Frequently Asked Questions

- **What is the source of CBP data?**

CBP data are extracted from the Business Register, the Census Bureau's file of all known single and multi-establishment companies. Data comes from a variety of sources, including the [Economic Census](#), [the Annual Survey of Manufactures](#), and [Current Business Surveys](#), as well as from administrative records of the Internal Revenue Service (IRS), the Social Security Administration (SSA), and the Bureau of Labor Statistics (BLS).

- **Are sales and receipts data provided in CBP?**

No. Sales and receipts data are available from other Census Bureau programs. For more information, please see the [Census Bureau's economic data](#).

- **Can I find data on a specific company or get a list of companies in an area?**

The Census Bureau is forbidden by Federal Law, Title 13 of the U.S. Code, from providing data that can be linked to specific establishments, which includes any lists of companies in a designated area. Even revealing that an entity is in the data is prohibited under this law.

- **Can CBP be used as a time series?**

We don't recommend using CBP data as a time series. While CBP publishes annually, the data is meant to be more of a snap shot in time. Further, CBP does not revise data for prior years. CBP relies on administrative data that is subject to non sampling error.

Definitions

- **Legal Form of Organization (LFO)** – An LFO is the organizational structure a firm chooses to adopt.
- **North America Industry Classification System (NAICS)** – The standard used by Federal statistical agencies in classifying business establishments. For more information, visit the [NAICS website](#).
- **Noise Infusion** – A method of disclosure avoidance in which values for each firm are perturbed prior to the data being released. Read more on our [How the Data Are Collected](#) page.
- **NOISE Flags**–
 - G - Low Noise Infusion
 - H - Medium Noise Infusion
 - J - High Noise Infusion
 - D - Withheld to avoid disclosing data for individual companies; data are included in higher level totals
 - S – Withheld because estimate did not meet publication standards
 - N – Not available or not comparable
- **Statewide** – Classification for employees in a state without a fixed location.

Technical

Documentation

CBP is an annual series that provides subnational economic data by industry. This series includes the number of establishments, employment during the week of March 12, first quarter payroll, and annual payroll.

Data is available:

- Through Data.census.gov (starting in 2012)
- Through AFF (2004-2016)
- downloadable (in CSV)
- by the Congressional District tool (under latest)
- API

Data

County Business Patterns has been produced as a consistent, annual series since 1964 and ZIP Code Business Patterns since 1994. Printed reports were published annually through 2004 and at irregular intervals dating back to 1946. Printed volumes in major depository libraries are the only forms in which data are available prior to 1986.

Visit [The National Archives](#) to find files for years prior to 1986.

CBP Tables

CBP data tables are available on [data.census.gov](#) from 2012-present, in American Factfinder from 2004-2016, and in print publication from 1997-2004.

CBP Datasets

CBP data are available in downloadable CSV format, along with record layouts and reference guides, from 1986-present.

CBP by Congressional District

My Congressional District tool allows data users to view the most recent CBP data and American Community Survey data by congressional district.

API

The Census Bureau's Application Programming Interface allows developers to create custom queries. Users can embed these statistics into web or mobile apps.

County Business Patterns: 2017

NOVEMBER 21, 2019

This series includes the number of establishments, employment during the week of March 12, first quarter payroll, and annual payroll. This data is useful for studying the economic activity of small areas; analyzing economic changes over time; and as a benchmark for other statistical series, surveys, and databases between economic censuses. Businesses use the data for analyzing market potential, measuring the effectiveness of sales and advertising programs, setting sales quotas, and developing budgets. Government agencies use the data for administration and planning.

Prior to reference year 2017, the number of establishments in a particular tabulation cell was not considered sensitive; therefore, counts of establishments were released without any disclosure avoidance methods applied. Beginning with reference year 2017, cells with fewer than 3 establishments have been omitted from the release.

The Census Bureau has reviewed this data product for unauthorized disclosure of confidential information and has approved the disclosure avoidance practices applied. (Approval ID: CBDRB-FY20-064).
