U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES
March 2015

The U.S. Census Bureau and the U.S. Bureau of Economic Analysis, through the Department of Commerce, announced today that the goods and services deficit was **$51.4 billion** in March, up $15.5 billion from $35.9 billion in February, revised. March exports were **$187.8 billion**, $1.6 billion more than February exports. March imports were **$239.2 billion**, $17.1 billion more than February imports.

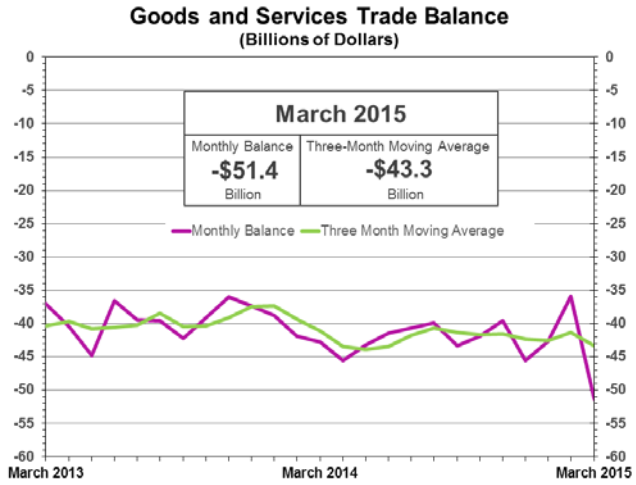

The March increase in the goods and services deficit reflected an increase in the goods deficit of $14.9 billion to $70.6 billion and a decrease in the services surplus of $0.6 billion to $19.2 billion.

Year-to-date, the goods and services deficit increased $6.4 billion, or 5.2 percent, from the same period in 2014. Exports decreased $11.7 billion or 2.0 percent. Imports decreased $5.3 billion or 0.8 percent.

Goods and Services Three-Month Moving Averages (Exhibit 2)

The average goods and services deficit increased $1.9 billion to $43.3 billion for the three months ending in March.

- Average exports of goods and services decreased $2.4 billion to $187.8 billion in March.
- Average imports of goods and services decreased $0.5 billion to $231.1 billion in March.

Year-over-year, the average goods and services deficit increased $2.1 billion from the three months ending in March 2014.

- Average exports of goods and services decreased $3.9 billion from March 2014.
- Average imports of goods and services decreased $1.8 billion from March 2014.

NOTE: All statistics referenced are seasonally adjusted; statistics are on a balance of payments basis unless otherwise specified. Additional statistics, including not seasonally adjusted statistics and details for goods on a Census basis, are available in Exhibits 1-20b of this release. For information on data sources, definitions, and scheduled release dates through December 2015, see the information section on page A-1 of this release. The next release is **June 3, 2015.**

Exports (Exhibits 3, 6, and 7)

Exports of goods increased $1.5 billion to $127.1 billion in March.

Exports of goods on a Census basis increased $1.3 billion.

- Capital goods increased $1.5 billion.
  - Civilian aircraft increased $0.5 billion.
  - Civilian aircraft engines increased $0.2 billion.
  - Electric apparatus increased $0.2 billion.

Net balance of payments adjustments increased $0.2 billion.

Exports of services increased $0.2 billion to $60.8 billion in March.

- Transport, which includes freight and port services and passenger fares, increased $0.1 billion.
- Travel (for all purposes including education) decreased $0.1 billion.

Imports (Exhibits 4, 6, and 8)

Imports of goods increased $16.4 billion to $197.6 billion in March.

Imports of goods on a Census basis increased $16.4 billion.

- Consumer goods increased $9.0 billion.
  - Cell phones and other household goods increased $1.7 billion.
  - Other textile apparel and household goods increased $1.3 billion.
  - Furniture, household goods, etc. increased $1.0 billion.
- Capital goods increased $4.0 billion.
- Automotive vehicles, parts, and engines increased $2.7 billion.

Net balance of payments adjustments decreased $0.1 billion.

Imports of services increased $0.8 billion to $41.6 billion in March.

- Transport increased $0.6 billion.
- Travel (for all purposes including education) increased $0.1 billion.

Real Goods in 2009 Dollars – Census Basis (Exhibit 11)

The real goods deficit increased $16.0 billion to $67.2 billion in March.

- Real exports of goods increased $1.3 billion to $118.8 billion.
- Real imports of goods increased $17.3 billion to $186.0 billion.

Revisions

Revisions to February exports

- Exports of goods were revised downward less than $0.1 billion.
- Exports of services were revised downward less than $0.1 billion.

Revisions to February imports

- Imports of goods were revised upward $0.5 billion.
- Imports of services were revised downward $0.1 billion.

