "locations" in New Hampshire.

School District--There is a marked organizational diversity in the types of governmental units that provide for the operation of public schools. School districts, which are governmental entities that are fiscally and administratively independent of any other government, are found in all but five States (Alaska, Hawaii, Maryland, North Carolina, and Virginia) and the District of Columbia. Dependent school systems are administrative agencies of other governments (States, counties, municipalities, and townships) and are not counted as separate governmental entities by the Bureau of the Census. Dependent school systems are found exclusively in the District of Columbia and the five States noted above and also exist in 11 other States.

Special District--Special districts are local governmental units created to provide specific services that are not being supplied by other governments. These governmental units are known by a

[1]For more detailed information concerning the identification and classification of governments, see Vol. 1, Governmental Organization, of the 1982 Census of Governments.

variety of titles including districts, authorities, boards, and commission. A majority of special districts are established to perform a single function, but some have been given authority to provide several, usually related, kinds of services.

Area Statistics

County Areas--Selected data on local government employment and payrolls are shown in this report by county area. These county area statistics are aggregates of all local government employment and payrolls within the geographic boundaries of the county or county-type area.

The county areas used in this volume include all areas with an independently organized county government and most county-type areas without an independently organized county government, including the unorganized areas in Alaska, Connecticut, Rhode Island, and South Dakota bearing county designations, the "independent cities" in Virginia, and other municipalities which are city-county consolidations or which are outside of any county designated area.

Standard Metropolitan Statistical Areas (SMSA's)--The SMSA's were designated by the U.S. Office of Management and Budget with the advice of the Federal Committee on Standard Metropolitan Statistical Areas. Each SMSA consists of a single county area or a group of contiguous county areas, except that in New England such an area consists of a group of contiguous cities and towns. For the New England States, this report uses New England County Metropolitan Areas (NECMA's) which are defined the same way SMSA's are in the rest of the country. Each SMSA or NECMA includes at least one "central city" of at least 50,000 inhabitants, or a city with at least 25,000 inhabitants, which together with those contiguous places having population densities of at least 1,000 persons per square mile, has a combined population of 50,000 or more and constitutes for general economic and social purposes a single community, provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000.[2] There were 289 SMSA's and 16 NECMA's in the 50 States and the District of Columbia at the time of the 1982 Census of Governments.

Subject Matter Concepts

Employment and Employees--Employment, as used in this report, refers to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in a paid leave status, and persons paid on a "per meeting," annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees. Full-time employees are defined to include those persons whose hours of work represent full-time employment in their employer government; part-time employees are those persons who work less than the standard number of hours for full-time work in their employer government.

Full-time Equivalent Employment--A computed statistic representing the number of full-time employees that could have been employed at the same total payroll cost if all personnel were engaged on a full-time basis at the average monthly pay applying to full-time workers; it is calculated separately for each particular function of a government by dividing the total payroll amount (full-time plus part-time) by the full-time payroll amount and multiplying the resultant quotient by the number of full-time employees.

October Payroll--Payroll amounts shown in this report represent gross payrolls for the one-month period of October 1982. The gross payroll includes all salaries, wages, fees, or commissions paid to employees during the pay period which included the date of October 12, 1982. Payroll amounts reported for a period other than one month were converted to represent an amount for the month of October.

Average October Earnings--Average October earnings shown in this report are for full-time employees only and represent the quotient of full-time employee payroll divided by the number of full-time employees.

Governmental Functions

Employment and payrolls of governments are classified according to the major function or activity of the agency, of-

[2]Further information on the classification of metropolitan statistical areas may be obtained from the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

fice, or other organizational entity in which the individual is employed. Following is a brief description of each functional category used in this report:

Air transportation--State and local government operation and support of airport facilities.

All Other and Unallocable--The use of this classification varies from table to table in this report; in each tabulation, however, this classification represents all activites not individually specified.

Correction--The activities pertaining to the confinement and correction of adults and minors convicted of criminal offenses. Pardon, probation, and parole activities are also included here.

Electric Power--The activities associated with the production or acquisition and distribution of electric power.

