Data on housing vacancies  
and housing characteristics

U.S. Department of Commerce  
BUREAU OF THE CENSUS

## CURRENT DATA ON HOUSING

### HOUSING VACANCIES (SERIES H-111)

Current statistics on housing vacancies, based on a scientifically selected sample. This series of four quarterly reports and one annual report provides rental vacancy rates and homeowner vacancy rates for the United States, each of the four regions, and inside and outside standard metropolitan statistical areas. The statistics for the current quarter are compared with data for the same quarter in the preceding year. Percent distributions are presented for rental vacancies and homeowner vacancies by the following housing characteristics:

- Number of rooms
- Number of bedrooms
- Number of housing units in structure
- Duration of vacancy
- Plumbing facilities
- Monthly rent and sales price asked
- Year structure built

Also shown are percent distributions of all vacant housing units by year-round and seasonal status, figures on occupancy and vacancy rates based on the total housing inventory, and the home ownership rate. The annual report, in addition to the above, presents percent distributions of housing characteristics for both renter- and owner-occupied units.

## HOUSING CHARACTERISTICS (H-121)

This series of reports is published on an irregular schedule. Individual reports present data for the United States, regions, or local areas on one or more selected housing characteristics. (Publications in this series include 15 reports on television ownership, 1 report on second homes, 1 report on housing units by plumbing facilities and condition, and a special study on housing characteristics classified by the 1959 income of occupants.) Stocks of these reports are exhausted. Photocopies only are available. For information, write to: Housing Division, Bureau of the Census, Washington, D.C. 20233.
