Activity Item
The following item is part of this activity and appears at the end of this student version.

- Item 1: Hispanic or Latino Percentage of the Population in 50 States and District of Columbia: 2014

Student Learning Objectives
- I will be able to complete frequency tables.
- I will be able to create and interpret histograms.

How do the percentages of people who are Hispanic or Latino in each state and the District of Columbia vary?

To complete your assigned part of this activity and help your group answer the question above, review the data in Item 1: Hispanic or Latino Percentage of the Population in 50 States and District of Columbia: 2014. Start by placing tally marks in the second column of your frequency table for each data value that falls in the appropriate class width in the first column.
**Example:** In 2014, 1.7 percent of the population in Vermont was Hispanic or Latino, so for that percentage you should add a tally mark to the “0 to less than 5” class width, as shown here:

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 5</td>
<td>1</td>
</tr>
</tbody>
</table>

After tallying all the percentages, convert the tally marks to frequency values in the third column, as shown here:

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 5</td>
<td>5</td>
<td>5</td>
</tr>
</tbody>
</table>

You can add your frequencies in the total row to make sure you didn’t miss any data points. The total should always be 51. Use the data in your frequency table to make a histogram on your graph template.
Part 1 - Make a Frequency Table and Histogram With a Class Width of 5 Percentage Points

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class Width = 5 Percentage Points)

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5 to less than 10</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10 to less than 15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>15 to less than 20</td>
<td></td>
<td></td>
</tr>
<tr>
<td>20 to less than 25</td>
<td></td>
<td></td>
</tr>
<tr>
<td>25 to less than 30</td>
<td></td>
<td></td>
</tr>
<tr>
<td>30 to less than 35</td>
<td></td>
<td></td>
</tr>
<tr>
<td>35 to less than 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td>40 to less than 45</td>
<td></td>
<td></td>
</tr>
<tr>
<td>45 to less than 50</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total: 

NAME: ___________________________ DATE: ________________
Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014

Class width = 5 percentage points

Hispanic or Latino percentage of the population
Part 2 – Make a Frequency Table and Histogram With a Class Width of 10 Percentage Points

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class Width = 10 Percentage Points)

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 10</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10 to less than 20</td>
<td></td>
<td></td>
</tr>
<tr>
<td>20 to less than 30</td>
<td></td>
<td></td>
</tr>
<tr>
<td>30 to less than 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td>40 to less than 50</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total:

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class width = 10 percentage points)

Hispanic or Latino percentage of the population

0 5 10 15 20 25 30 35 40 45 50 55 60
50 45 40 35 30 25 20 15 10 5
Part 3 - Make a Frequency Table and Histogram With a Class Width of 15 Percentage Points

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class Width = 15 Percentage Points)

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>15 to less than 30</td>
<td></td>
<td></td>
</tr>
<tr>
<td>30 to less than 45</td>
<td></td>
<td></td>
</tr>
<tr>
<td>45 to less than 60</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014

Hispanic or Latino percentage of the population
Part 4 – Make a Frequency Table and Histogram With a Class Width of 20 Percentage Points

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class Width = 20 Percentage Points)

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to less than 20</td>
<td></td>
<td></td>
</tr>
<tr>
<td>20 to less than 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td>40 to less than 60</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Frequency of the Hispanic or Latino Percentage of the Population for Each State and District of Columbia: 2014
(Class width = 20 percentage points)
Part 5 - Summarize Your Data

Now work with your group members to review the frequency tables and histograms you each created and to complete the following table, for use in answering the questions below.

<table>
<thead>
<tr>
<th>Part #</th>
<th>Class Width</th>
<th>Total Number of Class Groups</th>
<th>Class Width x Total Number of Class Groups</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>10</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>15</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>20</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. What do you notice about the numbers in the last column of the table above?

2. If you increase the number of class groups, what happens to the class width?

3. If you increase the class width, what happens to the number of class groups?
4. Look back at all four histograms that your group members made to fill in the following table.

| At what percentage do the data appear to be centered? |  
| What appears to be the range of the data? |  
| Which way do the data appear to be skewed? |  

5. Which class width helps you give the most accurate answers to the questions in the table above? How?

6. What do you think are the disadvantages of the smaller class widths when compared with the larger class widths?

7. What do you think a histogram for these data would look like if the class width were 1 percentage point?
Part 6 – Make a Frequency Chart and Histogram About the Asian Population (Optional)

Now that you’ve practiced creating frequency tables and histograms to learn about Hispanic or Latino population percentages, do the same for the Asian population using data from the table below.

