AES Broadcast #2013027

Automated Commercial Environment (ACE) Software Developer Session

In furtherance of support of the continued progress being made by Customs and Border Protection (CBP) on the Automated Commercial Environment (ACE), the National Customs Brokers & Forwarders Association of America, Inc. (NCBFAA) is hosting a one-day session that will provide an opportunity for trade software developers to exchange ideas with CBP regarding new functionality scheduled to be delivered in ACE, the processes by which CBP will deploy this functionality, and the critical role the trade software developers will play in this effort.

This forum will allow for an open dialogue on the technical and business process issues surrounding the programming changes, related policy, process, and additional specifications on upcoming Trade Pilot tests.