Goods by Selected Countries and Areas: Monthly – Census Basis (Exhibit 19)

The March figures show surpluses, in billions of dollars, with South and Central America ($2.9), OPEC ($0.7), and Brazil ($0.4). Deficits were recorded, in billions of dollars, with China ($37.8), European Union ($11.0), Japan ($6.3), Germany ($5.6), Mexico ($4.8), South Korea ($2.6), Italy ($2.1), India ($2.0), France ($1.5), Canada ($1.4), United Kingdom ($0.2), and Saudi Arabia ($0.1).

- The deficit with **China** increased $10.5 billion to $37.8 billion in March. Exports increased $0.4 billion to $9.3 billion and imports increased $10.9 billion to $47.1 billion.
- The deficit with **Japan** increased $2.0 billion to $6.3 billion in March. Exports increased $0.2 billion to $5.6 billion and imports increased $2.2 billion to $11.9 billion.

NOTE: For definitions of goods on a balance of payments basis, goods on a Census basis, and net balance of payments adjustments, see the information section on page A-1 of this release.

NOTICE

New U.S. Bureau of Economic Analysis International Trade and Investment Country Factsheets

On May 4, 2015, the U.S. Bureau of Economic Analysis (BEA) released a new data application on its Web site. The International Trade and Investment Country Facts application provides information on U.S. trade in goods and services, direct investment, and the activities of multinational enterprises for individual countries and country groupings. Users select a country from an interactive world map or a searchable menu. The application generates a country factsheet with graphs and tables showing the latest data on U.S. trade and investment with that country. The factsheet can be downloaded or printed in PDF format. The application also generates data tables containing more detailed statistics that can be downloaded in Excel format.

The application can be accessed from www.bea.gov/international/factsheet. If you have questions, please contact BEA's Balance of Payments Division at InternationalAccounts@bea.gov.

New U.S. Census Bureau Report on U.S. International Trade in Goods

On July 30, 2015, at 8:30 a.m., the U.S. Census Bureau will introduce a new release, "Advance Report: U.S. International Trade in Goods." This report will:

- Be released monthly, 4-7 business days in advance of the "U.S. International Trade in Goods and Services" report (FT-900).
- Present advance statistics for the reference month. For example, the July 30 release will feature advance statistics for June 2015.
- Contain statistics for international trade in goods on a Census basis by principal end-use category.
- Include both seasonally adjusted and not seasonally adjusted statistics.
- Not include statistics for trade in goods on a balance of payments basis or statistics for trade in services, both of which will continue to be featured in the FT-900.
- Be available at www.census.gov/trade.

In accordance with Section 7 of the Office of Management and Budget's (OMB) Statistical Policy Directive No. 3, OMB granted the Census Bureau an exception to the previously approved schedule for the release of the FT-900. OMB granted the exception for the sole purpose of publicly releasing advance monthly statistics on trade in goods.

The new report will present two sets of statistics: "Advance" statistics, which reflect partial coverage, and "Final" statistics, which reflect complete coverage and correspond to the most recently published statistics in Exhibits 6 and 13 of the FT-900. Sample exhibits of the new report are available at www.census.gov/foreign-trade/statistics/notices/20150405_advrelease.html.

The release schedule for this report through December 2015 is as follows:

Statistical Month	Date	Day
June	07-30-15	Thu
July	08-28-15	Fri
August	09-29-15	Tue
September	10-28-15	Wed
October	11-24-15	Tue
November	12-29-15	Tue

If you have questions, please contact the Census Bureau, Economic Indicators Division, on (800) 549-0595, option 4, on (301) 763-2311, or at eid.international.trade.data@census.gov.

(cont.)

Upcoming Revisions to Goods and Services

On June 3, 2015, the U.S. Census Bureau and the U.S. Bureau of Economic Analysis (BEA) will release "U.S. International Trade in Goods and Services: April 2015" and "U.S. International Trade in Goods and Services: Annual Revision for 2014." With these releases, statistics on trade in goods, on both a Census basis and a balance of payments (BOP) basis, will be revised beginning with 2012, and statistics on trade in services will be revised beginning with 1999. The revised statistics for goods on a BOP basis and for services will also be included in the report "U.S. International Transactions: First Quarter 2015 and Annual Revisions" and in the annual revision of the U.S. International Transactions Accounts (ITAs), both to be released by BEA on June 18, 2015.

Goods

Revised statistics on trade in goods will reflect 1) corrections and adjustments to previously published not-seasonally-adjusted statistics for goods on a Census basis, 2) recalculated seasonal and trading-day adjustments, and 3) newly available and revised source data on BOP adjustments, which are adjustments that BEA applies to goods on a Census basis to convert them to a BOP basis. BOP adjustments are presented as *net adjustments* in this release.

Services

Revised statistics on trade in services beginning with 1999 will reflect the reclassification of repairs related to Foreign Military Sales from exports of *government goods and services n.i.e.* (not included elsewhere) to exports of *maintenance and repair services n.i.e.* This reclassification will result in more accurate international account statistics and will bring BEA's statistics into closer alignment with international guidelines, which recommend that services supplied by and to governments be classified to a specific services category where possible.

