[1] Preliminary data; includes about 1 million persons in mental and correctional institutions and 4.8 million failing State-residence requirements. The latter are rough approximations based on 1955-60 migration patterns and 1964 survey data on total interstate, intercounty, and intracounty movement. No allowances were made in the figures for States that permit "newcomers" to vote for President or have less restrictions for them. See Meyer Zitter and Donald E. Starsinic, "Estimates of Eligible Voters in Small Areas," op. cit., footnote 1, p.1, for method of derivation.
