WHO SHOULD REPORT?

• Every concern that performed oil and gas field services for other concerns during any part of 2012 in the United States is required to submit a census report. The report should be completed by the operator of the establishment, whether the operator is the owner or is operating it under lease or contract.
• If you have not received forms to cover each of your operations, call or write the Census Bureau, describing the activity at the establishments for which you are requesting forms.
• If this questionnaire does not pertain to your type of activity, complete all appropriate items, such as employment, payroll, shipments, etc., of this report. Describe your activities in the Remarks section.

WHAT IS A MINERAL ESTABLISHMENT?

An oil and gas field service establishment primarily performs drilling, exploration and other oil and gas field support services for operators of oil and gas field properties on a contract or fee basis. It includes all nationwide oil and gas field service activities performed under your current Employer Identification Number (EIN) for the year 2012.

WHAT ACTIVITIES SHOULD BE REPORTED?

INCLUDE

• Oil and gas field services performed for others, such as:
  – exploration for oil and gas
  – drilling oil, gas, dry, and service wells
  – drilling water wells for oil-field use
  – building lease tanks
  – running and pulling casing
  – cementing and shooting wells
  – installing production equipment and offshore platforms

• Other associated activities when carried on in connection with your oil and gas field services such as:
  – generating energy for this operation
  – maintenance of equipment
  – receiving, shipping, storage, research, record keeping, health, safety, cafeteria, and other services

EXCLUDE

• Operation of company stores, boardinghouses, bunkhouses, and recreational facilities
• Separate sales branches, research laboratories, and general administrative offices. Report these on the appropriate Census of Business, Census of Manufactures, or central office or auxiliary forms
• Operation of leases for your own account or on contract for others if the value of shipments from these operations amounted to more than $500,000. File a separate report form MI-21101 covering these oil and gas field operations

WHAT PERIOD SHOULD EACH REPORT COVER?

• Each report should cover the calendar year 2012.
• If book records are not on a calendar-year basis, carefully prepared estimates are acceptable.
• If your fiscal year covers at least 10 months of calendar-year 2012, and reporting on a calendar-year basis involves considerable cost, you may report on a fiscal-year basis. However, all payroll and hours-worked figures should relate to the calendar year rather than the fiscal year. (Use calendar-year payroll records from your tax records.)
• If an establishment began to operate or ceased to operate during 2012, report only the part of the year that the establishment was in operation.
If the operator changed during the year, report only for that part of the year that your company operated the establishment. Report in item the appropriate information on changes in operational status.

Specify in the certification, item the exact period that the report covers.

If any of the items requested are maintained in your records only at a divisional or company level, allocate their costs to each establishment for which you received a questionnaire. When determining transfer values of products and materials from one establishment to another (interplant transfers), include, in addition to direct costs of production, a reasonable proportion of “all other costs (company overhead) and profits.” The establishments receiving such transfers should report them as purchased coal for processing, supplies, fuels, or electric energy at the same value plus cost of freight and other direct handling charges. (See item.

You may distribute the total based on the ratio of the payroll of each mining establishment to the total company payroll unless you have developed your own method of making such allocations. Specify the method used and the approximate portion that has been allocated in the REMARKS section at the end of the form.

Include employer’s cost for legally required programs and programs not required by law.

Line 1 - Health Insurance - Insurance premiums on hospitals, medical plans, and single service plans such as dental, vision, and prescription drug plans. Include premium equivalents for self-insured plans and fees paid to third party administrators (TPAs). Do not include employee contributions.

Line 2 - Pension plans

Pension plans that specify the benefit to be paid to employee upon retirement, generally either as a specified amount or a percentage of compensation. Employer contributions are based on actuarial computations that include the employee’s compensation and years of service and are not allocated to specific accounts maintained for employees.

b. Defined contribution plans – Costs under defined contribution plans. Pension plans that define the employer contributions to a separate account provided for each employee. The employee “benefit” at retirement depends on the amount contributed and the results of the account’s activity. Examples include profits sharing plans, money purchase (e.g., 401k, 403b) and stock bonus plans (e.g., ESOPs).

Line 3 - Other - Other fringe benefits (e.g., Social Security, worker’s compensation insurance, unemployment tax, state disability insurance programs, life insurance benefits, Medicare).

Item 9 - INVENTORIES
Assign to each establishment those inventories that the establishment is responsible for as if it owned them. In completing the report of a mining establishment or sales branch, INCLUDE those inventories that are held elsewhere, such as a warehouse operated by your company or a public warehouse. The inventories of an operating establishment held elsewhere should not be reported on the report of the warehouse where they may be actually stored. Inventories should not be duplicated on establishment reports.

INCLUDE
- Stocks of items to be used for mineral service work
- Stocks of supplies, parts, fuels, etc.
Part B, line 2 – LIFO RESERVE

LIFO reserve represents the excess of current period cost over the LIFO carrying value. LIFO reserve is the difference between the current cost (e.g., FIFO) of inventories (gross value) and the LIFO carrying value (net value).

Item 13 – ASSETS, CAPITAL EXPENDITURES, RETIREMENTS, DEPRECIATION

If the establishment maintains a tenant relationship with the parent company or one of its subsidiaries and pays "rent" for the use of either its buildings or equipment, exclude the value of this rent from item 14. Rental Payments. Instead, report the gross value of assets made available to this establishment as a result of this "rental" agreement in item 13 as if the establishment owned them.

If this establishment uses buildings or equipment rented directly from other companies, but rental payments are handed centrally at a company or division level, report the share of overhead charged to this establishment or estimate the share of rental charges appropriate to the operations of this establishment in item 14.

Establishments Involved With Leasing Arrangements for Equipment and/or Buildings

- If the establishment was acquired during the year, report the value at the end of the year (item 13D) as your purchase cost adjusted for capital expenditures (item 13B) and deductions (item 13C) since the time of purchase. Include used assets purchased during the year at their market value at the time of transfer rather than at original book value.

- If the establishment was sold by your company during the year, report the gross value at the beginning of the year (item 13A) as its acquisition cost. Also report this acquisition cost plus capital expenditures that may have occurred since the beginning of the year and the time of sale in item 13C.

- Report gross assets for the end of the year consistently with the gross assets at the beginning of the year and the annual asset changes during the year. Item 13A, plus 13B minus 13C equals 13D.