Revised statistics on trade in services beginning with 2012 will also reflect 1) newly available and revised source data primarily from BEA's surveys of international services transactions, 2) revised seasonal adjustments, and 3) revised interpolations of quarterly source data to monthly statistics (see the information section on page A-4 of this release).

A preview of BEA's 2015 annual revision of the ITAs was published in the April 2015 *Survey of Current Business*. If you have questions, please contact BEA's Balance of Payments Division at InternationalAccounts@bea.gov.

To learn more about the FT-900 and other economic indicators the Census Bureau publishes, join the Economic Indicators Division for the "Investigating Economic Indicators" Webinar series. For more information, visit www.census.gov/econ/webinar.

(1) Data are presented on a BOP basis.

NOTES:
* The three-month moving averages shown in this exhibit are computed by summing the subject month and the two prior months, dividing by three, and showing the average at the end month of the period. A moving average is useful in smoothing the volatile trade data so that trends can better be discerned.
* For information on data sources and methodology, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part A: Seasonally Adjusted (by Commodity/Service)

Exhibit 3. U.S. Exports of Services by Major Category

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. (R) - Revised.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.
(2) Includes petroleum and petroleum products.

NOTE: For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part A: Seasonally Adjusted (by Commodity/Service)

Exhibit 7. U.S. Exports of Goods by End-Use Category and Commodity

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The commodities in this exhibit are ranked on the monthly change within each major commodity grouping. (-) Represents zero or less than one-half of measurement shown. (R) - Revised.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy-related petroleum products as those aggregated in the Standard International Trade Classification (SITC). The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene, which are included in "Manufactured Goods" in the SITC.

NOTE: For information on data sources, nonsampling errors, definitions, and details concerning what is included in Net Adjustments, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.
(2) Includes petroleum and petroleum products.
(3) The "residual" represents the difference between total exports or imports of goods on a Census basis and the sum of the components. For additional information, see www.census.gov/foreign-trade/aip/priceadj.html.

NOTE: For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part A: Seasonally Adjusted (by Commodity/Service)

Exhibit 11. Real U.S. Trade in Petroleum and Non-Petroleum Products by End-Use
Chained (2009) Dollars

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The values in this exhibit are subject to periodic change, reflecting revisions to the source information for the monthly deflators. (-) Represents zero or less than one-half of measurement shown. (R) - Revised.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.
(2) Includes petroleum and petroleum products.

NOTE: For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part B: NOT Seasonally Adjusted

Exhibit 14. U.S. Trade in Goods by Selected Countries and Areas: 2015

In millions of dollars. Details may not equal totals due to rounding. (-) Represents zero or less than one-half of measurement shown.
(R) - Revised. (X) - Not applicable.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.
(2) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

NOTES:
* This exhibit is not additive; countries may be included in more than one area. For a list of countries in each area, see the information section on page A-2 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were at the time of reporting.
* For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part B: NOT Seasonally Adjusted

Exhibit 14a. U.S. Trade in Goods by Selected Countries and Areas: 2014

In millions of dollars. Details may not equal totals due to rounding. (-) Represents zero or less than one-half of measurement shown.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.
(2) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

NOTES:
* This exhibit is not additive; countries may be included in more than one area. For a list of countries in each area, see the information section on page A-2 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were at the time of reporting.
* For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part B: NOT Seasonally Adjusted

(1) Detailed data are presented for domestic exports unless otherwise noted. All data are on a Census basis. The information needed to convert to a BOP basis is not available.
(2) Total exports including re-exports (exports of foreign merchandise).
(3) Manufactured Goods is based on the North American Industry Classification System (NAICS) and Agricultural Commodities is based on the Harmonized System commodities specified by the U.S. Department of Agriculture definition. All other commodity detail is based on the SITC.
(4) Export statistics for certain commodity classifications related to the aircraft industry are subject to suppression and have been aggregated in a manner that prevents the disclosure of confidential information. For additional information, see www.census.gov/foreign-trade/statistics/notices/aircraft/.

NOTE: For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

NOTES:

* Export statistics for certain commodity classifications related to the aircraft industry are subject to suppression and have been aggregated in a manner that prevents the disclosure of confidential information. As a result, Advanced Technology Product exports are overstated by $588 million in March 2015. For additional information, see www.census.gov/foreign-trade/statistics/notices/aircraft/.

* Data are not available on a BOP basis. For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

(1) Export statistics for certain commodity classifications related to the aircraft industry are subject to suppression and have been aggregated in a manner that prevents the disclosure of confidential information. As a result, Advanced Technology Product exports are overstated by $588 million in March 2015. For additional information, see www.census.gov/foreign-trade/statistics/notices/aircraft/.