### Asian Percentage of the Population in 50 States and District of Columbia: 2014

<table>
<thead>
<tr>
<th>State/District</th>
<th>Percentage Asian Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alabama</td>
<td>1.2</td>
</tr>
<tr>
<td>Alaska</td>
<td>6.0</td>
</tr>
<tr>
<td>Arizona</td>
<td>3.2</td>
</tr>
<tr>
<td>Arkansas</td>
<td>1.2</td>
</tr>
<tr>
<td>California</td>
<td>13.9</td>
</tr>
<tr>
<td>Colorado</td>
<td>2.9</td>
</tr>
<tr>
<td>Connecticut</td>
<td>4.2</td>
</tr>
<tr>
<td>Delaware</td>
<td>3.9</td>
</tr>
<tr>
<td>District of Columbia</td>
<td>3.8</td>
</tr>
<tr>
<td>Florida</td>
<td>2.6</td>
</tr>
<tr>
<td>Georgia</td>
<td>3.7</td>
</tr>
<tr>
<td>Hawaii</td>
<td>37.6</td>
</tr>
<tr>
<td>Idaho</td>
<td>1.5</td>
</tr>
<tr>
<td>Illinois</td>
<td>5.2</td>
</tr>
<tr>
<td>Indiana</td>
<td>2.0</td>
</tr>
<tr>
<td>Iowa</td>
<td>2.2</td>
</tr>
<tr>
<td>Kansas</td>
<td>2.6</td>
</tr>
<tr>
<td>Kentucky</td>
<td>1.2</td>
</tr>
<tr>
<td>Louisiana</td>
<td>1.7</td>
</tr>
<tr>
<td>Maine</td>
<td>1.1</td>
</tr>
<tr>
<td>Maryland</td>
<td>6.2</td>
</tr>
<tr>
<td>Massachusetts</td>
<td>6.1</td>
</tr>
<tr>
<td>Michigan</td>
<td>2.8</td>
</tr>
<tr>
<td>Minnesota</td>
<td>4.6</td>
</tr>
<tr>
<td>Mississippi</td>
<td>0.8</td>
</tr>
<tr>
<td>Missouri</td>
<td>1.8</td>
</tr>
<tr>
<td>Montana</td>
<td>0.8</td>
</tr>
<tr>
<td>Nebraska</td>
<td>2.1</td>
</tr>
<tr>
<td>Nevada</td>
<td>7.8</td>
</tr>
<tr>
<td>New Hampshire</td>
<td>2.6</td>
</tr>
<tr>
<td>New Jersey</td>
<td>9.3</td>
</tr>
<tr>
<td>New Mexico</td>
<td>1.5</td>
</tr>
<tr>
<td>New York</td>
<td>8.2</td>
</tr>
<tr>
<td>North Carolina</td>
<td>2.5</td>
</tr>
<tr>
<td>North Dakota</td>
<td>1.2</td>
</tr>
<tr>
<td>Ohio</td>
<td>1.9</td>
</tr>
<tr>
<td>Oklahoma</td>
<td>2.0</td>
</tr>
<tr>
<td>Oregon</td>
<td>4.0</td>
</tr>
<tr>
<td>Pennsylvania</td>
<td>3.1</td>
</tr>
<tr>
<td>Rhode Island</td>
<td>3.4</td>
</tr>
<tr>
<td>South Carolina</td>
<td>1.4</td>
</tr>
<tr>
<td>South Dakota</td>
<td>1.3</td>
</tr>
<tr>
<td>Tennessee</td>
<td>1.6</td>
</tr>
<tr>
<td>Texas</td>
<td>4.3</td>
</tr>
<tr>
<td>Utah</td>
<td>2.2</td>
</tr>
<tr>
<td>Vermont</td>
<td>1.6</td>
</tr>
<tr>
<td>Virginia</td>
<td>6.1</td>
</tr>
<tr>
<td>Washington</td>
<td>7.8</td>
</tr>
<tr>
<td>West Virginia</td>
<td>0.6</td>
</tr>
<tr>
<td>Wisconsin</td>
<td>2.6</td>
</tr>
<tr>
<td>Wyoming</td>
<td>0.9</td>
</tr>
</tbody>
</table>

U.S. Census Bureau, 2014 American Community Survey 1-Year Estimates
1. Examine the data and decide the appropriate class width for your frequency table, writing it in the blank below. (In general, mathematicians like to separate data into between five and ten class groups.)

   Class Width: __________

2. Fill in your frequency table, adding a descriptive title in the space provided.

   Title:

<table>
<thead>
<tr>
<th>Class Width</th>
<th>Tally Marks</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
3. Create your histogram of these data on the grid below. Make sure to write the class boundaries along the horizontal axis and the frequency intervals along the vertical axis, to add a title, and to label both your axes.

Class width =
4. Find a classmate who chose a different class width than you, and then work together to complete the following table about both your histograms.

<table>
<thead>
<tr>
<th>Your histogram</th>
<th>Your classmate’s histogram</th>
</tr>
</thead>
<tbody>
<tr>
<td>At what percentage do the data appear to be centered?</td>
<td></td>
</tr>
<tr>
<td>What appears to be the range of the data?</td>
<td></td>
</tr>
<tr>
<td>Which way do the data appear to be skewed?</td>
<td></td>
</tr>
</tbody>
</table>

5. Did you and your classmate discover any unusual observations in the data? If so, explain.
6. Working on your own now, look at the histogram you just created for this part and the histogram you created earlier in this activity to complete the following table.

<table>
<thead>
<tr>
<th></th>
<th>At what percentage do the data appear to be centered?</th>
<th>What appears to be the range of the data?</th>
<th>Which way do the data appear to be skewed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your Asian population histogram</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Your Hispanic or Latino population histogram</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
7. List three ways that your two data distributions (for the Asian and for the Hispanic or Latino populations) are different.

8. Thinking back to your class discussion before this activity about the American Community Survey (ACS), list three questions that you think could be answered using ACS data.
### Item 1: Hispanic or Latino Percentage of the Population in 50 States and District of Columbia: 2014

<table>
<thead>
<tr>