Elementary and Secondary Education--All activities associated with the operation of public elementary and secondary schools and locally operated vocational-technical schools. Special education programs operated by elementary and secondary school systems are also included as are all ancillary services associated with the operation of schools, such as pupil transportation and food service. Instructional employees includes not only classroom teachers, but also principals, supervisors of instruction, librarians, teacher aides, library aides, and guidance and psychological personnel. Other employees includes all persons not included as instructional employees (e.g., school superintendents and other administrative personnel, clerical and secretarial staffs, plant operation and maintenance personnel, health and recreation employees, transportation and food service personnel, and any student employees).

Financial Administration--This function includes activities concerned with tax assessment and collection, custody and disbursement of funds, debt management, administration of trust funds, budgeting and other governmentwide financial management activities. This function is not applied to school district or special district governments.

Fire Protection--This classification is applied to local government fire protection and prevention activities plus any ambulance, rescue or other auxiliary services provided by the fire protection agency. Volunteer firefighters, if remunerated for their services on a "per fire" or some other basis, are included as part-time employees. The subcategory of firefighters shown in this report includes personnel trained and/or engaged in fire suppression and prevention.

Gas Supply--Local government activities associated with the acquisition of gas supplies and distribution to individual consumers.

Health--Administration of public health programs, community and visiting nurse services, immunization programs, drug abuse rehabilitation programs, health and food inspection activities, operation of out-patient clinics, vector control, and environmental pollution control activities are included in this classification.

Higher Education--This activity includes State and local government degree-granting institutions which provide academic training above grade 12. Instructional employees includes persons engaged in teaching and related academic research as well as teachers at hospitals and agricultural experiment stations and farms. Noninstructional employees at hospitals operated by higher education institutions and serving the general public are excluded here and included in the "Hospitals" function. Employees in agricultural extension services and noninstructional employees at agricultural experiment stations and farms are also excluded from this category and included in the "Natural resources" function. Gallaudet College and Howard University are no longer classified as Federal as they were during previous censuses of governments. The Federal Government's army, air force, and naval academies are included at "National defense;" the coast guard academy is included at "Police protection."

Highways--Activities associated with the maintenance and operation of streets, roads, sidewalks, bridges, tunnels, toll roads, and ferries are included at this function. Snow and ice removal, street lighting, and highway and traffic engineering activities are also included here.

Hospitals--This category includes only government-operated medical care facilities which provide in-patient care. Employees and payrolls of private corporations which lease and operate government-owned hospital facilities are excluded. In hospitals associated with government-operated medical schools, the instructional staff are included under "Higher Education" and all other hospital employees are included in this category.

Housing and Community Development--The operation of housing and redevelopment projects and other activities to promote or aid housing and community development are included in this category.

Judicial and Legal--This category includes courts and court-related activities (except probation and parole activities which are included at the "Correction" function), court activities of sheriff's offices, prosecuting attorneys' and public defender offices, legal departments, and attorneys providing governmentwide legal services.

Libraries--This classification applies only to libraries operated by local governments for use by the general public. School or law libraries are included in the "Elementary and secondary education" or "Higher education" and "Judicial and legal" categories respectively.

National Defense and International Relations--Federal Government activities associated with national defense and international relations, including primarily the Departments of Army, Navy, and Air Force; Department of State; U.S. Information Agency; and the Defense Logistics Agency. Defense related activities of State and local governments, including National Guard and civil defense, are classified at the "All other and unallocable" category.

Natural Resources--This function includes activities primarily concerned with the conservation and development of natural resources--forest fire prevention and control, flood control, irrigation, drainage, land and forest reclamation, fish and game preservation and control, soil conservation, forestry, agricultural aids and research, agricultural development and inspection, and mineral resources activities.

Other Education--State government activities relating to the supervision and regulation of public and private elementary and secondary schools; programs and institutions for the training of blind, deaf, and other handicapped persons; and vocational rehabilitation programs.

Other Governmental Administration--This category relates to the legislative and other governmentwide administrative agencies of governments. Included here are overall planning and zoning activities, central personnel and administrative services, the office of chief executive, and legislative activities. This function is not applied to school district or special district governments.

Parks and Recreation--Government activities which include the operation and maintenance of parks, playgrounds, swimming pools, public beaches, auditoriums, public golf courses, museums, marinas, botanical gardens, and zoological parks.

Police Protection--All activities concerned with the enforcement of law and order, including coroner's offices, police training academies, investigation bureaus, and local jails, "lockups," or other detention facilities not intended to serve as correctional facilities. The subcategory of police officers includes only persons with the power of arrest.

Postal Service--The United States Postal Service.

Public Welfare--Included in this category are such activities as the administration of various public assistance programs for the needy, operation of homes for the elderly, indigent care institutions, and programs which provide payments for medical care and other services for the needy. Health care and hospital services provided directly by a government, however, are included in the "Health" and "Hospital" functions rather than here.

Sanitation Other than Sewerage--Refuse collection and disposal, operation of sanitary landfills, and street cleaning activities.

Sewerage--This function includes the provision, maintenance, and operation of sanitary and storm sewer systems and sewage disposal and treatment facilities.

Social Insurance Administration--This category includes the administration and conduct of social insurance programs. For State governments, these activities include unemployment compensation and worker compensation programs, work/study programs, and determination of eligibility for Federal Old Age, Survivors, Disability, and Health Insurance (Social Security). Federal activities in this category are primarily those performed by the Social Security Administration, the Railroad Retirement Administration, and the Pension Benefit Guarantee Corporation.

Space Research and Technology--Federal space activities, primarily programs of the National Aeronautics and Space Administration.

State Liquor Stores--This category includes the administration and operation of liquor stores by State governments.

Transit--Included at this category are activities relating to the operation and maintenance of public mass transit systems (e.g., bus, subway, surface rail, and street railroad systems). Elementary and secondary school transportation systems are included in the "Local schools" function.

Water Supply--Government activities associated with the production or acquisition of water and distribution to the public.

Water Transport and Terminals--Activities which are connected with the operation and support of canals and other waterways, harbors, docks, wharves, and other related marine terminal facilities.

SOURCES OF DATA

The data in this report are based on information obtained in the 1982 Census of Governments. Information on the number of full-time and part-time employees and the corresponding gross full-time and part-time payrolls (salaries and wages) was collected for the pay period that included the date of October 12, 1982. Data are collected for October because public employment is relatively stable in that month and free from seasonal employment fluctuations.

Data for the Federal Government were compiled from records of the U.S. Office of Personnel Management, formerly the U.S. Civil Service Commission.

Data for 24 of the 50 State governments were obtained primarily from a central respondent for each State. Additional data for individual agencies and institutions of higher education were obtained, as necessary, by a mail canvass of the individual units. All individual agencies and institutions in the remaining 26 States were surveyed by mail.

Local government data were obtained primarily by mail canvass. Survey questionnaires were tailored to the various types of local governments and agencies surveyed; these questionnaires contained descriptions and instructions for each of the data categories for which information was requested. Governments that did not respond to the original mail request received followup mail requests and in some cases were personally visited and enumerated by trained Census Bureau personnel. As a rule, questionnaires were not sent to municipal and township governments with less than 2,500 population (unless they had a dependent school system) or to special district governments with less than five full-time employees, since these small governments were requested to report their employment and payrolls in an earlier identification and classification phase of the census.

Information supplied on mail canvass returns were electronically recorded and edited for consistency and reasonableness. Incomplete returns and replies containing information that failed consistency or reasonableness tests were referred to trained Census Bureau personnel for review and possible followup. Additional or corrected information obtained in the review of these "failed edit" cases were than entered into the electronic data file for corrective processing.

Data for some local governments could not be obtained for October 1982. For the largest of these units (any counties, municipalities and northeastern townships with populations greater than 10,000, school districts enrolling 5,000 or more pupils, and special districts with 100 or more employees), 1981 data were used, if available, or data were imputed on the basis of their most recent response in the Bureau's annual survey of government employment. For the remaining nonrepondent counties, municipalities, townships, and school systems, imputed data were developed on the basis of similar respondent governments in the same State. Imputation procedures were not applied to special districts; if available, data from secondary sources were used.

