

How to use the American FactFinder (AFF) to retrieve all blocks within a Place.

- 1.) Go to the American FactFinder at <http://factfinder2.census.gov>.
- 2.) Click on the arrow located on the light blue Topics bar.

- 3.) Click the plus sign next to the word Datasets.

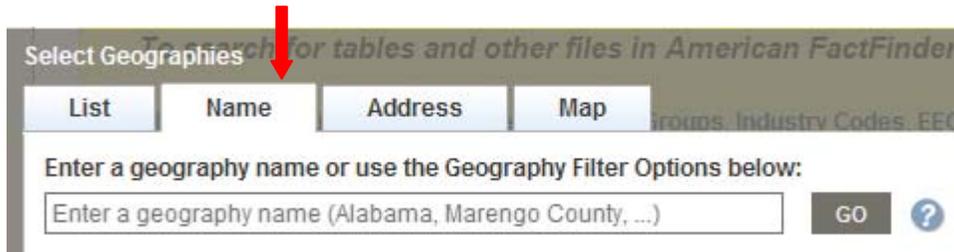

- 4.) In the list that opens, click on the entry that reads "2010 Redistricting Data SF (P.L. 94-171)".

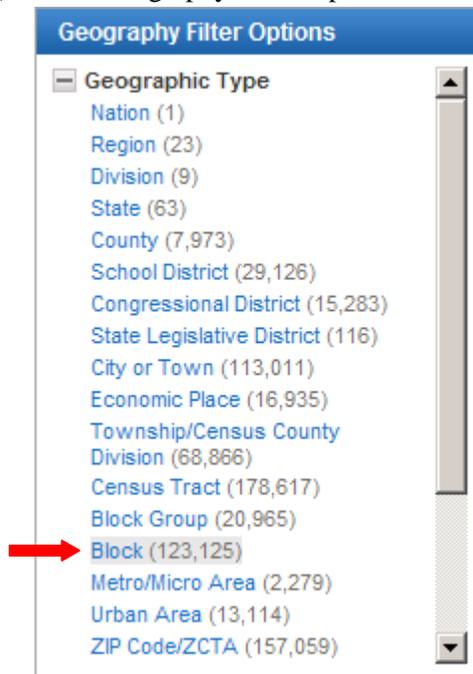

- 5.) Click on the arrow located on the light blue Geographies bar.

6.) In the Select Geographies overlay window that opens, click on the Name tab.

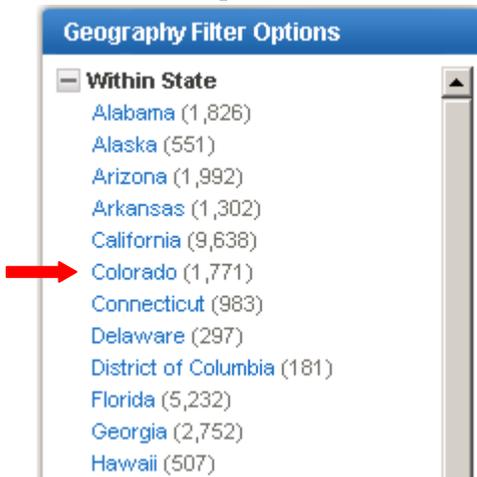

7.) In the Geography Filter Options section click on the Block entry.

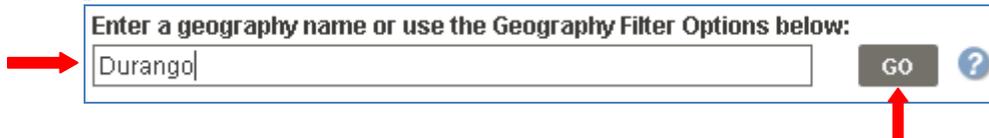

8.) In the same Geography Filter Options area, which updates after you pick Block from the previous step, click the plus sign next to Within State.

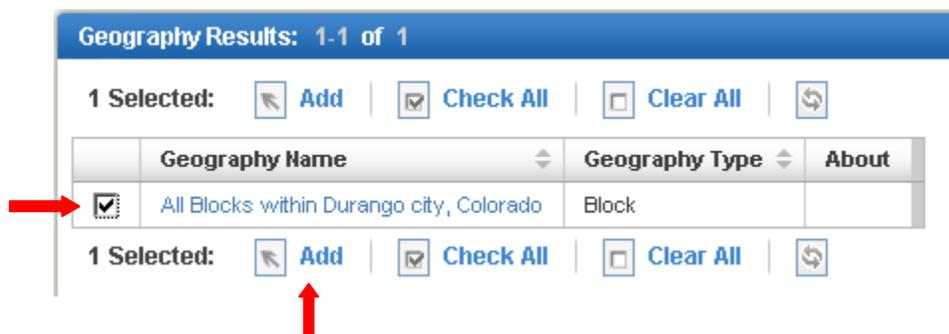

9.) In the list that opens, click on the name of the state in which the place resides.

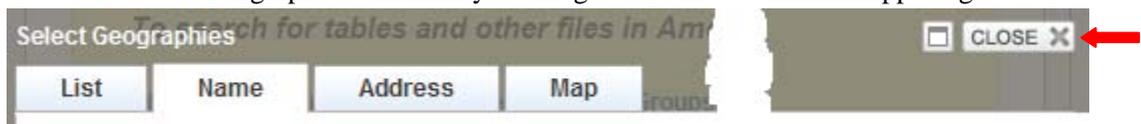

10.) In the name filter box at the top of the Select Geographies window, type in the name of your place of interest and click the GO button.

11.) The Geography Results area in the center of the Select Geographies window should now have only a listing for "All Blocks within <your place>, <state>". Click the checkbox next to this entry and then the Add button which is located at both the top and bottom of the Geography Results window.

12.) Close the Select Geographies window by clicking the Close button in the upper right hand corner.

13.) In the Main Search Results page, check the box(s) next to the tables H1, P1, P2, P3, or P4 depending on your data need. You can select more than one table. Once you have the marked the checkboxes you need, click the View button.

Search Results: 1-6 of 6 tables and other products match 'Your Selections' per page:

15.) In the download window, select your preferred file format and then click the OK button. If there are more than 230 blocks in your place, the Excel function will not work as it exceeds the number of columns available for an Excel spreadsheet. This can be overcome by using the Modify Table button and then selecting Transpose Rows and Columns prior to performing your download.

16.) The download manager will build your data file and you can then save or open the .zip file that contains the table you requested.

17.) To view and download any additional tables you had selected, use the left right arrow keys located in the upper right hand corner of the page. Each table must be downloaded separately.
