

# Take the Pulse of America's Economy

## America's Economy

### On-Time Data About America's Economy

The America's Economy mobile app provides smartphone and tablet users with real-time releases of 16 key government statistics that drive business hiring, sales and production decisions useful to small businesses, the construction industry, the banking industry, journalists, economists, planners, policymakers and anyone who wants to monitor U.S. economic data.

The app consolidates indicators from the Census Bureau, the Bureau of Economic Analysis and the Bureau of Labor Statistics, which produce monthly and quarterly snapshots of key sectors within the U.S. economy.

With the ability to view trends over the past few years and the upcoming release schedule, users of this application have the latest indicators at their fingertips, with the ability to set alerts to receive notifications when economic indicators are updated. They can also add statistical release schedules to their personal calendars. When each indicator is released, users can also share the news on both Facebook and Twitter.

### Anywhere, Anytime, on Any Device

The America's Economy mobile app is part of the Census Bureau's Digital Transformation to provide the general public and the government workforce with access to information "anywhere, anytime, on any device," a key goal of the Federal Digital Strategy. That goal is consistent with the Census Bureau's longtime mission to provide the public with accurate statistics about our growing, changing nation, using 21st century technology to make that information available more quickly and easily. It is part of an overall transformation effort at the Census Bureau, which now provides for Internet responses to 60 different surveys.