LIMITATIONS OF DATA

The mail canvass questionnaires used in this phase of the 1982 Census of Governments contained detailed definitions and reporting instructions to assist local government officials in their preparation of replies and to facilitate uniform interpretation and reporting procedures. Each questionnaire also contained a Census Bureau telephone number that State or local officials could call to obtain additional clarification and assistance from subject matter specialists. Quality control of reported data was aided also by reference to information collected by the Bureau in its annual sample surveys of government employment and payrolls. These annual surveys request similar employment and payroll data; include the same general definitions and reporting procedures, and include all State governments, the largest local governments, and a sample of smaller local governments. However, human and mechanical errors occur

in any mass statistical operation such as the census of governments, including omissions, misinterpretations, errors in reporting, errors in electronic recording of data, errors in the clerical review and adjustment of electronically identified problem data, and at other stages of data processing. Procedures were applied at each stage of processing this phase of the 1982 Census of Governments to keep human and mechanical errors at an acceptably low level.

Although an effort has been made in each census to maintain congruity of the definitions, concepts, and terms applied in data collection, historical and interarea comparisons should be made with care. Changes in the level or type of government providing particular services occur over time. Hence, a decrease in employment for a particular function of a government does not, in and of itself, signify a diminution of services the population receives. Moreover, certain services may be "contracted out" and the contractor's employees are not counted as employees of the contracting government. Also, annexations, other boundary changes, consolidations of governmental entities, and changes in the demographic makeup of the area served may affect not only the number of persons for whom services must be provided, but also the nature and scope of the necessary services.

Aggregated data for "county areas" and State areas probably represent the most uniform basis for comparing one geographic area to another. Table 14 provides aggregates of employment and payrolls for all types of local governments in each individual county area. State and local government aggregates, by State, are provided in table 12.

Care should be exercised in converting October payrolls and average earnings figures to yearly amounts. Some employees, especially in the education and natural resources functions, may only be paid during 9 or 10 months of the year. Other employees may perform their duties for a 9-or-10 month period, but have their annual salaries disbursed over a full 12 months. Calculations of yearly or quarterly amounts from October data may tend to yield inaccurate estimates of expenditures or average earnings since figures for a particular time period may not represent an average or mean amount for longer time spans.

AVAILABILITY OF DATA

Copies of this and other reports of the 1982 Census of Governments are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 and from U.S. Department of Commerce District Offices.

Published data on employment and payrolls for individual major local governments (all counties, municipalities, and townships in selected States having 10,000 or more population, local school systems enrolling 5,000 or more pupils, and special districts employing 100 or more full-time workers) are presented in Volume 3, Number 1, Employment of Major Local Governments.

In addition to the Volume 3 published reports of the 1982 Census of Governments, detailed and summary magnetic tapes of the 1982 Census of Governments, Survey of Government Employment, are also available. For details, contact the Data User Services Division, Customer Services, Washington, D.C. 20233 (telephone area code 301, 763-4100).

For additional information concerning the government employment phase of the 1982 Census of Governments, contact the Governments Division, Bureau of the Census, Washington, D.C. 20233 or call area code 301, 763-5086.

ACKNOWLEDGMENT

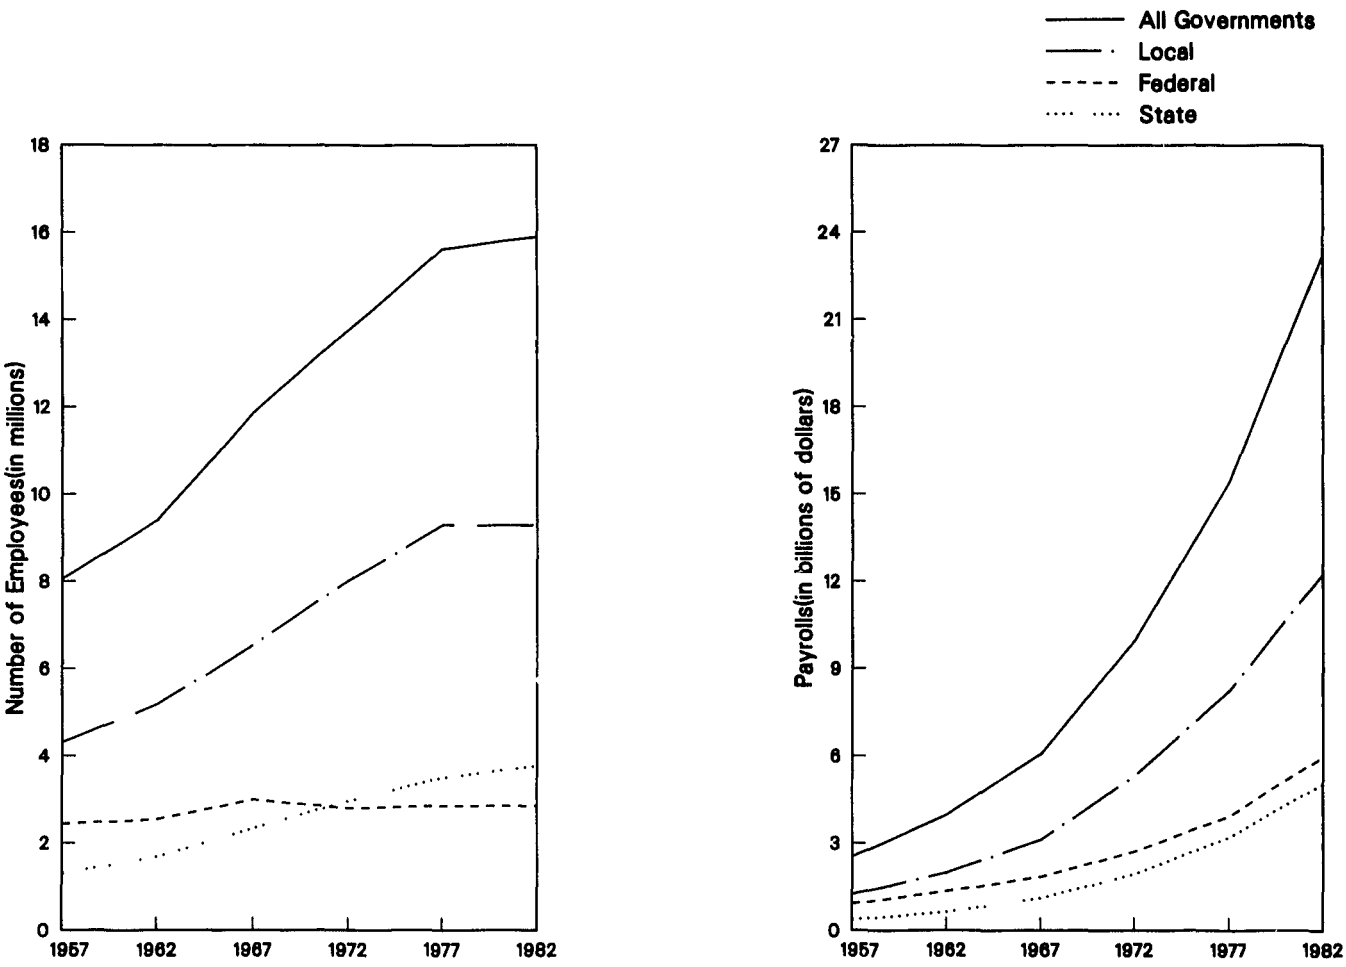

The generous cooperation of State and local government officials is gratefully acknowledged. The time and effort provided by these officials in supplying original data for this phase of the 1982 Census of Governments, and in assisting Bureau personnel who telephoned for verification or adjustment of data questioned during processing of replies, made it possible to produce this report.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

- `-` Represents zero or rounds to zero.
- `r` Revised.
- `(NA)` Not available.
- `(Z)` Less than one-half the unit of measurement shown.

