

Table A-2.

Number of People by Type of Health Insurance Coverage for Working-Age Adults Aged 19 to 64: 2016 and 2017(Numbers in thousands, margins of error in thousands. Population as of March of the following year. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see www2.census.gov/programs-surveys/cps/techdocs/cpsmar18.pdf)

Characteristic	Total																					
	2016	2017	Any health insurance										Uninsured ⁵									
			2016		2017		Change (2017 less 2016) ¹ *	Private health insurance ³		Government health insurance ⁴		2016		2017		Change (2017 less 2016) ¹ *

* Changes between the estimates are statistically different from zero at the 90 percent confidence level.

¹ Details may not sum to totals because of rounding.² A margin of error (MOE) is a measure of an estimate's variability. The larger the MOE in relation to the size of the estimate, the less reliable the estimate. This number, when added to and subtracted from the estimate, forms the 90 percent confidence interval. MOEs shown in this table are based on standard errors calculated using replicate weights. For more information, see "Standard Errors and Their Use" at <www2.census.gov/library/publications/2018/demo/p60-264sa.pdf>.³ Private health insurance includes coverage provided through an employer or union, coverage purchased directly by an individual from an insurance company, or coverage through someone outside the household.⁴ Government health insurance coverage includes Medicaid, Medicare, TRICARE, CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs), and care provided by the Department of Veterans Affairs and the military.⁵ Individuals are considered to be uninsured if they do not have health insurance coverage for the entire calendar year.⁶ The combined category "married" includes three individual categories: "married, civilian spouse present," "married, armed forces spouse present," and "married, spouse absent."⁷ The sum of those with and without a disability does not equal the total because disability status is not defined for individuals in the armed forces.

Note: The estimates by type of coverage are not mutually exclusive; people can be covered by more than one type of health insurance during the year.