NOTE: Data are not available on a BOP basis. For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

Part B: NOT Seasonally Adjusted

NOTES:

* Countries may be included in more than one area. For a list of countries in each area, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were as of the most recent statistical period.
* Seasonally adjusted country and area data in this exhibit will not sum to the commodity-based seasonally adjusted totals shown in Part A of this release. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.
* For information on data sources, nonsampling errors, and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

NOTES:

* Countries may be included in more than one area. For a list of countries in each area and for additional information on country and area detail for goods on a BOP basis and for services, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were at the time of reporting.
* Seasonally adjusted country and area data in this exhibit will not sum to the seasonally adjusted totals shown in Part A of this release. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.
* For information on data sources, nonsampling errors, and definitions, see the information section that begins on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Statistics for the first quarter 2015 will be available with the April 2015 release on June 3, 2015.

NOTES:

* Countries may be included in more than one area. For a list of countries in each area and for additional information on country and area detail for goods on a BOP basis and for services, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were at the time of reporting.
* Seasonally adjusted country and area data in this exhibit will not sum to the seasonally adjusted totals shown in Part A of this release. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.
* For information on data sources, nonsampling errors, and definitions, see the information section that begins on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Statistics for the first quarter 2015 will be available with the April 2015 release on June 3, 2015.

NOTES:

* Countries may be included in more than one area. For a list of countries in each area and for additional information on country and area detail for goods on a BOP basis and for services, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Area data reflect the composition of the areas as they were at the time of reporting.
* Seasonally adjusted country and area data in this exhibit will not sum to the seasonally adjusted totals shown in Part A of this release. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.
* For information on data sources, nonsampling errors, and definitions, see the information section that begins on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
* Statistics for the first quarter 2015 will be available with the April 2015 release on June 3, 2015.

INFORMATION ON GOODS AND SERVICES

GOODS (CENSUS BASIS)

Data for goods on a Census basis are compiled from the documents collected by the U.S. Customs and Border Protection and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. They include government and non-government shipments of goods and exclude shipments between the United States and its territories and possessions; transactions with U.S. military, diplomatic, and consular installations abroad; U.S. goods returned to the United States by its Armed Forces; personal and household effects of travelers; and in-transit shipments. The General Imports value reflects the total arrival of merchandise from foreign countries that immediately enters consumption channels, warehouses, or Foreign Trade Zones.

For imports, the value reported is the U.S. Customs and Border Protection appraised value of merchandise—generally, the price paid for merchandise for export to the United States. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the United States are excluded. The exception is Exhibit 17a, which shows CIF import value. The CIF (cost, insurance, and freight) value represents the landed value of the merchandise at the first port of arrival in the United States. It is computed by adding import charges to the customs value and therefore excludes U.S. import duties.

Exports are valued at the f.a.s. (free alongside ship) value of merchandise at the U.S. port of export, based on the transaction price including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

REVISION PROCEDURE (CENSUS BASIS)

Monthly Revisions: Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month, the U.S. Census Bureau revises the aggregate seasonally adjusted (current and real chained-dollar) and unadjusted export, import, and trade balance figures, as well as the end-use totals for the prior month. Country detail data and commodity detail data, based on the Standard International Trade Classification (SITC) Revision 4 and the North American Industry Classification System (NAICS), are not revised monthly. The timing adjustment shown in Exhibit 14 is the difference between monthly data as originally reported and as recompiled.

For February, unadjusted exports of goods were revised downward less than $0.1 billion and unadjusted imports of goods were revised upward $0.4 billion. Goods carry-over in March was $0.1 billion (0.1 percent) for exports and $2.3 billion (1.2 percent) for imports. For February, revised export carry-over was less than $0.1 billion (less than 0.1 percent) and revised import carry-over was $0.1 billion (0.1 percent).

Quarterly Revisions to Chain-Weighted Dollar Series*:* For March, June, September, and December statistical month releases, revisions are made to the real chained-dollar series presented in Exhibits 10 and 11: the previous five months are revised to incorporate the Bureau of Labor Statistics' revisions to price indexes, which are used to produce the real chained-dollar series and to align Census data with data published by the U.S. Bureau of Economic Analysis (BEA) in the National Income and Product Accounts (NIPAs).

Annual Revisions*:* Each June, not seasonally adjusted goods data are revised to redistribute monthly data that arrived too late for inclusion in the month of transaction. In addition, revisions are made to reflect corrections received subsequent to the monthly revisions. Seasonally adjusted data are also revised to reflect recalculated seasonal and trading-day adjustments. These revisions are reflected in totals, end-use, commodity, and country summary data.

Other Revisions*:* For December and January statistical month releases, each prior month of the most recent full year is revised so that the totals of the seasonally adjusted months equal the annual totals.

U.S./CANADA DATA EXCHANGE AND SUBSTITUTION

Data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

1. *Coverage* - Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For March 2015, these shipments totaled $191.8 million. U.S. export coverage also excludes U.S. postal shipments to Canada. For March 2015, these shipments totaled $20.0 million.