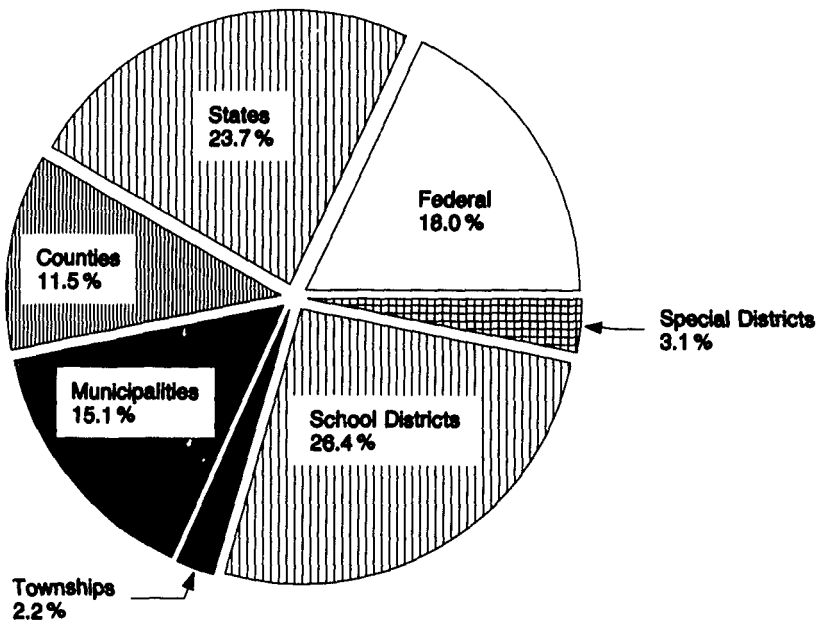

Public Employment and Payrolls by Level of Government: 1957-1982

Note: Data reported in 1957 represent the month of April. Other data reported represent the month of October.

Note: Because of rounding, detail may not add to totals.

[1]Federal civilian employees within the United States as of December 31, 1982. Total accordingly differs from Federal data shown in tables 1 and 3 which pertain to October 1982 and which include civilian employees working outside the United States.

Table 10. State and Local Government Payrolls by States: October 1982

(For meaning of symbols, see text)

State	October payroll (thousands of dollars)							State government percent of State-local total	Average October earnings, full-time employees (dollars)				
	Total	State government			Local governments				All	State government		Local governments	
		Total	Instructional employees	Other employees	Total	Instructional employees	Other employees			Instructional employees	Other employees	Instructional employees	Other employees

Appendix

Multidistrict Education Agencies

Several States have arrangements whereby several school systems jointly or cooperatively operate some aspect of public education. These cooperative operations can range from vocational or special education services to multidistrict administrative or learning media centers. These entities do not possess sufficient autonomy to be considered as independent governments nor can they be accurately assigned to any one school system; therefore, employees and payrolls of these multidistrict education agencies are not included in any of the tables in this publication.

Presented below are employment and payroll data where the Bureau of the Census has complete information. Several other States also have similar entities, but the Bureau of the Census was unable to obtain sufficient data to include their data in this tabulation.

Employment and Payrolls of Multidistrict Supplementary Education Centers

State	Employment			October payrolls ($1,000)
	Total	Full-time employees only	Full-time equivalent	
Iowa	3,898	3,365	3,589	5,272
Minnesota	1,555	1,377	1,452	2,860
New Hampshire	247	216	223	328
North Dakota	373	305	331	626

PUBLICATION PROGRAM

The 1982 Census of Governments, similar to those taken every 5 years since 1957, covers four major subject fields relating to State and local governments– governmental organization, taxable property values, public employment, and governmental finances.

The results are being issued in one preliminary report and eight volumes, which are described below. Publications order forms for specific reports may be obtained by writing to the Data User Services Division, Customer Services Branch (Publications), Bureau of the Census, Washington, D.C. 20233.

PRELIMINARY REPORT

This report presents preliminary data from the Directory Survey of Local Governments on the number of governments by type.

Number 1. Governmental Units in 1982

VOLUME 1. GOVERNMENTAL ORGANIZATION–1 report (GC82(1))

Data are presented at the national level, by States, and for SMSA's on county, municipal, and township governments by size classes; on public school systems by size of enrollment, by grades provided, and by number of schools operated; and on special district governments by function performed. The report also includes a summary description of governmental structure in each State.

