

Figure 9.
Uninsured Rates by Age: 1999 to 2012

¹ Implementation of Census 2000-based population controls occurred for the 2000 ASEC, which collected data for 1999. These estimates also reflect the results of follow-up verification questions, which were asked of people who responded “no” to all questions about specific types of health insurance coverage in order to verify whether they were actually uninsured. This change increased the number and percentage of people covered by health insurance, bringing the CPS more in line with estimates from other national surveys.

² The data for 1999 through 2009 were revised to reflect the results of enhancements to the editing process.

³ Implementation of 2010 Census population controls.

Notes: The data points are placed at the midpoints of the respective years. For information on recessions, see Appendix A. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see <www.census.gov/prod/techdoc/cps/cpsmar13.pdf>.
