</table>

**Family Poverty Ratio, Fifth Implicate**

Family Poverty Ratio, Fifth Implicate (FPL_I5) is a measure used to identify households below the poverty line when the household ties are based on a specific criterion. The table shows the distribution of unweighted and weighted cases across different FPL_I5 values. The unweighted and weighted counts are presented alongside their corresponding percentages. For example, in the row for FPL_I5 value 50, there are 3,303 unweighted cases which account for 6.5% of all cases, and 7,155,623 weighted cases which represent 9.8% of the total weighted cases.