VOLUME 2. TAXABLE PROPERTY VALUES AND ASSESSMENT/SALES PRICE RATIOS–1 report (GC82(2))

This volume presents data on amounts of assessed value (gross and net) officially determined in 1981 for local general property taxation, for counties, and for each city having a 1980 population of 50,000 or more, with totals for States. The data include estimates of locally assessed realty distributed among major use categories.

The report also provides statistics, based on a sampling within 2,000 local assessing jurisdictions throughout the United States, on real properties involved in measurable sales during a 6-month period of 1981. Statistics include assessment-sales ratios and dispersion coefficients applicable to single-family (nonfarm) houses and certain other realty.

VOLUME 3. PUBLIC EMPLOYMENT–3 reports (GC82(3) 1 to 3)

Number 1. Employment of Major Local Governments–This report presents statistics on October 1982 employment and payrolls of individual major local governments. Data are presented individually for all county governments, municipalities (and townships in selected States) with 10,000 or more population, school systems with 5,000 or more enrollment, and special districts having 100 or more full-time employees.

Number 2. Compendium of Public Employment–This report is a comprehensive summary of public sector employment, payrolls, and employer costs for selected employee benefits as of October 1982. Employment and payroll data are shown by governmental function. Data are summarized nationally and by States. Local government statistics are also summarized for each county area; by population-size group for counties, municipalities, and townships; by enrollment-size group for school districts; and by employment-size group for special district governments.

Number 3. Labor-Management Relations in State and Local Governments–This report is a national and State-by-State summary of labor-management relations in State and local governments as of October 1982. Statistics include the number and percent of employees who belong to an employee organization; number of governments with a labor relations policy; number of contractual agreements and number of employees covered by contractual agreements; number of employee bargaining units; and work stoppages which occurred between October 16, 1981, and October 15, 1982.

VOLUME 4. GOVERNMENTAL FINANCES–5 reports (GC82(4) 1 to 5)

This volume presents statistics on revenue, expenditure, debt, and financial assets of State and local governments.

Number 1. Finances of School Districts–Selected financial items are shown for enrollment-size groups of public school systems and individual school systems enrolling 5,000 or more pupils.

Number 2. Finances of Special Districts–Data are shown for selected large districts.

Number 3. Finances of County Governments–Selected financial items are shown for groups of counties, classified by population-size groups, and for individual county governments.

Number 4. Finances of Municipal and Township Governments–Selected financial items are reported for population-size groups of these governments and for individual municipalities and townships having 10,000 or more inhabitants.

Number 5. Compendium of Government Finances–This report is a comprehensive summary showing data for the Federal Government, individual States, and local governments by type of government, and data for State and local governments by States, including a breakdown by type of government. Data are given for county areas, per capita amounts, percentage distributions, and State rankings.

VOLUME 5. LOCAL GOVERNMENT IN METROPOLITAN AREAS–1 report (GC82(5))

This volume presents the census findings for standard metropolitan statistical areas (SMSA's) in three major subject fields: Numbers of local governments by type and size, local government employment and payrolls, and local government finances. Data are shown in terms of nationwide aggregates for population-size groups of SMSA's and for SMSA portion of each State, as well as for individual SMSA's and their component counties.

VOLUME 6. TOPICAL STUDIES–5 reports (GC82(6) 1 to 5)

This volume includes the following reports.

Number 1. Employee-Retirement Systems of State and Local Governments

Number 2. Governmental Statistics for Puerto Rico, Virgin Islands, Guam, and Northern Mariana Islands

Number 3. State Payments to Local Governments

Number 4. Historical Statistics on Governmental Finances and Employment

Number 5. Graphic Summary

VOLUME 7. GUIDE TO THE 1982 CENSUS OF GOVERNMENTS–1 report (GC82(7))

This report presents detailed samples of tables published in the 1982 Census of Governments report series.

VOLUME 8. PROCEDURAL HISTORY–1 report (GC82(81))

This report describes the procedures followed in planning and conducting the 1982 Census of Governments.