   U.S. import coverage includes shipments of railcars and locomotives from Canada. Effective with January 2004 statistics, Canada excludes these shipments from its goods exports to the United States, therefore creating coverage differences between the two countries for these goods.

2. *Valuation* - Canadian imports are valued at the point of origin in the United States. However, U.S. exports are valued at the port of exit in the United States and include inland freight charges, making the U.S. export value slightly larger than the Canadian import value. Canada requires inland freight to be reported separately from the value of the goods. Combining the inland freight and the Canadian reported import value provides a consistent valuation for all U.S. exports. Inland freight charges for March 2015 accounted for 2.0 percent of the value of U.S. exports to Canada.

3. *Re-exports* - Unlike Canadian imports, which are based on country of origin, U.S. exports include re-exports of foreign goods. Therefore, the aggregate U.S. export figure is slightly larger than the Canadian import figure. For March 2015, re-exports to Canada were $4,271.6 million.

4. *Exchange Rate* - Average monthly exchange rates are applied to convert the published data to U.S. currency. For March 2015, the average exchange rate was 1.2618 Canadian dollars per U.S. dollar.

5. *Other* - There are other minor differences, such as rounding error, that are statistically insignificant.

Canadian Estimates: Effective with January 2001 statistics, the current month data for exports to Canada contain an estimate for late arrivals and corrections. The following month, this estimate is replaced, in the news release exhibits only, with the actual value of late receipts and corrections. This estimate improves the current month data for exports to Canada and treats late receipts for exports to Canada in a manner that is more consistent with the treatment of late receipts for exports to other countries.

NONSAMPLING ERRORS

The goods data are a complete enumeration of documents collected by the U.S. Customs and Border Protection and are not subject to sampling errors. Quality assurance procedures are performed at every stage of collection, processing, and tabulation. However, the data are still subject to several types of nonsampling errors. The most significant of these include reporting errors, undocumented shipments, timeliness, data capture errors, and errors in the estimation of low-valued transactions.

Reporting Errors: Reporting errors are mistakes or omissions made by importers, exporters, or their agents in their import or export declarations. Most errors involve missing or invalid commodity classification codes and missing or incorrect quantities or shipping weights. They have a negligible effect on aggregate import, export, and balance of trade statistics. However, they can affect the detailed commodity statistics.

Undocumented Shipments: Federal regulations require importers, exporters, or their agents to report all merchandise shipments above established exemption levels. The U.S. Census Bureau has determined that not all required documents are filed, particularly for exports.

Timeliness and Data Capture Errors: The U.S. Census Bureau captures import and export information from administrative documents and through various automated collection programs. Documents may be lost, and data may be incorrectly keyed, coded, or recorded. Transactions may be included in a subsequent month's statistics if received late.

Low-valued Transactions: The total values of transactions valued as much as or below $2,500 for exports and $2,000 ($250 for certain quota items) for imports are estimated for each country, using factors based on the ratios of low-valued shipments to individual country totals for past periods.

The U.S. Census Bureau recommends that data users incorporate this information into their analyses, as nonsampling errors could impact the conclusion drawn from the results. For a detailed discussion of errors affecting the goods data, see "U.S. Merchandise Trade Statistics: A Quality Profile," available at www.census.gov/foreign-trade/aip/quality_profile10032014.pdf or from the Economic Indicators Division, U.S. Census Bureau.

AREA GROUPINGS

North America: Canada, Mexico.

Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR): Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua.

Europe: Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Faroe Islands, Finland, France, Georgia, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kosovo, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain, Svalbard-Jan Mayen Island, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, Uzbekistan, Vatican City.

European Union: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Euro Area: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain.

Newly Industrialized Countries (NICs): Hong Kong, Korea (South), Singapore, Taiwan.

Pacific Rim: Australia, Brunei, China, Hong Kong, Indonesia, Japan, Korea (South), Macau, Malaysia, New Zealand, Papua New Guinea, Philippines, Singapore, Taiwan.

South/Central America: Anguilla, Antigua and Barbuda, Argentina, Aruba, Bahamas, Barbados, Belize, Bermuda, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominica, Dominican Republic, Ecuador, El Salvador, Falkland Islands (Islas Malvinas), French Guiana, Grenada, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Montserrat, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, Sint Maarten, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, Venezuela.

OPEC: Algeria, Angola, Ecuador, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, Venezuela.

Africa: Algeria, Angola, Benin, Botswana, British Indian Ocean Territories, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Brazzaville), Congo (Kinshasa), Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, French Southern and Antarctic Lands, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Ivory Coast, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mayotte, Morocco, Mozambique, Namibia, Niger, Nigeria, Reunion, Rwanda, St. Helena, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Western Sahara, Zambia, Zimbabwe.

ADJUSTMENTS FOR SEASONAL AND TRADING-DAY VARIATIONS

Goods are initially classified under the Harmonized Commodity Description and Coding System (Harmonized System), which is an internationally accepted standard for the commodity classification of traded goods. The Harmonized System describes and measures the characteristics of the goods and is the basis for the systems used in the United States: Schedule B for exports and Harmonized Tariff Schedule for imports. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine goods according to their principal uses (see Exhibits 7 and 8). These categories are used as the basis for computing the seasonal and trading-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (see Exhibit 6). These data are provided to BEA, from the U.S. Census Bureau, for use in the NIPAs and in the U.S International Transactions Accounts (balance of payments accounts).

Exhibit 19 shows goods (Census Basis) that are seasonally adjusted for selected countries and world areas. Unlike the commodity-based adjustments discussed above, these adjustments are developed and applied directly at the country and world area levels. For total exports and imports, data users should refer to the commodity-based totals shown in the other exhibits. The seasonally adjusted country and world area data will not sum to the seasonally adjusted commodity-based totals because the seasonally adjusted country and world area data and the commodity-based totals are derived from different aggregations of the export and import data and from different seasonal adjustment models. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.

The seasonal adjustment procedure (X13-ARIMA-SEATS) is based on a model that estimates the monthly movements as percentages above or below the general level of series (unlike other methods that redistribute the actual series values over the calendar year). Because the data series for aircraft is highly variable, users studying data trends may wish to analyze aircraft separately from other trade.

ADJUSTMENTS FOR PRICE CHANGE

Data adjusted for seasonal variation on a real chained-dollar basis (2009 base year) are presented in Exhibits 10 and 11. This adjustment for price change is done using the Fisher chain-weighted methodology. The deflators are primarily based on the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the NIPAs by BEA.

PRINCIPAL COMMODITIES

Goods data appearing in Exhibit 15 are classified in terms of the SITC Revision 4, with the exception of agricultural and manufactured goods. Agricultural goods are defined by the U.S. Department of Agriculture (USDA); they consist of non-marine food products and other products of agriculture that have not passed through complex processes of manufacture. Manufactured goods conform to the NAICS; they consist of goods that have been mechanically, physically, or chemically transformed. USDA agricultural goods and NAICS manufactured goods are not mutually exclusive categories.

Re-exports are foreign merchandise entering the country as imports and then exported in substantially the same condition as when imported. Re-exports, included in overall export totals, appear as separate line items in Exhibit 15.

ADVANCED TECHNOLOGY PRODUCTS

About 500 of some 22,000 Schedule B and Harmonized Tariff Schedule classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes, and they meet the following criteria:

1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).

2. These products represent leading edge technology in that field.

3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the goods results in a measure of advanced technology trade that appears in Exhibits 16 and 16a. This product- and commodity-based measure of advanced technology differs from broader NAICS-based measures, which include all goods produced by a particular industry group, regardless of the level of technology embodied in the goods.

GOODS (BALANCE OF PAYMENTS BASIS) AND SERVICES

Quarterly and annual statistics for goods on a balance of payments (BOP) basis and for services are included in the U.S. International Transactions Accounts (ITAs), which are published by BEA in news releases in March, June, September, and December and in the *Survey of Current Business* in the January, April, July, and October issues. The next release of the ITAs is scheduled for June 18, 2015. The *Survey of Current Business* is available online at www.bea.gov/scb/index.htm.

GOODS (BALANCE OF PAYMENTS BASIS)

Goods on a Census basis are adjusted by BEA to a BOP basis to align the data with the concepts and definitions used to prepare the international and national economic accounts. These

adjustments, which are applied separately to exports and imports, are necessary to supplement coverage of the Census data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions at market prices. They include both *additions* to and *deductions* from goods on a Census basis and are presented in this release as *net adjustments*. Adjustments that exhibit significant seasonal patterns are seasonally adjusted. BEA also publishes more detailed quarterly and annual statistics for *net adjustments* in ITA Table 2.4. U.S. International Trade in Goods, Balance of Payments Adjustments and in the January, April, July, and October issues of the *Survey of Current Business*.

The export adjustments include:

Exports under U.S. military sales contracts - This adjustment reflects the net amount of two separate adjustments. BEA first *deducts* goods identified in the Census data as exports under the U.S. Foreign Military Sales program. BEA then *adds* primary source data for these exports, which are reported to BEA by the U.S. Department of Defense.

Gold exports, nonmonetary - This *addition* is made for gold that is purchased by foreign official agencies from private dealers in the United States and held at the Federal Reserve Bank of New York. The Census data only include gold that leaves the U.S. customs territory.

Goods procured in U.S. ports by foreign carriers - This *addition* is made for foreign air and ocean carriers' fuel purchases in U.S. ports.

Net exports of goods under merchanting - This *addition* is made to include the net value of the purchase and subsequent resale of goods abroad without the goods entering the United States. Because these goods do not cross the U.S. customs frontier, their value is not recorded in the Census data.

Other adjustments to exports include:

Deductions for equipment repairs (parts and labor), developed motion picture film, and military grant-aid. *Additions* for sales of fish caught in U.S. territorial waters, exports of electricity to Mexico, private gift parcels, vessels and oil rigs for which ownership changes, valuation of software exports at market value, and low-value (below reporting threshold) transactions for 1999–2009 to phase in a revised Census Bureau low-value methodology that was implemented for goods on a Census basis beginning with statistics for 2010.

The import adjustments include:

Gold imports, nonmonetary - This *addition* is made for gold sold by foreign official agencies to private purchasers out of stock held at the Federal Reserve Bank of New York. The Census data only include gold that enters the U.S. customs territory.

Goods procured in foreign ports by U.S. carriers - This *addition* is made for U.S. air and ocean carriers' fuel purchases in foreign ports.

Imports by U.S. military agencies - This *addition* is made for purchases of goods abroad by U.S. military agencies, which are reported to BEA by the U.S. Department of Defense. The Census data only include imports of goods by U.S. military agencies that enter the U.S. customs territory.

Inland freight in Canada and Mexico - This *addition* is made for inland freight in Canada and Mexico. Imports of goods from all countries should be valued at the customs value—the value at the foreign port of export including inland freight charges. For imports from Canada and Mexico, this should be the cost of the goods at the U.S. border. However, the customs value for imports for certain Canadian and Mexican goods is the point of origin in Canada or Mexico. BEA makes an *addition* for the inland freight charges of transporting these goods to the U.S. border to make the value comparable to the customs value reported for imports from other countries.

Other adjustments to imports include:

Deductions for equipment repairs (parts and labor), repairs to U.S. vessels abroad, and developed motion picture film. *Additions* for non-reported imports of locomotives and railcars, imports of electricity from Mexico, conversion of vessels for commercial use, valuation of software imports at market value, and low-value (below reporting threshold) transactions for 1999–2009 to phase in a revised Census Bureau low-value methodology that was implemented for goods on a Census basis beginning with statistics for 2010.

SERVICES

The services statistics cover transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic, and consular installations abroad are excluded because these installations are considered to be part of the U.S. economy.

Services statistics are based on quarterly, annual, and benchmark surveys and information obtained from monthly government and industry reports. For categories for which monthly data are not available, monthly statistics are derived from quarterly statistics through temporal distribution, or interpolation. The interpolation methodology used by BEA is the modified Denton proportional first difference method. This method preserves the pattern of the monthly indicator series, if available, while satisfying the annual aggregation constraints. See "An Empirical Review of Methods for Temporal Distribution and Interpolation in the National Accounts" for more information. Services are seasonally adjusted when statistically significant seasonal patterns are present.

Services are shown in nine broad categories. The following is a brief description of the types of services included in each category:

Maintenance and repair services n.i.e. (not included elsewhere) - Consists of maintenance and repair services performed by residents of one country on goods that are owned by residents of another country. The repairs may be performed at the site of the repair facility or elsewhere. Excludes such services in which the cost is included in the price of the goods and is not billed separately or is declared as a part of the price of the goods on the import or export declaration filed with the U.S. Customs and Border Protection. Maintenance and repair of ships, aircraft, and other transport equipment are included under transport services, and maintenance and repair of computers are included under computer services.

Transport - Consists of transactions associated with moving people and freight from one location to another and includes related supporting and auxiliary services. Transport covers all modes of transportation, including air, sea, rail, road, space, and pipeline. Postal and courier services and port services, which cover cargo handling, storage and warehousing, and other related transport services, are also included.

Travel (for all purposes including education) - Includes goods and services acquired by nonresidents while abroad. A traveler is defined as a person who stays, or intends to stay, for less than one year in a country of which he or she is not a resident or as a nonresident whose purpose is to obtain education or medical treatment, no matter how long the stay. Purchases can be either for own use or for gifts to others. Travel is a transactor-based component that covers a variety of goods and services, primarily lodging, meals, transportation in the country of travel, amusement, entertainment, and gifts. Excludes air passenger services for travel between countries, which are included in *transport*, and goods for resale, which are included in goods.

Travel includes business and personal travel. Business travel covers goods and services acquired for use by persons whose primary purpose for travel is for business (including goods and services for which business travelers are reimbursed by employers). Business travel also includes expenditures by border, seasonal, and other short-term workers in their economy of employment. Personal travel covers travel for all non-business purposes, including for medical or educational purposes.

Insurance services - Includes the direct insurance services of providing life insurance and annuities, non-life (property and casualty) insurance, reinsurance, freight insurance, and auxiliary insurance services. Insurance is measured as gross premiums earned plus premium supplements less claims payable, with an adjustment for claims volatility. Premium supplements represent investment income from insurance reserves, which are attributed to policyholders who are treated as paying the income back to the insurer. Auxiliary insurance services include agents' commissions, brokerage services, insurance consulting services, actuarial services, and other insurance services.

Financial services - Includes financial intermediary and auxiliary services, except insurance services. These services include those normally provided by banks and other financial institutions. Services primarily include those for which an explicit commission or a fee is charged; implicit fees for bond transactions, measured as the difference between bid and ask prices, are also included. Services include securities brokerage and underwriting, financial management, financial advisory, and custody services; credit and other credit-related services; and securities lending, electronic funds transfer, and other services.

Charges for the use of intellectual property n.i.e. - Includes charges for the use of proprietary rights, such as patents, trademarks, and copyrights, and charges for licenses to use, reproduce, distribute, and sell or purchase intellectual property**.**

Telecommunications, computer, and information services - Telecommunications services include the broadcast or transmission of sound, images, data, or other information by electronic means. These services do not include the value of the information transmitted. Computer services consist of hardware- and software-related services and data processing services. Sales of customized software and related use licenses, as well as licenses to use non-customized software with a periodic license fee, are also included, as is software downloaded or otherwise electronically delivered. Cross-border transactions in non-customized packaged software with a license for perpetual use are included in goods. Information services include news agency services, database services, and web search portals.

Other business services - Consists of research and development services, professional and management consulting services, and technical, trade-related, and other business services. Research and development services include services associated with basic and applied research and experimental development of new products and processes. Professional and management consulting services include legal services, accounting, management consulting, managerial services, public relations services, advertising, and market research. Amounts received by a parent company from its affiliates for general overhead expenses related to these services are included. Technical, trade-related, and other business services include architectural and engineering, construction, audio-visual, waste treatment, operational leasing, trade-related, and other business services.

Government goods and services n.i.e. - Includes goods and services supplied by and to enclaves, such as embassies, military bases, and international organizations; goods and services acquired from the host economy by diplomats, consular staff, and military personnel located abroad and their dependents; and services supplied by and to governments that are not included in other services categories. Services supplied by and to governments are classified to specific services categories when source data permit.

GOODS (BOP BASIS) AND SERVICES BY COUNTRY AND AREA

Monthly country and area detail is not available for goods on a BOP basis or for services. However, quarterly statistics on goods on a BOP basis and on services that are seasonally adjusted by geography are shown in Exhibit 20. Unlike the seasonal adjustments by commodity and by service type that are applied to the global totals, these adjustments are developed and applied directly at the country and world area levels. For total exports and imports, data users should refer to the by-commodity and by-service type totals shown in the other exhibits. The seasonally adjusted country and world area data will not sum to the seasonally adjusted by-commodity and by-service type totals because the two sets of statistics are derived from different aggregations of the export and import data and from different seasonal adjustment models. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.

The definitions of the world areas shown in Exhibit 20 are consistent with the definitions for goods on a Census basis (see *AREA GROUPINGS* above) with a few exceptions. For services, CAFTA-DR is not available because trade with this area's member countries cannot be separately identified. For goods on a BOP basis and for services, European Union and OPEC reflect the composition of the areas as they were at the time of reporting.

REVISION PROCEDURE (GOODS ON A BOP BASIS AND SERVICES)

Monthly Revisions: Each month, a preliminary estimate for the current month and a revised estimate for the immediately preceding month are released. After the initial revision, no further revisions are made to a month until more complete source data become available in March, June, September, and December.

Quarterly Revisions: The releases in March, June, September, and December contain revised estimates for the previous six months to incorporate more comprehensive and updated source data.

Annual Revisions: Each June, historical data are revised to incorporate newly available and revised source data, changes in definitions and classifications, and changes in estimation methods. Seasonally adjusted data are also revised to reflect recalculated seasonal and trading-day adjustments.

Other Revisions: The release in February contains revisions to goods for January through November of the most recent year and the release in March contains revisions to both goods and services for all months of the most recent year. These revisions result from forcing the seasonally adjusted months to equal the annual totals.

(1) Due to non-disclosure requirements, certain 10-digit Schedule B commodity classifications are subject to suppression and require a change in aggregation. For additional information see www.census.gov/ft900.

Exhibit 2. Origin of Movement of U. S. Exports of Goods by State by NAICS-Based Product Code Groupings, Not Seasonally Adjusted: 2015

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable.
(-) Represents zero or less than one-half unit of measurement shown.

(1) Includes agricultural, forestry, fishery products, mineral commodities, scrap, waste and used or second-hand merchandise. The state of origin of movement value totals for non-manufactured commodities usually reflect the state where the U.S. port of export is located.
(2) Includes prior month's revision to exports to Canada.

Exhibit 2a. U. S. General Imports of Goods by State, State of Destination, by NAICS-Based Product Code Groupings, Not Seasonally Adjusted: 2015

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable. (-) Represents zero or less than one-half unit of measurement shown.
