A New Portrait of America,
First 2010 Census Results

• The U.S. Census Bureau will release the first set of 2010 Census data at a news conference Tuesday, Dec. 21 at 11 a.m. EST at the National Press Club in Washington, D.C.
Pre-release Media Webinar for the First 2010 Census Results

A New Portrait of America, First 2010 Census Results

The 2010 Census data to be released will include:
• the resident population for the nation, states, and Puerto Rico;
• and the congressional apportionment results for each state.
Pre-release Media Webinar for the First 2010 Census Results

The law requires the Census Bureau to report these results to the President by Dec. 31.

(within 9 months of Census Day - April 1)

Population Change

Population change is the rate of change in population between decennial census years. While every census region grew considerably during the twentieth century, the South and West experienced the largest increases in population.

**POPULATION CHANGE SINCE 1910**

UNITED STATES

- **1910**: 92.2 MIL
- **2010**: 281,421,908

**% CHG:**
- 1910: 21.0
- 1920: 15.0
- 1930: 16.2
- 1940: 14.5
- 1950: 18.5
- 1960: 13.3
- 1970: 11.5
- 1980: 9.8
- 2000: 13.2

**REGIONAL POPULATION GROWTH 1990-2000**

- **WEST**: 19.7%
- **MIDWEST**: 7.9%
- **NORTHEAST**: 5.5%
- **SOUTH**: 17.3%

**LEGEND**

- LOSS 0-5%
- 5-16%
- 15-25%
- 25% +

**POPULATION CHANGE**

Apportionment

• Apportionment is the process of dividing the 435 memberships, or seats, in the U.S. House of Representatives among the 50 states.

• Congress determines the method of apportionment.

• The U.S. Census Bureau is tasked with running the calculations based on Census results.
Who’s Included in Apportionment?

• Population of the 50 states

• Overseas military and federal civilian employees and their dependents living overseas with them.

• The District of Columbia, Puerto Rico and U.S. Island Areas are not included.

- State level map showing the apportionment of 435 Congressional seats with losses and gains from 2000.
Pre-release Media Webinar for the First 2010 Census Results

Number of Representatives

- The Constitution set the number of Representatives at 65 from 1787 until the first enumeration in 1790.

- As specified in the Constitution after the 1790 Census, the number of Representatives was raised to 105.

- Congress sets by law the number of Representatives.

- The number of Representatives was set at 435 in 1911 and took effect when the 63rd Congress began its session in 1913.
How Is Apportionment Calculated?

• Congress determines method

• Calculated by Method of Equal Proportions

• Used since the 1940 Census, in accordance with Title 2, U.S. Code

• Every state is initially assigned 1 seat

• The remaining 385 seats are distributed to states using this formula
Pre-release Media Webinar for the First 2010 Census Results

Method of Equal Proportions

• Multiplier \((m) = 1 \text{ divided by the square root of } (n*(n-1))\), where \((n)\) represents the next House seat that a state could earn.

• A priority value is determined by multiplying the state’s population by a multiplier for seat \((n)\).

• Find formula here:
