The Census Bureau is moving toward all-electronic collections

We are phasing out paper forms for our business surveys. This will enable us to improve efficiency and reduce the cost of printing, mailing, and processing paper forms.

In addition to saving money, the benefits of reporting electronically include:

- Built-in calculation features
- Edits that identify potential reporting issues
- Immediate confirmation of submission

Report electronically at https://econhelp.census.gov/cosasm

Click the "Report Now" button, then enter the User ID and Password located on the cover letter.

Other helpful features available through the website include:

- Request a time extension
- Get detailed instructions and FAQs
- Check the filing status of your company's forms
- Contact a survey representative using the Secure Messaging Center
